(2) **ENHANCING ADMINISTRATION AND MANAGEMENT.**—The head of each Federal agency that has administrative jurisdiction over a Federal asset shall support the purposes of this subtitle and may take appropriate actions to enhance internal agency administration and management to better support, integrate, finance, and utilize observation data, products, and services developed under this section to further its own agency mission and responsibilities.

(3) **AVAILABILITY OF DATA.**—The head of each Federal agency that has administrative jurisdiction over a Federal asset shall make available data that are produced by that asset and that are not otherwise restricted for integration, management, and dissemination by the System.

(4) **NON-FEDERAL ASSETS.**—Non-Federal assets shall be coordinated, as appropriate, by the Interagency Ocean Observing Committee or by regional information coordination entities.

(c) **POLICY OVERSIGHT, ADMINISTRATION, AND REGIONAL COORDINATION.**—

(1) **COUNCIL FUNCTIONS.**—The Council shall serve as the policy and coordination oversight body for all aspects of the System. In carrying out its responsibilities under this subtitle, the Council shall—

(A) approve and adopt comprehensive System budgets developed and maintained by the Interagency Ocean Observation Committee to support System operations, including operations of both Federal and non-Federal assets;

(B) ensure coordination of the System with other domestic and international earth observing activities including the Global Ocean Observing System and the Global Earth Observing System of Systems, and provide, as appropriate, support for and representation on United States delegations to international meetings on coastal and ocean observing programs; and

(C) encourage coordinated intramural and extramural research and technology develop-

ment, and a process to transition developing technology and methods into operations of the System.

(2) **INTERAGENCY OCEAN OBSERVATION COMMITTEE.**—The Council shall establish or designate an Interagency Ocean Observation Committee which shall—

(A) prepare annual and long-term plans for consideration and approval by the Council for the integrated design, operation, maintenance, enhancement and expansion of the System to meet the objectives of this subtitle and the System Plan;

(B) develop and transmit to Congress at the time of submission of the President’s annual budget request an annual coordinated, comprehensive budget to operate all elements of the System identified in subsection (b), and to ensure continuity of data streams from Federal and non-Federal assets;

(C) establish required observation data variables to be gathered by both Federal and non-Federal assets and identify, in consultation with regional information coordination entities, priorities for System observations;

(D) establish protocols and standards for System data processing, management, and communication;

(E) develop contract certification standards and compliance procedures for all non-Federal assets, including regional information coordination entities, to establish eligibility for integration into the System and to ensure compliance with all applicable standards and protocols established by the Council, and ensure that regional observations are integrated into the System on a sustained basis;

(F) identify gaps in observation coverage or needs for capital improvements of both Federal assets and non-Federal assets;

(G) subject to the availability of appropriations, establish through one or more participating Federal agencies, in consultation with the System advisory committee established under subsection (d), a competitive matching grant or other programs—

(i) to promote intramural and extramural research and development of new, innovative, and emerging observation technologies including testing and field trials; and

(ii) to facilitate the migration of new, innovative, and emerging scientific and technological advances from research and development to operational deployment;

(H) periodically review and recommend to the Council, in consultation with the Administrator, revisions to the System Plan;

(I) ensure collaboration among Federal agencies participating in the activities of the Committee; and

(J) perform such additional duties as the Council may delegate.

(3) **LEAD FEDERAL AGENCY.**—The National Oceanic and Atmospheric Administration shall function as the lead Federal agency for the implementation and administration of the System, in consultation with the Council, the Interagency Ocean Observation Committee, other Federal agencies that maintain portions of the System, and the regional information coordination entities, and shall—

(A) establish an Integrated Ocean Observing Program Office within the National Oceanic and Atmospheric Administration utilizing to the extent necessary, personnel from member agencies participating on the Interagency Ocean Observation Committee, to oversee daily operations and coordination of the System;

(B) implement policies, protocols, and standards approved by the Council and delegated by the Interagency Ocean Observing Committee;

(C) promulgate program guidelines to certify and integrate non-Federal assets, including regional information coordination entities, into the System to provide regional coastal and ocean observation data that meet the needs of user groups from the respective regions;

(D) have the authority to enter into and oversee contracts, leases, grants or cooperative agreements with non-Federal assets, including regional information coordination entities, to support the purposes of this subtitle on such terms as the Administrator deems appropriate;

(E) implement a merit-based, competitive funding process to support non-Federal assets, including the development and maintenance of a network of regional information coordination entities, and develop and implement a process for the periodic review and evaluation of all non-Federal assets, including regional information coordination entities;

(F) provide opportunities for competitive contracts and grants for demonstration projects to design, develop, integrate, deploy, and support components of the System;

(G) establish efficient and effective administrative procedures for allocation of funds among contractors, grantees, and non-Federal assets, including regional information coordination entities in a timely manner, and contingent on appropriations according to the budget adopted by the Council;

(H) develop and implement a process for the periodic review and evaluation of regional information coordination entities;

(I) formulate an annual process by which gaps in observation coverage or needs for capital improvements of Federal assets and non-Federal assets of the System are identified by the regional information coordination entities, the Administrator, or other members of the System and transmitted to the Interagency Ocean Observing Committee;

(J) develop and be responsible for a data management and communication system, in accordance with standards and protocols established by the Council, by which all data collected by the System regarding ocean and coastal waters of the United States including the Great Lakes, are processed, stored, integrated, and made available to all end-user communities;

(K) implement a program of public education and outreach to improve public awareness of global climate change and effects on the ocean, coastal, and Great Lakes environment;

(L) report annually to the Interagency Ocean Observing Committee on the accomplishments, operational needs, and performance of the System to contribute to the annual and long-term plans developed pursuant to subsection (c)(2)(A)(i); and

(M) develop a plan to efficiently integrate into the System new, innovative, or emerging technologies that have been demonstrated to be useful to the System and which will fulfill the purposes of this subtitle and the System Plan.

(4) REGIONAL INFORMATION COORDINATION ENTITIES.—

(A) IN GENERAL.—To be certified or established under this subtitle, a regional information coordination entity shall be certified or established by contract or agreement by the Administrator, and shall agree to meet the certification standards and compliance procedure guidelines issued by the Administrator and information needs of user groups in the region while adhering to national standards and shall—

(i) demonstrate an organizational structure capable of gathering required System observation data, supporting and integrating all aspects of coastal and ocean observing and information programs within a region and that reflects the needs of State and local governments, commercial interests, and other users and beneficiaries of the System and other requirements specified under this subtitle and the System Plan;

(ii) identify gaps in observation coverage needs for capital improvements of Federal assets and non-Federal assets of the System, or other recommendations to assist in the development of the annual and long-term plans created pursuant to subsection (c)(2)(A)(i) and transmit such information to the Interagency Ocean Observing Committee via the Program Office;

(iii) develop and operate under a strategic operational plan that will ensure the efficient and effective administration of programs and assets to support daily data observations for integration into the System, pursuant to the standards approved by the Council;

(iv) work cooperatively with governmental and non-governmental entities at all levels to identify and provide information products of the System for multiple users within the service area of the regional information coordination entities; and

(v) comply with all financial oversight requirements established by the Administrator, including requirements relating to audits.

(B) PARTICIPATION.—For the purposes of this subtitle, employees of Federal agencies may participate in the functions of the regional information coordination entities.

(d) SYSTEM ADVISORY COMMITTEE.—

(1) IN GENERAL.—The Administrator shall establish or designate a System advisory committee, which shall provide advice as may be requested by the Administrator or the Interagency Ocean Observing Committee.

(2) PURPOSE.—The purpose of the System advisory committee is to advise the Administrator and the Interagency Ocean Observing Committee on—

(A) administration, operation, management, and maintenance of the System, including integration of Federal and non-Federal assets and data management and communication aspects of the System, and fulfillment of the purposes set forth in section 12302;

(B) expansion and periodic modernization and upgrade of technology components of the System;

(C) identification of end-user communities, their needs for information provided by the System, and the System's effectiveness in disseminating information to end-user communities and the general public; and

(D) any other purpose identified by the Administrator or the Interagency Ocean Observing Committee.

(3) MEMBERS.—

(A) IN GENERAL.—The System advisory committee shall be composed of members appointed by the Administrator. Members shall be qualified by education, training, and experience to evaluate scientific and technical information related to the design, operation, maintenance, or use of the System, or use of data products provided through the System.

(B) TERMS OF SERVICE.—Members shall be appointed for 3-year terms, renewable once. A vacancy appointment shall be for the remainder of the unexpired term of the vacancy, and an individual so appointed may subsequently be appointed for 2 full 3-year

terms if the remainder of the unexpired term is less than 1 year.

(C) CHAIRPERSON.—The Administrator shall designate a chairperson from among the members of the System advisory committee.

(D) APPOINTMENT.—Members of the System advisory committee shall be appointed as special Government employees for purposes of section 202(a) of title 18, United States Code.

(4) ADMINISTRATIVE PROVISIONS.—

(A) REPORTING.—The System advisory committee shall report to the Administrator and the Interagency Ocean Observing Committee, as appropriate.

(B) ADMINISTRATIVE SUPPORT.—The Administrator shall provide administrative support to the System advisory committee.

(C) MEETINGS.—The System advisory committee shall meet at least once each year, and at other times at the call of the Administrator, the Interagency Ocean Observing Committee, or the chairperson.

(D) COMPENSATION AND EXPENSES.—Members of the System advisory committee shall not be compensated for service on that Committee, but may be allowed travel expenses, including per diem in lieu of subsistence, in accordance with subchapter I of chapter 57 of title 5, United States Code.

(E) EXPIRATION.—Section 14 of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the System advisory committee.

(e) CIVIL LIABILITY.—For purposes of determining liability arising from the dissemination and use of observation data gathered pursuant to this section, any non-Federal asset or regional information coordination entity incorporated into the System by contract, lease, grant, or cooperative agreement under subsection (c)(3)(D) that is participating in the System shall be considered to be part of the National Oceanic and Atmospheric Administration. Any employee of such a non-Federal asset or regional information coordination entity, while operating within the scope of his or her employment in carrying out the purposes of this subtitle, with respect to tort liability, is deemed to be an employee of the Federal Government.

(f) LIMITATION.—Nothing in this subtitle shall be construed to invalidate existing certifications, contracts, or agreements between regional information coordination entities and other elements of the System.

SEC. 12305. INTERAGENCY FINANCING AND AGREEMENTS.

(a) IN GENERAL.—To carry out interagency activities under this subtitle, the Secretary of Commerce may execute cooperative agreements, or any other agreements, with, and receive and expend funds made available by, any State or subdivision thereof, any Federal agency, or any public or private organization, or individual.

(b) RECIPROCITY.—Member Departments and agencies of the Council shall have the authority to create, support, and maintain joint centers, and to enter into and perform such contracts, leases, grants, and cooperative agreements as may be necessary to carry out the purposes of this subtitle and fulfillment of the System Plan.

SEC. 12306. APPLICATION WITH OTHER LAWS.

Nothing in this subtitle supersedes or limits the authority of any agency to carry out its responsibilities and missions under other laws.

SEC. 12307. REPORT TO CONGRESS.

(a) REQUIREMENT.—Not later than 2 years after the date of the enactment of this Act and every 2 years thereafter, the Administrator shall prepare and the President acting

through the Council shall approve and transmit to the Congress a report on progress made in implementing this subtitle.

(b) **CONTENTS.**—The report shall include—

(1) a description of activities carried out under this subtitle and the System Plan;

(2) an evaluation of the effectiveness of the System, including an evaluation of progress made by the Council to achieve the goals identified under the System Plan;

(3) identification of Federal and non-Federal assets as determined by the Council that have been integrated into the System, including assets essential to the gathering of required observation data variables necessary to meet the respective missions of Council agencies;

(4) a review of procurements, planned or initiated, by each Council agency to enhance, expand, or modernize the observation capabilities and data products provided by the System, including data management and communication subsystems;

(5) an assessment regarding activities to integrate Federal and non-Federal assets, nationally and on the regional level, and discussion of the performance and effectiveness of regional information coordination entities to coordinate regional observation operations;

(6) a description of benefits of the program to users of data products resulting from the System (including the general public, industries, scientists, resource managers, emergency responders, policy makers, and educators);

(7) recommendations concerning—

(A) modifications to the System; and

(B) funding levels for the System in subsequent fiscal years; and

(8) the results of a periodic external independent programmatic audit of the System.

SEC. 12308. PUBLIC-PRIVATE USE POLICY.

The Council shall develop a policy within 6 months after the date of the enactment of this Act that defines processes for making decisions about the roles of the Federal Government, the States, regional information coordination entities, the academic community, and the private sector in providing to end-user communities environmental information, products, technologies, and services related to the System. The Council shall publish the policy in the Federal Register for public comment for a period not less than 60 days. Nothing in this section shall be construed to require changes in policy in effect on the date of enactment of this Act.

SEC. 12309. INDEPENDENT COST ESTIMATE.

Within 1 year after the date of enactment of this Act, the Interagency Ocean Observation Committee, through the Administrator and the Director of the National Science Foundation, shall obtain an independent cost estimate for operations and maintenance of existing Federal assets of the System, and planned or anticipated acquisition, operation, and maintenance of new Federal assets for the System, including operation facilities, observation equipment, modeling and software, data management and communication, and other essential components. The independent cost estimate shall be transmitted unbridged and without revision by the Administrator to Congress.

SEC. 12310. INTENT OF CONGRESS.

It is the intent of Congress that funding provided to agencies of the Council to implement this subtitle shall supplement, and not replace, existing sources of funding for other programs. It is the further intent of Congress that agencies of the Council shall not enter into contracts or agreements for the development or procurement of new Federal assets

for the System that are estimated to be in excess of \$250,000,000 in life-cycle costs without first providing adequate notice to Congress and opportunity for review and comment.

SEC. 12311. AUTHORIZATION OF APPROPRIATIONS.

There are authorized to be appropriated to the Secretary of Commerce for fiscal years 2009 through 2013 such sums as are necessary to fulfill the purposes of this subtitle and support activities identified in the annual coordinated System budget developed by the Interagency Ocean Observation Committee and submitted to the Congress.

Subtitle D—Federal Ocean Acidification Research and Monitoring Act of 2009

SEC. 12401. SHORT TITLE.

This subtitle may be cited as the “Federal Ocean Acidification Research And Monitoring Act of 2009” or the “FOARAM Act”.

SEC. 12402. PURPOSES.

(a) **PURPOSES.**—The purposes of this subtitle are to provide for—

(1) development and coordination of a comprehensive interagency plan to—

(A) monitor and conduct research on the processes and consequences of ocean acidification on marine organisms and ecosystems; and

(B) establish an interagency research and monitoring program on ocean acidification;

(2) establishment of an ocean acidification program within the National Oceanic and Atmospheric Administration;

(3) assessment and consideration of regional and national ecosystem and socioeconomic impacts of increased ocean acidification; and

(4) research adaptation strategies and techniques for effectively conserving marine ecosystems as they cope with increased ocean acidification.

SEC. 12403. DEFINITIONS.

In this subtitle:

(1) **OCEAN ACIDIFICATION.**—The term “ocean acidification” means the decrease in pH of the Earth’s oceans and changes in ocean chemistry caused by chemical inputs from the atmosphere, including carbon dioxide.

(2) **SECRETARY.**—The term “Secretary” means the Secretary of Commerce, acting through the Administrator of the National Oceanic and Atmospheric Administration.

(3) **SUBCOMMITTEE.**—The term “Subcommittee” means the Joint Subcommittee on Ocean Science and Technology of the National Science and Technology Council.

SEC. 12404. INTERAGENCY SUBCOMMITTEE.

(a) **DESIGNATION.**—

(1) **IN GENERAL.**—The Joint Subcommittee on Ocean Science and Technology of the National Science and Technology Council shall coordinate Federal activities on ocean acidification and establish an interagency working group.

(2) **MEMBERSHIP.**—The interagency working group on ocean acidification shall be comprised of senior representatives from the National Oceanic and Atmospheric Administration, the National Science Foundation, the National Aeronautics and Space Administration, the United States Geological Survey, the United States Fish and Wildlife Service, and such other Federal agencies as appropriate.

(3) **CHAIRMAN.**—The interagency working group shall be chaired by the representative from the National Oceanic and Atmospheric Administration.

(b) **DUTIES.**—The Subcommittee shall—

(1) develop the strategic research and monitoring plan to guide Federal research on

ocean acidification required under section 12405 of this subtitle and oversee the implementation of the plan;

(2) oversee the development of—

(A) an assessment of the potential impacts of ocean acidification on marine organisms and marine ecosystems; and

(B) adaptation and mitigation strategies to conserve marine organisms and ecosystems exposed to ocean acidification;

(3) facilitate communication and outreach opportunities with nongovernmental organizations and members of the stakeholder community with interests in marine resources;

(4) coordinate the United States Federal research and monitoring program with research and monitoring programs and scientists from other nations; and

(5) establish or designate an Ocean Acidification Information Exchange to make information on ocean acidification developed through or utilized by the interagency ocean acidification program accessible through electronic means, including information which would be useful to policymakers, researchers, and other stakeholders in mitigating or adapting to the impacts of ocean acidification.

(c) **REPORTS TO CONGRESS.**—

(1) **INITIAL REPORT.**—Not later than 1 year after the date of enactment of this Act, the Subcommittee shall transmit a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology and the Committee on Natural Resources of the House of Representatives that—

(A) includes a summary of federally funded ocean acidification research and monitoring activities, including the budget for each of these activities; and

(B) describes the progress in developing the plan required under section 12405 of this subtitle.

(2) **BIENNIAL REPORT.**—Not later than 2 years after the delivery of the initial report under paragraph (1) and every 2 years thereafter, the Subcommittee shall transmit a report to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology and the Committee on Natural Resources of the House of Representatives that includes—

(A) a summary of federally funded ocean acidification research and monitoring activities, including the budget for each of these activities; and

(B) an analysis of the progress made toward achieving the goals and priorities for the interagency research plan developed by the Subcommittee under section 12405.

(3) **STRATEGIC RESEARCH PLAN.**—Not later than 2 years after the date of enactment of this Act, the Subcommittee shall transmit the strategic research plan developed under section 12405 to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology and the Committee on Natural Resources of the House of Representatives. A revised plan shall be submitted at least once every 5 years thereafter.

SEC. 12405. STRATEGIC RESEARCH PLAN.

(a) **IN GENERAL.**—Not later than 2 years after the date of enactment of this Act, the Subcommittee shall develop a strategic plan for Federal research and monitoring on ocean acidification that will provide for an assessment of the impacts of ocean acidification on marine organisms and marine ecosystems and the development of adaptation and mitigation strategies to conserve marine

organisms and marine ecosystems. In developing the plan, the Subcommittee shall consider and use information, reports, and studies of ocean acidification that have identified research and monitoring needed to better understand ocean acidification and its potential impacts, and recommendations made by the National Academy of Sciences in the review of the plan required under subsection (d).

(b) **CONTENTS OF THE PLAN.**—The plan shall—

(1) provide for interdisciplinary research among the ocean sciences, and coordinated research and activities to improve the understanding of ocean chemistry that will affect marine ecosystems;

(2) establish, for the 10-year period beginning in the year the plan is submitted, the goals and priorities for Federal research and monitoring which will—

(A) advance understanding of ocean acidification and its physical, chemical, and biological impacts on marine organisms and marine ecosystems;

(B) improve the ability to assess the socioeconomic impacts of ocean acidification; and

(C) provide information for the development of adaptation and mitigation strategies to conserve marine organisms and marine ecosystems;

(3) describe specific activities, including—

- (A) efforts to determine user needs;
- (B) research activities;
- (C) monitoring activities;
- (D) technology and methods development;
- (E) data collection;
- (F) database development;
- (G) modeling activities;
- (H) assessment of ocean acidification impacts; and

(I) participation in international research efforts;

(4) identify relevant programs and activities of the Federal agencies that contribute to the interagency program directly and indirectly and set forth the role of each Federal agency in implementing the plan;

(5) consider and utilize, as appropriate, reports and studies conducted by Federal agencies, the National Research Council, or other entities;

(6) make recommendations for the coordination of the ocean acidification research and monitoring activities of the United States with such activities of other nations and international organizations;

(7) outline budget requirements for Federal ocean acidification research and monitoring and assessment activities to be conducted by each agency under the plan;

(8) identify the monitoring systems and sampling programs currently employed in collecting data relevant to ocean acidification and prioritize additional monitoring systems that may be needed to ensure adequate data collection and monitoring of ocean acidification and its impacts; and

(9) describe specific activities designed to facilitate outreach and data and information exchange with stakeholder communities.

(c) **PROGRAM ELEMENTS.**—The plan shall include at a minimum the following program elements:

(1) Monitoring of ocean chemistry and biological impacts associated with ocean acidification at selected coastal and open-ocean monitoring stations, including satellite-based monitoring to characterize—

- (A) marine ecosystems;
- (B) changes in marine productivity; and
- (C) changes in surface ocean chemistry.

(2) Research to understand the species specific physiological responses of marine orga-

nisms to ocean acidification, impacts on marine food webs of ocean acidification, and to develop environmental and ecological indices that track marine ecosystem responses to ocean acidification.

(3) Modeling to predict changes in the ocean carbon cycle as a function of carbon dioxide and atmosphere-induced changes in temperature, ocean circulation, biogeochemistry, ecosystem and terrestrial input, and modeling to determine impacts on marine ecosystems and individual marine organisms.

(4) Technology development and standardization of carbonate chemistry measurements on moorings and autonomous floats.

(5) Assessment of socioeconomic impacts of ocean acidification and development of adaptation and mitigation strategies to conserve marine organisms and marine ecosystems.

(d) **NATIONAL ACADEMY OF SCIENCES EVALUATION.**—The Secretary shall enter into an agreement with the National Academy of Sciences to review the plan.

(e) **PUBLIC PARTICIPATION.**—In developing the plan, the Subcommittee shall consult with representatives of academic, State, industry and environmental groups. Not later than 90 days before the plan, or any revision thereof, is submitted to the Congress, the plan shall be published in the Federal Register for a public comment period of not less than 60 days.

SEC. 12406. NOAA OCEAN ACIDIFICATION ACTIVITIES.

(a) **IN GENERAL.**—The Secretary shall establish and maintain an ocean acidification program within the National Oceanic and Atmospheric Administration to conduct research, monitoring, and other activities consistent with the strategic research and implementation plan developed by the Subcommittee under section 12405 that—

(1) includes—

(A) interdisciplinary research among the ocean and atmospheric sciences, and coordinated research and activities to improve understanding of ocean acidification;

(B) the establishment of a long-term monitoring program of ocean acidification utilizing existing global and national ocean observing assets, and adding instrumentation and sampling stations as appropriate to the aims of the research program;

(C) research to identify and develop adaptation strategies and techniques for effectively conserving marine ecosystems as they cope with increased ocean acidification;

(D) as an integral part of the research programs described in this subtitle, educational opportunities that encourage an interdisciplinary and international approach to exploring the impacts of ocean acidification;

(E) as an integral part of the research programs described in this subtitle, national public outreach activities to improve the understanding of current scientific knowledge of ocean acidification and its impacts on marine resources; and

(F) coordination of ocean acidification monitoring and impacts research with other appropriate international ocean science bodies such as the International Oceanographic Commission, the International Council for the Exploration of the Sea, the North Pacific Marine Science Organization, and others;

(2) provides grants for critical research projects that explore the effects of ocean acidification on ecosystems and the socioeconomic impacts of increased ocean acidification that are relevant to the goals and priorities of the strategic research plan; and

(3) incorporates a competitive merit-based process for awarding grants that may be con-

ducted jointly with other participating agencies or under the National Oceanographic Partnership Program under section 7901 of title 10, United States Code.

(b) **ADDITIONAL AUTHORITY.**—In conducting the Program, the Secretary may enter into and perform such contracts, leases, grants, or cooperative agreements as may be necessary to carry out the purposes of this subtitle on such terms as the Secretary considers appropriate.

SEC. 12407. NSF OCEAN ACIDIFICATION ACTIVITIES.

(a) **RESEARCH ACTIVITIES.**—The Director of the National Science Foundation shall continue to carry out research activities on ocean acidification which shall support competitive, merit-based, peer-reviewed proposals for research and monitoring of ocean acidification and its impacts, including—

(1) impacts on marine organisms and marine ecosystems;

(2) impacts on ocean, coastal, and estuarine biogeochemistry; and

(3) the development of methodologies and technologies to evaluate ocean acidification and its impacts.

(b) **CONSISTENCY.**—The research activities shall be consistent with the strategic research plan developed by the Subcommittee under section 12405.

(c) **COORDINATION.**—The Director shall encourage coordination of the Foundation's ocean acidification activities with such activities of other nations and international organizations.

SEC. 12408. NASA OCEAN ACIDIFICATION ACTIVITIES.

(a) **OCEAN ACIDIFICATION ACTIVITIES.**—The Administrator of the National Aeronautics and Space Administration, in coordination with other relevant agencies, shall ensure that space-based monitoring assets are used in as productive a manner as possible for monitoring of ocean acidification and its impacts.

(b) **PROGRAM CONSISTENCY.**—The Administrator shall ensure that the Agency's research and monitoring activities on ocean acidification are carried out in a manner consistent with the strategic research plan developed by the Subcommittee under section 12405.

(c) **COORDINATION.**—The Administrator shall encourage coordination of the Agency's ocean acidification activities with such activities of other nations and international organizations.

SEC. 12409. AUTHORIZATION OF APPROPRIATIONS.

(a) **NOAA.**—There are authorized to be appropriated to the National Oceanic and Atmospheric Administration to carry out the purposes of this subtitle—

- (1) \$8,000,000 for fiscal year 2009;
- (2) \$12,000,000 for fiscal year 2010;
- (3) \$15,000,000 for fiscal year 2011; and
- (4) \$20,000,000 for fiscal year 2012.

(b) **NSF.**—There are authorized to be appropriated to the National Science Foundation to carry out the purposes of this subtitle—

- (1) \$6,000,000 for fiscal year 2009;
- (2) \$8,000,000 for fiscal year 2010;
- (3) \$12,000,000 for fiscal year 2011; and
- (4) \$15,000,000 for fiscal year 2012.

Subtitle E—Coastal and Estuarine Land Conservation Program

SEC. 12501. SHORT TITLE.

This Act may be cited as the “Coastal and Estuarine Land Conservation Program Act”.

SEC. 12502. AUTHORIZATION OF COASTAL AND ESTUARINE LAND CONSERVATION PROGRAM.

The Coastal Zone Management Act of 1972 (16 U.S.C. 1451 et seq.) is amended by inserting after section 307 the following new section:

“AUTHORIZATION OF THE COASTAL AND ESTUARINE LAND CONSERVATION PROGRAM

“SEC. 307A. (a) IN GENERAL.—The Secretary may conduct a Coastal and Estuarine Land Conservation Program, in cooperation with appropriate State, regional, and other units of government, for the purposes of protecting important coastal and estuarine areas that have significant conservation, recreation, ecological, historical, or aesthetic values, or that are threatened by conversion from their natural, undeveloped, or recreational state to other uses or could be managed or restored to effectively conserve, enhance, or restore ecological function. The program shall be administered by the National Ocean Service of the National Oceanic and Atmospheric Administration through the Office of Ocean and Coastal Resource Management.

“(b) PROPERTY ACQUISITION GRANTS.—The Secretary shall make grants under the program to coastal states with approved coastal zone management plans or National Estuarine Research Reserve units for the purpose of acquiring property or interests in property described in subsection (a) that will further the goals of—

“(1) a Coastal Zone Management Plan or Program approved under this title;

“(2) a National Estuarine Research Reserve management plan;

“(3) a regional or State watershed protection or management plan involving coastal states with approved coastal zone management programs; or

“(4) a State coastal land acquisition plan that is consistent with an approved coastal zone management program.

“(c) GRANT PROCESS.—The Secretary shall allocate funds to coastal states or National Estuarine Research Reserves under this section through a competitive grant process in accordance with guidelines that meet the following requirements:

“(1) The Secretary shall consult with the coastal state's coastal zone management program, any National Estuarine Research Reserve in that State, and the lead agency designated by the Governor for coordinating the implementation of this section (if different from the coastal zone management program).

“(2) Each participating coastal state, after consultation with local governmental entities and other interested stakeholders, shall identify priority conservation needs within the State, the values to be protected by inclusion of lands in the program, and the threats to those values that should be avoided.

“(3) Each participating coastal state shall to the extent practicable ensure that the acquisition of property or easements shall complement working waterfront needs.

“(4) The applicant shall identify the values to be protected by inclusion of the lands in the program, management activities that are planned and the manner in which they may affect the values identified, and any other information from the landowner relevant to administration and management of the land.

“(5) Awards shall be based on demonstrated need for protection and ability to successfully leverage funds among participating entities, including Federal programs, regional organizations, State and other gov-

ernmental units, landowners, corporations, or private organizations.

“(6) The governor, or the lead agency designated by the governor for coordinating the implementation of this section, where appropriate in consultation with the appropriate local government, shall determine that the application is consistent with the State's or territory's approved coastal zone plan, program, and policies prior to submittal to the Secretary.

“(7)(A) Priority shall be given to lands described in subsection (a) that can be effectively managed and protected and that have significant ecological value.

“(B) Of the projects that meet the standard in subparagraph (A), priority shall be given to lands that—

“(i) are under an imminent threat of conversion to a use that will degrade or otherwise diminish their natural, undeveloped, or recreational state; and

“(ii) serve to mitigate the adverse impacts caused by coastal population growth in the coastal environment.

“(8) In developing guidelines under this section, the Secretary shall consult with coastal states, other Federal agencies, and other interested stakeholders with expertise in land acquisition and conservation procedures.

“(9) Eligible coastal states or National Estuarine Research Reserves may allocate grants to local governments or agencies eligible for assistance under section 306A(e).

“(10) The Secretary shall develop performance measures that the Secretary shall use to evaluate and report on the program's effectiveness in accomplishing its purposes, and shall submit such evaluations to Congress triennially.

“(d) LIMITATIONS AND PRIVATE PROPERTY PROTECTIONS.—

“(1) A grant awarded under this section may be used to purchase land or an interest in land, including an easement, only from a willing seller. Any such purchase shall not be the result of a forced taking under this section. Nothing in this section requires a private property owner to participate in the program under this section.

“(2) Any interest in land, including any easement, acquired with a grant under this section shall not be considered to create any new liability, or have any effect on liability under any other law, of any private property owner with respect to any person injured on the private property.

“(3) Nothing in this section requires a private property owner to provide access (including Federal, State, or local government access) to or use of private property unless such property or an interest in such property (including a conservation easement) has been purchased with funds made available under this section.

“(e) RECOGNITION OF AUTHORITY TO CONTROL LAND USE.—Nothing in this title modifies the authority of Federal, State, or local governments to regulate land use.

“(f) MATCHING REQUIREMENTS.—

“(1) IN GENERAL.—The Secretary may not make a grant under the program unless the Federal funds are matched by non-Federal funds in accordance with this subsection.

“(2) COST SHARE REQUIREMENT.—

“(A) IN GENERAL.—Grant funds under the program shall require a 100 percent match from other non-Federal sources.

“(B) WAIVER OF REQUIREMENT.—The Secretary may grant a waiver of subparagraph (A) for underserved communities, communities that have an inability to draw on other sources of funding because of the small

population or low income of the community, or for other reasons the Secretary deems appropriate and consistent with the purposes of the program.

“(3) OTHER FEDERAL FUNDS.—Where financial assistance awarded under this section represents only a portion of the total cost of a project, funding from other Federal sources may be applied to the cost of the project. Each portion shall be subject to match requirements under the applicable provision of law.

“(4) SOURCE OF MATCHING COST SHARE.—For purposes of paragraph (2)(A), the non-Federal cost share for a project may be determined by taking into account the following:

“(A) The value of land or a conservation easement may be used by a project applicant as non-Federal match, if the Secretary determines that—

“(i) the land meets the criteria set forth in section 2(b) and is acquired in the period beginning 3 years before the date of the submission of the grant application and ending 3 years after the date of the award of the grant;

“(ii) the value of the land or easement is held by a non-governmental organization included in the grant application in perpetuity for conservation purposes of the program; and

“(iii) the land or easement is connected either physically or through a conservation planning process to the land or easement that would be acquired.

“(B) The appraised value of the land or conservation easement at the time of the grant closing will be considered and applied as the non-Federal cost share.

“(C) Costs associated with land acquisition, land management planning, remediation, restoration, and enhancement may be used as non-Federal match if the activities are identified in the plan and expenses are incurred within the period of the grant award, or, for lands described in (A), within the same time limits described therein. These costs may include either cash or in-kind contributions.

“(g) RESERVATION OF FUNDS FOR NATIONAL ESTUARINE RESEARCH RESERVE SITES.—No less than 15 percent of funds made available under this section shall be available for acquisitions benefitting National Estuarine Research Reserves.

“(h) LIMIT ON ADMINISTRATIVE COSTS.—No more than 5 percent of the funds made available to the Secretary under this section shall be used by the Secretary for planning or administration of the program. The Secretary shall provide a report to Congress with an account of all expenditures under this section for fiscal year 2009 and triennially thereafter.

“(i) TITLE AND MANAGEMENT OF ACQUIRED PROPERTY.—If any property is acquired in whole or in part with funds made available through a grant under this section, the grant recipient shall provide—

“(1) such assurances as the Secretary may require that—

“(A) the title to the property will be held by the grant recipient or another appropriate public agency designated by the recipient in perpetuity;

“(B) the property will be managed in a manner that is consistent with the purposes for which the land entered into the program and shall not convert such property to other uses; and

“(C) if the property or interest in land is sold, exchanged, or divested, funds equal to the current value will be returned to the

Secretary in accordance with applicable Federal law for redistribution in the grant process; and

“(2) certification that the property (including any interest in land) will be acquired from a willing seller.

“(j) REQUIREMENT FOR PROPERTY USED FOR NON-FEDERAL MATCH.—If the grant recipient elects to use any land or interest in land held by a non-governmental organization as a non-Federal match under subsection (g), the grant recipient must to the Secretary's satisfaction demonstrate in the grant application that such land or interest will satisfy the same requirements as the lands or interests in lands acquired under the program.

“(k) DEFINITIONS.—In this section:

“(1) CONSERVATION EASEMENT.—The term ‘conservation easement’ includes an easement or restriction, recorded deed, or a reserve interest deed where the grantee acquires all rights, title, and interest in a property, that do not conflict with the goals of this section except those rights, title, and interests that may run with the land that are expressly reserved by a grantor and are agreed to at the time of purchase.

“(2) INTEREST IN PROPERTY.—The term ‘interest in property’ includes a conservation easement.

“(l) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Secretary to carry out this section \$60,000,000 for each of fiscal years 2009 through 2013.”.

TITLE XIII—MISCELLANEOUS

SEC. 13001. MANAGEMENT AND DISTRIBUTION OF NORTH DAKOTA TRUST FUNDS.

(a) NORTH DAKOTA TRUST FUNDS.—The Act of February 22, 1889 (25 Stat. 676, chapter 180), is amended by adding at the end the following:

“SEC. 26. NORTH DAKOTA TRUST FUNDS.

“(a) DISPOSITION.—Notwithstanding section 11, the State of North Dakota shall, with respect to any trust fund in which proceeds from the sale of public land are deposited under this Act (referred to in this section as the ‘trust fund’)—

“(1) deposit all revenues earned by a trust fund into the trust fund;

“(2) deduct the costs of administering a trust fund from each trust fund; and

“(3) manage each trust fund to—

“(A) preserve the purchasing power of the trust fund; and

“(B) maintain stable distributions to trust fund beneficiaries.

“(b) DISTRIBUTIONS.—Notwithstanding section 11, any distributions from trust funds in the State of North Dakota shall be made in accordance with section 2 of article IX of the Constitution of the State of North Dakota.

“(c) MANAGEMENT OF PROCEEDS.—Notwithstanding section 13, the State of North Dakota shall manage the proceeds referred to in that section in accordance with subsections (a) and (b).

“(d) MANAGEMENT OF LAND AND PROCEEDS.—Notwithstanding sections 14 and 16, the State of North Dakota shall manage the land granted under that section, including any proceeds from the land, and make distributions in accordance with subsections (a) and (b).”.

(b) MANAGEMENT AND DISTRIBUTION OF MORRILL ACT GRANTS.—The Act of July 2, 1862 (commonly known as the “First Morrill Act”) (7 U.S.C. 301 et seq.), is amended by adding at the end the following:

“SEC. 9. LAND GRANTS IN THE STATE OF NORTH DAKOTA.

“(a) EXPENSES.—Notwithstanding section 3, the State of North Dakota shall manage

the land granted to the State under the first section, including any proceeds from the land, in accordance with this section.

“(b) DISPOSITION OF PROCEEDS.—Notwithstanding section 4, the State of North Dakota shall, with respect to any trust fund in which proceeds from the sale of land under this Act are deposited (referred to in this section as the ‘trust fund’)—

“(1) deposit all revenues earned by a trust fund into the trust fund;

“(2) deduct the costs of administering a trust fund from each trust fund; and

“(3) manage each trust fund to—

“(A) preserve the purchasing power of the trust fund; and

“(B) maintain stable distributions to trust fund beneficiaries.

“(c) DISTRIBUTIONS.—Notwithstanding section 4, any distributions from trust funds in the State of North Dakota shall be made in accordance with section 2 of article IX of the Constitution of the State of North Dakota.

“(d) MANAGEMENT.—Notwithstanding section 5, the State of North Dakota shall manage the land granted under the first section, including any proceeds from the land, in accordance with this section.”.

(c) CONSENT OF CONGRESS.—Effective July 1, 2009, Congress consents to the amendments to the Constitution of North Dakota proposed by House Concurrent Resolution No. 3037 of the 59th Legislature of the State of North Dakota entitled “A concurrent resolution for the amendment of sections 1 and 2 of article IX of the Constitution of North Dakota, relating to distributions from and the management of the common schools trust fund and the trust funds of other educational or charitable institutions; and to provide a contingent effective date” and approved by the voters of the State of North Dakota on November 7, 2006.

SEC. 13002. AMENDMENTS TO THE FISHERIES RESTORATION AND IRRIGATION MITIGATION ACT OF 2000.

(a) PRIORITY PROJECTS.—Section 3(c)(3) of the Fisheries Restoration and Irrigation Mitigation Act of 2000 (16 U.S.C. 777 note; Public Law 106-502) is amended by striking “\$5,000,000” and inserting “\$2,500,000”.

(b) COST SHARING.—Section 7(c) of Fisheries Restoration and Irrigation Mitigation Act of 2000 (16 U.S.C. 777 note; Public Law 106-502) is amended—

(1) by striking “The value” and inserting the following:

“(1) IN GENERAL.—The value”; and

(2) by adding at the end the following:

“(2) BONNEVILLE POWER ADMINISTRATION.—

“(A) IN GENERAL.—The Secretary may, without further appropriation and without fiscal year limitation, accept any amounts provided to the Secretary by the Administrator of the Bonneville Power Administration.

“(B) NON-FEDERAL SHARE.—Any amounts provided by the Bonneville Power Administration directly or through a grant to another entity for a project carried under the Program shall be credited toward the non-Federal share of the costs of the project.”.

(c) REPORT.—Section 9 of the Fisheries Restoration and Irrigation Mitigation Act of 2000 (16 U.S.C. 777 note; Public Law 106-502) is amended—

(1) by inserting “any” before “amounts are made”; and

(2) by inserting after “Secretary shall” the following: “, after partnering with local governmental entities and the States in the Pacific Ocean drainage area.”.

(d) AUTHORIZATION OF APPROPRIATIONS.—Section 10 of the Fisheries Restoration and

Irrigation Mitigation Act of 2000 (16 U.S.C. 777 note; Public Law 106-502) is amended—

(1) in subsection (a), by striking “2001 through 2005” and inserting “2009 through 2015”; and

(2) in subsection (b), by striking paragraph (2) and inserting the following:

“(2) ADMINISTRATIVE EXPENSES.—

“(A) DEFINITION OF ADMINISTRATIVE EXPENSE.—In this paragraph, the term ‘administrative expense’ means, except as provided in subparagraph (B)(iii)(II), any expenditure relating to—

“(i) staffing and overhead, such as the rental of office space and the acquisition of office equipment; and

“(ii) the review, processing, and provision of applications for funding under the Program.

“(B) LIMITATION.—

“(i) IN GENERAL.—Not more than 6 percent of amounts made available to carry out this Act for each fiscal year may be used for Federal and State administrative expenses of carrying out this Act.

“(ii) FEDERAL AND STATE SHARES.—To the maximum extent practicable, of the amounts made available for administrative expenses under clause (i)—

“(I) 50 percent shall be provided to the State agencies provided assistance under the Program; and

“(II) an amount equal to the cost of 1 full-time equivalent Federal employee, as determined by the Secretary, shall be provided to the Federal agency carrying out the Program.

“(iii) STATE EXPENSES.—Amounts made available to States for administrative expenses under clause (i)—

“(I) shall be divided evenly among all States provided assistance under the Program; and

“(II) may be used by a State to provide technical assistance relating to the program, including any staffing expenditures (including staff travel expenses) associated with—

“(aa) arranging meetings to promote the Program to potential applicants;

“(bb) assisting applicants with the preparation of applications for funding under the Program; and

“(cc) visiting construction sites to provide technical assistance, if requested by the applicant.”.

SEC. 13003. AMENDMENTS TO THE ALASKA NATURAL GAS PIPELINE ACT.

Section 107(a) of the Alaska Natural Gas Pipeline Act (15 U.S.C. 720e(a)) is amended by striking paragraph (3) and inserting the following:

“(3) the validity of any determination, permit, approval, authorization, review, or other related action taken under any provision of law relating to a gas transportation project constructed and operated in accordance with section 103, including—

“(A) subchapter II of chapter 5, and chapter 7, of title 5, United States Code (commonly known as the ‘Administrative Procedure Act’);

“(B) the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.);

“(C) the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.);

“(D) the National Historic Preservation Act (16 U.S.C. 470 et seq.); and

“(E) the Alaska National Interest Lands Conservation Act (16 U.S.C. 3101 et seq.).”.

SEC. 13004. ADDITIONAL ASSISTANT SECRETARY FOR DEPARTMENT OF ENERGY.

(a) IN GENERAL.—Section 203(a) of the Department of Energy Organization Act (42

U.S.C. 7133(a)) is amended in the first sentence by striking "7 Assistant Secretaries" and inserting "8 Assistant Secretaries".

(b) CONFORMING AMENDMENT.—Section 5315 of title 5, United States Code, is amended by striking "Assistant Secretaries of Energy (7)" and inserting "Assistant Secretaries of Energy (8)".

SEC. 13005. LOVELACE RESPIRATORY RESEARCH INSTITUTE.

(a) DEFINITIONS.—In this section:

(1) INSTITUTE.—The term "Institute" means the Lovelace Respiratory Research Institute, a nonprofit organization chartered under the laws of the State of New Mexico.

(2) MAP.—The term "map" means the map entitled "Lovelace Respiratory Research Institute Land Conveyance" and dated March 18, 2008.

(3) SECRETARY CONCERNED.—The term "Secretary concerned" means—

(A) the Secretary of Energy, with respect to matters concerning the Department of Energy;

(B) the Secretary of the Interior, with respect to matters concerning the Department of the Interior; and

(C) the Secretary of the Air Force, with respect to matters concerning the Department of the Air Force.

(4) SECRETARY OF ENERGY.—The term "Secretary of Energy" means the Secretary of Energy, acting through the Administrator for the National Nuclear Security Administration.

(b) CONVEYANCE OF LAND.—

(1) IN GENERAL.—Notwithstanding section 120(h) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9620(h)) and subject to valid existing rights and this section, the Secretary of Energy, in consultation with the Secretary of the Interior and the Secretary of the Air Force, may convey to the Institute, on behalf of the United States, all right, title, and interest of the United States in and to the parcel of land described in paragraph (2) for research, scientific, or educational use.

(2) DESCRIPTION OF LAND.—The parcel of land referred to in paragraph (1)—

(A) is the approximately 135 acres of land identified as "Parcel A" on the map;

(B) includes any improvements to the land described in subparagraph (A); and

(C) excludes any portion of the utility system and infrastructure reserved by the Secretary of the Air Force under paragraph (4).

(3) OTHER FEDERAL AGENCIES.—The Secretary of the Interior and the Secretary of the Air Force shall complete any real property actions, including the revocation of any Federal withdrawals of the parcel conveyed under paragraph (1) and the parcel described in subsection (c)(1), that are necessary to allow the Secretary of Energy to—

(A) convey the parcel under paragraph (1); or

(B) transfer administrative jurisdiction under subsection (c).

(4) RESERVATION OF UTILITY INFRASTRUCTURE AND ACCESS.—The Secretary of the Air Force may retain ownership and control of—

(A) any portions of the utility system and infrastructure located on the parcel conveyed under paragraph (1); and

(B) any rights of access determined to be necessary by the Secretary of the Air Force to operate and maintain the utilities on the parcel.

(5) RESTRICTIONS ON USE.—

(A) AUTHORIZED USES.—The Institute shall allow only research, scientific, or educational uses of the parcel conveyed under paragraph (1).

(B) REVERSION.—

(i) IN GENERAL.—If, at any time, the Secretary of Energy, in consultation with the Secretary of the Air Force, determines, in accordance with clause (ii), that the parcel conveyed under paragraph (1) is not being used for a purpose described in subparagraph (A)—

(I) all right, title, and interest in and to the entire parcel, or any portion of the parcel not being used for the purposes, shall revert, at the option of the Secretary, to the United States; and

(II) the United States shall have the right of immediate entry onto the parcel.

(ii) REQUIREMENTS FOR DETERMINATION.—Any determination of the Secretary under clause (i) shall be made on the record and after an opportunity for a hearing.

(6) COSTS.—

(A) IN GENERAL.—The Secretary of Energy shall require the Institute to pay, or reimburse the Secretary concerned, for any costs incurred by the Secretary concerned in carrying out the conveyance under paragraph (1), including any survey costs related to the conveyance.

(B) REFUND.—If the Secretary concerned collects amounts under subparagraph (A) from the Institute before the Secretary concerned incurs the actual costs, and the amount collected exceeds the actual costs incurred by the Secretary concerned to carry out the conveyance, the Secretary concerned shall refund to the Institute an amount equal to difference between—

(i) the amount collected by the Secretary concerned; and

(ii) the actual costs incurred by the Secretary concerned.

(C) DEPOSIT IN FUND.—

(i) IN GENERAL.—Amounts received by the United States under this paragraph as a reimbursement or recovery of costs incurred by the Secretary concerned to carry out the conveyance under paragraph (1) shall be deposited in the fund or account that was used to cover the costs incurred by the Secretary concerned in carrying out the conveyance.

(ii) USE.—Any amounts deposited under clause (i) shall be available for the same purposes, and subject to the same conditions and limitations, as any other amounts in the fund or account.

(7) CONTAMINATED LAND.—In consideration for the conveyance of the parcel under paragraph (1), the Institute shall—

(A) take fee title to the parcel and any improvements to the parcel, as contaminated;

(B) be responsible for undertaking and completing all environmental remediation required at, in, under, from, or on the parcel for all environmental conditions relating to or arising from the release or threat of release of waste material, substances, or constituents, in the same manner and to the same extent as required by law applicable to privately owned facilities, regardless of the date of the contamination or the responsible party;

(C) indemnify the United States for—

(i) any environmental remediation or response costs the United States reasonably incurs if the Institute fails to remediate the parcel; or

(ii) contamination at, in, under, from, or on the land, for all environmental conditions relating to or arising from the release or threat of release of waste material, substances, or constituents;

(D) indemnify, defend, and hold harmless the United States from any damages, costs, expenses, liabilities, fines, penalties, claim, or demand for loss, including claims for

property damage, personal injury, or death resulting from releases, discharges, emissions, spills, storage, disposal, or any other acts or omissions by the Institute and any officers, agents, employees, contractors, sublessees, licensees, successors, assigns, or invitees of the Institute arising from activities conducted, on or after October 1, 1996, on the parcel conveyed under paragraph (1); and

(E) reimburse the United States for all legal and attorney fees, costs, and expenses incurred in association with the defense of any claims described in subparagraph (D).

(8) CONTINGENT ENVIRONMENTAL RESPONSE OBLIGATIONS.—If the Institute does not undertake or complete environmental remediation as required by paragraph (7) and the United States is required to assume the responsibilities of the remediation, the Secretary of Energy shall be responsible for conducting any necessary environmental remediation or response actions with respect to the parcel conveyed under paragraph (1).

(9) NO ADDITIONAL COMPENSATION.—Except as otherwise provided in this section, no additional consideration shall be required for conveyance of the parcel to the Institute under paragraph (1).

(10) ACCESS AND UTILITIES.—On conveyance of the parcel under paragraph (1), the Secretary of the Air Force shall, on behalf of the United States and subject to any terms and conditions as the Secretary determines to be necessary (including conditions providing for the reimbursement of costs), provide the Institute with—

(A) access for employees and invitees of the Institute across Kirtland Air Force Base to the parcel conveyed under that paragraph; and

(B) access to utility services for the land and any improvements to the land conveyed under that paragraph.

(11) ADDITIONAL TERM AND CONDITIONS.—The Secretary of Energy, in consultation with the Secretary of the Interior and Secretary of the Air Force, may require any additional terms and conditions for the conveyance under paragraph (1) that the Secretaries determine to be appropriate to protect the interests of the United States.

(c) TRANSFER OF ADMINISTRATIVE JURISDICTION.—

(1) IN GENERAL.—After the conveyance under subsection (b)(1) has been completed, the Secretary of Energy shall, on request of the Secretary of the Air Force, transfer to the Secretary of the Air Force administrative jurisdiction over the parcel of approximately 7 acres of land identified as "Parcel B" on the map, including any improvements to the parcel.

(2) REMOVAL OF IMPROVEMENTS.—In concurrence with the transfer under paragraph (1), the Secretary of Energy shall, on request of the Secretary of the Air Force, arrange and pay for removal of any improvements to the parcel transferred under that paragraph.

SEC. 13006. AUTHORIZATION OF APPROPRIATIONS FOR NATIONAL TROPICAL BOTANICAL GARDEN.

Chapter 1535 of title 36, United States Code, is amended by adding at the end the following:

"§ 153514. Authorization of appropriations

"(a) IN GENERAL.—Subject to subsection (b), there is authorized to be appropriated to the corporation for operation and maintenance expenses \$500,000 for each of fiscal years 2008 through 2017.

"(b) LIMITATION.—Any Federal funds made available under subsection (a) shall be matched on a 1-to-1 basis by non-Federal funds."

TITLE XIV—CHRISTOPHER AND DANA REEVE PARALYSIS ACT

SEC. 14001. SHORT TITLE.

This title may be cited as the “Christopher and Dana Reeve Paralysis Act”.

Subtitle A—Paralysis Research

SEC. 14101. ACTIVITIES OF THE NATIONAL INSTITUTES OF HEALTH WITH RESPECT TO RESEARCH ON PARALYSIS.

(a) **COORDINATION.**—The Director of the National Institutes of Health (referred to in this title as the “Director”), pursuant to the general authority of the Director, may develop mechanisms to coordinate the paralysis research and rehabilitation activities of the Institutes and Centers of the National Institutes of Health in order to further advance such activities and avoid duplication of activities.

(b) **CHRISTOPHER AND DANA REEVE PARALYSIS RESEARCH CONSORTIA.**—

(1) **IN GENERAL.**—The Director may make awards of grants to public or private entities to pay all or part of the cost of planning, establishing, improving, and providing basic operating support for consortia in paralysis research. The Director shall designate each consortium funded through such grants as a Christopher and Dana Reeve Paralysis Research Consortium.

(2) **RESEARCH.**—Each consortium under paragraph (1)—

(A) may conduct basic, translational, and clinical paralysis research;

(B) may focus on advancing treatments and developing therapies in paralysis research;

(C) may focus on one or more forms of paralysis that result from central nervous system trauma or stroke;

(D) may facilitate and enhance the dissemination of clinical and scientific findings; and

(E) may replicate the findings of consortia members or other researchers for scientific and translational purposes.

(3) **COORDINATION OF CONSORTIA; REPORTS.**—The Director may, as appropriate, provide for the coordination of information among consortia under paragraph (1) and ensure regular communication among members of the consortia, and may require the periodic preparation of reports on the activities of the consortia and the submission of the reports to the Director.

(4) **ORGANIZATION OF CONSORTIA.**—Each consortium under paragraph (1) may use the facilities of a single lead institution, or be formed from several cooperating institutions, meeting such requirements as may be prescribed by the Director.

(c) **PUBLIC INPUT.**—The Director may provide for a mechanism to educate and disseminate information on the existing and planned programs and research activities of the National Institutes of Health with respect to paralysis and through which the Director can receive comments from the public regarding such programs and activities.

Subtitle B—Paralysis Rehabilitation Research and Care

SEC. 14201. ACTIVITIES OF THE NATIONAL INSTITUTES OF HEALTH WITH RESPECT TO RESEARCH WITH IMPLICATIONS FOR ENHANCING DAILY FUNCTION FOR PERSONS WITH PARALYSIS.

(a) **IN GENERAL.**—The Director, pursuant to the general authority of the Director, may make awards of grants to public or private entities to pay all or part of the costs of planning, establishing, improving, and providing basic operating support to multicenter networks of clinical sites that will collaborate to design clinical rehabilitation

intervention protocols and measures of outcomes on one or more forms of paralysis that result from central nervous system trauma, disorders, or stroke, or any combination of such conditions.

(b) **RESEARCH.**—A multicenter network of clinical sites funded through this section may—

(1) focus on areas of key scientific concern, including—

(A) improving functional mobility;

(B) promoting behavioral adaptation to functional losses, especially to prevent secondary complications;

(C) assessing the efficacy and outcomes of medical rehabilitation therapies and practices and assisting technologies;

(D) developing improved assistive technology to improve function and independence; and

(E) understanding whole body system responses to physical impairments, disabilities, and societal and functional limitations; and

(2) replicate the findings of network members or other researchers for scientific and translation purposes.

(c) **COORDINATION OF CLINICAL TRIALS NETWORKS; REPORTS.**—The Director may, as appropriate, provide for the coordination of information among networks funded through this section and ensure regular communication among members of the networks, and may require the periodic preparation of reports on the activities of the networks and submission of reports to the Director.

Subtitle C—Improving Quality of Life for Persons With Paralysis and Other Physical Disabilities

SEC. 14301. PROGRAMS TO IMPROVE QUALITY OF LIFE FOR PERSONS WITH PARALYSIS AND OTHER PHYSICAL DISABILITIES.

(a) **IN GENERAL.**—The Secretary of Health and Human Services (in this subtitle referred to as the “Secretary”) may study the unique health challenges associated with paralysis and other physical disabilities and carry out projects and interventions to improve the quality of life and long-term health status of persons with paralysis and other physical disabilities. The Secretary may carry out such projects directly and through awards of grants or contracts.

(b) **CERTAIN ACTIVITIES.**—Activities under subsection (a) may include—

(1) the development of a national paralysis and physical disability quality of life action plan, to promote health and wellness in order to enhance full participation, independent living, self-sufficiency, and equality of opportunity in partnership with voluntary health agencies focused on paralysis and other physical disabilities, to be carried out in coordination with the State-based Disability and Health Program of the Centers for Disease Control and Prevention;

(2) support for programs to disseminate information involving care and rehabilitation options and quality of life grant programs supportive of community-based programs and support systems for persons with paralysis and other physical disabilities;

(3) in collaboration with other centers and national voluntary health agencies, the establishment of a population-based database that may be used for longitudinal and other research on paralysis and other disabling conditions; and

(4) the replication and translation of best practices and the sharing of information across States, as well as the development of comprehensive, unique, and innovative programs, services, and demonstrations within

existing State-based disability and health programs of the Centers for Disease Control and Prevention which are designed to support and advance quality of life programs for persons living with paralysis and other physical disabilities focusing on—

(A) caregiver education;

(B) promoting proper nutrition, increasing physical activity, and reducing tobacco use;

(C) education and awareness programs for health care providers;

(D) prevention of secondary complications;

(E) home- and community-based interventions;

(F) coordinating services and removing barriers that prevent full participation and integration into the community; and

(G) recognizing the unique needs of underserved populations.

(c) **GRANTS.**—The Secretary may award grants in accordance with the following:

(1) To State and local health and disability agencies for the purpose of—

(A) establishing a population-based database that may be used for longitudinal and other research on paralysis and other disabling conditions;

(B) developing comprehensive paralysis and other physical disability action plans and activities focused on the items listed in subsection (b)(4);

(C) assisting State-based programs in establishing and implementing partnerships and collaborations that maximize the input and support of people with paralysis and other physical disabilities and their constituent organizations;

(D) coordinating paralysis and physical disability activities with existing State-based disability and health programs;

(E) providing education and training opportunities and programs for health professionals and allied caregivers; and

(F) developing, testing, evaluating, and replicating effective intervention programs to maintain or improve health and quality of life.

(2) To private health and disability organizations for the purpose of—

(A) disseminating information to the public;

(B) improving access to services for persons living with paralysis and other physical disabilities and their caregivers;

(C) testing model intervention programs to improve health and quality of life; and

(D) coordinating existing services with State-based disability and health programs.

(d) **COORDINATION OF ACTIVITIES.**—The Secretary shall ensure that activities under this section are coordinated as appropriate by the agencies of the Department of Health and Human Services.

(e) **AUTHORIZATION OF APPROPRIATIONS.**—For the purpose of carrying out this section, there is authorized to be appropriated \$25,000,000 for each of fiscal years 2008 through 2011.

TITLE XV—SMITHSONIAN INSTITUTION FACILITIES AUTHORIZATION

SEC. 15101. LABORATORY AND SUPPORT SPACE, EDGEWATER, MARYLAND.

(a) **AUTHORITY TO DESIGN AND CONSTRUCT.**—The Board of Regents of the Smithsonian Institution is authorized to design and construct laboratory and support space to accommodate the Mathias Laboratory at the Smithsonian Environmental Research Center in Edgewater, Maryland.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section a total of \$41,000,000 for fiscal years 2009 through 2011. Such sums shall remain available until expended.

SEC. 15102. LABORATORY SPACE, GAMBOA, PANAMA.

(a) **AUTHORITY TO CONSTRUCT.**—The Board of Regents of the Smithsonian Institution is authorized to construct laboratory space to accommodate the terrestrial research program of the Smithsonian tropical research institute in Gamboa, Panama.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated to carry out this section a total of \$14,000,000 for fiscal years 2009 and 2010. Such sums shall remain available until expended.

SEC. 15103. CONSTRUCTION OF GREENHOUSE FACILITY.

(a) **IN GENERAL.**—The Board of Regents of the Smithsonian Institution is authorized to construct a greenhouse facility at its museum support facility in Suitland, Maryland, to maintain the horticultural operations of, and preserve the orchid collection held in trust by, the Smithsonian Institution.

(b) **AUTHORIZATION OF APPROPRIATIONS.**—There is authorized to be appropriated \$12,000,000 to carry out this section. Such sums shall remain available until expended.

NOTICE OF HEARING**COMMITTEE ON ENERGY AND NATURAL RESOURCES**

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a hearing has been scheduled before the Senate Committee on Energy and Natural Resources. The hearing will be held on Tuesday, March 24, at 2:30 p.m., in room SD-366 of the Dirksen Senate Office Building.

The purpose of the hearing is to consider the nomination of Thomas Strickland, to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record may do so by sending it to the Committee on Energy and Natural Resources, United States Senate, Washington, D.C. 20510-6150, or by e-mail to Amanda_kelly@energy.senate.gov.

For further information, please contact Sam Fowler at (202) 224-7571 or Amanda Kelly at (202) 224-6836.

AUTHORITY FOR COMMITTEES TO MEET**COMMITTEE ON ARMED SERVICES**

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Committee on Armed Services be authorized to meet during the session of the Senate on Tuesday, March 17, 2008. At 10 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON BANKING, HOUSING AND URBAN AFFAIRS

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet

during the session of the Senate on March 17, 2009 at 10 a.m. to conduct a hearing entitled "Perspectives on Modernizing Insurance Regulation."

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate to conduct a hearing on Tuesday, March 17, 2009, at 10 a.m., in room SD-366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON FINANCE

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Committee on Finance be authorized to meet during the session of the Senate on Tuesday, March 17, 2009 at 10 a.m., in room 215 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet during the session of the Senate on March 17, 2009 at 2:30 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON CRIME AND DRUGS

Mr. SCHUMER. Mr. President, I ask unanimous consent that the Senate Committee on the Judiciary, Subcommittee on Crime and Drugs be authorized to meet during the session of the Senate, to conduct a hearing entitled "Law Enforcement Responses to Mexican Drug Cartels" on Tuesday, March 17, 2009, at 10:30 a.m., in room SD-226 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE CALENDAR

Mr. MERKLEY. Mr. President, as in executive session, I ask unanimous consent that on Wednesday, March 18, following the period of morning business, the Senate proceed to executive session to consider Calendar No. 24, the nomination of Ronald Kirk to be U.S. Trade Representative; that there be up to 90 minutes of debate with respect to the nomination, with the time divided as follows: 30 minutes under the control of the majority and 60 minutes under the control of the Republicans; that upon the use or yielding back of time, the vote on confirmation of the nomination occur at a time to be determined by the majority leader, following consultation with the Republican leader, and that upon confirmation, the motion to reconsider be laid

upon the table, no further motions be in order, the President be immediately notified of the Senate's action, and the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL TEMPORARY EXTENSIONS OF THE SMALL BUSINESS ACT AND THE SMALL BUSINESS INVESTMENT ACT OF 1958

Mr. MERKLEY. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 1541, which was received from the House.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (H.R. 1541) to provide for an additional temporary extension of programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. MERKLEY. Mr. President, I ask unanimous consent that the bill be read three times and passed, the motion to reconsider be laid upon the table, with no intervening action or debate, and any statements related to the bill be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1541) was ordered to a third reading, was read the third time, and passed.

REAUTHORIZING AND IMPROVING THE FEDERAL FINANCIAL ASSISTANCE MANAGEMENT IMPROVEMENT ACT OF 2009

Mr. MERKLEY. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar No. 30, S. 303.

The PRESIDING OFFICER. The clerk will report the bill by title.

The legislative clerk read as follows:

A bill (S. 303) to reauthorize and improve the Federal Financial Assistance Management Improvement Act of 1999.

There being no objection, the Senate proceeded to consider the bill.

Mr. MERKLEY. Mr. President, I ask unanimous consent that the bill be read a third time and passed, the motion to reconsider be laid upon the table, with no intervening action or debate, and that any statements related thereto be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (S. 303) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S. 303

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Financial Assistance Management Improvement Act of 2009".

SEC. 2. REAUTHORIZATION.

Section 11 of the Federal Financial Assistance Management Improvement Act of 1999 (31 U.S.C. 6101 note) is amended—

(1) in the section heading, by striking “**AND SUNSET**”; and

(2) by striking “and shall cease to be effective 8 years after such date of enactment”.

SEC. 3. WEBSITE RELATING TO FEDERAL GRANTS.

Section 6 of the Federal Financial Assistance Management Improvement Act of 1999 (31 U.S.C. 6101 note) is amended—

(1) by redesignating subsections (e) and (f) as subsections (f) and (g), respectively;

(2) by inserting after subsection (d) the following:

“(e) **WEBSITE RELATING TO FEDERAL GRANTS.**—

“(1) **IN GENERAL.**—The Director shall establish and maintain a public website that serves as a central point of information and access for applicants for Federal grants.

“(2) **CONTENTS.**—To the maximum extent possible, the website established under this subsection shall include, at a minimum, for each Federal grant—

“(A) the grant announcement;

“(B) the statement of eligibility relating to the grant;

“(C) the application requirements for the grant;

“(D) the purposes of the grant;

“(E) the Federal agency funding the grant; and

“(F) the deadlines for applying for and awarding of the grant.

“(3) **USE BY APPLICANTS.**—The website established under this subsection shall, to the greatest extent practical, allow grant applicants to—

“(A) search the website for all Federal grants by type, purpose, funding agency, program source, and other relevant criteria;

“(B) apply for a Federal grant using the website;

“(C) manage, track, and report on the use of Federal grants using the website; and

“(D) provide all required certifications and assurances for a Federal grant using the website.”; and

(3) in subsection (g), as so redesignated, by striking “All actions” and inserting “Except for actions relating to establishing the website required under subsection (e), all actions”.

SEC. 4. REPORT ON IMPLEMENTATION.

The Federal Financial Assistance Management Improvement Act of 1999 (31 U.S.C. 6101 note) is amended by striking section 7 and inserting the following:

“SEC. 7. EVALUATION OF IMPLEMENTATION.

“(a) **IN GENERAL.**—Not later than 9 months after the date of enactment of the Federal Financial Assistance Management Improvement Act of 2009, and every 2 years thereafter until the date that is 15 years after the date of enactment of the Federal Financial Assistance Management Improvement Act of 2009, the Director shall submit to Congress a report regarding the implementation of this Act.

“(b) **CONTENTS.**—

“(1) **IN GENERAL.**—Each report under subsection (a) shall include, for the applicable period—

“(A) a list of all grants for which an applicant may submit an application using the website established under section 6(e);

“(B) a list of all Federal agencies that provide Federal financial assistance to non-Federal entities;

“(C) a list of each Federal agency that has complied, in whole or in part, with the requirements of this Act;

“(D) for each Federal agency listed under subparagraph (C), a description of the extent of the compliance with this Act by the Federal agency;

“(E) a list of all Federal agencies exempted under section 6(d);

“(F) for each Federal agency listed under subparagraph (E)—

“(i) an explanation of why the Federal agency was exempted; and

“(ii) a certification that the basis for the exemption of the Federal agency is still applicable;

“(G) a list of all common application forms that have been developed that allow non-Federal entities to apply, in whole or in part, for multiple Federal financial assistance programs (including Federal financial assistance programs administered by different Federal agencies) through a single common application;

“(H) a list of all common forms and requirements that have been developed that allow non-Federal entities to report, in whole or in part, on the use of funding from multiple Federal financial assistance programs (including Federal financial assistance programs administered by different Federal agencies);

“(I) a description of the efforts made by the Director and Federal agencies to communicate and collaborate with representatives of non-Federal entities during the implementation of the requirements under this Act;

“(J) a description of the efforts made by the Director to work with Federal agencies to meet the goals of this Act, including a description of working groups or other structures used to coordinate Federal efforts to meet the goals of this Act; and

“(K) identification and description of all systems being used to disburse Federal financial assistance to non-Federal entities.

“(2) **SUBSEQUENT REPORTS.**—The second report submitted under subsection (a), and each subsequent report submitted under subsection (a), shall include—

“(A) a discussion of the progress made by the Federal Government in meeting the goals of this Act, including the amendments made by the Federal Financial Assistance Management Improvement Act of 2009, and in implementing the strategic plan submitted under section 8, including an evaluation of the progress of each Federal agency that has not received an exemption under section 6(d) towards implementing the strategic plan; and

“(B) a compilation of the reports submitted under section 8(c)(3) during the applicable period.

“(c) **DEFINITION OF APPLICABLE PERIOD.**—In this section, the term ‘applicable period’ means—

“(1) for the first report submitted under subsection (a), the most recent full fiscal year before the date of the report; and

“(2) for the second report submitted under subsection (a), and each subsequent report submitted under subsection (a), the period beginning on the date on which the most recent report under subsection (a) was submitted and ending on the date of the report.”.

SEC. 5. STRATEGIC PLAN.

(a) **IN GENERAL.**—The Federal Financial Assistance Management Improvement Act of 1999 (31 U.S.C. 6101 note) is amended—

(1) by redesignating sections 8, 9, 10, and 11 as sections 9, 10, 11, and 12, respectively; and

(2) by inserting after section 7, as amended by this Act, the following:

“SEC. 8. STRATEGIC PLAN.

“(a) **IN GENERAL.**—Not later than 18 months after the date of enactment of the

Federal Financial Assistance Management Improvement Act of 2009, the Director shall submit to Congress a strategic plan that—

“(1) identifies Federal financial assistance programs that are suitable for common applications based on the common or similar purposes of the Federal financial assistance;

“(2) identifies Federal financial assistance programs that are suitable for common reporting forms or requirements based on the common or similar purposes of the Federal financial assistance;

“(3) identifies common aspects of multiple Federal financial assistance programs that are suitable for common application or reporting forms or requirements;

“(4) identifies changes in law, if any, needed to achieve the goals of this Act; and

“(5) provides plans, timelines, and cost estimates for—

“(A) developing an entirely electronic, web-based process for managing Federal financial assistance, including the ability to—

“(i) apply for Federal financial assistance;

“(ii) track the status of applications for and payments of Federal financial assistance;

“(iii) report on the use of Federal financial assistance, including how such use has been in furtherance of the objectives or purposes of the Federal financial assistance; and

“(iv) provide required certifications and assurances;

“(B) ensuring full compliance by Federal agencies with the requirements of this Act, including the amendments made by the Federal Financial Assistance Management Improvement Act of 2009;

“(C) creating common applications for the Federal financial assistance programs identified under paragraph (1), regardless of whether the Federal financial assistance programs are administered by different Federal agencies;

“(D) establishing common financial and performance reporting forms and requirements for the Federal financial assistance programs identified under paragraph (2), regardless of whether the Federal financial assistance programs are administered by different Federal agencies;

“(E) establishing common applications and financial and performance reporting forms and requirements for aspects of the Federal financial assistance programs identified under paragraph (3), regardless of whether the Federal financial assistance programs are administered by different Federal agencies;

“(F) developing mechanisms to ensure compatibility between Federal financial assistance administration systems and State systems to facilitate the importing and exporting of data;

“(G) developing common certifications and assurances, as appropriate, for all Federal financial assistance programs that have common or similar purposes, regardless of whether the Federal financial assistance programs are administered by different Federal agencies; and

“(H) minimizing the number of different systems used to disburse Federal financial assistance.

(b) **CONSULTATION.**—In developing and implementing the strategic plan under subsection (a), the Director shall consult with representatives of non-Federal entities and Federal agencies that have not received an exemption under section 6(d).

(c) **FEDERAL AGENCIES.**—

“(1) **IN GENERAL.**—Not later than 6 months after the date on which the Director submits the strategic plan under subsection (a), the

head of each Federal agency that has not received an exemption under section 6(d) shall develop a plan that describes how the Federal agency will carry out the responsibilities of the Federal agency under the strategic plan, which shall include—

“(A) clear performance objectives and timelines for action by the Federal agency in furtherance of the strategic plan; and

“(B) the identification of measures to improve communication and collaboration with representatives of non-Federal entities on an on-going basis during the implementation of this Act.

“(2) CONSULTATION.—The head of each Federal agency that has not received an exemption under section 6(d) shall consult with representatives of non-Federal entities during the development and implementation of the plan of the Federal agency developed under paragraph (1).

“(3) REPORTING.—Not later than 2 years after the date on which the head of a Federal agency that has not received an exemption under section 6(d) develops the plan under paragraph (1), and every 2 years thereafter until the date that is 15 years after the date of enactment of the Federal Financial Assistance Management Improvement Act of 2009, the head of the Federal agency shall submit to the Director a report regarding the progress of the Federal agency in achieving the objectives of the plan of the Federal agency developed under paragraph (1).”

(b) TECHNICAL AND CONFORMING AMENDMENT.—Section 5(d) of the Federal Financial Assistance Management Improvement Act of 1999 (31 U.S.C. 6101 note) is amended by inserting “, until the date on which the Federal agency submits the first report by the Federal agency required under section 8(c)(3)” after “subsection (a)(7)”.

THE DISTRICT OF COLUMBIA SPECIAL OLYMPICS LAW ENFORCEMENT TORCH RUN

Mr. MERKLEY. Mr. President, I ask unanimous consent the Rules Committee be discharged from further consideration of H. Con. Res. 39 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the concurrent resolution by title.

The legislative clerk read as follows:

A resolution (H. Con. Res. 39) authorizing the use of the Capitol Grounds for the District of Columbia Special Olympics Law Enforcement Torch Run.

There being no objection, the Senate proceeded to consideration of the concurrent resolution.

Mr. MERKLEY. I ask unanimous consent the concurrent resolution be agreed to, the motion to reconsider be laid upon the table, with no intervening action or debate, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The concurrent resolution (H. Con. Res. 39) was agreed to.

APPOINTMENT OF DAVID M. RUBENSTEIN AS A CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

Mr. MERKLEY. Mr. President, I ask unanimous consent that the Rules Committee be discharged from further consideration of S.J. Res. 8 and the Senate then proceed to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 8) providing for the appointment of David M. Rubenstein as a citizen regent of the Board of Regents of the Smithsonian Institution.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. MERKLEY. I ask unanimous consent that the joint resolution be read three times, passed, the motion to reconsider be laid upon the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (S.J. Res. 8) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 8

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 5581 of the Revised Statutes (20 U.S.C. 43), the vacancy on the Board of Regents of the Smithsonian Institution, in the class other than Members of Congress, occurring because of the expiration of the term of Anne d'Harnoncourt of Pennsylvania is filled by the appointment of David M. Rubenstein of Maryland. The appointment is for a term of 6 years, effective on the date of enactment of this joint resolution.

APPOINTMENT OF FRANCE A. CORDOVA AS A CITIZEN REGENT OF THE BOARD OF REGENTS OF THE SMITHSONIAN INSTITUTION

Mr. MERKLEY. Mr. President, I ask unanimous consent that the Rules Committee be discharged from further consideration of S.J. Res. 9 and that the Senate then proceed to its consideration.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report the resolution by title.

The legislative clerk read as follows:

A joint resolution (S.J. Res. 9) providing for the appointment of France A. Cordova as a citizen regent of the Board of Regents of the Smithsonian Institution.

There being no objection, the Senate proceeded to consider the joint resolution.

Mr. MERKLEY. I ask unanimous consent that the joint resolution be read three times, passed, the motion to reconsider be laid upon the table, and any statements be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The joint resolution (S.J. Res. 9) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

S.J. RES. 9

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, in accordance with section 5581 of the Revised Statutes (20 U.S.C. 43), the vacancy on the Board of Regents of the Smithsonian Institution, in the class other than Members of Congress, occurring by reason of the resignation of Eli Broad of California is filled by the appointment of France A. Cordova of Indiana. The appointment is for a term of 6 years, effective on the later of April 7, 2009, or the date of enactment of this joint resolution.

ORDERS FOR WEDNESDAY, MARCH 18, 2009

Mr. MERKLEY. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 9:30 a.m. tomorrow, Wednesday, March 18; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the time for the two leaders be reserved for their use later in the day, and there be a period of morning business for up to 1 hour, with Senators permitted to speak for up to 10 minutes each, with the time equally divided and controlled between the two leaders or their designees, with the Republicans controlling the first half and the majority controlling the final half; further, that following morning business, the Senate proceed to executive session under the previous order; further that following executive session, the Senate resume consideration of H.R. 146, the lands bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. MERKLEY. Mr. President, Senators should expect a series of votes around 2 p.m. on the confirmation of the Kirk nomination and three Coburn amendments.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. MERKLEY. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it adjourn under the previous order.

There being no objection, the Senate, at 7:39 p.m., adjourned until Wednesday, March 18, 2009, at 9:30 a.m.

WITHDRAWAL

Executive message transmitted by the President to the Senate on March 17, 2009 withdrawing from further Senate consideration the following nomination:

DEMETRIOS J. MARANTIS, OF THE DISTRICT OF COLUMBIA, TO BE A DEPUTY UNITED STATES TRADE REPRESENTATIVE, WITH THE RANK OF AMBASSADOR, VICE PETER F. ALLGEIER, RESIGNED, WHICH WAS SENT TO THE SENATE ON MARCH 16, 2009.

HOUSE OF REPRESENTATIVES—Tuesday, March 17, 2009

The House met at 10:30 a.m. and was called to order by the Speaker pro tempore (Ms. JACKSON-LEE of Texas).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,

March 17, 2009.

I hereby appoint the Honorable SHEILA JACKSON-LEE to act as Speaker pro tempore on this day.

NANCY PELOSI,

Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 6, 2009, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties, with each party limited to 30 minutes and each Member, other than the majority and minority leaders and the minority whip, limited to 5 minutes.

THE BUDGET

The SPEAKER pro tempore. The Chair recognizes the gentleman from Ohio (Mr. BOEHNER).

Mr. BOEHNER. I welcome my colleagues to St. Patrick's Day and I hope everyone has a happy one.

Madam Speaker, we are 2 months into this Congress, and Washington has done nothing to ease the economic challenges facing middle class families and small businesses.

We've watched the administration approve another \$350 billion for more bailouts for the financial industry, and we've watched passage of a trillion-dollar "stimulus" bill, and then we've watched the passage of a \$410 billion omnibus bill loaded with some 9,000 unscrutinized earmarks.

Soon we are going to debate the President's budget, a budget which spends too much, taxes too much, and borrows too much from our kids and our grandkids. This budget raises taxes on everyone, from middle class families to small businesses, to seniors and to schools. It even punishes anyone who would have the audacity to flip on a light switch thanks to a brand new \$646 billion energy tax. This means less money in the family budget and more jobs being shipped overseas.

The American people are looking for real solutions that will help create jobs, rebuild savings, and create more investment in our economy. And in spite of what some disingenuous political operatives are saying, Republicans are offering better solutions.

So far this year, we've presented clear, superior alternatives to Washington Democrats' flawed proposals. We've asked the administration for an exit strategy to get the government back out of the private sector and get taxpayers off the hook for more billions in handouts to the financial sector. Our whip, ERIC CANTOR, and I personally delivered to the President an economic recovery plan that would create twice as many jobs as the Democrats' plan at half the cost. And we fought for a spending freeze as the majority fought for their bloated \$410 billion omnibus spending bill.

Listen, the American people are fed up with what they're seeing here in Washington. Don't they deserve to keep more of what they earn as we try to get this economy back on track? Don't they deserve better solutions than the spending, taxing, and borrowing that they're seeing out of this Congress?

Republicans are offering better solutions, and we hope the majority will join us.

THE CONTINUED NEED FOR HEALTH REFORM

The SPEAKER pro tempore. The Chair recognizes the gentleman from Rhode Island (Mr. LANGEVIN) for 5 minutes.

Mr. LANGEVIN. I would like to just take this opportunity to wish all of my colleagues and the American people, particularly my constituents, a happy St. Patrick's Day.

Madam Speaker, I rise today to speak on an issue that continues to be a top priority for American families and businesses, one that is fundamentally intertwined with the strength of our Nation's economy and the government's long-term fiscal sustainability. I'm speaking, of course, about the need for health care reform.

Health care costs in the United States are rising at an alarming rate. Yet despite the fact that we spend more per capita on health care than any other industrialized country, we produce some of the worst outcomes by a number of important health measures. Furthermore, the U.S. remains the only developed nation that does

not guarantee health coverage as a right to its citizens.

Recent estimates indicate that over 45 million Americans lack health insurance, leaving one in six without access to proper medical care. Even more shocking is that over 80 percent of the uninsured come from working families. Health care costs are imposing an increasing burden on families and placing employers at a further competitive disadvantage in our global economy.

Now, as we seek to unfurl the complex economic challenges facing our country, it remains abundantly clear that our success will not only depend on our ability to stem housing foreclosures and create new jobs; it will also depend on our will to change a system of health care that is fundamentally flawed and under tremendous strain.

According to Dr. Peter Orszag, the Director of the Office of Management and Budget, in his recent testimony before the Housing Budget Committee on which I sit, "the single most important step we could take to put this Nation back on a path to fiscal responsibility is to address rising health care costs." He further stated that "health care is the key to our fiscal future. We cannot afford inaction."

I could not agree more, Madam Speaker. But this is not just an economic or a fiscal imperative; it is also a moral one. For many years I have continually heard from Rhode Islanders who are struggling to pay their share of health care premiums, as well as from businesses that can no longer afford to operate under the existing system. Those constituents who are fortunate to have access to health insurance are struggling in the face of increasingly daunting costs, while many of them are afraid, of course, that they will lose the benefit altogether.

Now, this cannot simply continue any longer, and I am very pleased that within the last 2 months, this Congress and President Obama have already taken extraordinary steps to begin addressing these challenges by expanding coverage and investing in innovative technologies that will ensure better treatments and outcomes for the future.

On February 4 Congress passed and the President enacted a bill to provide health coverage to 11 million low-income children through SCHIP, the State Children's Health Insurance Program, which I was proud to support. Also included in the Recovery Act were a number of important measures to

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

provide additional funding to State Medicaid programs, extend health benefits to the unemployed, and ensure proper investment into health information technology so that we can achieve higher quality care with greater efficiency.

As recently as last week, President Obama signed an executive order lifting the ban on Federal funding for embryonic stem cell research, an act, I believe, will fundamentally alter the course of science and medicine in the same manner as did the discovery of the first vaccine or X-rays or other significant medical discoveries.

We have made amazing strides in a short period of time, but there is obviously so much more work to be done. I believe it is incumbent upon us, as policymakers, to offer a new vision for health care in America, one that contains costs, improves quality, increases efficiency, promotes wellness, guarantees universal coverage, and encourages investment in treatments and cures for the 21st century.

Madam Speaker, I look forward to working with my colleagues in Congress, the President, health care providers, community advocates, business leaders, families, and patients across the country to find real solutions that permanently address the longstanding need to health reform in America.

HONK IF YOU'RE PAYING MY MORTGAGE

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. MCCLINTOCK) for 5 minutes.

Mr. MCCLINTOCK. Madam Speaker, I have been asked to present more than 6,000 postcards that were generated by the Armstrong and Getty radio show to protest policies that can best be described by the new bumper sticker "Honk if You're Paying My Mortgage" or today's reprise "Honk if You're Paying AIG's Bonuses."

These postcards represent the first stirring of the public against some of the excesses that we are seeing out of this administration on the mortgage issue.

Rick Santelli of CNBC struck a nerve last month when he asked, "How many of you want to pay your neighbor's mortgage who has an extra bathroom and can't pay their bills?" Jack Armstrong and Joe Getty, who host the popular radio talk show in Northern California, asked the same question of their listeners. And here's their response:

On each of these thousands of postcards is the story of a responsible family struggling to make ends meet in the worst recession in a generation, families who are meeting their obligations, who are staying current with their mortgages, even though many of them are upside down on their home

values and owe more than their home is worth. And they're watching as this government says to borrowers who lied on their applications, who put no money down and accepted teaser rates, and who withdrew all of the equity of their home to pay for stuff, don't worry, we'll force your neighbor to pay your mortgage.

They're watching as this government says to lenders like AIG who knowingly made loans to people they knew couldn't afford them, who made millions creating the housing bubble, don't worry, we'll cover your million dollar bonuses with taxpayer money.

But the families who sent in these postcards keep making their payments, many eating into their savings, foregoing vacations, postponing retirements, turning down consumer purchases because they stand by their word. These are the families that turned down the opportunity to flip that house, to make that quick fortune, to cash in on their equity for a second home or a boat they couldn't afford. They are the 92 percent of borrowers who are making their mortgage payments, despite all of the incentives that this administration's offering them to stop. And these postcards are eloquent testimony to their resentment at being required to bail out the banks and the borrowers who created the housing bubble, who caused the credit collapse, and who now are being subsidized, bailed out, and lavished with multi-million dollar bonuses paid for with our tax money.

Joe Getty asked the question yesterday, "What has happened to the words 'sadder but wiser'? What has happened to that American tradition that you make your own decisions, good or bad, and then you live with those decisions?"

The President tells us that if your neighbor's home is on fire, you don't quibble over who pays for the water. And that's true. But as Jack Armstrong pointed out, if my neighbor burns down his house by shooting off Roman candles in his living room, I'll be darned if I'm going to pay for him to rebuild it.

Armstrong and Getty, Rick Santelli, and others are speaking for the vast silent majority of Americans who pay their bills, who honor their commitments, and who make this country run.

The President recently said that we are all to blame. Well, no, we not all to blame. Those families who passed up the get-rich-quick real estate seminars and turned down the loans they couldn't afford or settled for a smaller home or who rented because that's what they could afford, they're not to blame, and they shouldn't be left holding the bag.

Ninety-two percent of Americans are making their mortgage payments not only because it's the right thing to do, but because they know that the sooner

the market corrects itself, the sooner our homes will begin to appreciate once again.

By prolonging the real estate correction, by propping up bad loans, by undermining responsible homeowners, and by rewarding the smartest guys in the room who created this catastrophe with taxpayer-paid bonuses, this government is extending the agony and postponing the day when the market will bottom out and home buyers can safely re-enter the housing market.

Madam Speaker, I take great hope from the public's response to Armstrong and Getty's invitation to protest the mortgage bailouts. It means that the American spirit is not dead, that there are still millions of Americans who believe in individual responsibility and integrity. And even if such people are in short supply in Washington today, they still comprise the vast majority of our Nation, and that great silent majority is fast tiring of remaining silent.

CENSUS

The SPEAKER pro tempore. The Chair recognizes the gentleman from North Carolina (Mr. MCHENRY) for 5 minutes.

Mr. MCHENRY. Madam Speaker, tomorrow the President's nominee for Commerce Secretary will have his confirmation hearing in the Senate.

Gary Locke, the former Governor of Washington State, is the third nominee for this Cabinet position. As you recall, the second nominee, Senator JUDD GREGG, withdrew his name from consideration.

Senator GREGG objected to the President's intention to move control of the Census Bureau from the Commerce Department into the White House. This unprecedented move to politicize the 2010 Decennial Census has met with strong opposition from across the political spectrum. The Obama administration has since backtracked and attempted to downplay its role regarding the census. To his credit, Governor Locke has expressed his intention to not cede control of the 2010 census to the White House should he be confirmed.

I have encouraged our colleagues in the Senate Commerce Committee to ask Governor Locke several important questions at tomorrow's hearing, two of which are: What would he consider to be an inappropriate political interference from the White House regarding the census, and how would he respond to attempts from the White House to exert political influence over the conduct of the census?

□ 1045

I suspect that Governor Locke's responses to these questions will determine his fate in the Senate.

But there is a second and equally important point of contention and controversy over the census. The statistical adjustment of census data is prohibited by Federal law. However, there are some partisans who refuse to give up the cause of data manipulation. They want to manipulate the census results for political gain, for their own political gain, and, in the process, undermine the integrity of the country's entire statistical system.

I hope that our colleagues in the Senate will question Governor Locke about his thoughts regarding statistical adjustment. Governor Locke expressed his willingness to use adjustment as an "accuracy check." This comment must be expanded upon for members of the Senate Commerce Committee and all interested parties. Republicans and Democrats alike must truly guard the integrity of the constitutionally-mandated census in the United States. The appropriate allocation of Federal funds depend upon an accurate census.

My colleagues and I on the Census Subcommittee, of which I am the ranking member, are working to ensure that the 2010 Decennial Census is apolitical, fair and accurate. Governor Locke's confirmation should rest upon whether he shares this goal; a census free of White House political pressure and partisan influence and free of manipulation, and data manipulation in particular.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Ms. Wanda Evans, one of his secretaries.

PRESENTING A PROPER BUDGET FOR AMERICA

The SPEAKER pro tempore. The Chair recognizes the gentleman from California (Mr. DANIEL E. LUNGREN) for 5 minutes.

Mr. DANIEL E. LUNGREN of California. Madam Speaker, just a few moments ago the President of the United States made a press statement in which he outlined parts of his budget and then challenged the Republicans, or those who might oppose his budget, to come up with alternatives. Well, let me say in the spirit of St. Patrick, as a great descendant of the Irish aisle, I accept that challenge. I accept that challenge on behalf of my colleagues on this side of the aisle, but also on behalf of my constituents.

When I was home this weekend, I heard from many of them. In fact, I continued to hear from them on the plane ride back from Sacramento here to Dulles Airport. They said, please tell the President this: Let's get our priorities straight. Fix the financial system first. Get the economy working right.

Then we will talk about your other ideas.

So I would say to the President, the better idea that I have from my constituents back home is set your sights on righting the financial institutions in America.

Now, what we have heard from the President by and large is well, it is somebody else's fault. It was the fault of the previous administration. And there may be some truth to that. But let's remember, for instance, with AIG it was Treasury Secretary Geithner who negotiated that deal with AIG. It was this administration that allowed something like \$30 billion to go to AIG just recently without any strings attached.

Let's focus on the situation we have with respect to our financial institutions first. The President tells us we have to do all these other things first. Well, as Warren Buffett said the other day, he doesn't think Franklin Delano Roosevelt said on the day after Pearl Harbor, "What a great opportunity for us to expand government. We shouldn't let this crisis be wasted."

Let's not listen to some around the President who say that a crisis like this gives us a great opportunity to do all of the things we have wanted to do with respect to government. Let's get down to the basics.

So let's talk about the budget that the President has presented to us. It increases spending by \$1 trillion over the next decade. It includes an additional \$250 billion placeholder for another financial bailout. It likely leads to a 12 percent increase in discretionary spending. It permanently expands, makes larger, the Federal Government by nearly 3 percent of the gross domestic product over pre-recession levels. In other words, the answer to big government and big spending and big taxing and big borrowing is more big government, big spending, big taxes and big borrowing.

It raises taxes on all Americans by \$1.4 trillion over the next decade. It raises taxes on 3.2 million taxpayers by an average of \$300,000 over the next decade.

The President said look, he is going to raise taxes on the rich, but 95 percent of Americans are going to get a better deal. Well, guess what? His cap-and-trade plan, if adopted, is a cap-and-tax plan. He calls it cap-and-trade. It actually is cap-and-tax, because it increases the cost of anything basically produced by fossil fuels in America. That means your air conditioning, that means your heating, that means your transportation. That means it is going to be placed into the cost of food being developed, of food being delivered to us. It is going to wipe out any suggested tax relief that the average family gets, and more. And the average family uses these things as a higher percentage of these income than do the

rich, therefore they will be disproportionately impacted.

So, Madam Speaker, let's look at what the President has presented. I love his melodious tones as he explains to us he is not for more spending, he is not for more taxes, he is not for more borrowing, he is not for expansion of entitlement programs. But his budget does precisely all of those things. It is a net increase in taxes on every American. It is an increase in spending. It is an increase in borrowing on my children and my grandchildren and everyone's children and grandchildren. It is the greatest transfer of wealth from one generation to another in the history of the United States.

Madam Speaker, you don't have to dislike a President of the United States personally, you don't have to dislike what he is trying to do, to dislike his policies, particularly if they undercut the very promises he is making, if they undercut the very things he says we want to do. We stand ready to join him. We stand ready to join him in meeting the goals that he sets up. But, Madam Speaker, this budget taxes too much, spends too much, borrows too much. It is in fact a repudiation of the very goals he has established.

THE PRESIDENT'S BUDGET AND TAXES

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. SHIMKUS) for 5 minutes.

Mr. SHIMKUS. Madam Speaker, I also come down to the floor to talk about the President's budget, and I am going to focus on the issue of taxing. There is one provision in the tax increase of the President's budget that is very detrimental to our country and to our society, and that is the carbon tax aspect of this. Imagine paying more for every piece of energy that you use. That is what this cap-and-trade, cap-and-tax plan will do.

I have seen the direct result of placing taxes and additional regulatory burdens on my congressional district in Southern Illinois. I always tell the story about the 1990 amendments to the Clean Air Act where because of Federal regulation, in this one case, in this one case, 1,200 miners lost their jobs.

I was told by someone who was the business manager for the United Mine Workers of America in Southern Illinois that during 1990 he was responsible for 14,000 mine workers in Southern Illinois. After the amendments were passed, he then was reorganized into a three-State region to only bargain for 4,000 United Mine workers. 10,000 mine workers' jobs were lost.

That was just in the cap-and-trade clean air amendments 1990s, where we had technology to make the transformation. This carbon dioxide cap-and-tax provision, we do not have the

technology available today to effect this change.

So this is what happened. This is actually a picture of mine workers who lost their jobs. This is the mine I was talking about, Peabody No. 10 in Kincaid, Illinois. The interesting thing about this mine, it is very, very efficient in that the mine was right across the street from the power plant, so you saved on the transportation costs, whether that be the trucks or that would be the rail applications. There was a little conveyor belt going across the road to the power plant. This mine was closed down. These miners lost their jobs.

Now, under the new regime of the President's bill that taxes too much, he proposes additional taxation of \$686 billion through a carbon tax. This carbon tax will be passed on to everybody who uses fossil fuels in America.

You might say, I don't want to use fossil fuels. It is like the story where the individual says I don't like coal, I don't like nuclear power, I don't like hydroelectric. I like electricity. The problem with this is 50 percent of all electricity, even the electricity that lights this Chamber, is produced by coal-based electricity generation. The power plant just down the road two blocks from here is a coal-fired power plant. Fifty percent.

If you put additional taxation on that fossil fuel, that cost will be passed on to the individuals and the consumers. This is the worst time to really attack our economy through additional taxation, because of the economic slowdown, the economic recession, the competitive nature of the world. If we not only put a challenge to our use of fossil fuels in this country, not only coal, natural gas as a fossil fuel, gasoline as a fossil fuel, estimations of the last cap-and-trade bills are 50 cents additional to the cost of a gallon of gas.

Where does that money go to when we collect it? There is an old story. When the bank robbers rob a bank and they get away to their hideaway and they put the loot on the table, what happens? That is when you have the fights break out. That is when one bad guy shoots the other bad guy and says, I am taking all the money for myself.

What this cap-and-tax regime will do will allow bureaucrats, it will allow us in Washington, to decide how that money is going to be split up, and it will be folks here making that determination. Why do you think so many people are at the table? They are at the table because they want part of your tax dollars that you are going to pay through higher rates to us and they want to get benefited.

You can look across all the regimes that are at the table. They are at the table because they want part of that revenue stream. What this revenue stream will do is not only kill the fos-

sil fuel of this industry, which is hundreds of thousands of jobs and low-cost power, it will make us not competitive with the developing nations who are using coal and having low cost power.

MOVING FORWARD TO A NEW ENERGY FUTURE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Washington (Mr. INSLEE) for 5 minutes.

Mr. INSLEE. Madam Speaker, last week I had two very exciting meetings with people who have some insights about how we can move forward to use a new energy future to really revive our economy, and I thought I would take a couple of moments to advise my colleagues about these meetings. I thought they would be interested in them.

First, I met some absolutely brilliant people up in Boston area at the MIT, Massachusetts Institute of Technology, Energy Club. This is a club of graduate and post-graduate students who have come together to organize themselves to try to promote ideas about how to build a new, clean energy future for the country.

These are brilliant people, post-graduates in chemistry, electrical engineering, mechanical engineering. These are really some of the creme de la creme of our young geniuses coming up who can help build our new economy. It was fascinating to me, because these were people who were tremendously optimistic even in these tough times about the ability to grow the U.S. economy, if we will get serious about promoting the future of new energy technologies.

□ 1100

I am convinced after meeting these relatively young people that we've got a bright future in our economy if we can unleash these intellectual geniuses. They told me that they were waiting for a signal from Washington, DC, that we were really going to embrace these new technologies; and they told me about some of these new technologies that they're fascinated in. I thought I would share some of them today.

They told me about a technology company called Ramgen, a company out in my State of Washington, that has an ability to compress carbon dioxide so that someday we might be able to burn coal in a way that carbon dioxide doesn't go into the air but we compress that carbon dioxide and put it under the ground permanently so it doesn't cause global warming. They're waiting for Congress to pass a bill that will essentially direct the economy in that direction. They told me it's very important to have a bill that will create a fund to be able to support the research so that these people at MIT can help develop this and various other technologies. The cap-and-trade bill,

which I'll talk about a little later, is a bill that will do just that, to help that technology forward.

We talked about the Ausra Company, a company that just opened the first manufacturing plant in the United States, commercial plant, for concentrated solar energy, so you can concentrate the sun's rays and generate electricity. They are now hiring several hundred people in Nevada, building these new plants, so that we can convert the sun's energy directly to electricity, and they were very excited about that technology.

I met up there the leader of A123 Battery Company. At A123 Battery, they make lithium ion batteries that can power plug-in hybrid cars and ultimately all electric cars using lithium ion. The beauty of this, of course, is that if you use electricity, you don't have to import gasoline from Saudi Arabia, you don't have to wrap yourself around that national security threat, and you can use electricity rather than oil. But they told me they're waiting for a signal from Congress to move toward electricity in our cars. Now we started that in the stimulus bill to help them, but now we need to move forward to have a bill to essentially regulate carbon dioxide so we can have another signal to industry to start moving to electric cars.

We talked about a company called the Sapphire Energy Company. The Sapphire Energy Company just started construction of ponds—and this will sound like science fiction but it's real—ponds where you can grow algae and the algae takes the sun's energy and turns it into lipids and then you essentially press it and you get fuel that you make gasoline out of. So we can use algae to essentially eat carbon dioxide out of our coal-fired plants and then use it to make a liquid automobile fuel that's chemically indistinguishable for gasoline. Pretty exciting company.

We talked about the AltaRock Company. The AltaRock Company is a company, again up in the State of Washington, which is trying to commercialize what we call engineered geothermal, where you can poke a hole down in the Earth, you pump water down there, it collects to a 300-degree temperature, you bring it up, generate steam and make electricity. Again, zero CO₂.

These companies are waiting for a signal from Congress, the cap-and-trade bill, and we're going to try and get it through this year.

REGARDING THE PRESIDENT'S BUDGET PROPOSAL

The SPEAKER pro tempore. The Chair recognizes the gentleman from Indiana (Mr. PENCE) for 3 minutes.

Mr. PENCE. Madam Speaker, I rise today in the midst of an enormous

amount of national outrage. I sensed it yesterday when I was in Anderson, Indiana, meeting with my constituents, meeting with small business leaders at a forum. Now much in the media today is focused on the frustration over a large business, specifically AIG, that received tens of billions of dollars in taxpayer money and now has been busy paying bonuses with it to the tune of over \$150 million and has been passing out that money to foreign corporations. That outrage is very real and I agree with it. The American people are tired of bailouts. I voted against the Wall Street bailout last fall, defied a President of my own party, because I simply believe we can't borrow and spend and bail our way back to a growing America. And it seems that much of the public has now come to the conclusion that this notion that we can bail out every failing business in the country is a deeply flawed notion. But I also heard an enormous amount of outrage in my district yesterday about this administration's budget.

The truth is the more the American people look at the President's budget plan, the more they realize that it spends too much, it taxes too much, and it borrows too much, and we have to do better.

I heard yesterday from a constituent by the name of Ted Fiock, who runs and owns Anderson Tool and Engineering Company. He talked about the increasing cost in his business, saying, "The cost burden is just insane right now. We're not doing well. We're struggling. We're in a survival mode right now." You can imagine his frustration and even, I would perceive, outrage when I explained to him that 50 percent of the Americans who will be paying higher taxes under the President's budget are actually small business owners just like him. The President said it would just affect Americans who make more than \$250,000 a year, but according to the most reasonable estimates, more than 50 percent of the Americans that file taxes over that amount are actually small business owners just like Ted filing as individuals. Raising taxes on small businesses, especially during these difficult economic times, is not a prescription for recovery. It's a prescription for economic decline. I also shared with Ted and others the President's plan, the so-called cap-and-trade energy tax. Under the administration's budget, there would be a new energy tax that could cost every household, let alone every business, up to \$3,128 a year for using electricity, driving a car, relying on energy in any way.

The President's budget simply taxes too much. And as I explain the metes and bounds in this budget today, the outrage about AIG's bonuses, the outrage about bailouts has suddenly met its match. I think the more the American people look at this administra-

tion's budget, the more they know we can do better, and we must do better. It's time for this Congress to embrace the principles of fiscal restraint and policies that will get America growing again, and Republicans are prepared to bring those ideas forward.

CONGRESSIONAL EARMARKS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Arizona (Mr. FLAKE) for 3 minutes.

Mr. FLAKE. Madam Speaker, a little later today, I will bring another privileged resolution to the floor asking for the Ethics Committee to look into the relationship between earmarks and campaign contributions. This will be the fourth one that has been offered. Each time these have been tabled and we haven't instructed the Ethics Committee to look into this. I hope that that changes.

Several years ago, we had a scandal involving earmarks, the Jack Abramoff scandal. Mr. Abramoff now sits in Federal prison. Some staff members and lobbyists and others also were implicated in that scandal. The leadership at that time was slow to recognize the scandal that was there, and I would say today that the leadership is also slow to recognize what is going on here. There are investigations going on around us. The Department of Justice is investigating—we know this from various press reports—the relationship between earmarks and campaign contributions.

Let me just read a few of the whereas clauses from the resolution that will be introduced later today. This one is a little more specific. The first resolution that was introduced had to do just with earmarks and campaign contributions in general. The second one had to do with earmarks related to the PMA Group. The next one just with earmarks related to the PMA Group for FY09 defense spending. This one has to do specifically with the head of PMA, Mr. Magliocchetti, whom we were told had his home raided by the FBI a while ago. Keep in mind that the PMA Group was a lobbying firm, a powerhouse lobbying firm, that over a period of 8 years collected more than \$100 million in fees from its clients, mostly for seeking earmarks from this Congress. Yet when the news came that the FBI was investigating and had raided the office, that firm, that I believe brought in about \$17 million last year alone in revenue, imploded, within a week. By the end of this month it will be completely gone, dissolved. And when you read some of allegations that are going around in the press, you don't wonder why.

CQ Today reported recently that Mr. Magliocchetti and nine of his relatives—two children, daughter-in-law, current wife, his ex-wife, ex-wife's parents, sister and brother-in-law—pro-

vided \$1.5 million in political contributions from 2000 to 2008. Now if you look at some of the occupations listed by some of those who were giving \$100,000 over just a couple of years—school teacher, police sergeant, homemaker—does that not raise somebody's antenna that something might be amiss here?

We can't simply let the Justice Department's investigation dictate what we do here in the House. We should move forward ourselves. We shouldn't say that whether or not you can be indicted or convicted should be the standard that we uphold here in the House to uphold the dignity and decorum of this body. Madam Speaker, this body, this Congress, deserves better than that. That's why I hope that we will actually ask this time the Ethics Committee to investigate this matter.

THE BUDGET TAXES TOO MUCH

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Tennessee (Mrs. BLACKBURN) for 3¾ minutes.

Mrs. BLACKBURN. I thank the Speaker.

Madam Speaker, I rise today to talk a little bit about the budget issues that are before us and about how we are spending too much, we're borrowing too much and we're taxing too much. Recently one of my constituents came up and she had a child in her arms. It was her 6-month-old grandchild. She looked at me and she said, Marsha, you know, it makes me really angry when you all spend money that I haven't made, but when Congress is spending money that this grandbaby has not made, it just absolutely infuriates me. It makes me want to come to Washington and knock on the doors of the Members of Congress and say, What are you doing to this child's future?

Madam Speaker, that is what our constituents are saying when they look at this budget proposal that contains the largest tax increase in history, \$1.4 trillion, over a 10-year period of time. Now some of my constituents have said, where do they get this money? Where does this come from and what are they taxing to come up with \$1.4 trillion? Well, I want to talk a second about the cap-and-tax proposal that the President and the administration has brought forward. I want to use a quote that the President made in an editorial board with the San Francisco Chronicle in January 2008. It said under my plan of a cap-and-trade system, electricity rates would necessarily skyrocket. That will cost money. That will pass the money on to consumers.

That was in January 2008. What we see is, yes, electricity rates will go up. Every time an individual flips on a light switch, every time they punch the brew button on their coffee maker, every time they turn on their computer, it is going to cost them more

money, every single time, to the tune of \$3,128 per family per year. That is what we are beginning to see. This is going to increase your cost of doing business in your home every single day of living, that maintenance of life that we all go through.

We're very concerned about this part of the proposal, the cap-and-tax. It is part of the \$1.4 trillion increase.

With that, Madam Speaker, I yield back my time, and I thank you for yielding the time.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 14 minutes a.m.), the House stood in recess until noon.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. BLUMENAUER) at noon.

PRAYER

The Chaplain, the Reverend Daniel P. Coughlin, offered the following prayer: Lord God Almighty, Creator of all things great and small, the ancient Celtic people took such joy in nature's secrets as well as its beauty. They found Your presence in every spring, every lake, forest and glen. Each was a sanctuary where prayer came easily, and the poetry of creation became a spark of Your own Divine light.

Be with Congress today. Bless its aspirations and its work. Be close to this Nation, and intimately present to its people.

In the midst of anxieties, busy work, and grave responsibilities, grant them a moment to be touched by Your glorious creation so they, too, find praise on their lips and joy in their hearts for another day, and a sense of Your eternal goodness.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Georgia (Mr. KINGSTON) come forward and lead the House in the Pledge of Allegiance.

Mr. KINGSTON led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

CONCERNS OVER AIG BONUSES

(Mr. BUTTERFIELD asked and was given permission to address the House for 1 minute.)

Mr. BUTTERFIELD. Mr. Speaker, like most Americans, I am deeply outraged this morning that while millions of people suffer through this difficult economy, AIG executives are seeking to take \$165 million in bonus pay. The scope and depth of this waste and greed are just shocking and unjustifiable. It is beyond my imagination that they would do that.

Mr. Speaker, I represent a district in North Carolina where the median household income is just a little bit more than \$30,000 per year. These Americans must work extremely hard every day just to meet their obligations.

It is patently unfair that hard-working Americans could be asked to work harder to pay more taxes that are needed simply to provide AIG executives with multimillion-dollar bonuses. It is patently unfair.

I encourage this body and President Barack Obama to take every avenue possible to stop these bonuses or, if they are legally unstoppable, to tax them beyond belief.

NOTICE OF INTENTION TO OFFER RESOLUTION RAISING A QUESTION OF THE PRIVILEGES OF THE HOUSE

Mr. FLAKE. Mr. Speaker, pursuant to clause 2(a)(1) of rule IX, I hereby notify the House of my intention to offer a resolution as a question of the privileges of the House.

The form of my resolution is as follows:

Whereas, Mr. Paul Magliocchetti, a former Appropriations Committee staffer, founded a prominent lobbying firm specializing in obtaining defense earmarks for its clients and whose offices—along with the home of the founder—were recently raided by the FBI.

Whereas, the lobbying firm has shuttered its political action committee and is scheduled to cease operations at the end of the month but, according to the New York Times, "not before leaving a detailed blueprint of how the political money churn works in Congress" and amid multiple press reports that its founder is the focus of a Justice Department investigation. (The New York Times, February 20, 2009)

Whereas, CQ Today noted that the firm has "charged \$107 million in lobbying fees from 2000 through 2008" and estimates of political giving by the raided firm have varied in the press, with The Hill reporting that the firm has given \$3.4 million to no less than 284 members of Congress. (CQ Today, March 12, 2009; The Hill, March 4, 2009)

Whereas, The Hill reported that Mr. Magliocchetti is "under investigation for [the firm's] campaign donations," the Wash-

ington Post highlighted the fact that federal investigators are "focused on allegations" that he "may have reimbursed some of his staff to cover contributions made in their names . . ." and the New York Times noted that federal prosecutors are "looking into the possibility" that he "may have funneled bogus campaign contributions" to members of Congress. (The Hill, February 20, 2009; The Washington Post, February 14, 2009; The New York Times, February 11, 2009)

Whereas, Roll Call reported on "the suspicious pattern of giving established by two Floridians who joined [the firm's] board of directors in 2006" and who, with "no previous political profile . . . made more than \$160,000 in campaign contributions over a three-year period" and "generally contributed the same amount to the same candidate on the same days." (Roll Call, February 20, 2009)

Whereas, The Hill also reported that "the embattled defense lobbyist who led the FBI-raided [firm] has entered into a Florida-based business with two associates whose political donations have come into question" and is listed in corporate records as being an executive with them in a restaurant business. (The Hill, February 17, 2009)

Whereas, Roll Call also reported that it had located tens of thousands of dollars of donations linked to the firm that "are improperly reported in the FEC database." (Roll Call, February 20, 2009)

Whereas, CQ Today recently reported that Mr. Magliocchetti and "nine of his relatives—two children, his daughter-in-law, his current wife, his ex-wife and his ex-wife's parents, sister, and brother-in-law" provided "\$1.5 million in political contributions from 2000 through 2008 as the lobbyist's now-embattled firm helped clients win billions of dollars in federal contracts," with the majority of the family members contributing in excess of \$100,000 in that timeframe. (CQ Today, March 12, 2009)

Whereas, CQ Today also noted that "all but one of the family members were recorded as working for [the firm] in campaign finance reports, and most also were listed as having other employers" and with other occupations such as assistant ticket director for a Class A baseball team, a school teacher, a police sergeant, and a homemaker. (CQ Today, March 12, 2009)

Whereas, in addition to reports of allegations related to reimbursing employees and the concerning patterns of contributions of business associates and board members, ABC News reported that some former clients of the firm "have complained of being pressured by [the firm's] lobbyists to write checks for politicians they either had no interest in or openly opposed." (ABC News The Blotter, March 4, 2009)

Whereas, Roll Call has taken note of the timing of contributions from employees of Mr. Magliocchetti's firm and its clients when it reported that they "have provided thousands of dollars worth of campaign contributions to key Members in close proximity to legislative activity, such as the deadline for earmark request letters or passage of a spending bill." (Roll Call, March 3, 2009)

Whereas, reports of the firm's success in obtaining earmarks for their clients are widespread, with CQ Today reporting that "104 House members got earmarks for projects sought by [clients of the firm] in the 2008 defense appropriations bills," and that 87 percent of this bipartisan group of Members received campaign contributions from the raided firm. (CQ Today, February 19, 2009)

Whereas, clients of Mr. Magliocchetti's firm received at least three hundred million

dollars worth of earmarks in fiscal year 2009 appropriations legislation, including several that were approved even after news of the FBI raid and Justice Department investigation into the firm and its founder was well known.

Whereas, the Chicago Tribune noted that the ties between a senior House Appropriations Committee member and Mr. Magliocchetti's firm "reflect a culture of pay-to-play in Washington," and ABC News indicated that "the firm's operations—millions out to lawmakers, hundreds of millions back in earmarks for clients—have made it, for many observers, the poster child for tacit 'pay-to-play' politics . . ." (Chicago Tribune, March 2, 2009; ABC News The Blotter, March 4, 2009)

Whereas Roll Call has reported that "a handful of lawmakers had already begun to refund donations tied to" the firm "at the center of a federal probe . . ." (Roll Call, February 23, 2009)

Whereas, the persistent media attention focused on questions about the nature and timing of campaign contributions related to Mr. Magliocchetti, as well as reports of the Justice Department conducting research on earmarks and campaign contributions, raise concern about the integrity of Congressional proceedings and the dignity of the institution.

Whereas, the fact that cases are being investigated by the Justice Department does not preclude the Committee on Standards from taking investigative steps: Now, therefore, be it

Resolved, That

(a) The Committee on Standards of Official Conduct, or a subcommittee of the committee designated by the committee and its members appointed by the chairman and ranking member, shall immediately begin an investigation into the relationship between the source and timing of past campaign contributions to Members of the House related to the founder of the raided firm and earmark requests made by Members of the House on behalf of clients of the raided firm.

(b) The Committee on Standards of Official Conduct shall submit a report of its findings to the House of Representatives within 2 months after the date of adoption of the resolution.

The SPEAKER pro tempore. Under rule IX, a resolution offered from the floor by a Member other than the majority leader or the minority leader as a question of the privileges of the House has immediate precedence only at a time designated by the Chair within 2 legislative days after the resolution is properly noticed.

Pending that designation, the form of the resolution noticed by the gentleman from Arizona will appear in the RECORD at this point.

The Chair will not at this point determine whether the resolution constitutes a question of privilege. That determination will be made at the time designated for consideration of the resolution.

WHAT'S GOOD FOR DETROIT IS GOOD FOR WALL STREET

(Mrs. MILLER of Michigan asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. MILLER of Michigan. Mr. Speaker, this week, we saw the latest outrage from Wall Street when it was exposed that AIG paid out hundreds of millions of dollars in bonuses, much of which went to workers in the division that helped actually cause the economic meltdown, and all with taxpayers' money. The excuse we are given is that those are contractual obligations and they must be paid, and we are supposed to just accept that.

Let us contrast that with how American auto workers are treated when General Motors or Chrysler need bridge loans from the government. They are told that they make too much money and that their contracts are killing the companies, and that they must take less or else the Federal Government will let the companies die.

So let's get this straight; AIG employees, who helped implode the economy, are given bonuses with taxpayers' money because it's in their contract, while UAW workers whose companies were badly hurt by the economic meltdown—partially caused by AIG—are told that their contracts must be disregarded or renegotiated. That is a vivid example of the double standard where people who work on Wall Street get their contracts upheld, but people who work on the line, it doesn't matter, and let them eat cake. This is wrong, Mr. Speaker.

RESPONSIBLE CORPORATE EXECUTIVE COMPENSATION ACT OF 2009

(Mr. DINGELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DINGELL. Mr. Speaker, like everybody else in this Chamber, I am outraged about AIG. They got \$170 billion in taxpayer funds to bail them out of a situation which was largely of their own creation. And they then made it worse by giving \$165 million in bonuses to people who had participated in the outrage about which all Americans are so infuriated.

The Federal Government is trying to save this corporation because it's too big to fail, but we don't have to save a bunch of money-grubbing rascals who had a part in the collapse of our economy, which they helped to bring about.

I am introducing a bill today which is going to address the problem. It is entitled, the "Responsible Corporate Executive Compensation Act of 2009." It will impose a 95 percent tax on bonuses paid to employees of TARP recipients.

I urge my colleagues to cosponsor this bill and help make certain that hardworking Americans are not the only ones who have to sacrifice during this time of severe economic stress and uncertainty.

WE OWE OUR VETERANS EVERYTHING

(Mr. KIRK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KIRK. Mr. Speaker, last week the administration announced plans for veterans to rely on private insurance company payments for the treatment of their war wounds. The American Legion's Commander Rehbein and the Iraq and Afghanistan Veterans of America Executive Director Reickhoff have already expressed very strong concerns.

The government broke these soldiers in battles across World War II, Korea, Vietnam, Iraq, and Afghanistan. We, the citizens of America, owe veterans care through our government. Veterans should not depend on private insurance companies who bear no moral bond to soldiers or their pain.

One of President Washington's first missions was to care for veterans. President Lincoln promised "to care for him who bore the brunt of battle, his widow and his orphan."

President Obama eloquently portrays Lincoln as his hero, and it is clear what Lincoln would advise today.

Care for our veterans, Mr. President. Private companies owe them very little. We, the American people and our Federal Government, owe them everything.

□ 1215

DISCRIMINATION IS STILL ALIVE AND WELL

(Mr. KAGEN asked and was given permission to address the House for 1 minute.)

Mr. KAGEN. Mr. Speaker, discrimination is alive and well all across America. You may not have heard about it on the radio or seen it on television, but it's still alive and well. You won't see it on television because discrimination today is beneath the skin, beneath the skin of our entire society, as insurance companies, omnipotent as they are, continue to discriminate based on the preexisting condition of a citizen.

These insurance companies no longer discriminate on the basis of skin color. Rather, they discriminate against women because of the calcium, or the lack of it, in their bones. They discriminate against people who may have coronary artery disease or any of a number of medical conditions.

The lessons of both my profession and my faith have made it clear: We are all really the same beneath our skin. We're all made of the same clay. And 40 years after the civil rights movement has established that all citizens of any color shall be able to drink from the same water fountain, sit on the same bus, and attend the same

medical clinic, our Nation still remains divided, not by skin color but by skin chemistry.

Mr. Speaker, it's time we bring an end to discrimination in health care.

THE FLOGGING OF GRANDMA

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Mr. Speaker, last week was International Women's Day to proclaim human rights for all women.

Obviously, Saudi Arabia didn't get the memo. In the name of religion, the official Muslim religious police arrested a 75-year-old woman for accepting bread from two young men. The crime: She had the arrogance to be with males who were not blood kin.

To the religious police in Saudi Arabia, her behavior cannot be tolerated. So the 75-year-old woman was hauled off to court, and a judge ordered her to receive, get this, 40 lashes and 4 months in jail with deportation to follow. And the two boys who were kind to her by giving her bread: lashes and prison for them too.

The official Muslim religious police are feared by women in Saudi Arabia because they enter homes to enforce dress codes, prayer times, and segregation of the sexes. Flogging women in the name of religion for accepting bread from young men seems to be anti-social action and contrary to basic human rights.

So much for the idea of helping the widows and the orphans. Maybe next year grandmas in Saudi Arabia can celebrate International Women's Day without being flogged by their government.

And that's just the way it is.

THE ECONOMY

(Ms. RICHARDSON asked and was given permission to address the House for 1 minute.)

Ms. RICHARDSON. Mr. Speaker, mistaken policies, misplaced priorities, and profound irresponsibility have brought us where we are today. President Obama and this Congress are committed to real change. And what is that change? We propose solutions, real solutions. An honest budget, rejecting gimmicks, and eliminating the wasteful spending that has brought us to this trillion dollar deficit that we now have today.

What the American people need are tax cuts, and 95 percent of Americans will now receive a tax cut. What do the American people need? A double commitment of the investment of Pell grants, of looking at a commitment to Head Start, and so many of the other vital areas.

When we look at this Congress, we are committed to fixing health care,

not to be a party of "no," but to say that we are going to address what is happening for struggling homeowners.

The American Recovery Act addressed and is helping us to bring forward 3.5 million jobs to help stabilize the State budgets and to dig us out of this fiscal mess that we inherited over the last 8 years.

We can recover, we must recover, because as Americans, failure is not an option.

ENERGY

(Mr. CASSIDY asked and was given permission to address the House for 1 minute.)

Mr. CASSIDY. Mr. Speaker, as regards to energy, I'm an all-of-the-above-type person. We need a diversity of energy sources. But we will not be carbon free for generations. Our need for plastics, fertilizers, lubricants, and fuels so dictates.

So given the fact that we're not going to be carbon free, it seems like domestic energy production should be encouraged. If we've got to have something, it's better for us to buy it from ourselves, for our workers, for the money to stay here.

In Louisiana alone, my home State, oil and gas production in the petrochemical industry employs 320,000 people. They work as welders, pipe-fitters, on barges, engineers. Countless small businesses with another 100,000 or so workers. Yet the President's budget contains at least eight separate tax hikes specifically targeting domestic oil and gas production.

Tax hikes create uncertainty, uncertainty creates caution, and caution inhibits economic activity. As we seek energy security and to create and preserve American jobs, I have to ask why are we punishing the industry which contributes both?

FORMER VICE PRESIDENT CHENEY'S ATTEMPT TO REWRITE HISTORY

(Mr. YARMUTH asked and was given permission to address the House for 1 minute.)

Mr. YARMUTH. Mr. Speaker, on Sunday former Vice President Cheney made the latest in a series of outrageous attempts to rewrite history. He suggested that America was less safe now than under President Bush. Well, as a former journalist and editor, I'm compelled to do a little rewrite of his story.

I think it is important to note that under President Bush and Vice President Cheney, we let Osama bin Laden escape. We took our eye off the ball in Afghanistan and moved to Iraq. We went into Iraq with no plan for victory. We heard from Vice President Cheney that we were going to be greeted as liberators, that WMD would certainly be

found, and that this war was going to be very short and cost us very little money.

My editing of Vice President Cheney's statement on Sunday would be that he did not exactly tell the whole story.

Fortunately, the American people know the whole story. They know that we are much safer now with President Obama in the White House. So as the recently departed Paul Harvey would have said, "And now you know the rest of the story."

CALLING FOR THE PREVENTION OF BONUSES PAID TO AIG EXECUTIVES AT TAXPAYERS' EXPENSE

(Mr. BUCHANAN asked and was given permission to address the House for 1 minute.)

Mr. BUCHANAN. Mr. Speaker, the American people were outraged yesterday, and with good reason, when they learned that the bonuses of \$165 million were going to executives at AIG, an insurance company. They are the very executives who drove the company to the ground and helped create the economic problems we're facing today. Instead of getting bonuses, they should be fired.

AIG is now 80 percent owned by the Federal Government, which is the American people. This is an outrageous injustice at taxpayers' expense.

I have been in business 30 years. We always pay for results, proven results, in this case something that would be a return to the American people. But that hasn't happened. This rewards greed and recklessness.

AIG recently reported in a 2008 fourth quarter more than \$60 billion in losses, all while the unemployment in America hit a 25-year high.

I ask the President to use all the power at his disposal to prevent these bonuses from being paid at taxpayers' expense.

CALLING FOR 100 PERCENT TAX ON "PERFORMANCE" BONUSES BY ANY COMPANY IN WHICH THE GOVERNMENT OWNS A MAJORITY STAKE

(Mrs. MALONEY asked and was given permission to address the House for 1 minute.)

Mrs. MALONEY. Mr. Speaker, we all know the news yesterday that AIG is paying over \$100 million in bonuses. I find this an absolute outrage. I'm glad the President has directed the Treasury Department to use all legal means to restrict these bonuses.

But we in Congress can actually make the laws, and here's a law we should make: Tax the bonuses of any company in which the government owns a majority stake at 100 percent. I have introduced this bill today—tax so-

called “performance” bonuses at 100 percent.

Bonuses are supposed to be given to someone who has done a good job. But AIG, as my colleague said, and we’ve found something we agree on, lost over \$70 billion in the last quarter. We put in \$170 billion of taxpayers’ money. They don’t deserve a bonus. They deserve better management. They deserve certainly a restriction on the bonuses that they have. And I really applaud President Obama, who said yesterday that this isn’t just a matter of dollars and cents; it’s a matter of fundamental values.

I urge my colleagues to join me in taxing this bonus.

PRESIDENT’S BUDGET: TAXES TOO MANY TOO MUCH

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, Democrats have broken their promise not to raise taxes on 95 percent of Americans. Democrats are proposing to tax small businesses and everyone who plans to turn on a light, drive a car, or heat their home.

Under the Democrat budget, many small businesses will see their taxes go up. At a time when our economy is in trouble, this budget raises taxes on the one group that creates the most jobs in America.

But small businesses are not alone. Under the new Democrat cap, trade, and tax proposal, every household in this country would pay as much as \$3,128 each year in higher energy costs. This would surely overwhelm any tax break they may be getting.

The President says this budget is not just about numbers on a page. I agree. There are real families and small businesses that will be hurt by the \$1.4 trillion in new taxes this budget will create.

In conclusion, God bless our troops, and we will never forget September the 11th.

CALLING FOR COMPREHENSIVE FINANCIAL REGULATORY REFORM AND ACCOUNTABILITY

(Mr. ARCURI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ARCURI. Mr. Speaker, the bonuses announced by AIG are nothing less than a slap in the face to the tax-paying families across my district and across the entire country. Families that are struggling to pay rising energy bills and put food on their table.

To expect hardworking middle class families in my district and across the country to foot the bill for executive bonuses when those same executives

failed in their job and dragged our economy down with them is completely unacceptable.

My constituents pay their bills on time. They make hard financial choices, and they meet their responsibilities each and every day without a bailout.

This is truly a nonpartisan issue. I will work with my colleagues on both sides of the aisle and with the administration to build a regulatory system founded on accountability. That is why I support legislation to hold these irresponsible individuals accountable and demand that they pay back to the American people the money that we gave them in bailouts.

Now is the time for comprehensive financial regulatory reform and accountability. Never again should we leave the foxes in charge of the henhouse.

THE DEMOCRAT PARTY: THE PARTY OF “OWE”

(Mr. KINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KINGSTON. Mr. Speaker, the Democrat budget that we are looking at of \$3.6 trillion spends too much, taxes too much, and it borrows too much.

Not that spending is a problem to this majority. Take recently the town of Union, New York, which received \$578,000 in stimulus money that they did not ask for, and the money was earmarked for a homeless prevention shelter, which they do not have. Now the town supervisor says this is nice but we’re not aware of any homeless problem in Union, New York.

Nonetheless, the White House, instead of saying this is a mistake, they simply say we encourage them to develop creative strategies for this funding.

This party is the party of “owe.” They owe China. They owe their big union lobbyists. They owe our children and the future generations. And, oh, my goodness, look how many O’s are in \$3.6 trillion.

□ 1230

FISCAL YEAR 2010 BUDGET

(Mr. CONNOLLY of Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CONNOLLY of Virginia. Mr. Speaker, I rise today to address the President’s fiscal year 2010 budget proposal. We are in a crucial time in our Nation’s history. According to a recent CNN poll, 45 percent of Americans believe that another Great Depression is likely.

The President’s budget represents a bold strike to revitalize the economy

and provides a path to future economic stability and prosperity. The proposal is a good start.

There are, however, areas that require further refinement. The suggestion to limit itemized deductions will have negative unintended consequences. As charitable donations become scarcer in these trying times, signaling an intent to limit their tax-deductible value may further impair charitable giving at precisely the time we need more.

Capping the mortgage interest deduction will cause unintended discouragement for homeownership at precisely the time we need to stabilize home values. We also must consider increasing the \$250,000 income cap for raising tax brackets. In my district, with one of the highest costs of living and one of the highest percentages of dual incomes, the proposed level would be a difficult imposition. Additionally, we must ensure pay parity between civilian and military government employees as we ask more of the civilian workforce.

Overall, I expect the proposed budget to be worked out over the next few weeks in the Budget Committee.

LEGISLATIVE MALPRACTICE

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, the President’s chief of staff said, “You never want a serious crisis to go to waste. It’s an opportunity to do things that you think you could not do before.”

In other words, the administration and this Congress are exploiting our financial crisis, inserting many of their political-agenda items into the massive spending bills without due deliberation: items like repeal of welfare reform; like the comparative effectiveness board that will lead to rationed health care; like electricity rate decoupling, which increases electricity prices as people use less energy; like easing Cuba travel restrictions; like mandating Davis-Bacon for all contract projects in the country; like killing school choice for poor kids in Washington; and parts of government-run health care and the cap-and-trade energy taxes and more and more.

Without one Member of the House reading these 1,100-page-plus bills, Mr. Speaker, this is legislative malpractice.

AIG AND THEIR BIG-TIME BONUSES

(Mr. SAM JOHNSON of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SAM JOHNSON of Texas. Mr. Speaker, my e-mail inbox is full of constituents fed up with AIG. I don’t

blame them. I have had it up to here with bad news about AIG and their big-time bonuses. They should return that money.

As a U.S. News columnist asked, "Forget bonuses. Why are these people still collecting regular paychecks?" I am glad that New York Attorney General Andrew Cuomo demanded AIG provide information on who is receiving bonuses in its Financial Products Group. Those who receive the fat-cat bonuses are mainly responsible for the company's and the country's financial problems.

I say fire them all. They don't deserve bonuses. Turn them over to the Marines. Put them in the brig.

CONGRATULATING ZWOLLE AND SPRINGHILL ON WINNING BASKETBALL STATE CHAMPIONSHIPS

(Mr. FLEMING asked and was given permission to address the House for 1 minute.)

Mr. FLEMING. Mr. Speaker, I want to acknowledge the accomplishments of two outstanding basketball programs that brought home Louisiana State titles in my district over this weekend.

The Springhill High School Lumberjacks won the Class 2A State championship on Saturday with a 70-66 victory over Many High School. Antonious Markray ended a stellar high-school career with a game high of 29 points for the Lumberjacks. This is the first State title in the modern era for Springhill, Louisiana.

Also winning a State title this weekend were the Class B champions from Zwolle High School. The Hawks beat Rapides 55-53 with Antonio Holmes leading the way. He finished with 17 points and was awarded the MVP trophy. This is the third State title in 4 years for Zwolle.

Congratulations to the players, coaches and parents of the Lumberjacks and the Hawks for a job well done.

HONORING THE EDEN PRAIRIE EAGLES BOYS HOCKEY TEAM

(Mr. PAULSEN asked and was given permission to address the House for 1 minute.)

Mr. PAULSEN. Mr. Speaker, I rise to pay tribute to the Eden Prairie Eagles boys hockey team that won the Minnesota State High School Class AA Tournament just this past weekend.

Minnesota is known as the "State of Hockey," and I submit we have the highest quality high school hockey tournament in the Nation. Led by coach Lee Smith, the talented Eden Prairie team had a tough road to the title.

They beat defending State champion Hill-Murray in the opening round, and

they followed that win with a victory over a tough Blaine team. In the final, they defeated a tough Moorhead team as well, 3-0, to win the school's very first high school hockey championship for Eden Prairie.

As a resident of Eden Prairie myself, I am especially proud of the Eagles. I ask my colleagues to join me in offering our praises and congratulations to the coaches, the parents and the talented group of scholar athletes for a great season. And I also heartily applaud the school spirit of the student cheering section, which was the largest at the tournament.

OUTRAGE OVER HARASSMENT OF U.S. UNARMED CIVILIANS IN INTERNATIONAL WATERS

(Mr. FORBES asked and was given permission to address the House for 1 minute.)

Mr. FORBES. Mr. Speaker, I have watched in the last several minutes as one by one people have come up to these podiums and beaten them and talked about being outraged. But 10 days ago, one of our naval vessels that was unarmed, full of civilians, was harassed by a Chinese aircraft and five Chinese vessels, and this House has not had time to express the outrage for what has happened with that.

We had time to pass a bill that expressed our outrage of how they treated the people of Tibet, but not over unarmed American civilians. We had time yesterday to pass three pieces of enormous legislation naming post offices, but not time to express our outrage over the harassment of U.S. civilians who are unarmed in international waters. Today we will leave at 3 o'clock, but we won't have time to express our outrage over unarmed civilians.

Mr. Speaker, I hope this House leadership will change its position, bring the resolution to the floor and send a message that we are going to protect and defend our people when they are in international waters.

PRESIDENT'S BUDGET SPENDS TOO MUCH, TAXES TOO MUCH AND BORROWS TOO MUCH

(Mr. PENCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PENCE. It's St. Patrick's Day, Mr. Speaker, and my Irish grandfather would want me to do nothing short of acknowledging that and wearing the green. But I have to tell you, with the headlines about bailouts, the President's budget for \$3.5 trillion and more spending and more taxes to grow government and pay for more bailouts, it's enough to get my Irish up.

Reality is that when the American people are taking a closer and closer

look at this administration's budget, they know three things. This President's budget spends too much, it taxes too much and it borrows too much.

Believe it or not, in these times when the American people are saying enough is enough on big government spending and bailouts, this administration is poised to raise taxes on small business owners. Fifty percent of Americans who file taxes above the level the President wants to raise them are actually small business owners filing as individuals.

The average American household will pay \$3,100 more with the President's new energy tax. And with the President capping charitable giving, charities in this country, churches and synagogues and the like could lose \$9 billion this year alone.

Enough is enough. We have to say no to the President's budget and give the American people a budget that is strong and diverse and restrained and committed to growth as they are.

HOUSE CONSERVATIVES AND THE MINORITY TODAY ARE READY TO LEAD AND OFFER ALTERNATIVES

(Mr. CULBERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CULBERSON. Mr. Speaker, the conservatives who won re-election in the House are those who overwhelmingly voted against the massive spending programs that were proposed over the course of the last administration, who voted against the \$1.5 trillion of new spending of this new administration. And we, House conservatives and the minority today, are ready to lead. We are offering alternatives to this massive spending program proposed by this new administration.

In only 38 legislative days, Mr. Speaker, the new liberal majority that rules Congress and rules the White House has managed to spend more money in less time than any Congress in the history of the United States. Never before have so few spent so much money in so little time.

This budget proposed by the White House, spending \$3.5 trillion, driving up the deficit to triple the level of last year, doubling the national debt in 8 years, ignores the financial hurricane just over the horizon that House conservatives are ready to deal with. This Nation faces unfunded liabilities at unprecedented levels, and we have got to just say "no" to more spending.

SMALL BUSINESSES AND NEW TAX BURDEN

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, growing up, my father ran two small businesses, a sporting goods business and a marina, both of which I worked at over the years. My grandfather's family worked a local dairy and farm.

So, Mr. Speaker, I was a bit taken back when the administration's budget proposal came across my desk last week. I know you often hear politicians speak about small business being the backbone of our economy, but it's true, and even more so in the American rural communities that I represent.

With 710 new jobs created by small business owners, these individuals are key to the revitalization of our economy and putting folks back to work. This budget proposal will increase the tax burden on every single small business owner not once, but twice. Overhead costs, raw materials, transportation, and every other segment of the supply chain will skyrocket under this proposal.

This is not acceptable and will only lengthen this recession and penalize the very best people that are best equipped to put folks back to work. Now, I will give credit where credit is due. I was pleased to see the President take a step in the right direction yesterday by relaxing the lending rules at the Small Business Administration to allow credit to flow more freely.

PRESIDENT'S BUDGET TAXES TOO MUCH

(Mr. NEUGEBAUER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. NEUGEBAUER. Mr. Speaker, hardworking Americans across this country are trimming their budgets and finding ways to save and make sacrifices. In these tough economic times the Federal Government should be held to that same standard.

During a time of economic instability, we cannot start raising taxes to pay for more government spending. Unfortunately, that's exactly what the President has proposed in his budget that he has submitted to Congress. The administration proposes to raise taxes \$1.4 trillion over the next 10 years, which includes taxes on small businesses, the backbone of our economy.

Let's be clear about what \$1 trillion is. If you started counting to \$1 trillion, 1, 2, 3, it would only take you 31,708 years to count to 1 trillion. Yet we are talking about \$1.3 trillion in new taxes.

The American taxpayers deserve a better plan for individuals and small businesses. We must empower American individuals and families. The road to economic recovery is paved with healthy small business communities creating jobs and opportunity.

Congress and the administration should focus on solutions that empower

individuals and businesses to succeed in the economy, rather than solutions that spend too much, borrow too much and tax too much.

PRESIDENT'S BUDGET IS RECIPE FOR HIGH INFLATION

(Mr. COFFMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COFFMAN. Mr. Speaker, the President's budget is a recipe for high inflation, higher interest rates and a permanent downsizing of the U.S. economy.

For the President to say that this budget has fiscal year discipline defies all common sense. The President says he will cut the deficit in half over the next 5 years. However, that is only after he hikes it to over \$1 trillion in the first year. His promise of never having a balanced budget has even caused our largest public debt holder, the People's Republic of China, to take notice and express concern over the lack of fiscal responsibilities in this budget.

When the economy begins to recover, public borrowing under the President's budget will compete with the demand for private borrowing, leading to a dramatic rise in interest rates and inflation, weakening the value of the dollar and lessening the value of U.S. Treasury notes.

Mr. Speaker, this budget taxes too much, spends too much and borrows too much and must be defeated.

HONORING UNIVERSITY OF WYOMING NORDIC SKI CLUB

(Mrs. LUMMIS asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. LUMMIS. Mr. Speaker, I rise today to recognize an achievement of the University of Wyoming Nordic Ski Club.

Two weeks ago, this team swept the United States Collegiate Ski and Snowboard Association Nationals, with the men's and women's team both bringing home the gold.

I would like to congratulate coaches Christi Boggs and Rachel Watson, who led this team to double championship titles at Devil's Thumb Ranch in Colorado. This is the fourth national title for the University of Wyoming's women's program and the second for the men's program in 10 years.

Particular recognition should also go to Daniel Lewis, who came away with three individual championships, as well as his fellow teammates on the men's championship relay team, Eliah Pedersen and Evgeniy Panzhinskiy. In addition to these three accomplished young men, John Kirilin was named an Overall Individual All-American.

On the women's team, this title was awarded to Gracey Lewis, Kari Boroff, Gwynn Barrows and Marie Cartwright.

Again, I congratulate the University of Wyoming ski teams, my alma mater ski teams, on all their success. The Cowboy State is proud of these young men and women.

□ 1245

CAP-AND-TAX PROVISION HURTS AN AILING ECONOMY

(Mr. SHIMKUS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHIMKUS. The President today said that he was frustrated at the Republicans' "just say no" attitude. Well, this is what I am going to say "no" to. I am saying "no" to a 686 billion carbon tax increase. What does that mean?

This is Peabody Mine No. 10 in 1990. After the last Clean Air amendments, this mine was shut down. We lost over 1,200 mineworkers' jobs because of that.

The carbon tax, the cap-and-tax provision in the budget bill, will raise costs to every energy user in this country, hurting manufacturing, hurting retail industries. It's egregious, it's not necessary, and it only hurts an ailing economy.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Record votes on postponed questions will be taken later.

SUPPORTING PROFESSIONAL SOCIAL WORK MONTH AND WORLD SOCIAL WORK DAY

Mr. POLIS. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 240) to support the goals and ideals of Professional Social Work Month and World Social Work Day, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 240

Whereas social workers have the demonstrated education and experience to guide individuals, families, and communities through complex issues and choices;

Whereas social workers help people in all stages of life, from children to the elderly, and in all situations from adoption to hospice care;

Whereas social workers are in schools, courtrooms, drug clinics, hospitals, senior centers, shelters, nursing homes, the military, disaster relief, prisons, and corporations;

Whereas social workers are dedicated to improving the society in which we live and connecting individuals, families, and communities to available resources;

Whereas social workers stand up for others to make sure everyone has access to the same basic rights, protections, and opportunities;

Whereas social workers, such as Harry Hopkins, Frances Perkins, Whitney M. Young, Jr., and Dr. Dorothy I. Height have been the driving force behind important social movements in the United States and abroad;

Whereas, according to the United States Department of Labor, Bureau of Labor Statistics, employment for social workers is expected to grow much faster than the average for all occupations;

Whereas Professional Social Work Month and World Social Work Day, which is March 17, 2009, will build awareness of the role of professional social workers and their commitment and dedication to individuals, families, and communities everywhere through service delivery, research, education, and legislative advocacy; and

Whereas the 2009 Social Work Month theme—Social Work: Purpose and Possibility—highlights the special characteristics of those who choose social work as a profession, and underscores the goals of their work: Now, therefore, be it

Resolved, That the House of Representatives—

(1) supports the goals and ideals of Professional Social Work Month and World Social Work Day;

(2) acknowledges the diligent efforts of individuals and groups who promote the importance of social work and who are observing Professional Social Work Month and World Social Work Day;

(3) encourages the American people to engage in appropriate ceremonies and activities to further promote awareness of the life-changing role of social workers;

(4) recognizes with gratitude the contributions of the millions of caring individuals who have chosen to serve their communities through social work; and

(5) encourages young people to seek out educational and professional opportunities to become social workers.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Colorado (Mr. POLIS) and the gentleman from Pennsylvania (Mr. THOMPSON) each will control 20 minutes.

The Chair recognizes the gentleman from Colorado.

GENERAL LEAVE

Mr. POLIS. I request 5 legislative days during which Members may revise and extend and insert extraneous materials on House Resolution 240 into the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. POLIS. Mr. Speaker, I rise today to support the goals and ideals of Professional Social Work Month and World Social Work Day. Social workers are valuable members of all communities,

helping people in all stages of life, from birth through the elderly, and in all situations, from adoption to hospice care and end of life. Dedicating their education and experience, social workers help to guide individuals, families, and communities through complicated issues and complex choices.

There are more than 600,000 people in the United States who have devoted their lives to social work and to the improvement of the society in which we live by obtaining social work degrees. Many social workers have been the driving force behind important social movements in the United States and abroad.

A few examples include Harry Hopkins, who relocated to New Orleans in order to work for the American Red Cross as Director of Civilian Relief, Gulf Division; or Francis Perkins, who championed the minimum wage laws and reduced the workweek for women to 48 hours.

My late grandmother, Ruth Schutz, was a social worker for over 20 years in New York City, as well as a progressive activist. These are the frequently unsung heroes of our communities, and that's why it's important that we recognize them here today, Mr. Speaker.

Social workers labor in schools, courtrooms, drug clinics, hospitals, senior centers, shelters, nursing homes, the military, disaster relief, prisons, and corporations all over the country as they stand up for others to make sure that everyone has access to the same basic rights, protections, and opportunities.

This is hard work, emotionally difficult, and frequently thankless work, which is why it's so important that our body take this step to honor social workers here today.

However, the need for social workers is expected to grow twice as fast as other occupations, especially in gerontology and home health care issues as our aging demographic requires more services for our seniors. Substance abuse, private social service agencies, and school social work also continue to increase.

Professional Social Work Month and World Social Work Day, which is March 17, 2009, will build awareness of the role of professional social workers and their commitment and dedication to individuals, families, and community everywhere through service delivery, research, education, and legislative advocacy.

I urge my colleagues to support this resolution honoring those who choose social work as a profession in their endeavors to better society.

I reserve the balance of my time.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of House Resolution 240, which supports the goals and ideals of Profes-

sional Social Work Month and World Social Work Day.

As a health care professional of three decades and a former licensed nursing home administrator, I observed personally every day social workers making meaningful contributions throughout the Nation.

They are on the front lines helping people overcome life's most difficult challenges—poverty, abuse, addiction, illness, disability, discrimination, and more. Social workers are the Nation's largest providers of mental health services, delivering 60 percent of mental health treatment.

However, these highly trained professionals also work in schools, hospitals, health care agencies, senior centers, crisis centers, and military bases. Social workers also actively advocate changes in policy and legislation to strengthen the social safety nets critical to so many. Whether in direct practice, administration, education, research, or policy development, social workers promote social justice for all.

According to the International Federation of Social Workers, social work grew out of humanitarian and democratic ideals, and its values are based on respect for equality, worth, and dignity of all people.

Since its beginnings over a century ago, social work has focused on meeting human needs and developing human potential. Human rights and social justice serve as the motivation and justification for social work action. In solidarity with those who are less fortunate, the profession strives to alleviate poverty and to promote inclusion for the most vulnerable populations.

This year's Social Work Month theme—"Purpose and Possibility"—truly highlights the special characteristics of those who choose social work as a profession and underscores the goals of their work. While their day-to-day work often goes unnoticed, we stand today to recognize with gratitude the contributions of the millions of caring individuals who have chosen to serve their communities through social work. I ask my colleagues to support this resolution.

I yield back the balance of my time.

Mr. POLIS. By passing this resolution and by bringing attention to Professional Social Work Month and World Social Work Day, which is March 17, 2009, we can not only bring attention and appreciation to an important profession, but engage in a discussion about the important role of social workers in keeping and weaving our community fabric together.

I ask my colleagues to join me in supporting this important bill.

Ms. SHEA-PORTER. Mr. Speaker, I am pleased to rise today to speak on behalf of House Resolution 240, which honors the dedication and compassion of professional social workers. Our highest calling is to provide service to others, especially those less fortunate than ourselves.

In the early 20th century, thousands of people lived in despair and poverty, and it was the early progressive moment in which the social work movement was born, providing food, clothing, health care and education to the less fortunate.

Social workers had a role in civil rights and in women's freedom. Today, social workers continue this fight to ensure that vulnerable families have the support and the health care that they need.

Social workers are everywhere in our society, caring for all of us. They help people in all stages of life, from children to the elderly, and in all situations, from adoption to hospice care. You can find social workers in hospitals, police departments, mental health clinics, military facilities and corporations.

Professional social workers are the Nation's largest providers of mental health care services. They provide more mental health services than psychologists, psychiatrists and psychiatric nurses combined.

The Veterans Administration employs more than 4,400 social workers to assist veterans and their families with individual and family counseling, client education, end-of-life planning, substance abuse treatment, crisis intervention and other services.

Today we thank all those who have toiled in the fields of our community, including my grandmother, who left the comfort of her home each day at the turn of the century and went to the Lower East Side to help immigrants. And we praise all of those who reach out to others every day in their community.

Social workers' service makes our communities stronger. March is National Professional Work Month, and Tuesday, March 17 is World Social Work Day. I honor their service and thank them for caring for all of us each day.

Mr. POLIS. I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. POLIS) that the House suspend the rules and agree to the resolution, H. Res. 240, as amended.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. POLIS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

SUPPORTING NATIONAL WOMEN'S HISTORY MONTH

Mr. CLAY. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 211) supporting the goals and ideals of National Women's History Month.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 211

Whereas the purpose of National Women's History Month is to increase awareness and

knowledge of women's involvement in history;

Whereas as recently as the 1970s, women's history was rarely included in the kindergarten through grade 12 curriculum and was not part of public awareness;

Whereas the Education Task Force of the Sonoma County (California) Commission on the Status of Women initiated a "Women's History Week" celebration in 1978 centered around International Women's History Day, which is celebrated on March 8th;

Whereas in 1981, responding to the growing popularity of women's history celebrations, Congress passed a resolution making Women's History Week a national observance;

Whereas during this time, using information provided by the National Women's History Project, founded in Sonoma County, California, thousands of schools and communities joined in the commemoration of National Women's History Week, with support and encouragement from governors, city councils, school boards, and Congress;

Whereas in 1987, the National Women's History Project petitioned Congress to expand the national celebration to include the entire month of March;

Whereas educators, workplace program planners, parents, and community organizations in thousands of American communities, under the guidance of the National Women's History Project, have turned National Women's History Month into a major local learning experience and celebration;

Whereas the popularity of women's history celebrations has sparked a new interest in uncovering women's forgotten heritage;

Whereas the President's Commission on the Celebration of Women in American History was established to consider how best to acknowledge and celebrate the roles and accomplishments of women in American history;

Whereas the National Women's History Museum was founded in 1996 as an institution dedicated to preserving, interpreting, and celebrating the diverse historic contributions of women, and integrating this rich heritage fully into the Nation's teachings and history books;

Whereas the House of Representatives recognizes March 2009 as National Women's History Month; and

Whereas the theme of National Women's History Month for 2009 is women taking the lead to save our planet: Now, therefore, be it Resolved, That the House of Representatives—

(1) supports the goals and ideals of National Women's History Month; and

(2) recognizes and honors the women and organizations in the United States that have fought for and continue to promote the teaching of women's history.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Missouri (Mr. CLAY) and the gentleman from California (Mr. ISSA) each will control 20 minutes.

The Chair recognizes the gentleman from Missouri.

GENERAL LEAVE

Mr. CLAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CLAY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a member of the House Committee on Oversight and Government Reform, I am pleased to join my colleagues in consideration of H. Res. 211, which is designed to provide recognition and support for National Women's History Month, which is commemorated annually during the month of March.

Sponsored by our colleague, Congresswoman LYNN WOOLSEY of California, H. Res. 211 was introduced on March 5, 2009, and is currently cosponsored by 115 Members of Congress, both men and women, as well as from both sides of the aisle. The measure was considered by Chairman TOWNS and the Oversight panel on March 10, 2009, where it was passed without objection by voice vote.

Mr. Speaker, I contend that it would be challenging to recount history without recognizing the profound role that women have played in every community, State, and country throughout the world. While only a small measure of appreciation, today's consideration of H. Res. 211 is designed to express the appreciation and the gratitude of this legislative body for the priceless and timeless contribution of women throughout history.

The origins of National Women's History Month dates back to 1978 when organizers in Sonoma County, California, established a public celebration of women's history, calling it "Women's History Week." In 1987, Congress expanded the celebration to a month-long commemoration by declaring March as Women's History Month.

Since the 1970s, we in America have seen notable growth in the study and expansion of women's history. In fact, today almost every college offers women's history courses and most major graduate programs offer doctoral degrees in this important field of study.

Even today, we continue to witness women history makers—from our very own Speaker of the House to the Speaker of the California State Assembly. From Governors and mayors to successful businesswomen, scientists, athletes, teachers and, of course, mothers, women are clearly making a difference in our country and in our world.

Mr. Speaker, I reserve the balance of my time.

Mr. ISSA. I yield myself such time as I may consume.

Mr. Speaker, I join with my colleagues in recognizing Women's History Month. This is important. We recognize a great many days and months here in the Capitol, and sometimes we get disparaged for it. But I think when we look at the important role and the partnership since Colonial times until this very day that women have spent and made in our history, we do so without it being properly marked in history.

One needs to dig a little deeper in order to see the equal participation of

women. Our Founding Fathers did not make the decision to go to war without the support of their families because their land, their property, and their very lives were at stake when they made that decision.

Since 1987, this country has recognized Women's History Month in this month, and we should. National Women's History Month has also received the support of Federal, State, and local officials that allow for public fora to raise the awareness and perhaps to inspire a next generation of women to do all that they can do, be all that they can be, and participate in ways that women throughout our history have, and more.

So I join with my colleagues, and particularly my California colleague, Representative WOOLSEY, in asking that we take a moment to recognize Women's History Month.

I reserve the balance of my time.

□ 1300

Mr. CLAY. Mr. Speaker, I recognize the sponsor of the resolution, Ms. WOOLSEY of California, for 4 minutes.

Ms. WOOLSEY. Mr. Speaker, I rise to honor Women's History Month. Women were once considered second-class citizens whose rights were restricted, from voting to property ownership. But today, women serve in the Senate and the House of Representatives, they serve as members of the President's cabinet, and as Speaker of the House of Representatives. It is important that the role that women have played in shaping this country is honored. However, it wasn't until the late 1970s that women's history was taught in our schools. It was almost completely absent in media coverage and cultural celebrations.

That is why, Mr. Speaker, in 1998, the Education Task Force of the Sonoma County Commission on the Status of Women, when I was the Chair of the Commission on the Status of Women, initiated a women's history week celebration, a celebration that centered around International Women's History Day. The National Women's History Project, located in my district, was founded in 1980 by many dedicated women who poured their hearts and their ideas into promoting and expanding the weeklong celebration. Because several dedicated women, including Molly Murphy MacGregor, Mary Ruthsdotter, Maria Cuevas, Paula Hammett, and Bette Morgan, decided to write women back into history, thousands of schools and communities then started to commemorate Women's History Week by bringing lessons on women's achievements into the classroom, staging parades, and engaging neighborhoods and churches in celebration of the contributions of women.

The hard work and dedication of these women and the support of the Sonoma County Commission on the

Status of Women paid off. They started a national movement, and in 1981 Congress responded to the growing popularity of Women's History Week by making it a national observance in 1987 and expanding the week to a month, the month of March.

Imagine what American history lessons would be today without teaching about Harriet Tubman's Underground Railroad; or the work of Elizabeth Cady Stanton or Susan B. Anthony, and the many women who fought for women's suffrage; or Dr. Sally K. Ride, who was the first woman in space, encouraging more girls to be interested in science.

Today, Mr. Speaker, I ask my colleagues to join me in reaffirming our commitment to the celebration of women's history by supporting H. Res. 211, to ensure our grandchildren and great grandchildren learn more about women like Amelia Earhart and, eventually, the first woman President.

Mr. Speaker, I want to thank Chairman TOWNS, Chairman CLAY, and Ranking Member ISSA for supporting this resolution. Let us reflect on the contributions of women. Let us reflect on their place in history, with the hope that the day will come, and soon, when it is impossible to study American history without remembering the contribution of women.

Mr. CLAY. Mr. Speaker, I yield 2 minutes to the distinguished gentleman from Illinois (Ms. SCHAKOWSKY).

Ms. SCHAKOWSKY. I thank the gentleman for yielding.

As cochair of the Congressional Caucus on Women's Issues, it gives me great pleasure to rise in strong support of H. Res. 211, Recognizing March As Women's History Month. I want to thank Congresswoman LYNN WOOLSEY for introducing this resolution, and to acknowledge our own woman Speaker of the House, NANCY PELOSI.

Women's History Month is about recognizing the achievements of women throughout our history, while also acknowledging the significant obstacles they had to overcome along the road to success, and the many we still face. I want to thank President Obama for creating, this month, a high-level White House Council on Women and Girls.

Our women's caucus, which is chaired by my friend and colleague, MARY FALLIN, is dedicated to addressing those challenges by supporting legislation and developing policies through our eight task forces. And I want to thank my sisters in the House for making history that will lift women and girls in the United States and around the world. We, as the more privileged women of the United States of America, see ourselves as part of an international sisterhood, where women in places like the Congo are facing a weapon of war that is low cost and low

tech called rape. We are concerned about our sisters here in the United States who are victims of domestic violence and discrimination in the workplace. We understand all these challenges, but we have seen women throughout history, fierce and strong women, who have stood up to those and overcome those challenges, and we want to acknowledge those women on whose shoulders we stand and to pledge in their memory to go forward on their behalf.

Mr. CLAY. Mr. Speaker, at this time I yield 2 minutes to my good friend from the State of Wisconsin (Ms. MOORE).

Ms. MOORE of Wisconsin. As a vice chair of the Congressional Women's Caucus, I proudly rise today in support of House Resolution 211, honoring the contributions that women have made to history both at home and abroad.

Women have never, ever had it easy, and it is vital that as we continue to move forward, we never forget the contributions of those who came before us. Whether it was Harriet Tubman, repeatedly risking death to lead slaves through the dangers and trials of the underground railroad, or Elizabeth Cady Stanton and Susan B. Anthony organizing, against the wisdom of the day, to convince the male electorate to let women vote, over and over and over again women have stood up and demanded the rights that are due to them. And today, with so much uncertainty in our economy, it is women in households across our country who are pooling together their resources to make sure their families can eat and that their children are on time for school. So let us remember Mother Ruth, Big Mama, Aunt Peaches, and Grandma Helen.

This resolution honors the contributions that women have made through history. But it does more than that. It reminds us of the strength and dignity that we possess in even the most uncertain times, and it urges us to seek out and stamp out injustice against women and their families wherever we see it. I urge support for H. Res. 211.

Mr. CLAY. Mr. Speaker, at this time I recognize my friend from Ohio, the most senior female in the House, Ms. KAPTUR, for 2 minutes.

Ms. KAPTUR. I thank Chairman CLAY for moving this bill forward. I thank him for yielding me time. I want to thank Congresswoman WOOLSEY for her great leadership in introducing House Resolution 211, honoring the contributions of women across history, and certainly here in our great country. I want to thank Congressman ISSA for his support.

I also want to say that we have a long way to go. As far as we have come, we have even further to go. The majority of women's contributions in history have never been recorded. So much of what women have lived has not even

been put to pen and to page; and that is no more true than here in the House of Representatives itself.

I was so pleased the other day to walk in the main corridor on the first floor of the Capitol, and to see for the first time in history the portrait of Shirley Chisholm hung in a place where most people who travel here will actually witness the first African American woman ever to be elected to the Congress of the United States, and who campaigned for me in my very first campaign. She left in 1983.

For a very long time, indeed the first 200 years of our country, up until this last decade, the only portrait of a woman hung in this House was of Pocahontas over in the main dome of the Capitol as she saved the life of John Smith around the year 1623. But it wasn't until this last decade where we tried to get the portraits of women hung in this Capitol, and it has proved to be as hard as winning the Revolutionary War.

Mary Norton, the child of Irish immigrants, has finally been hung in the Education and Labor Committee as the first woman to chair a committee in this House, the Education and Labor Committee. She wrote the National Labor Relations Act, No Child Labor, time-and-a-half overtime, minimum wage. And for all those years, from the Great Depression until this past year, her portrait was in a closet here in the Capitol. Imagine that. Jeannette Rankin, the first woman to ever serve from the State of Montana before suffrage was even adopted, never a portrait of her. Finally, it was commissioned. We worked so hard. She is hung up on the third floor as you come off to the visitor's gallery.

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Mr. CLAY. I yield the gentlewoman another 30 seconds.

Ms. KAPTUR. I thank the gentleman for that time. And, to say, when the Senate saw what we did in the House, they hung a portrait of Hattie Carraway, the first woman elected to the Senate, over on the Senate side.

So the road has been a very long road, even here inside the Capitol, which is supposed to reflect the history of the American people. We know as women, at the founding of our republic, as with slaves, we were considered three-quarters of a person, and it was not until 1920 with adoption of the 19th amendment to our Constitution were we considered full persons. And it was not until the Married Women Property Acts were passed in the State of New York in the late 1800s that in fact women began to emerge from the shackles that had held them in bondage for all of recorded history.

I congratulate my dear friend from California, Congresswoman WOOLSEY. I thank the chairman of the Committee. Thank you for bringing us into the 21st century.

Mr. CLAY. Let me first of all thank the gentlewoman from Ohio for that quick history lesson on women's history in this Capitol. I want to yield to my friend from South Dakota (Ms. HERSETH SANDLIN) for 2 minutes.

MS. HERSETH SANDLIN. Mr. Speaker, I thank the gentleman from Missouri for yielding. I rise in strong support of House Resolution 211, a resolution Supporting the Goals and Ideals of National Women's History Month.

I am proud to be a cosponsor of this resolution, along with many of my colleagues, and would like to thank Congresswoman WOOLSEY for introducing this legislation, recognizing the critical role women have played in shaping the Nation we are proud to call home today.

Women like the pioneers who helped settle the great plains in the West, the women who were the suffragettes working to ensure women's right to vote, the role of so many women on the home front and abroad throughout our Nation's history and serving in our Armed Forces, the important and positive influence of women across the country in the workplace, in public service, and throughout our communities.

Although we have certainly come a long way in ensuring equal treatment of women, challenges do remain. In recognition of the need to address the obstacles women still face, President Obama signed an executive order recently, creating the White House Council on Women and Girls, and I was honored to participate in the signing ceremony at the White House.

Given the number of working mothers in South Dakota, one of the highest numbers per capita in the country, and having recently become a working mother myself, I will be particularly interested in this new council's focus on this aspect of women and families. I am proud of the progress we have made to integrate the stories of heroic American women into the discussion of our Nation's history. I encourage schools and organizations across the country to participate in the celebration of National Women's History Month and make their own unique contribution to the ongoing narrative of the history of women in America.

I would like to thank again Congresswoman WOOLSEY for introducing this important resolution. I thank her for her leadership, and I encourage my colleagues to support the resolution.

Mr. CLAY. Mr. Speaker, at this time I would like to recognize the distinguished gentlewoman from Nevada (Ms. TITUS) for 2 minutes.

□ 1315

Ms. TITUS. Thank you, Mr. Chairman, for yielding.

Today I rise in strong support of H. Res. 211 and National Women's History Month, which this year celebrates

women who are taking the lead to save our planet. Women have played a critical role in the fight to protect the Earth as activists, scientists and public servants. In Nevada, many of the early environmental activists, like Tina Nappe, were women inspired to act by their childhood experiences in the beautiful Silver State. They have been joined by respected scientists, such as Dr. Peg Rees, dedicated to finding new ways to protect the desert for future generations.

As public servants, women have also made a significant contribution to saving our planet. In the Nevada legislature, for example, our women members have been ahead of their time, championing issues from renewable energy development, like Sheila Leslie, to smart growth, like Chris Giunchigliani. These many accomplishments are being documented, analyzed and disseminated to the public by the Women's Research Institute at the University of Nevada in Las Vegas under the able direction of Dr. Joanne Goodwin.

But Women's History Month is not only a month of remembrance of the important women of our past. It is an inspiration for the next generation of women and a call for them to continue the fight to leave this precious rock a better place to our children than we found it. So, thank you, Mr. Chairman, and thank you especially, Ms. WOOLSEY, for offering this important resolution that commemorates the 22nd anniversary of National Women's History Month.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I believe today as we move this important piece of legislation recognizing Women's History Month that we realize that women have played an important part in both parties and in all the major issues of our time. Certainly when we view Susan B. Anthony through the role she played as a strong women's suffragette and as a strong advocate for women's rights, the right of life, a strong pro-life advocate, we realize that women have played an important role in political decisions, decisions of war and peace and in development of so many things in our country. And they continue to do so today.

So, I would hope that as we recognize Women's History Month, we recognize that women are just as independent in their politics, in their desires and in their beliefs as any man would ever hope to be, and that we not falsely determine that somehow women will save the planet where men won't, or that there aren't women developing innovative solutions including next generation nuclear, wind and solar, and, beyond that, solutions that haven't even been talked about on the House floor.

With that, I reserve the balance of my time.

Mr. CLAY. At this time, Mr. Speaker, I would like to recognize my friend

from Florida (Ms. WASSERMAN SCHULTZ) for 2 minutes.

Ms. WASSERMAN SCHULTZ. Mr. Speaker, today I rise in recognition of National Women's History Month.

With this year's theme of "Women Taking the Lead to Save Our Planet," I am pleased to recognize the many women who have showed exceptional vision and leadership in the ongoing efforts to save our planet, women like Carol Browner, the White House Coordinator of Energy and Climate Policy, Speaker NANCY PELOSI, the first ever female Speaker of the U.S. House of Representatives, Eileen Collins, the first woman shuttle commander, and Nan Rich, my State senator, who just became the first female Democratic leader in the Florida State Senate in our history. These women exemplify that a woman can do any job a man can do. As we saw during the Presidential election, women like Secretary of State Hillary Clinton showed Americans that women are ready to lead.

My daughter, Rebecca, turned in her fourth grade biography report on Susan B. Anthony this week. She and I learned together about the right to vote and equal access to education for women that she fought for so valiantly but never lived to see. As the mother of two young daughters, it is so important to me that they see strong women taking the lead to repair our world.

As we look to the future and the steps that must be taken to save our planet, women can and will take the lead.

Ms. CORRINE BROWN of Florida. Mr. Speaker, I rise in strong support of House Resolution 211, a bill to support the goals and ideals of National Women's History Month.

I would like to send a tribute out to all of the women trailblazers who have contributed so much to our country. And I think St. Patrick's Day is the perfect time to remember them! I would like to begin by sending a very special thank you to former Congresswoman Pat Schroeder of Colorado; Congresswoman Carrie Meek of Florida; and Congresswoman Barbara Kennelly of Connecticut; and to some of the women Members who I had the honor to serve with in this body and recently passed: The Honorable Stephanie Tubbs-Jones of Ohio; The Honorable Julia Carson of Indiana; and the Honorable Juanita Millender-McDonald of California.

I would also like to discuss a few of the women who served as mentors to me over the years. I remember growing up in Jacksonville, back in the civil rights era in the United States. And I knew I wanted to do something—get involved in something big—to make a difference. And I was inspired by a strong willed woman, Ms. Gwendolyn Sawyer Cherry, who would stop at nothing to change the terrible ills that our society, and in particular, African Americans, were facing in that time period.

Ms. Sawyer Cherry was the first African-American woman to practice law in Dade County, Florida, and became one of the first nine attorneys who initially served at Legal Services in Greater Miami in 1966. She was

elected as a state representative in 1970, becoming the first African-American woman to serve as a legislator for the State of Florida. She was elected to four terms and served until 1979.

During her term, she introduced the Equal Rights Amendment in Florida, chaired the State of Florida's committee for International Woman's Year in 1978, and co-authored *Portraits in Color*. I thank you, Ms. Sawyer Cherry, for all you have done for our nation and for the state of Florida.

And the last woman I would like to mention is a very near and dear friend of mine; an African American woman who served with me both in the Florida state legislature and came up to Washington with me in 1993. I am referring to, of course, Ms. Carrie Meek of Miami.

The granddaughter of a slave and the daughter of former sharecroppers, she spent her childhood in segregated Tallahassee. She then went on to graduate from Florida A&M University in 1946, at a time when African Americans could not attend graduate school in Florida, so she was forced to travel North to continue her studies and ended up graduating from the University of Michigan.

Ms. Meek went on to become a Florida state representative in 1979, and was the first African American female elected to the Florida State Senate in 1982. As a state senator, Meek served on the Education Appropriations Subcommittee, and her efforts in the Legislature also led to the construction of thousands of affordable rental housing units.

In 1992, Congresswoman Carrie Meek was elected to the U.S. House of Representatives from Florida's 17th Congressional District. This made Ms. Meek, along with myself and Congressman ALCEE HASTINGS, to serve as the first black lawmakers elected to represent Florida in Congress since Reconstruction. Upon taking office, Ms. Meek was faced the extreme task of helping her district recover from Hurricane Andrew's devastation, and her efforts helped to provide \$100 million in federal assistance to rebuild Dade County.

As a powerful and hard working Member of the appropriations committee, Congresswoman Meek became a leader on issues from economic development, to health care funding, to education and housing. She also passed legislation to improve Dade County's transit system, their airport and seaport; construct a new family and childcare center in North Dade County; and fund advanced aviation training programs at Miami-Dade Community College. In recent times, the Honorable Carrie Meek has worked to become a civil rights advocate for senior citizens in the Miami area, as well for the Haitian community in South Florida.

In closing, I want to thank these pioneers, those who have led the way for our daughters today and in the future.

Ms. GIFFORDS. Mr. Speaker, I am honored today to celebrate March as National Women's History Month with my support of H. Res. 211, "Supporting the Goals and Ideals of National Women's History Month."

Women make up only 17% of the 111th Congress—that is abysmal given that we make up more than 50 percent of America's population. In the private sector, women CEOs are also in the minority. According to a 2008 census by Catalyst, among fortune 500 com-

panies, only 2.4 percent are women. We can do better. More voices of women are needed in our boardrooms, courtrooms and in the halls of Congress.

In my home state of Arizona, women have been trailblazers. This year, Arizona became the only state in the nation to have three female Governors in a row: Jane Hull, Janet Napolitano and Janice Brewer. In 1998, Arizona became the first state to elect women to all five of its top offices, dubbed the "Fab Five." Additionally, Sandra Day O'Connor, the first woman to serve on the United States Supreme Court, hails from the great state of Arizona.

All of these strong, independent leaders embody the true spirit of Arizona women: self-reliant, hard-working and determined.

I also want to pay tribute to the countless organizations and coalitions that work tirelessly to improve the lives of women and girls throughout Southern Arizona.

I am proud to celebrate National Women's History Month by recognizing the increased awareness and knowledge of women's involvement in history.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I stand here before you not only as a Member of the United States Congress, but as a woman. I fully support H. Res. 211, "Supporting the goals and ideals of National Women's History Month", this is an issue that I hold dear to my heart. This bill will increase awareness and knowledge of women's involvement in history.

Women's history is a vital part of American history, however it is not public knowledge; mostly in part to the lack of women's history education in the schools. I thank my colleague Representative WOOLSEY for introducing this valuable piece of legislation.

As Susan B. Anthony said "It was we, the people; not we, the white male citizens; nor yet we, the male citizens; but we, the whole people, who formed the Union" and "There never will be complete equality until women themselves help to make laws and elect lawmakers."

This national celebration and recognition of women's historic achievements began in 1980 when National Women's History Week was proclaimed by Presidential Proclamation. In 1987, this national celebration was expanded by Congressional Resolution to an entire month by declaring March as National Women's History Month.

National Women's History Month provides an opportunity to educate the general public about the significant role of women in American history and contemporary society. Establishing this focal celebration has encouraged schools to introduce new curriculum, and communities to recognize women who have been pivotal in their own communities.

The knowledge of women's history provides a more expansive vision of what a woman can do. This perspective can encourage girls and women to think larger and bolder and can give boys and men a fuller understanding of the female experience.

Today, women account for 51% of the world's population and throughout "woman's-kind" we have had countless sisters whose brilliance, bravery and power changed the course of history. H. Res. 211 recognizes and

honors the women and organizations in the United States that have fought for and continue to promote the teaching of women's history.

While we have come a long way from the early nineteenth century, when women were considered second class citizens whose existence was limited to the interior life of the home and care of the children, we have yet to achieve equality. It is a shame that a decade into the new millennium we are still fighting for women's equality and the right to be respected for our contributions both in and out of the workplace.

This bill will bring awareness to all of those women who have broken barriers and glass ceilings for the rest of us. Women such as the Honorable Speaker PELOSI, the Honorable Ruth Bader Ginsburg, Susan B. Anthony, the Honorable Barbara Jordan, Sojourner Truth, Sacagawea, Rosa Parks, Amelia Earhart, Joan of Arc, and the list could go on for miles.

However, this month is not only about the well known women of history. It is also about those less renowned, such as Belva Ann Lockwood, who fought for admittance into law school. She fought to practice before the Supreme Court and even ran two full campaigns to run for President of the United States, although she could not vote. Texas is home to a multitude of women. The women of Texas are strong, and National Women's History Month is the perfect time to celebrate the diverse population of women that reside in the great state of Texas. I am a proud Texan, and today, I want to bring attention to several women from Texas who deserve recognition and praise for their influence in the continuing fight for women's equality.

One of my personal heroes is Barbara Jordan. Barbara Jordan was born in the Fifth Ward of Houston to a Baptist minister and a domestic worker. She grew up a native Houstonian, attended Houston public school, and attended Texas Southern University in Houston. In 1966, Barbara Jordan was elected as State Senator becoming the first woman to serve since 1883. Her political career continued to grow when she was elected to Federal Representative in 1972. As a Congresswoman, Barbara Jordan sponsored the cause of the poor, black, and disadvantaged people. She is truly a strong woman from Texas that is more than deserving of our recognition during National Women's History Month.

A native Texan, Ann Richards was politically motivated from a young age. Through the 1950s and 60s, she volunteered on several Democratic Governor campaigns, and by 1976, she won her first political position as a Commissioner in Travis County. Beginning in 1982, she became the first woman elected to statewide office in 50 years as state Treasurer, and in 1990, a Democrat turned the typically red state of Texas blue. Ann Richards worked hard to champion for all of her constituents while she was in office and continued this fight even after she was out of office. In 2006, Ms. Richards passed away, but she will always be remembered for her kind heart and determined demeanor. She was an advocate for women everywhere. I want to make sure that her Texas memory is not forgotten.

Alongside Barbara Jordan and Ann Richards there are many Texas women that have

championed to represent strong, Texas women. Throughout Texas, there are women that have paved their individual paths independently and with dignity. Texas Railroad Commissioner Lena Guerrero was also a Hispanic legend in Texas. She was the youngest ever President of the Young Democrats of Texas at 21 years of age and was elected as a state representative in 1984. She was the first Hispanic and first woman on the Texas Railroad commission. Tragically, Lena met her demise at the age of 50. However, in her short time, Lena was someone to be admired and who made many contributions as a Texas citizen.

Dr. Polly Turner, an Associate Professor of Health Administration at Texas Southern University is another outstanding woman I would like to direct attention to. In 2007, she was awarded the Outstanding Texan Honoree in Education by State Representative Garnet Coleman.

Vanessa Diane Gilmore is a judge on the United States District Court for the Southern District of Texas. She was appointed to this position by President Clinton in 1994. At that time, she was the youngest sitting federal judge in the United States. She was also the first graduate of the University of Houston to be appointed to the federal bench.

Hazel Hainsworth Young is another Texan deserving of our respect. In 1926, Hazel Young was named the first Latin teacher at the brand-new Jack Yates High School. In 2008, HISD honored Ms. Young and her contributions as a teacher at her 103rd birthday.

I would also like to direct attention to Faye B. Bryant, the 21st International President of Alpha Kappa Alpha (AKA) Sorority, Inc. Faye B. Bryant was born in Houston in 1957. Since then, Ms. Bryant has worked as a teacher and administrator of Houston Independent School District (HISD). Along with her education focus, she stayed a strong supporter of her sorority, and as President of AKA, she has reached out to other nations and developed programs such as the African Village Development Program.

Mattelia B. Grays, the 18th International President of AKA, was also a native born Houstonian. After her education in Michigan and California, Ms. Grays returned to Houston to teach for public schools. Under her leadership the Rodgers Educational Enrichment Center was named one of "One of Six Super Schools" by Texas Monthly magazine. Like Ms. Bryant, Ms. Grays held positions of influence in HISD and championed for children's rights.

Aside the plethora of minority women that have made a name and established a foothold in the state of Texas, there are Caucasian women such as Patricia Lykos who is currently the District Attorney of Harris County. A graduate of the University of Houston and South Texas College of Law, Patricia has dedicated her career to the administration of justice. In 1980, she was the first Republican elected to the Harrison County criminal court bench.

Melissa Noriega is also a woman to be admired. She is a 27 year veteran of the HISD, a community activist, and a former member of the Texas House of representatives. Melissa's actions demonstrate her belief in public serv-

ice and her ability to set aside her personal agendas for the greater good.

Furthermore, Rosanna Osterman was a Texas pioneer, American Civil War nurse and philanthropist. She lived in Galveston, and during the 1853 yellow fever epidemic, she erected a temporary hospital on her family premises in order to nurse the sick and the dying. Osterman also chose to stay in Galveston during the civil war and opened her home as a hospital, first to Union soldiers, then to Confederate soldiers.

I am proud to stand here today as a female member of Congress and champion for the unending fights for the rights and equality of women, and I am proud that I am able to bring recognition to these truly amazing women from Texas.

Women have a distinct place in American history as well as world history. Women had to fight uphill battles in order to free themselves from their cages. For example, women had to prove that intense physical or intellectual activity would not in fact be injurious to the "delicate" female biology, and to be seen as individuals and not property and objects of beauty.

As Susan B. Anthony said "It was we, the people; not we, the white male citizens; nor yet we, the male citizens; but we, the whole people, who formed the Union" and "There never will be complete equality until women themselves help to make laws and elect law-makers". Women face discrimination and prejudice everyday, yet women all over the world continue to work hard to make a difference—to alter their lives and the lives of others. I believe that women have always had the power to change the world and we will. I urge my colleagues to support this important resolution.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I rise in strong support of House Resolution 211, Supporting the Goals and Ideals of National Women's History Month. I am proud to be a cosponsor of this resolution.

Throughout the month of March, we pause to celebrate the rich achievements women have made in every aspect of life—whether in arts, government, science, sports, or family life. We stand here to champion these contributions and honor those taking the lead to save our planet.

Before the 1970s women's history was largely overlooked, but today we cannot ignore the significant contributions women have made in shaping our country and building for a brighter, more peaceful future.

Recognizing these accomplishments through Women's History Month will no doubt greatly impact the self-esteem of young women and girls.

Emphasizing the wide range of educational and career opportunities, and introducing them to positive role models of all backgrounds, will leave a lasting impression on the future women leaders of our country.

Mr. Speaker, I call on my colleagues to support House Resolution 211, recognizing the unique role of women and working to increase awareness of women's involvement in our history.

Mr. ISSA. Mr. Speaker, I would like to yield back the remainder of my time.

Mr. CLAY. At this time, we yield back the balance of our time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri (Mr. CLAY) that the House suspend the rules and agree to the resolution, H. Res. 211.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. CLAY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

AUTHORIZING PILOT PROGRAM FOR PATENT CASES

Mr. JOHNSON of Georgia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 628) to establish a pilot program in certain United States district courts to encourage enhancement of expertise in patent cases among district judges.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 628

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. PILOT PROGRAM IN CERTAIN DISTRICT COURTS.

(a) ESTABLISHMENT.—

(1) IN GENERAL.—There is established a program, in each of the United States district courts designated under subsection (b), under which—

(A) those district judges of that district court who request to hear cases under which 1 or more issues arising under any Act of Congress relating to patents or plant variety protection are required to be decided, are designated by the chief judge of the court to hear those cases;

(B) cases described in subparagraph (A) are randomly assigned to the judges of the district court, regardless of whether the judges are designated under subparagraph (A);

(C) a judge not designated under subparagraph (A) to whom a case is assigned under subparagraph (B) may decline to accept the case; and

(D) a case declined under subparagraph (C) is randomly reassigned to 1 of those judges of the court designated under subparagraph (A).

(2) SENIOR JUDGES.—Senior judges of a district court may be designated under paragraph (1)(A) if at least 1 judge of the court in regular active service is also so designated.

(3) RIGHT TO TRANSFER CASES PRESERVED.—This section shall not be construed to limit the ability of a judge to request the reassignment of or otherwise transfer a case to which the judge is assigned under this section, in accordance with otherwise applicable rules of the court.

(b) DESIGNATION.—

(1) IN GENERAL.—Not later than 6 months after the date of the enactment of this Act, the Director of the Administrative Office of the United States Courts shall designate not less than 6 United States district courts, in

at least 3 different judicial circuits, in which the program established under subsection (a) will be carried out.

(2) CRITERIA FOR DESIGNATIONS.—

(A) IN GENERAL.—Except as provided under subparagraph (B), the Director shall make designations under paragraph (1) from—

(i) the 15 district courts in which the largest number of patent and plant variety protection cases were filed in the most recent calendar year that has ended; or

(ii) the district courts that have adopted local rules for patent and plant variety protection cases.

(B) EXCEPTIONS.—The Director may only designate a court in which—

(i) at least 10 district judges are authorized to be appointed by the President, whether under section 133(a) of title 28, United States Code, or on a temporary basis under other provisions of law; and

(ii) at least 3 judges of the court have made the request under subsection (a)(1)(A).

(c) DURATION.—The program established under subsection (a) shall terminate 10 years after the end of the 6-month period described in subsection (b).

(d) APPLICABILITY.—The program established under subsection (a) shall apply in a district court designated under subsection (b) only to cases commenced on or after the date of such designation.

(e) REPORTS TO CONGRESS.—

(1) IN GENERAL.—At the times specified in paragraph (2), the Director of the Administrative Office of the United States Courts, in consultation with the chief judge of each of the district courts designated under subsection (b) and the Director of the Federal Judicial Center, shall submit to the Committee on the Judiciary of the House of Representatives and the Committee on the Judiciary of the Senate a report on the pilot program established under subsection (a). The report shall include—

(A) an analysis of the extent to which the program has succeeded in developing expertise in patent and plant variety protection cases among the district judges of the district courts so designated;

(B) an analysis of the extent to which the program has improved the efficiency of the courts involved by reason of such expertise;

(C) with respect to patent cases handled by the judges designated pursuant to subsection (a)(1)(A) and judges not so designated, a comparison between the 2 groups of judges with respect to—

(i) the rate of reversal, by the Court of Appeals for the Federal Circuit, of such cases on the issues of claim construction and substantive patent law; and

(ii) the period of time elapsed from the date on which a case is filed to the date on which trial begins or summary judgment is entered;

(D) a discussion of any evidence indicating that litigants select certain of the judicial districts designated under subsection (b) in an attempt to ensure a given outcome; and

(E) an analysis of whether the pilot program should be extended to other district courts, or should be made permanent and apply to all district courts.

(2) TIMETABLE FOR REPORTS.—The times referred to in paragraph (1) are—

(A) not later than the date that is 5 years and 3 months after the end of the 6-month period described in subsection (b); and

(B) not later than 5 years after the date described in subparagraph (A).

(3) PERIODIC REPORTS.—The Director of the Administrative Office of the United States Courts, in consultation with the chief judge

of each of the district courts designated under subsection (b) and the Director of the Federal Judicial Center, shall keep the committees referred to in paragraph (1) informed, on a periodic basis while the pilot program is in effect, with respect to the matters referred to in subparagraphs (A) through (E) of paragraph (1).

(f) AUTHORIZATION FOR TRAINING AND CLERKSHIPS.—

(1) IN GENERAL.—In addition to any other funds made available to carry out this section, there are authorized to be appropriated not less than \$5,000,000 in each fiscal year for—

(A) educational and professional development of those district judges designated under subsection (a)(1)(A) in matters relating to patents and plant variety protection; and

(B) compensation of law clerks with expertise in technical matters arising in patent and plant variety protection cases, to be appointed by the courts designated under subsection (b) to assist those courts in such cases.

(2) AVAILABILITY OF FUNDS.—Amounts made available pursuant to this subsection shall remain available until expended.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. JOHNSON) and the gentleman from Texas (Mr. SMITH) each will control 20 minutes. The Chair recognizes the gentleman from Georgia.

GENERAL LEAVE

Mr. JOHNSON of Georgia. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. JOHNSON of Georgia. I yield myself such time as I may consume.

Mr. Speaker, this bill will create a pilot program to help enhance district court expertise in patent cases. The United States patent system leads the world in its strength and effectiveness. For over two centuries, the incentives for innovation it supports have helped create the world's strongest economy. But to ensure that it continues to play this role, we must be mindful of whether it is working as efficiently as it could be and whether we can improve it.

In recent years, concern has arisen over the expense and duration of patent litigation, as well as the lack of consistency in the patent decisions that are handed down by district courts. This bill should help address both of those concerns. It is widely believed that the lack of experience and expertise that most district court judges have with respect to patent and plant variety protection cases is responsible for the wide divergence in their decisions in these cases and their high rate of reversal on appeal.

This bill establishes a pilot program to enable interested judges in certain

district courts to gain increased expertise in adjudicating complex and technical patent and plant variety protection cases. This will create a cadre of judges who gain advanced knowledge of patent and plant variety protection through more intensified experience in handling the cases, along with special education and career development opportunities.

This should bring greater predictability in patent and plant variety protection decisions, as well as greater efficiency in the processing of all cases. The bill also sets forth reporting requirements to Congress, which will help us guide our future efforts to further improve the patent system.

H.R. 628 has bipartisan support in the Judiciary Committee and broad support from the patent bar and affected industry and trade groups. In 2006 a nearly identical bill, H.R. 5418, was reported by the Judiciary Committee and passed the House under suspension. The legislation passed the House again under suspension in the last Congress.

I urge my colleagues to join me in supporting it now.

I reserve the balance of my time.

Mr. SMITH of Texas. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is widely recognized that patent litigation is too expensive, too time consuming, and too unpredictable. H.R. 628 addresses these concerns by authorizing a pilot program in certain United States district courts to promote patent expertise among participating judges. The need for such a program becomes apparent when one considers that less than 1 percent of all cases in U.S. district courts are patent cases and that a district court judge typically has a patent case proceed through trial only once every 7 years. These cases require a disproportionate share of attention and judicial resources, and the rate of reversal, unfortunately, remains unacceptably high.

The premise underlying H.R. 628 is that practice makes perfect, or at least better. Judges who regularly focus on patent cases can be expected to make better decisions.

Introduced by our colleagues DARRELL ISSA and ADAM SCHIFF, this bill is identical to legislation that the House passed unanimously under suspension of the rules in the last two Congresses. H.R. 628 requires that the Director of the Administrative Office of the Courts to select six district courts to participate in a 10-year pilot program that begins no later than 6 months after the date of enactment.

This bill requires the director to provide the Committees on the Judiciary of the House of Representatives and the Senate with periodic progress reports. These reports will enable Congress and the courts to evaluate whether the pilot program is working, and, if so, whether it should be made permanent.

Mr. Speaker, this is a creative bill that will improve the application of patent law. I want to really take a moment to thank again Mr. ISSA, the gentleman from California, for this creative idea coming up with this bill, and also for his personal expertise. Mr. ISSA actually holds 37 patents, which I suspect is far more than any other Member of Congress has ever held in the history of this institution, so he knows whereof he speaks. It is no surprise he has come up with this very productive and constructive piece of legislation. And we are very pleased he is also a leader on the Judiciary Committee as well.

I urge my colleagues to support this legislation.

Mr. Speaker, I ask unanimous consent to yield the balance of my time to the gentleman from California (Mr. ISSA).

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The SPEAKER pro tempore. The gentleman from California will control the balance of the time.

Mr. JOHNSON of Georgia. Mr. Speaker, first I would like to thank the gentleman from California (Mr. ISSA) for his leadership on this bill. It has been his bill for four sessions of Congress. That tells you how much we need to do in order to do something we should have done a while ago. So I'm glad to support you on this, Mr. ISSA.

Also I thank the ranking member of the Judiciary Committee, Mr. LAMONT SMITH of Texas, for his work in bringing this bill to the floor in the 111th Congress.

Mr. Speaker, I yield 3 minutes to the honorable gentleman from California, ADAM SCHIFF.

Mr. SCHIFF. I thank the gentleman.

Mr. Speaker, I want to join in acknowledging the leadership of my colleague, DARRELL ISSA from California, in developing this bill. He has fought hard for it for several years now. We are hoping this is the time we succeed. We have a deep interest in improving the efficiency of the patent process, in taking a lot of the costs out, some of the litigation costs and the inefficiencies in the patent review, and also by improving the quality of patents. We are at present trying to work on those broader patent reforms. We hope we can succeed with those. This bill is a win-win situation. Through it, we can expand upon the knowledge and expertise of the courts that decide patent issues. We can allow the courts to identify judges that have an interest in this area and that want to engage in further education to improve the quality of decision making.

Unfortunately, these cases are often very complex. The result is that you get decisions that are too often reversed on appeal. So to the degree that

we can encourage some specialization in the district courts, improve the cost quality of decisions in the court process, we can reduce costs and we can improve the process.

□ 1330

So I think that this pilot project is a very important step forward.

Again, I want to congratulate my colleague. I know how hard he has worked on this. It is good to have somebody with the experience of getting a patent himself. I have some fabulous patent ideas, multimillion-dollar ideas. I haven't gotten them patented yet. But when I do, I want to make sure that there is a good, efficient system. And should anyone have the unmitigated temerity to actually challenge one in court, I want judges who are well educated and understand that my patent is valid and any claim to the contrary is without merit.

I congratulate my colleague, thank him for his superb work, and urge my fellow colleagues to support the bill.

I rise today in support of H.R. 628, legislation that will enhance expertise in patent cases among district judges, provide district courts with resources and training to reduce the error rates in patent cases, and help reduce the high cost and lost time associated with patent litigation.

I joined my colleague Mr. ISSA in introducing this legislation because I believe this proposal will provide us with valuable and important insight on the operation of patent litigation in the federal court system.

In the 109th Congress, the Judiciary Subcommittee on Courts, the Internet, and Intellectual Property held a hearing on improving federal court adjudication of patent cases in response to high rates of reversal at the Federal Circuit. At this hearing, a number of proposed options to address this issue were discussed. Serious concerns were expressed with a number of proposals, including those that would create new specialized courts and those that would move all patent cases to existing specialized courts.

These concerns centered around the need to maintain generalist judges, to preserve random case assignment, and to continue fostering the important legal percolation that currently occurs among the various district courts. Our proposal aims to avoid these pitfalls.

H.R. 628 establishes a mechanism to steer patent cases to judges that have the desire and aptitude to hear such cases, while preserving the principle of random assignment in order to prevent forum shopping among the pilot districts.

The legislation will also provide the Congress and the courts with the opportunity to assess the program on a periodic basis. Reports will examine whether the program succeeds in developing greater expertise among participating District judges, the extent to which the program contributes to improving judicial efficiency in deciding these cases, and whether the program should be extended, expanded or made permanent.

By providing our courts with the resources they need to carefully consider patent cases,

we will ultimately save the American taxpayer money.

The legislation has been passed by the House in the 109th and 110th Congresses. We are pleased that companion legislation has been introduced by Senator SPECTER, and we hope that the other body will act on this proposal this Congress.

While this legislation is an important first step at addressing needed patent reforms, I believe that Congress must continue to work on a more comprehensive reform of our patent system. I look forward to continuing my work with my colleagues in the Judiciary Committee and in Congress to address these issues.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

I want to thank my partner in this bill, ADAM SCHIFF. For three Congresses in a row, we have worked together and enjoyed a luxury of riches. The bill passes unanimously on suspension, only to be not quite broad enough to appeal to some people in the Senate. I think many of those questions were worked out by agreement in the last Congress, and I believe we have a real chance of moving this bill into law in this Congress.

I thank Mr. JOHNSON and the ranking member, HOWARD COBLE, for both being cosponsors of this bill. I believe we have made some technical adjustments that will inspire not just the three districts of California, but also Massachusetts, New Jersey and some of the other major areas in which these types of legislation have run into a lot of problems, particularly the fact that we have amended the bill to support those jurisdictions which adopt local rules even if they would otherwise not be eligible that would allow for this type of specialization.

On that word, I want to make sure that everyone in the Congress understands, on both sides of the dome, that when we say specialization, we are not trying to create a specialty court; just the opposite. We are trying to save the district court as we know it. I have had a number of patents properly adjudicated both as a defendant and as a plaintiff, and what I have discovered is that the judges, given the tools at the district court level and given the opportunity to practice more frequently, or at least having at least one judge who has practiced more frequently, they will adjudicate these cases properly. They will make good Markman decisions, and they will in fact understand the nuances of patent. Without that expertise lying in each of the district courts, particularly the large ones, we undoubtedly will continue to have cases which get ping-ponged around and which get decided, unfortunately, incorrectly the first time and only decided correctly after they have come back from the Fed circuit.

So as many have called for the creation of a specialty court similar to the appellate court, the Fed circuit, we are trying here through this patent

pilot to do just the opposite: to retain at the district court closest to the people the opportunity to have their patents heard, but to provide them the additional tools necessary to do it, and as was said very kindly by both Mr. SCHIFF and Mr. JOHNSON, to give them the frequency of those judges who would like to have that frequency of doing more than one case every seven years. So with that, I again urge passage of this bill.

I reserve the balance of my time.

Mr. JOHNSON of Georgia. Mr. Speaker, may I inquire as to how many more speakers the gentleman from California has?

Mr. ISSA. I would make myself the last speaker, if the gentleman is prepared to close.

Mr. JOHNSON of Georgia. I am prepared to close if you are.

Mr. ISSA. I yield myself 30 seconds to again recognize that this bill has passed this House overwhelmingly repeatedly. This time I believe we have perfected on a bipartisan basis with a companion, including Senator SPECTER in the Senate, the ability to move this as a separate freestanding bill quickly, and then I look forward to working particularly with ADAM SCHIFF on these many other pieces of legislation and other reforms that we have talked about at length, and of course with the chairman of the subcommittee, Mr. JOHNSON.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise in strong support of H.R. 628, the "Patent Judges Pilot Program in Certain District Courts." I urge my colleagues to support this bill. This bill will provide more expertise in skill in a difficult area of law: patent law. Americans hold the patents and patent law as important integral to our very lives. Patents reward ingenuity and creativity.

As the Blackberry litigation demonstrated, deficiencies in the current system have the ability to paralyze America. Indeed, the New York Times noted that "[something] has gone very wrong with the United States patent system." The Financial Times opined that "[i]t is time to restore the balance of power in U.S. patent law." Indeed, there has been a cry for change in the patent system and increased expertise for many years now.

The Constitution mandates that we "promote the progress of science and the useful arts . . . by securing for limited times to . . . inventors the exclusive right to their . . . discoveries." In order to fulfill the Constitution's mandate, we, as Members of Congress, must examine the system periodically to determine whether there may be flaws in the system that may hamper innovation, including the problems described as decreased patent quality, prevalence of subjective elements in patent practice, patent abuse, and lack of qualified persons to study patent law. H.R. 628 attempts to correct some of these problems.

H.R. 628 creates a pilot program to increase the expertise of U.S. District Court judges who wish to hear cases that involve issues related to patents or plant variety protection. The bill provides for the designation of not less than 6

United States district courts in at least 3 different circuits to take part in the pilot program. In the designated courts, judges who elect to hear patent or plant variety protection cases will be designated to do so by the chief judge. Cases will be assigned randomly, but undesignated judges may decline to accept patent and plant variety protection cases. The bill authorizes the expenditure of not less than \$5 million per year for up to 10 years to pay for the educational and professional development of designated judges, and for compensation for law clerks with technical expertise related to patent and plant variety protection cases to be appointed by the designated courts.

The high cost of patent litigation is widely publicized. It is not unusual for a patent suit to cost each party upwards of \$10 million. Appeals from United States district courts to the Federal Circuit are frequent, in part because of the perception within the patent community that most district court judges are not sufficiently prepared to adjudicate complex, technical patent cases. In 2008, 45 percent of the patent cases that were appealed to the Federal Circuit were reversed in whole or in part or vacated and remanded. This bill seeks to promote consistency among United States district courts by increasing the expertise of district court judges, thus providing for more certainty in intellectual property protection.

Taken together, these improvements would bring the American patent system up to speed for the twenty-first century. Instead of remaining a hindrance to innovation and economic growth, the patent system should work for inventors, ensuring America's patent system remains the best in the world and prevents risks to innovation.

I am encouraged by this bill, and I am hopeful that minorities and women take advantage of this pilot program. The patent judges pilot program and pilot program for law clerks provides for the educational and professional development of the designated district judges in matters relating to patent and plant variety protection, and for compensating law clerks with expertise in technical matters arising in patent and plant variety protection cases. This is yet another step that America is taking to ensure that its patent system is the best in the world. I urge my colleagues to support this bill.

Mr. ISSA. Mr. Speaker, I yield back the balance of my time.

Mr. JOHNSON of Georgia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. JOHNSON) that the House suspend the rules and pass the bill, H.R. 628.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. ISSA. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

STOP AIDS IN PRISON ACT OF 2009

Ms. WATERS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1429) to provide for an effective HIV/AIDS program in Federal prisons.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1429

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Stop AIDS in Prison Act of 2009".

SEC. 2. COMPREHENSIVE HIV/AIDS POLICY.

(a) IN GENERAL.—The Bureau of Prisons (hereinafter in this Act referred to as the "Bureau") shall develop a comprehensive policy to provide HIV testing, treatment, and prevention for inmates within the correctional setting and upon reentry.

(b) PURPOSE.—The purposes of this policy shall be as follows:

(1) To stop the spread of HIV/AIDS among inmates.

(2) To protect prison guards and other personnel from HIV/AIDS infection.

(3) To provide comprehensive medical treatment to inmates who are living with HIV/AIDS.

(4) To promote HIV/AIDS awareness and prevention among inmates.

(5) To encourage inmates to take personal responsibility for their health.

(6) To reduce the risk that inmates will transmit HIV/AIDS to other persons in the community following their release from prison.

(c) CONSULTATION.—The Bureau shall consult with appropriate officials of the Department of Health and Human Services, the Office of National Drug Control Policy, and the Centers for Disease Control regarding the development of this policy.

(d) TIME LIMIT.—The Bureau shall draft appropriate regulations to implement this policy not later than 1 year after the date of the enactment of this Act.

SEC. 3. REQUIREMENTS FOR POLICY.

The policy created under section 2 shall do the following:

(1) TESTING AND COUNSELING UPON INTAKE.—

(A) Medical personnel shall provide routine HIV testing to all inmates as a part of a comprehensive medical examination immediately following admission to a facility. (Medical personnel need not provide routine HIV testing to an inmate who is transferred to a facility from another facility if the inmate's medical records are transferred with the inmate and indicate that the inmate has been tested previously.)

(B) To all inmates admitted to a facility prior to the effective date of this policy, medical personnel shall provide routine HIV testing within no more than 6 months. HIV testing for these inmates may be performed in conjunction with other health services provided to these inmates by medical personnel.

(C) All HIV tests under this paragraph shall comply with paragraph (9).

(2) PRE-TEST AND POST-TEST COUNSELING.—Medical personnel shall provide confidential pre-test and post-test counseling to all inmates who are tested for HIV. Counseling may be included with other general health counseling provided to inmates by medical personnel.

(3) HIV/AIDS PREVENTION EDUCATION.—

(A) Medical personnel shall improve HIV/AIDS awareness through frequent edu-

cational programs for all inmates. HIV/AIDS educational programs may be provided by community based organizations, local health departments, and inmate peer educators. These HIV/AIDS educational programs shall include information on modes of transmission, including transmission through tattooing, sexual contact, and intravenous drug use; prevention methods; treatment; and disease progression. HIV/AIDS educational programs shall be culturally sensitive, conducted in a variety of languages, and present scientifically accurate information in a clear and understandable manner.

(B) HIV/AIDS educational materials shall be made available to all inmates at orientation, at health care clinics, at regular educational programs, and prior to release. Both written and audio-visual materials shall be made available to all inmates. These materials shall be culturally sensitive, written for low literacy levels, and available in a variety of languages.

(4) HIV TESTING UPON REQUEST.—

(A) Medical personnel shall allow inmates to obtain HIV tests upon request once per year or whenever an inmate has a reason to believe the inmate may have been exposed to HIV. Medical personnel shall, both orally and in writing, inform inmates, during orientation and periodically throughout incarceration, of their right to obtain HIV tests.

(B) Medical personnel shall encourage inmates to request HIV tests if the inmate is sexually active, has been raped, uses intravenous drugs, receives a tattoo, or if the inmate is concerned that the inmate may have been exposed to HIV/AIDS.

(C) An inmate's request for an HIV test shall not be considered an indication that the inmate has put him/herself at risk of infection and/or committed a violation of prison rules.

(5) HIV TESTING OF PREGNANT WOMAN.—

(A) Medical personnel shall provide routine HIV testing to all inmates who become pregnant.

(B) All HIV tests under this paragraph shall comply with paragraph (9).

(6) COMPREHENSIVE TREATMENT.—

(A) Medical personnel shall provide all inmates who test positive for HIV—

(i) timely, comprehensive medical treatment;

(ii) confidential counseling on managing their medical condition and preventing its transmission to other persons; and

(iii) voluntary partner notification services.

(B) Medical care provided under this paragraph shall be consistent with current Department of Health and Human Services guidelines and standard medical practice. Medical personnel shall discuss treatment options, the importance of adherence to antiretroviral therapy, and the side effects of medications with inmates receiving treatment.

(C) Medical and pharmacy personnel shall ensure that the facility formulary contains all Food and Drug Administration-approved medications necessary to provide comprehensive treatment for inmates living with HIV/AIDS, and that the facility maintains adequate supplies of such medications to meet inmates' medical needs. Medical and pharmacy personnel shall also develop and implement automatic renewal systems for these medications to prevent interruptions in care.

(D) Correctional staff and medical and pharmacy personnel shall develop and implement distribution procedures to ensure timely and confidential access to medications.

(7) PROTECTION OF CONFIDENTIALITY.—

(A) Medical personnel shall develop and implement procedures to ensure the confidentiality of inmate tests, diagnoses, and treatment. Medical personnel and correctional staff shall receive regular training on the implementation of these procedures. Penalties for violations of inmate confidentiality by medical personnel or correctional staff shall be specified and strictly enforced.

(B) HIV testing, counseling, and treatment shall be provided in a confidential setting where other routine health services are provided and in a manner that allows the inmate to request and obtain these services as routine medical services.

(8) TESTING, COUNSELING, AND REFERRAL PRIOR TO REENTRY.—

(A) Medical personnel shall provide routine HIV testing to all inmates no more than 3 months prior to their release and reentry into the community. (Inmates who are already known to be infected need not be tested again.) This requirement may be waived if an inmate's release occurs without sufficient notice to the Bureau to allow medical personnel to perform a routine HIV test and notify the inmate of the results.

(B) All HIV tests under this paragraph shall comply with paragraph (9).

(C) To all inmates who test positive for HIV and all inmates who already are known to have HIV/AIDS, medical personnel shall provide—

(i) confidential prerelease counseling on managing their medical condition in the community, accessing appropriate treatment and services in the community, and preventing the transmission of their condition to family members and other persons in the community;

(ii) referrals to appropriate health care providers and social service agencies in the community that meet the inmate's individual needs, including voluntary partner notification services and prevention counseling services for people living with HIV/AIDS; and

(iii) a 30-day supply of any medically necessary medications the inmate is currently receiving.

(9) OPT-OUT PROVISION.—Inmates shall have the right to refuse routine HIV testing. Inmates shall be informed both orally and in writing of this right. Oral and written disclosure of this right may be included with other general health information and counseling provided to inmates by medical personnel. If an inmate refuses a routine test for HIV, medical personnel shall make a note of the inmate's refusal in the inmate's confidential medical records. However, the inmate's refusal shall not be considered a violation of prison rules or result in disciplinary action.

(10) EXCLUSION OF TESTS PERFORMED UNDER SECTION 4014(B) FROM THE DEFINITION OF ROUTINE HIV TESTING.—HIV testing of an inmate under section 4014(b) of title 18, United States Code, is not routine HIV testing for the purposes of paragraph (9). Medical personnel shall document the reason for testing under section 4014(b) of title 18, United States Code, in the inmate's confidential medical records.

(11) TIMELY NOTIFICATION OF TEST RESULTS.—Medical personnel shall provide timely notification to inmates of the results of HIV tests.

SEC. 4. CHANGES IN EXISTING LAW.

(a) SCREENING IN GENERAL.—Section 4014(a) of title 18, United States Code, is amended—

(1) by striking "for a period of 6 months or more";

(2) by striking " , as appropriate, "; and

(3) by striking "if such individual is determined to be at risk for infection with such virus in accordance with the guidelines issued by the Bureau of Prisons relating to infectious disease management" and inserting "unless the individual declines. The Attorney General shall also cause such individual to be so tested before release unless the individual declines."

(b) INADMISSIBILITY OF HIV TEST RESULTS IN CIVIL AND CRIMINAL PROCEEDINGS.—Section 4014(d) of title 18, United States Code, is amended by inserting "or under the Stop AIDS in Prison Act of 2009" after "under this section".

(c) SCREENING AS PART OF ROUTINE SCREENING.—Section 4014(e) of title 18, United States Code, is amended by adding at the end the following: "Such rules shall also provide that the initial test under this section be performed as part of the routine health screening conducted at intake."

SEC. 5. REPORTING REQUIREMENTS.

(a) REPORT ON HEPATITIS AND OTHER DISEASES.—Not later than 1 year after the date of the enactment of this Act, the Bureau shall provide a report to the Congress on Bureau policies and procedures to provide testing, treatment, and prevention education programs for Hepatitis and other diseases transmitted through sexual activity and intravenous drug use. The Bureau shall consult with appropriate officials of the Department of Health and Human Services, the Office of National Drug Control Policy, and the Centers for Disease Control regarding the development of this report.

(b) ANNUAL REPORTS.—

(1) GENERALLY.—Not later than 2 years after the date of the enactment of this Act, and then annually thereafter, the Bureau shall report to Congress on the incidence among inmates of diseases transmitted through sexual activity and intravenous drug use.

(2) MATTERS PERTAINING TO VARIOUS DISEASES.—Reports under paragraph (1) shall discuss—

(A) the incidence among inmates of HIV/AIDS, Hepatitis, and other diseases transmitted through sexual activity and intravenous drug use; and

(B) updates on Bureau testing, treatment, and prevention education programs for these diseases.

(3) MATTERS PERTAINING TO HIV/AIDS ONLY.—Reports under paragraph (1) shall also include—

(A) the number of inmates who tested positive for HIV upon intake;

(B) the number of inmates who tested positive prior to reentry;

(C) the number of inmates who were not tested prior to reentry because they were released without sufficient notice;

(D) the number of inmates who opted-out of taking the test;

(E) the number of inmates who were tested under section 4014(b) of title 18, United States Code; and

(F) the number of inmates under treatment for HIV/AIDS.

(4) CONSULTATION.—The Bureau shall consult with appropriate officials of the Department of Health and Human Services, the Office of National Drug Control Policy, and the Centers for Disease Control regarding the development of reports under paragraph (1).

SEC. 6. APPROPRIATIONS.

There are authorized to be appropriated such sums as may be necessary to carry out this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from

California (Ms. WATERS) and the gentleman from California (Mr. ISSA) each will control 20 minutes.

The Chair recognizes the gentlewoman from California.

GENERAL LEAVE

Ms. WATERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. WATERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to thank my friends, JOHN CONYERS, the chairman of the House Judiciary Committee, Mr. LAMAR SMITH, ranking member of the House Judiciary Committee, and Mr. BOBBY SCOTT, chairman of the Judiciary Subcommittee on Crime, Terrorism and Homeland Security. Their staffs worked closely with my staff in a bipartisan manner when we drafted this bill 2 years ago, introduced it as H.R. 1943, reported it favorably and passed it on suspension. And they have been strong supporters of it ever since.

More than a quarter century has passed since AIDS was first discovered, yet the AIDS virus continues to infect and kill thousands of Americans every year. Last year, the Centers for Disease Control and Prevention, CDC, released new estimates of HIV infection which proves that the HIV/AIDS epidemic is even worse than we thought. The new estimates indicate that approximately 56,300 new infections occurred in the United States in 2006. This figure is approximately 40 percent higher than CDC's previous estimates of 40,000 new infections every year.

Here in our Nation's capital, health officials just announced that the HIV infection rate has reached 3 percent. That is 2,984 residents per every 100,000 over the age of 15, or 15,120 right here in our capital. This is a rate that exceeds the 1 percent threshold for a severe epidemic, and compares to severely impacted nations in West Africa. This announcement made the headlines in Sunday's Washington Post.

We need to take the threat of HIV/AIDS seriously, and we need to confront it in every institution in our society. That includes our Nation's prison system.

In 2005, the Department of Justice reported that the rate of confirmed AIDS cases in prisons is three times higher than in the general population. The Department of Justice also reported that 2 percent of State prison inmates and 1.1 percent of Federal prison inmates were known to be living with HIV/AIDS in 2003. However, the actual rate of HIV infection in our Nation's prisons is still unknown because prison officials do not consistently test prisoners.

In January of this year, the Journal of the National Medical Association published an article by Dr. Nina Harawa and Dr. Adaora Adimora on "Incarceration, African Americans and HIV: Advancing a Research Agenda." The article confirmed that individuals at high risk for incarceration also tend to be at high risk for HIV infections. Incarcerated populations have a high prevalence of characteristics associated with HIV infection. These characteristics include low socioeconomic status, drug use, multiple sex partners, and histories of sexual abuse and assault.

Mr. Speaker, I reserve the balance of my time.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

The Stop AIDS in Prison Act of 2009 requires the Federal Bureau of Prisons to develop comprehensive policy to provide HIV testing, treatment, and prevention for inmates in Federal prisons. This legislation will combat and prevent the continued spread of HIV and AIDS among prison populations and the community at large.

Mr. Speaker, there are about 200,000 prisoners in the Federal prison system, but the incidence of HIV and AIDS in the prison system is difficult to measure because not all prisoners are routinely tested.

Mr. Speaker, there is no doubt that the prison population, like the population of America as a whole, includes prisoners who are HIV positive and do not know it. In 2006, a report by the U.S. Department of Justice estimated that over 1 percent of Federal inmates were known to be infected with HIV. The United Nations Joint Program on HIV/AIDS and the U.S. Centers for Disease Control and Prevention have historically defined an HIV epidemic as occurring when the overall percentage of disease among residents of a specific geographic area exceeds 1 percent. That means that the percentage of prisoners who carry the HIV/AIDS virus may have reached epidemic proportions.

The occurrence of HIV and AIDS cases in Federal prisons is at least three times higher among prison inmates than it is among the United States population as a whole.

H.R. 1429 requires routine testing of all Federal prison inmates upon entry and prior to release. For all existing inmates, testing will be required within 6 months of enactment. This reasonable requirement will enable prison officials to reduce HIV/AIDS among inmates and provide counseling, prevention, and health care services for inmates who are infected with the disease.

For those prisoners tested when they enter prison, testing will ensure that they receive adequate treatment, education, and prevention services while incarcerated. Similarly, it is important that prisoners are tested shortly before

release into the community so adequate services can be coordinated for the prisoners after release. That in turn will protect the community that they then reside in.

I believe in thorough punishment for criminal offenders because the public deserves to be protected; but we have a duty to treat prisoners humanely and to prevent the spread of HIV/AIDS, not just within the prison populations, but to the populations they return to.

Mr. Speaker, I would like to thank my colleagues on the Judiciary Committee and particularly Congresswoman WATERS for her work on this legislation. She has led the way, she has pushed hard, and she, with Ranking Member LAMAR SMITH, bring this bill today with broad bipartisan support. As was said earlier, this bill passed by suspension in the last Congress, and we would hope that it passes early and is signed into law at the earliest possible date. H.R. 1429 remains an important piece of legislation yet undone by this Congress from the previous Congress.

I reserve the balance of my time.

Ms. WATERS. Mr. Speaker, Dr. Harawa's and Dr. Adimora's article also pointed out that incarceration could provide a window of opportunity for reaching at-risk individuals and providing them testing, treatment, and prevention services for HIV and AIDS. Unfortunately, these services are not consistently available in the correctional system.

□ 1345

HIV testing is not required upon entry and prior to release from Federal prisons, nor is testing required in most State prisons.

Treatment for HIV/AIDS in the correctional system is often limited by lack of expertise among prison health providers and inadequate access to HIV pharmaceuticals.

Finally, HIV prevention programs are not available in a consistent or complete fashion throughout the entire correctional system. That is why we need to pass the Stop AIDS in Prison Act today. The Stop AIDS in Prison Act requires the Federal Bureau of Prisons to develop a comprehensive policy to provide HIV testing, treatment, and prevention for inmates in Federal prisons.

This bill requires the Bureau of Prisons to test all prison inmates for HIV upon entering prison and again prior to release from prison unless the inmate absolutely opts out of taking the test. Inmates who test positive will be given comprehensive treatment during their incarceration and referrals to services in the community prior to release. All inmates, regardless of their test results, will be given HIV prevention education.

We are honored to have the support of many of the prominent HIV/AIDS advocacy organizations for the Stop

AIDS in Prison Act. These include; AIDS Action, The AIDS Institute, the National Minority AIDS Council, the AIDS Healthcare Foundation, the HIV Medicine Association, the Latino Commission on AIDS, AIDS Project Los Angeles, Bienestar, a Latino community service and advocacy organization, and the AmASSI National Health and Cultural Centers, another community service and advocacy organization. The Board of Supervisors of the County of Los Angeles, which has been severely impacted by HIV/AIDS, has also expressed support for this bill.

In conclusion, the Stop AIDS in Prison Act will help stop the spread of HIV/AIDS among prison inmates, encourage them to take personal responsibility for their health, and reduce the risk that they will transmit HIV/AIDS to other persons in the community following their release from prison.

I would like to thank my colleagues who have been involved, especially my colleague from California who is on the floor today in support of this legislation.

I would urge all of my colleagues to support this important legislation.

Mr. Speaker, I reserve the balance of my time.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

I think the gentlelady made such a good point that, in fact, we have an obligation to recognize that individuals will return to our community, and they need to return healthier than they came in. So the requirements in this bill, both for testing on the way in and testing on the way out of prison, are so important.

Mr. Speaker, under Governor Pete Wilson, I had the honor to serve on his prison board for the Prison Work Program. What I discovered in prison is exactly what the gentlelady from California is alluding to, that we often incarcerate without doing the other things that should be done—education programs, work programs, drug and alcohol detoxing programs, and, yes, recognizing that good physical and mental health are essential, that we have to make sure that people who are being prepared to leave prison are being prepared to not return to prison.

So I join with the gentlelady in support of this effort, like so many others that she has championed over the years.

Mr. Speaker, I reserve the balance of my time.

Ms. WATERS. Mr. Speaker, may I inquire as to how much time I have remaining.

The SPEAKER pro tempore. The gentlewoman has 13½ minutes remaining.

Ms. WATERS. Mr. Speaker, I yield 3 minutes to the gentlelady from California, the Chair of the Congressional Black Caucus, BARBARA LEE.

Ms. LEE of California. I thank the gentlelady for yielding. But also, let

me thank you for making sure that we stayed on point as it relates to HIV/AIDS. And I have to just stop and take a minute and help recall some of this history.

Actually, when I was first elected in 1998, you were chairing the Congressional Black Caucus at that point. And you recognized what this HIV/AIDS epidemic was doing in our country, especially in the African American community.

I remember you called a meeting—I think you gave us maybe 2 or 3 days, but the seriousness of this warranted that. People came from all over the country. And we talked about what we needed to do, and we sounded the alarm.

Under your leadership, we developed the Minority AIDS Initiative. And I must say, you insisted then that it be comprehensive, and it must be complete, and it must be funded. I believe at that point we were able to get maybe \$150, \$157 million; drop in the bucket, maybe, but yes, it was a major step in the right direction. We are still trying to get up to \$650 million for the Minority AIDS Initiative.

But having said that, let me just say, in terms of the comprehensive nature of what we talked about then and what you insisted on, we said that any AIDS strategy had to be seen from the perspective of prevention, care, and treatment. In fact, we talked about the disproportionate numbers of African Americans being infected and affected and how the resources should be targeted to the communities in most need.

Fast forward to Toronto, Canada, to the HIV/AIDS International Conference. And I'll never forget this—and I have to say this because today is really a milestone, I think, in Congresswoman WATERS' work around this—we were there with the NAACP, we were there with all of our black AIDS organizations. And you whispered to me, you said, I'm getting ready to do something that's very controversial; some folks may not like it, but are you with me? I said, "Yes, ma'am." You said, "We're going to do a mandatory testing bill." And we talked about it. And you made it public at that conference, and you said you were not going to rest until this is done. You talked about the bill in concept, in terms of stopping AIDS in prison, because you were talking about the rates of infection with regard to African American women and what is taking place in prisons and how all of our heads really are in the sand about this, we just didn't want to deal with it at all. But you were determined that all of us—the NAACP, all of our groups—were going to deal with it. Some said it was going to be impossible to do because of mandatory testing requirements. We talked about how to deal with that, and you found a way, and that is, by allowing anyone who wants to opt out to opt out.

I always have to say, Congresswoman WATERS, that you always insist on doing this work—if we have to do it out of the box, we will, but where there is a will, there is a way. I think today really just demonstrates that where there is a will, there is a way. And with the bipartisan support now on H.R. 1429, with our President supporting the development of a national AIDS strategy and a national AIDS plan, I have a lot of hope.

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Ms. WATERS. I yield to the gentle lady as much time as she may need to continue this wonderful talk she's giving.

Ms. LEE of California. I have to say I am really excited today because I have a lot of hope. When you look at the numbers in the District of Columbia, for instance, what, 33 percent new infections for African American women? When you look at what is happening around the country and when you look at the disproportionate rates of African American men in prison, you can't help but be thankful today that this bill is on the floor, and with bipartisan support we're going to move it off the floor. Because I think that if we really are being for real about tackling this, we have got to do it, and we have got to require what this bill requires in our prisons.

I just have to say today, on behalf of my constituents, where we declared a state of emergency in 1999 in the African American community in Alameda County, on behalf of the entire country, thank you very much. It is a very hopeful day.

I urge support of this bill, and look forward to our continuing work and getting it to President Obama's desk so he can sign this into law.

Mr. SMITH of Texas. I am pleased to be original co-sponsor of H.R. 1429, the "STOP AIDS in Prison Act of 2009."

The Stop AIDS in Prison Act of 2009 requires the federal Bureau of Prisons to develop a comprehensive policy to provide HIV testing, treatment and prevention for inmates in federal prisons.

This legislation will combat and prevent the continued spread of HIV and AIDS among the prison population and the community at large.

There are about 200,000 prisoners in the federal system. But, the incidence of HIV and AIDS in the prison population is difficult to measure because not all inmates are routinely tested.

In a 2006 report, the Justice Department estimated that over one percent of federal inmates were known to be infected with HIV. The United Nations Joint Program on HIV/AIDS and the U.S. Centers for Disease Control and Prevention have historically defined an HIV epidemic as occurring when the overall percentage of disease among residents of a specific geographic area exceeds one percent.

That means that the percentage of prisoners who carry the HIV/AIDS virus may have reached epidemic proportions.

The occurrence of HIV and AIDS cases in federal prison is at least three times higher among prison inmates than it is among the United States population as a whole.

H.R. 1429 requires routine HIV testing for all federal prison inmates upon entry and prior to release. For all existing inmates, testing is required within six months of enactment.

This reasonable requirement will enable prison officials to reduce HIV/AIDS among inmates and provide counseling, prevention, and health care services for inmates who are infected with the disease.

For those prisoners tested when they enter prison, such testing will ensure that they receive adequate treatment, education and prevention services while incarcerated.

Similarly, it is important that prisoners are tested shortly before release into the community so that adequate services can be coordinated for the prisoner after release. That, in turn, will protect the community.

I believe in tough punishment for criminal offenders because the public deserves to be protected. But we have a duty to treat prisoners humanely and to rehabilitate them.

To me, preventing the spread of HIV and AIDS among prisoners is an essential part of humane treatment and rehabilitation.

I would like to thank my colleague on the Judiciary Committee, Congresswoman WATERS, for her work on this legislation. Ms. WATERS and I worked together on earlier versions of this bill in previous sessions of Congress. She has been an energetic partner in this effort.

I would also like to thank Chairman CONYERS for helping bring this legislation to the House floor today.

As my colleagues will recall, the House passed a version of this bill last Congress by voice vote. The bill was placed on the legislative calendar of the Senate, but it was never acted upon. It is my hope that the Senate will pass H.R. 1429 during this Congress.

I urge my colleagues to support this important legislation.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise in support of H.R. 1429, "Stop AIDS in Prison Act of 2009." I want to thank my colleague Congresswoman MAXINE WATERS of California for introducing this legislation.

Mr. Speaker, I strongly support H.R. 1429, which designed to address the growing impact that HIV/AIDS is having on minority communities. According to the Black AIDS Institute, Centers for Disease Control and Prevention (CDC) statistics reveal that African Americans account for half of all new HIV/AIDS cases. Racial and ethnic minorities comprise 69 percent of new cases, according to the 2005 data released by the CDC. African-American women account for the majority of new AIDS cases among women (67 percent in 2004); whereas white women account for 17 percent and Latinas 15 percent. The CDC estimates that 73 percent of all children born to HIV infected mothers in 2004 were African American. HIV/AIDS is now the leading cause of death among African Americans ages 25 to 44—deadlier than heart disease, accidents, cancer, and homicide.

The CDC reported that Hispanics accounted for 18 percent of new diagnoses reported in the 35 areas with long-term, confidential

name-based HIV reporting in the United States, and that most Hispanic men were exposed to HIV through sexual contact with other men, followed by injection drug use and heterosexual contact; and that most Hispanic women were exposed to HIV through heterosexual contact, followed by injection drug use.

According to the Bureau of Justice Statistics, African Americans made up 41 percent of all inmates in the prison system at the end of 2004. Since African Americans are disproportionately represented in jails and prisons, the Stop AIDS in Prison Bill is one way to begin addressing this problem.

The "Stop AIDS in Prison Act of 2009" directs the Bureau of Prisons to develop a comprehensive policy to provide HIV testing, treatment, and prevention for inmates in federal prisons and upon reentry into the community. The bill would require initial testing and counseling of inmates upon entry into the prison system and then ongoing testing available up to once a year upon the request of the inmate, or sooner if an inmate is exposed to the HIV/AIDS virus or becomes pregnant. Furthermore, the Bureau of Prisons will be required to make HIV/AIDS counseling and treatment available to prisoners, and give testing and treatment referrals to prisoners prior to reentering the community. The bill protects the confidentiality of prisoners, and allows prisoners to refuse routine HIV testing.

Finally, the bill contains a requirement that the Bureau of Prisons report to Congress, no later than one year after enactment, the number of inmates who tested positive for HIV upon intake; the number of inmates who tested positive prior to reentry; the number of inmates who were not tested prior to reentry because they were released without sufficient notice; the number of inmates who opted-out of taking the test; the number of inmates who were tested following exposure incidents; and the number of inmates who were under treatment for HIV/AIDS.

I urge my colleagues to support H.R. 1429 because we must reverse these costly trends. Currently, the only cure we have for HIV/AIDS is prevention.

Had the bill gone through regular and been marked up, I was planning on offering an amendment that would permit those infected with HIV to elect, on their own volition, to be housed separate from the general population as long as the prison had the facilities. This way, those infected with HIV could be housed in safety.

The HIV/AIDS pandemic is indeed a state of emergency in the African-American and Hispanic community. We must use all resources necessary to defeat this deadly enemy that continues to devastate the minority community. As Americans, we have a strong history, through science and innovation, of detecting, conquering and defeating many illnesses. We must and we will continue to fight HIV/AIDS until the battle is won.

Mr. Speaker, I strongly support H.R. 1429, "Stop AIDS in Prisons Act of 2009," and urge my colleagues to support it as well.

Mrs. CHRISTENSEN. Mr. Speaker, incarceration rates in the United States have skyrocketed through the years. Approximately 2.3 million Americans are incarcerated and more

than 1 in 100 American adults were incarcerated just at the start of 2008. Although the actual rates of HIV/AIDS infections in our nation's prisons are not known due the fact that current prison officials do not consistently test their prisoners; we see how this epidemic is effecting our nation and especially devastating the African American community.

An estimated 20 percent–26 percent of all Americans living with HIV/AIDS are incarcerated at some point and are frequently incarcerated during the course of their disease. Persons at risk for incarceration are more likely than others in our nation to be at high risk for HIV/AIDS infections especially related to risky behavioral practices and characteristics. These risk characteristics include minimal education, drug use, low socioeconomic status, multiple sex partners, a high prevalence of sexually transmitted infections, and histories of sexual abuse and assault. This also renders those in prison who are infected to become vulnerable to a whole range of other diseases. In custody HIV transmission occur through sexual activity, needle-sharing for drug injection, tattooing with unsterilized equipment, and contact with blood or mucous membranes through violence.

Incarceration is a crisis among African Americans. Research and data show that African Americans are disproportionately more likely than any other racial and ethnic group to be at risk for incarceration. In fact African Americans constitute just 13 percent of the American population but make up 44 percent of all prison and jail inmates. I am sure it is not surprising to see the correlation between this statistic and also the statistics that show that African Americans account for the majority of new AIDS cases, the majority of new HIV infections, and the majority of HIV deaths. The prevalence of HIV/AIDS in incarcerated men and women is 3–5 times that of the general population.

Particularly affected by the HIV/AIDS epidemic in incarcerated populations are African American women. The most astounding news is that prisons are the only setting in the United States where HIV prevalence is higher in females than in males, with approximately 2.6 percent of female and 1.8 percent of male state prison inmates known to be HIV infected. Further, African-American women make up two-thirds of newly reported HIV cases in females overall and 34 percent of all female inmates' cases.

In attempt to counter many assumptions, a number of published case studies and a smaller number of retrospective cohort studies have described cases of HIV transmission in U.S. inmates that occurred during incarceration. These studies only suggest that the incarcerated population needs to be fully included in HIV/AIDS prevention and treatment efforts. There must be a change in people's attitudes and the way we promote positive health initiatives through our federal prison systems.

I, therefore, rise today in strong and unwavering support of H.R. 1429, The Stop AIDS in Prison Act, which would require routine HIV testing for all federal prison inmates upon entry and prior to release from prison, provide inmates with education and treatment, and reduces the risks they may pose of transmitting HIV/AIDS to others in their communities after their release.

We all should support H.R. 1429 and ensure that incarcerated and ex-offender populations have access to adequate and realistic HIV prevention methods, receive voluntary and confidential HIV testing and are rolled into adequate HIV/AIDS-related care, treatment and services.

Mr. RANGEL. Mr. Speaker, I rise today to express my support of H.R. 1429, Stop AIDS in Prison Act of 2009, which has been reintroduced by Congresswoman MAXINE WATERS. It is important that proper HIV/AIDS testing, prevention, treatment, and education are provided to all inmates. HIV/AIDS is quickly rising in America. According to the Department of Justice the rate of confirmed AIDS cases in prisons was three times higher than in the general population.

This piece of legislation will help reduce the spread of HIV/AIDS by making inmates get tested for HIV/AIDS upon entering jail and when they leave. Testing inmates when they enter and when they leave will help track the number of people infected and it will also help reduce the spread to others in their communities. Educating inmates about HIV/AIDS and providing them treatment will make them more responsible about their health and the health of others.

This is only one part of helping to solve this epidemic that has spread vastly in large and small cities and towns across America as well as in countries around the world. That is why I am in strong support of this legislation.

Mr. ISSA. Mr. Speaker, I yield back the balance of my time.

Ms. WATERS. Mr. Speaker, I would like to thank Congresswoman BARBARA LEE for rushing to the floor to participate in the presentation of this bill, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from California (Ms. WATERS) that the House suspend the rules and pass the bill, H.R. 1429.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

JOHN "BUD" HAWK POST OFFICE

Mr. CLAY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 955) to designate the facility of the United States Postal Service located at 10355 Northeast Valley Road in Rollingbay, Washington, as the "John 'Bud' Hawk Post Office".

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 955

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. JOHN "BUD" HAWK POST OFFICE.

(a) DESIGNATION.—The facility of the United States Postal Service located at 10355 Northeast Valley Road in Rollingbay, Washington, shall be known and designated as the "John 'Bud' Hawk Post Office".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "John 'Bud' Hawk Post Office".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Missouri (Mr. CLAY) and the gentleman from California (Mr. ISSA) each will control 20 minutes.

The Chair recognizes the gentleman from Missouri.

GENERAL LEAVE

Mr. CLAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CLAY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as a member of the House subcommittee with jurisdiction over the U.S. Postal Service, I am pleased to present for consideration H.R. 955, a bill to designate the U.S. postal facility located at 10355 Northeast Valley Road in Rollingbay, Washington, as the "John 'Bud' Hawk Post Office."

Introduced by Representative JAY INSLEE on February 10, 2009 and reported out of our full committee by voice vote on March 10, 2009, H.R. 955 enjoys the support of the State of Washington's entire House delegation.

A long time resident of Bremerton, Washington, Sergeant John "Bud" Hawk received the Medal of Honor, the U.S. military's highest commendation, from President Harry S. Truman on July 13, 1945. Following his military career, Sergeant Hawk continued his devotion to public service by serving as a longtime educator in Bremerton, Washington.

In April of last year, Sergeant Hawk was again honored for his bravery during World War II as he was presented with a Medal of Honor flag at Olympia's Capitol Rotunda by Brigadier General Gordon Toney, Commander of the Washington Army National Guard.

Mr. Speaker, Sergeant Hawk's service stands as a testament to the brave men and women that have served and continue to serve our Nation at home and abroad. And it is my hope that we can further honor this distinguished veteran through the passage of H.R. 955.

I urge my colleagues to support this bill.

Mr. Speaker, I reserve the balance of my time.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of this bill designating the facility of the United States Postal Service located at 10355 Northeast Valley

Road in Rollingbay, Washington, as the "John "Bud" Hawk Post Office Building."

Bud Hawk embodies, in every sense, the word "hero." In June of 1945, President Truman placed a Congressional Medal of Honor around John "Bud" Hawk's neck on the Capitol steps in Olympia in his home State of Washington. With this bill, we are honoring John again, this time in the Nation's Capitol, and this time not only for his heroic efforts in World War II, but for his lifetime of service.

John first earned the Nation's gratitude and respect during World War II when his heroism was instrumental in destroying two enemy tanks and forcing the surrender of more than 500 enemy combatants in August of 1944.

Sergeant Hawk showed fearless initiative and heroic conduct, even while suffering from a painful wound. Under heavy enemy fire, John ran back and forth toward the enemy in order to give the American tanks correct targeting directions. John sacrificed his already wounded body to act as a human firing director for the American tanks. His action came at the end of the Battle of Normandy. In gratitude for his help in the liberation of their country, John was awarded France's Legion of Honor in 2007. John also received four Purple Hearts for four separate times he was wounded during his enlistment.

But John's heroics did not end when he returned home from World War II. A longtime teacher and principal in Bremerton, Washington, he has been a familiar face who has had tremendous impact on countless schoolchildren in his community. To this day, he remains a personal hero of his students for the humility and strength of character that he has instilled. That strength of character and humility is embodied in John Hawk and is, today, the reason that we recognize him as a hero and Medal of Honor recipient, and a lifetime hero to children in his home community.

□ 1400

I urge my colleagues to support this bill that demonstrates our gratitude for the life and contribution of John "Bud" Hawk, from his heroics in the battlefield to one might say his heroics in the classroom.

Mr. Speaker, I reserve the balance of my time.

Mr. CLAY. Mr. Speaker, at this time I yield 4 minutes to my good friend from the State of Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Speaker, I would commend this resolution to the House. This really is a great American story of truly a great American hero.

John "Bud" Hawk is a son of Rollingbay, Washington. He grew up playing with his sister around the post office we're about to name in his honor

in the little community of Rollingbay, Washington. And he's a fellow who answered the Nation's call in the 1940s and was a hero in the 1940s, but was a hero for several decades to the students he educated. And I just want to commend him for both of those acts of heroism.

My colleagues have talked about why he won the Congressional Medal of Honor, and I have to tell you if you actually read this, you would be mightily impressed by a fellow who on one day at the Battle of the Falaise Gap essentially with his machine gun squad destroyed two enemy tanks while he was already severely wounded and, after he was severely wounded, leading to the surrender of hundreds of German prisoners, still refused medical treatment. He was a hero several times in 1 day, and he was then injured three more times during World War II, and we still honor him for that.

But I want to just highlight something that he earned not in 1 day but he earned the honor and affection of hundreds, if not thousands, of people in our community.

After he got back from World War II, he came home and got a degree in biology. He worked for 7 years to do that, and he started teaching fifth and sixth grade, first at Tracyton Elementary in Bremerton and later at nearby Brownsville Elementary. He eventually became a teaching principal and taught classes while he was running the school. He served 31 years as an educator and retired in 1983 as principal of Woodlands Elementary in Bremerton.

And I just want to read something that a lot of people feel in our community of Bainbridge and Bremerton, something a former student of Mr. Hawk's wrote in a University of Washington Alumni magazine, recalling 1 year he spent as Mr. Hawk's student. This former student wrote:

"Ascribe it to my then youthful impressionableness, if you will, but John Hawk was then and remains still a personal hero of mine for the humanity and strength of character he taught his students, along with the more mundane subjects of math, science, and history. I count myself fortunate to have spent that year as his student. And I relish the opportunity all these years later to say what I at age 11 didn't know to say: For both a year of education and for your lifetime of service to your country and to humanity, thank you, Mr. Hawk."

So on this day of honoring Mr. Hawk by naming the Rollingbay Post Office in his honor, we want to say thank you, Mr. Hawk.

I know Mr. ISSA noted the bagpipes we heard just a few moments ago. They were honoring a great Irishman who's now President, President Barack Obama. All of the Irish are celebrating John "Bud" Hawk's celebration. There is a young lad, a young Irishman,

named Brody in Bainbridge Island. He's honoring Bud.

Thank you, Mr. Hawk. And thank you for the country in passing this resolution.

Mr. ISSA. Mr. Speaker, I yield myself 30 seconds to say from the "O'Issas" to the "Obamas," everyone is an Irishman here today. I'm sure there isn't anyone who isn't Irish here today. Perhaps a few with orange but most with green.

Mr. Speaker, I yield back the balance of my time.

Mr. CLAY. Mr. Speaker, at this time I urge my colleagues to support H.R. 955.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore (Mr. SERRANO). The question is on the motion offered by the gentleman from Missouri (Mr. CLAY) that the House suspend the rules and pass the bill, H.R. 955.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

REDUCING INFORMATION CONTROL DESIGNATIONS ACT

Mr. CLAY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1323) to require the Archivist of the United States to promulgate regulations regarding the use of information control designations, and for other purposes, as amended.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1323

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Reducing Information Control Designations Act".

SEC. 2. PURPOSE.

The purpose of this Act is to increase Governmentwide information sharing and the availability of information to the public by standardizing and limiting the use of information control designations.

SEC. 3. REGULATIONS RELATING TO INFORMATION CONTROL DESIGNATIONS WITHIN THE FEDERAL GOVERNMENT.

(a) REQUIREMENT TO REDUCE AND MINIMIZE INFORMATION CONTROL DESIGNATIONS.—Each Federal agency shall reduce and minimize its use of information control designations on information that is not classified.

(b) ARCHIVIST RESPONSIBILITIES.—

(1) REGULATIONS.—The Archivist of the United States shall promulgate regulations regarding the use of information control designations.

(2) REQUIREMENTS.—The regulations under this subsection shall address, at a minimum, the following:

(A) Standards for utilizing the information control designations in a manner that is narrowly tailored to maximize public access to information.

(B) The process by which information control designations will be removed.

(C) Procedures for identifying, marking, dating, and tracking information assigned the information control designations, including the identity of officials making the designations.

(D) Provisions to ensure that the use of information control designations is minimized and cannot be used on information—

(i) to conceal violations of law, inefficiency, or administrative error;

(ii) to prevent embarrassment to Federal, State, local, tribal, or territorial governments or any official, agency, or organization thereof; any agency; or any organization;

(iii) to improperly or unlawfully interfere with competition in the private sector;

(iv) to prevent or delay the release of information that does not require such protection;

(v) if it is required to be made available to the public; or

(vi) if it has already been released to the public under proper authority.

(E) Provisions to ensure that the presumption shall be that information control designations are not necessary.

(F) Methods to ensure that compliance with this Act protects national security and privacy rights.

(G) The establishment of requirements that Federal agencies, subject to chapter 71 of title 5, United States Code, implement the following:

(i) A process whereby an individual may challenge without retribution the application of information control designations by another individual.

(ii) A method for informing individuals that repeated failure to comply with the policies, procedures, and programs established under this section could subject them to a series of penalties.

(iii) Penalties for individuals who repeatedly fail to comply with the policies, procedures, and programs established under this section after having received both notice of their noncompliance and appropriate training or re-training to address such noncompliance.

(H) Procedures for members of the public to be heard regarding improper applications of information control designations.

(I) A procedure to ensure that all agency policies and standards for utilizing information control designations that are issued pursuant to subsection (c) be provided to the Archivist and that such policies and standards are made publicly available on the website of the National Archives and Records Administration.

(3) **CONSULTATION.**—In promulgating the regulations, the Archivist shall consult with the heads of Federal agencies and with representatives of State, local, tribal, and territorial governments; law enforcement entities; organizations with expertise in civil rights, employee and labor rights, civil liberties, and government oversight; and the private sector, as appropriate.

(c) **AGENCY RESPONSIBILITIES.**—The head of each Federal agency shall implement the regulations promulgated by the Archivist under subsection (b) in the agency in a manner that ensures that—

(1) information can be shared within the agency, with other agencies, and with State, local, tribal, and territorial governments, the private sector, and the public, as appropriate;

(2) all policies and standards for utilizing information control designations are consistent with such regulations;

(3) the number of individuals with authority to apply information control designations is limited; and

(4) information control designations may be placed only on the portion of information that requires control and not on the entire material.

SEC. 4. ENFORCEMENT OF INFORMATION CONTROL DESIGNATION REGULATIONS WITHIN THE FEDERAL GOVERNMENT.

(a) **INSPECTOR GENERAL RESPONSIBILITIES.**—The Inspector General of each Federal agency, in consultation with the Archivist, shall randomly audit unclassified information with information control designations. In conducting any such audit, the Inspector General shall—

(1) assess whether applicable policies, procedures, rules, and regulations have been followed;

(2) describe any problems with the administration of the applicable policies, procedures, rules and regulations, including specific non-compliance issues;

(3) recommend improvements in awareness and training to address any problems identified under paragraph (2); and

(4) report to the Committee on Oversight and Government Reform of the House of Representatives, the Committee on Homeland Security and Governmental Affairs of the Senate, the Archivist, and the public on the findings of the Inspector General's audits under this section.

(b) **PERSONAL IDENTIFIERS.**—

(1) **IN GENERAL.**—For purposes described in paragraph (2), the Archivist of the United States shall require that, at the time of designation of information, the following shall appear on the information:

(A) The name or personal identifier of the individual applying information control designations to the information.

(B) The agency, office, and position of the individual.

(2) **PURPOSES.**—The purposes described in this paragraph are as follows:

(A) To enable the agency to identify and address misuse of information control designations, including the misapplication of information control designations to information that does not merit such markings.

(B) To assess the information sharing impact of any such problems or misuse.

(c) **TRAINING.**—The Archivist, subject to chapter 71 of title 5, United States Code, and in coordination with the heads of Federal agencies, shall—

(1) require training as needed for each individual who applies information control designations, including—

(A) instruction on the prevention of the overuse of information control designations;

(B) the standards for applying information control designations;

(C) the proper application of information control designations, including portion markings;

(D) the consequences of repeated improper application of information control designations, including the misapplication of information control designations to information that does not merit such markings, and of failing to comply with the policies and procedures established under or pursuant to this section; and

(E) information relating to lessons learned about improper application of information control designations, including lessons learned pursuant to the regulations and Inspector General audits required under this Act and any internal agency audits; and

(2) ensure that such program is conducted efficiently, in conjunction with any other se-

curity, intelligence, or other training programs required by the agency to reduce the costs and administrative burdens associated with the additional training required by this section.

(d) **DETAILEE PROGRAM.**—

(1) **REQUIREMENT FOR PROGRAM.**—The Archivist, subject to chapter 71 of title 5, United States Code, shall implement a detailee program to detail Federal agency personnel, on a nonreimbursable basis, to the National Archives and Records Administration, for the purpose of—

(A) training and educational benefit for agency personnel assigned so that they may better understand the policies, procedures, and laws governing information control designations;

(B) bolstering the ability of the National Archives and Records Administration to conduct its oversight authorities over agencies; and

(C) ensuring that the policies and procedures established by the agencies remain consistent with those established by the Archivist of the United States.

(2) **SUNSET OF DETAILEE PROGRAM.**—Except as otherwise provided by law, this subsection shall cease to have effect on December 31, 2012.

SEC. 5. RELEASING INFORMATION PURSUANT TO THE FREEDOM OF INFORMATION ACT.

(a) **AGENCY RESPONSIBILITIES.**—The head of each Federal agency shall ensure that—

(1) information control designations are not a determinant of public disclosure pursuant to section 552 of title 5, United States Code (commonly referred to as the “Freedom of Information Act”); and

(2) all information in the agency's possession that is releasable is made available to members of the public pursuant to an appropriate request under such section 552.

(b) **RULE OF CONSTRUCTION.**—Nothing in this Act shall be construed to prevent or discourage any Federal agency from voluntarily releasing to the public any unclassified information that is not exempt from disclosure under section 552 of title 5, United States Code (commonly referred to as the “Freedom of Information Act”).

SEC. 6. DEFINITIONS.

In this Act:

(1) **INFORMATION CONTROL DESIGNATIONS.**—The term “information control designations” means information dissemination controls, not defined by Federal statute or by an Executive order relating to the classification of national security information, that are used to manage, direct, or route information, or control the accessibility of information, regardless of its form or format. The term includes, but is not limited to, the designations of “controlled unclassified information”, “sensitive but unclassified”, and “for official use only”.

(2) **INFORMATION.**—The term “information” means any communicable knowledge or documentary material, regardless of its physical form or characteristics, that is owned by, is produced by or for, or is under the control of the Federal Government.

(3) **FEDERAL AGENCY.**—The term “Federal agency” means—

(A) any Executive agency, as that term is defined in section 105 of title 5, United States Code;

(B) any military department, as that term is defined in section 102 of such title; and

(C) any other entity within the executive branch that comes into the possession of classified information.

SEC. 7. DEADLINE FOR REGULATIONS AND IMPLEMENTATION.

Regulations shall be promulgated in final form under this Act, and implementation of the requirements of this Act shall begin, not later than 24 months after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Missouri (Mr. CLAY) and the gentleman from California (Mr. ISSA) each will control 20 minutes.

The Chair recognizes the gentleman from Missouri.

GENERAL LEAVE

Mr. CLAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CLAY. Mr. Speaker, at this time I want to yield 3 minutes to the distinguished chairman of the House Oversight and Government Reform Committee, the gentleman from New York (Mr. TOWNS).

Mr. TOWNS. I would like to thank the gentleman from Missouri for yielding me 3 minutes.

Mr. Speaker, H.R. 1323, the Reducing Information Control Designations Act, introduced by Representative DRIEHAUS, is an important piece of legislation that will improve public access to unclassified information. I am pleased to be a cosponsor of this bill.

This week has been designated as Sunshine Week, and this bill will help bring more sunshine to the Federal Government. Our democracy requires that citizens be able to access information about how their government is working and how it is spending their tax dollars. This bill is the latest step that the Oversight Committee has taken to advance that goal.

In January we passed bills to open up presidential records and information on presidential libraries. The stimulus package requires that all spending information be posted online at recovery.gov, and we are holding a hearing on Thursday to examine how the transparency provisions of the stimulus bill are being implemented. And we are moving forward to obtain information from all Wall Street banks that receive bailout money, including AIG, on how they are spending that money, especially the bonuses. What these Wall Street firms need to understand is that if they are being supported by the taxpayers, which they are, sunshine applies to them also, and we will make that happen.

I would like to thank the gentleman from Ohio (Mr. DRIEHAUS) for taking the lead on this bill and the Chair of the Information Policy Subcommittee, Mr. CLAY, for all his work on bringing sunshine to the government. I also want to thank the ranking member, Mr. ISSA, for working together with us on these sunshine bills.

President Obama has indicated repeatedly that we need more transparency in our government. In almost every speech, he has indicated that. I agree with that goal. And this bill is an important step towards it.

I urge my colleagues to support this legislation. And, of course, on that note I would like to just commend the gentleman from Missouri and, of course, the gentleman from California for their outstanding work.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, often we bring a bill under suspension that's considered not to be overly important. This one is just the opposite. Transparency in government is an effort that has to be ongoing, and this is an important step. This solution has to be government-wide in order to be effective.

For too long, Mr. Speaker, the Federal departments have insisted on treating information that develops within their agency in a restricted fashion. We need to have government-wide solutions that make the maximum amount of information possible available to the public, and even if it is not available to the public, it must be classified at the most appropriate and lowest level in order to ensure its sensitive treatment.

For that reason I support, with the chairman, this piece of legislation that will reduce or eliminate the proliferation of terms such as "sensitive but unclassified" or "for official use only," designations which essentially mean nothing but clearly cause trepidation in the release of documents. Many organizations under the Freedom of Information Act have had to deal with redaction of these comparatively and usually meaningless terms.

So I join with the gentleman from Ohio, the chairman of the full committee, and the chairman of the subcommittee, Mr. CLAY, in asking that this important piece of legislation be moved under suspension because, although important, it is not controversial and its time has come.

Mr. Speaker, I reserve the balance of my time.

Mr. CLAY. I want to thank the ranking member, Mr. ISSA, for his remarks.

Mr. Speaker, I want to recognize one of our newest members on the committee, the gentleman from Ohio (Mr. DRIEHAUS) for 5 minutes. And, by the way, this is his inaugural bill on the floor, so I want to congratulate him too.

Mr. DRIEHAUS. A happy St. Patrick's Day to you, Mr. Speaker.

I very much appreciate the comments of the gentleman from Missouri and certainly the comments of Mr. ISSA from California as well as our chairman. This is an important issue, and I appreciate having the support of both the ranking member and the chairman of the committee as we move

forward on the Government Reform and Oversight Committee in really looking at how documents are classified in the United States Government.

As was mentioned by the chairman, this is Sunshine Week. And Sunshine Week is about shining the bright light on government to help people better understand what decisions are being made on their behalf because the information is the people's information.

But when we look at the records and we look at the classification of documents in the Federal Government, we find confusion. Since 1979 there have been six separate GAO reports talking about the over-classification of documents; yet nothing has been done by Congress to address this growing problem. Today there are over 107 different classifications. Some of these are official classifications, some of these are pseudo-classifications of documents in every administrative body in the Federal Government.

This bill is about the systemic issue of over-classification and the existence of these pseudo-classifications within the government. The citizens of our Nation have an inherent right to the information that the government collects so long as it's not of a sensitive nature. The bill promotes transparency and government efficiency by promoting a common language within government. It was introduced by Congressman WAXMAN last year, who was chairing the committee, and passed this House without objection.

Specifically, the bill has several components. It instructs the Archivist to create regulations that control what is classified and how it would be classified with the input of agency stakeholders. It provides training for agency employees who classify information. It calls for random audits of these materials by Inspectors General to ensure compliance. It requires personal identifiers to be placed on classified information in order to track and uphold regulations. And it restricts information from being classified that is not of a sensitive nature.

Essentially, Mr. Speaker, what this bill does is it allows the agencies of our government to not only talk with each other, but it allows the people to have access to the information and the decisions being made by their government.

□ 1415

It is an important step in the right direction. I would only give you one example to prove the point.

In 2008, and I think this was enlightening, there were over 362,000 requests under the Freedom of Information Act to the Federal Government; 121,833 of those requests still remain to be processed, and that is because of overclassification of documents.

It's not about documents of a sensitive nature not being turned over to the public, it is about making information available to the public in an easier fashion. That's what this bill is about.

I appreciate the support of the chairman and the ranking member.

Mr. ISSA. Mr. Speaker, I yield myself 2 minutes. I join with the gentleman in his comments and would only anecdotally tell you that this is the tip of the iceberg, and this committee is dedicated to drilling down deeply.

We want to know where our money has gone for TARP, we want to know where stimulus money is spent, both at the contractor and subcontractor level and beyond. We want to make sure that America's taxpayer dollars are well taken care of and transparent.

I will share with you something that perhaps you hadn't known, and that is that our government inflicts more wounds than you have yet seen, and you are going to see more in your time. Just last year I visited a location in Nevada, and since I was flying into Las Vegas people said, "Oh, are you going to Area 51?" I had been cautioned that I could not use that term, that that term was unacceptable. So I said, "Well, I can't tell you. I am just going to Nevada." So then when I returned I googled Area 51, and, of course, I saw detailed maps or detailed photos of everything, including the airfield that perhaps someone would land at, well into that Nevada test range which Google identifies as Area 51.

So I would say that if the gentleman and, of course, the Chair, would continue to work with us on all these matters, we will, on a bipartisan basis, drill down to try to prevent these prohibitions on that, which certainly flies in the face of common sense.

I reserve the balance of my time.

Mr. CLAY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as chairman of the Subcommittee on Information Policy, Census, and National Archives, I am pleased to join my colleagues in the consideration of H.R. 1323, the Reducing Information Control Designations Act.

This bill is being considered with an amendment to address some concerns that have been raised with the provision in the bill requiring incentives for individuals who successfully challenge the information control designation. This amendment strikes the language requiring incentives but continues to require a process through which individuals can challenge the information control designation.

Mr. Speaker, H.R. 1323 promotes transparency and government efficiency by promoting a common language within government. Therefore, I urge swift passage of the bill.

Mr. ISSA. Mr. Speaker, I yield back the balance of my time.

Mr. CLAY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri (Mr. CLAY) that the House suspend the rules

and pass the bill, H.R. 1323, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

LANCE CORPORAL MATTHEW P. PATHENOS POST OFFICE BUILDING

Mr. CLAY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1216) to designate the facility of the United States Postal Service located at 1100 Town and Country Commons in Chesterfield, Missouri, as the "Lance Corporal Matthew P. Pathenos Post Office Building".

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1216

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. LANCE CORPORAL MATTHEW P. PATHENOS POST OFFICE BUILDING.

(a) DESIGNATION.—The facility of the United States Postal Service located at 1100 Town and Country Commons in Chesterfield, Missouri, shall be known and designated as the "Lance Corporal Matthew P. Pathenos Post Office Building".

(b) REFERENCES.—Any reference in a law, map, regulation, document, paper, or other record of the United States to the facility referred to in subsection (a) shall be deemed to be a reference to the "Lance Corporal Matthew P. Pathenos Post Office Building".

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Missouri (Mr. CLAY) and the gentleman from California (Mr. ISSA) each will control 20 minutes.

The Chair recognizes the gentleman from Missouri.

GENERAL LEAVE

Mr. CLAY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CLAY. I now yield myself such time as I may consume.

On behalf of the House Committee on Oversight and Government Reform, I stand and join my colleagues from my home State of Missouri for the consideration of H.R. 1216, which names a postal facility in Chesterfield, Missouri, after Lance Corporal Matthew P. Pathenos.

As stated, H.R. 1216 has the support of the entire House congressional delegation from Missouri but is sponsored by my friend, Representative TODD AKIN. The bill was introduced on February 26 of 2009 and was considered by and reported from the Oversight Committee by voice vote on March 10.

As a member of the 3rd Battalion, 24th Marine Regiment, 4th Marine Di-

vision, Marine Forces and Reserve out of Bridgeton, Missouri, following in the footsteps of his older brother, Matthew Pathenos enlisted in military service with the hope of helping those who could not help themselves.

Unfortunately, on February 7, 2007, Lance Corporal Matthew Pathenos was killed while conducting combat operations in Fallujah, Iraq. In recognition of Corporal Pathenos' commitment to country and the concept of freedom, Mr. Speaker, I ask my colleagues join me in commemorating the life of this brave Marine by supporting the passage of H.R. 1216.

I reserve the balance of my time.

Mr. ISSA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in strong support of this bill designating the facility of the United States Postal Service located at 1100 Town and Country Commons in Chesterfield, Missouri, as the Lance Corporal Matthew P. Pathenos Post Office Building.

Marine Lance Corporal Pathenos was a selfless patriot. He was a loving brother, son and friend. As one of his comrades in arms once reflected, "The best thing about Matt was his ability to wake up every day with a smile and hold it all day long." Even through the hardships of war, Matt strove to bring joy to his friends.

A native of Ballwin, Missouri, Matt was an avid golfer and accomplished pilot, earning his flying license at age 14. After graduating from high school in 2003, Matt followed in the footsteps of his older brother and mentor, Marine Sergeant Christopher Pathenos, who had enlisted in the Armed Forces in the wake of September 11.

In the words of one relative, "For Matty, the motivation was more about Christopher, seeing how the Corps treated him."

As a member of the 3rd Battalion, 24th Marines, Matthew was one of 80 Marine members of his unit that were attached to a sister unit, the 1st Battalion, 24th Marines, for deployment to Iraq in September of 2006.

Tragically, on February 6, 2007, Lance Corporal Pathenos lost his life near Fallujah when his Humvee was struck by an improvised explosive device. His family will always remember him as a smiling young man who "sang as though no one could hear him and danced as though no one was watching him."

In a release shortly after the tragic loss, the family captured the sentiments of a grateful Nation. "Like his brother, Christopher, Matthew was proud to be a Marine and volunteered to serve his country. Matthew paid the ultimate sacrifice for our freedom and the future generations of this country. He loved his country and family, and we will miss him terribly."

Mr. Speaker, I urge my colleagues to join the chairman and myself in support of this courageous young man and

the sacrifice he gave by naming the post office in his honor.

I reserve the balance of my time.

Mr. CLAY. Again, I would like to thank my friend and colleague, Mr. AKIN, for introducing such a thoughtful measure.

I urge my colleagues to vote in favor of renaming the Town and Country Commons Post Office in Chesterfield, Missouri, after Lance Corporal Matthew P. Pathenos by passing H.R. 1216.

I continue to reserve the balance of my time.

Mr. ISSA. Mr. Speaker, I urge support for this resolution, and I yield back the balance of my time.

Mr. AKIN. Mr. Speaker, I rise today in strong support of H.R. 1216, a bill I introduced to honor the life of Matthew P. Pathenos by designating the post office in Chesterfield, Missouri, as the "Lance Corporal Matthew P. Pathenos Post Office Building." A resident of Ballwin, Missouri, Lance Corporal Matthew Pathenos was part of the 3rd Battalion, 24th Marine Regiment, 4th Marine Division, of the Marine Forces Reserve. On February 7th, 2007, Lance Corporal Pathenos was killed during combat operations in the Anbar province of Iraq. Matthew was often described by family and friends as a friendly young man who always had a joke to tell and a smile on his face. Matthew decided to join the military in order to follow his older brother into his country's service with the hope of helping those who could not help themselves. Matthew's then girlfriend, Erin, calls Lance Corporal Pathenos her hero, and wishes she might one day, "possess a fraction of his bravery and discipline."

As the father of two Marines, one of whom has served in Iraq; it is a privilege to stand here today to honor one of our fallen soldiers. Matthew's commitment and dedication to his country is a shining example of how our military men and women are the finest our nation has to offer. His and his family's sacrifice should serve as a reminder to all that the freedom we enjoy as Americans is not free but the result of the tremendous bravery and selfless service of men and women willing put themselves in harms way for freedom's cause.

Our nation will be forever indebted to Lance Corporal Matthew Pathenos.

Mr. Speaker, I ask that my colleagues join me today in honoring Lance Corporal Matthew Pathenos.

Vote "yes" on H.R. 1216.

Mr. CLAY. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri (Mr. CLAY) that the House suspend the rules and pass the bill, H.R. 1216.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

Mr. CLAY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX and the

Chair's prior announcement, further proceedings on this motion will be postponed.

The point of no quorum is considered withdrawn.

SMALL BUSINESS ADMINISTRATION EXTENSION

Ms. VELÁZQUEZ. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1541) to provide for an additional temporary extension of programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1541

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. EXTENSION.

(a) IN GENERAL.—Section 1 of the Act entitled "An Act to extend temporarily certain authorities of the Small Business Administration", approved October 10, 2006 (Public Law 109-316; 120 Stat. 1742), as most recently amended by section 1 of Public Law 110-235 (122 Stat. 1552), is amended by striking "March 20, 2009" in each place it appears and inserting "July 31, 2009".

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall take effect on March 19, 2009.

The SPEAKER pro tempore. Pursuant to the rule, the gentlewoman from New York (Ms. VELÁZQUEZ) and the gentleman from Missouri (Mr. GRAVES) each will control 20 minutes.

The Chair recognizes the gentlewoman from New York.

GENERAL LEAVE

Ms. VELÁZQUEZ. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and include extraneous material on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. VELÁZQUEZ. Mr. Speaker, I yield myself such time as I might consume.

As our Nation responds to the current economic downturn, small businesses will be central to our recovery. They are the engine of our economy, producing 60 to 80 percent of new jobs, and their role is even more important during recessions.

The fact is, when the job market is tight, many Americans venture out, launch their own enterprises. Following the recession of the early 1990s, small firms generated 3.8 million new positions for American workers, a number that surpassed big business expansion by almost half a million.

That kind of resilience, in the face of economic uncertainty, is a testament to the strength of our Nation. Times may be tough, but the American entrepreneurial spirit is tougher. Today, the

House is considering legislation that will extend programs at the Small Business Administration into July.

These programs play a pivotal role in our economy. The SBA guarantees loans that allow new ventures to start and existing firms to grow. It provides counseling and technical know-how to entrepreneurs, and it helps ensure that small firms can obtain their fair share of Federal contracts, something that will be more important as the Economic Recovery Act generates \$111 billion worth of new public works projects.

Extending these programs is important, but we must not lose sight of a larger goal. Later this Congress we will pass legislation to modernize the SBA and change the agency's culture. In these difficult economic times, we will need an SBA that can respond effectively. This will require extensive reforms.

Already in this Congress we passed the most significant update to the agency in a decade. With the economic recovery legislation, we made SBA bank loans more affordable for entrepreneurs. We increased the amount of a loan that the SBA can back, further opening up affordable credit for small business owners.

We established a new Small Business Stabilization Financing Program at the SBA, which will provide short-term loans to businesses struggling to meet their existing obligations. We gave the SBA tools it needs to begin unfreezing the secondary market for small business loans.

□ 1430

By reforming and updating the Small Business Investment Company program, we help channel new venture capital to small firms.

Taken together, all of these initiatives will yield \$21 billion in new investment and lending for small businesses and save or create 600,000 new jobs.

Earlier this week, President Obama moved to implement many of these changes. I applaud the administration for working quickly. However, this is just the start.

Later this year, the committee will draft a comprehensive rewrite of the SBA. If there has ever been a time for a strong, effective SBA, that time is now. It will be the responsibility of every Member in this House to make sure that we reauthorize these programs properly so the SBA can help Main Street businesses weather this recession and contribute to our economy.

The extension we are voting on today will give us the time to hear from all our colleagues and interested parties as we develop this legislation. I urge my colleagues to vote "yes."

I reserve the balance of my time.

Mr. GRAVES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of the chairwoman's request to suspend the rules and pass H.R. 1541. The bill is very simple. It extends the authorization of all programs operated or authorized by the Small Business Act, the Small Business Investment Act, and any program by the Small Business Administration for which Congress has already appropriated funds. The extension will last until July 31 of this year.

This extension is necessary because the authorization for various programs operated by the SBA ceases on March 20. The Committee has worked in a bipartisan fashion in the last Congress, and we reported out a number of bills to address programs operated by the SBA. Despite the efforts of the House, time in the last Congress expired before the legislative process could run its course.

The work needed to help America's entrepreneurs revitalize the economy simply can't be accomplished by Friday of this week.

Without the enactment of this extension, a number of vital programs that the SBA operates will cease to function. Given the importance that small businesses play, and will continue to play in the revitalization of the American economy, we cannot allow the SBA authorizations to run out.

Enactment of this extension will enable the House and Senate to work in a diligent manner to address the necessary changes to SBA programs. I urge all of my colleagues to suspend the rules and pass H.R. 1541.

I reserve the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, I yield 3 minutes to the gentleman from Oregon (Mr. Wu).

Mr. WU. Thank you, Madam Chair, and thank you, Mr. Speaker. As President Obama said recently, "small businesses are the heart of the American economy." They are responsible for half of all private-sector jobs, and they've created about 70 percent of all new jobs in the past 10 years.

We need to build our economy from the ground up, create stable jobs, and foster innovation that will lead to long-term growth. To do this, we need to support the small high-tech companies that grow our economy.

The Federal Government supports these innovative small businesses through the Small Business Innovative Research program and the Small Business Technology Transfer Program, which help companies commercialize Federally funded research. The programs now distribute more than \$2.5 billion each year and constitute the largest tech-transfer commercialization programs that we have in the Federal Government.

However, these programs must be updated to reflect the current innovation environment. Award sizes should be increased to reflect inflation and the

growth of operating costs; the issue of venture capital participation needs to be resolved; flexibility must be instilled between phase one and phase two grants; and data collection needs to be improved so that we can better target the program and determine its effectiveness.

Last year, the House overwhelmingly passed H.R. 5819, which made these necessary changes based on suggestions from hearings in my Technology and Innovation Subcommittee and in conjunction with our work with Chairwoman VELÁZQUEZ and Ranking Member GRAVES. However, good legislation, once again, died in the other Chamber.

Today, we find the House needing to pass an extension to keep these programs alive. This extension is necessary because the SBA and SBIR serve important purposes. But, moving forward, if we are to continue realizing the full value of programs like SBIR, we must reauthorize them with changes that reflect the evolving innovation environment, rather than simply extending the current authorization. It must be an innovation program as well as a jobs and small business program.

At a time when credit is tight and jobs are scarce, SBIR and STTR can have a significant role in jump-starting our economy. The House and Senate need to pass legislation this year that will reauthorize these programs, innovate new products and services, support small businesses, and create well-paying jobs for decades to come.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise in strong support of H.R. 1541.

The Small Business Administration (SBA) was created in 1953, and has a current business loan portfolio of roughly 220,000 loans worth more than \$50 billion, which makes it the largest single financial backer of U.S. businesses. My district is home to these businesses, many of which are struggling to hang tough in this trying economy.

In the 110th Congress, several short-term SBA authorization measures were enacted; the latest was signed into law on May 23, 2008. Under that law, authorization for SBA programs is scheduled to expire on March 20. I am hopeful that President Obama continues the recognition and support for small businesses that he demonstrated yesterday. His leadership, along with that of my colleague NYDIA VELÁZQUEZ on these issues could not come at a more important time.

Small business is frequently viewed as an incubator for employment and economic growth, and is a continuing legislative and oversight concern for Congress due to its constitutional role, through the interstate commerce and general welfare clauses, to promote economic well being and prosperity.

While many analysts believe a very significant percentage of the nation's jobs are created by small businesses, others note that a great many small businesses fail every year thereby eliminating jobs.

The 111th Congress is likely to consider many small business issues as it debates re-

authorization for the many Small Business Administration (SBA) programs that are scheduled to expire in 2009. Our small business owners need certainty to plan for the future and I will continue to work hard for a more permanent solution to complement the authorizations that many businesses have to endure.

A primary issue in the reauthorization is likely to be the cost to the government of various small business assistance programs. The Bush Administration had proposed that certain loan programs be cut back or eliminated, that borrowers in the SBA's basic loan program be charged higher fees, and that interest rates for disaster loans rise to market levels after five years. I hope that a full review of these policies is underway by the new administration.

Ways to insure that small businesses benefit from economic stimulus programs are likely to be considered. Finding ways for small businesses to provide health insurance to employees could be vital in getting elements of the business community to be actively supporting and working with Congress as we press ahead with legislation on health care. I understand that we in Congress cannot run your businesses for you. I just want to be there to help fashion fair and reasonable legislation that affects small business.

Mr. Speaker, this bill authorizes Small Business Administration programs and authority through July 31 and again it is my hope that we continue to engage the business community as this Congress seeks to move America from recession back to prosperity.

Mr. GRAVES. I would, again, urge my colleagues to support H.R. 1541.

I yield back the balance of my time.

Ms. VELÁZQUEZ. Mr. Speaker, I ask for a "yes" vote.

I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from New York (Ms. VELÁZQUEZ) that the House suspend the rules and pass the bill, H.R. 1541.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on motions to suspend the rules previously postponed.

Votes will be taken in the following order:

House Resolution 240, by the yeas and nays;

House Resolution 211, de novo; and
H.R. 628, de novo.

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes. Remaining votes on outstanding postponed motions to suspend the rules will be taken later.

SUPPORTING PROFESSIONAL SOCIAL WORK MONTH AND WORLD SOCIAL WORK DAY

The SPEAKER pro tempore. The unfinished business is the vote on the motion to suspend the rules and agree to the resolution, H. Res. 240, as amended, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Colorado (Mr. POLIS) that the House suspend the rules and agree to the resolution, H. Res. 240, as amended.

The vote was taken by electronic device, and there were—yeas 421, nays 0, not voting 10, as follows:

[Roll No. 128]

Mr. BILIRAKIS changed his vote from “nay” to “yea.”

So (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

SUPPORTING NATIONAL WOMEN'S HISTORY MONTH

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and agreeing to the resolution, H. Res. 211.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Missouri (Mr. CLAY) that the House suspend the rules and agree to the resolution, H. Res. 211.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the yeas have it.

RECORDED VOTE

Mr. CONNOLLY of Virginia. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 418, noes 0, not voting 13, as follows:

[Roll No. 129]

□ 1515

So (two-thirds being in the affirmative) the rules were suspended and the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

AUTHORIZING PILOT PROGRAM FOR PATENT CASES

The SPEAKER pro tempore. The unfinished business is the question on suspending the rules and passing the bill, H.R. 628.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. JOHNSON) that the House suspend the rules and pass the bill, H.R. 628.

The question was taken.

The SPEAKER pro tempore. In the opinion of the Chair, two-thirds being in the affirmative, the ayes have it.

RECORDED VOTE

Mr. CONNOLLY of Virginia. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 409, noes 7, not voting 15, as follows:

[Roll No. 130]

□ 1523

So (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. INGLIS. Mr. Speaker, on rollcall No. 130, I was unavoidably detained. Had I been present, I would have voted "aye."

APPOINTMENT OF MEMBERS TO BOARD OF VISITORS TO THE UNITED STATES COAST GUARD ACADEMY

The SPEAKER pro tempore. Pursuant to 14 U.S.C. 194(a), and the order of the House of January 6, 2009, the Chair announces the Speaker's appointment of the following Members of the House to the Board of Visitors to the United States Coast Guard Academy:

Mr. COURTNEY, Connecticut

Mr. COBLE, North Carolina

CERTIFICATION TO CONGRESS IN ACCORDANCE WITH PROVISIONS OF SECTION 1512 OF STROM THURMOND NATIONAL DEFENSE AUTHORIZATION ACT—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 111-25)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

To the Congress of the United States:

In accordance with the provisions of section 1512 of the Strom Thurmond National Defense Authorization Act for Fiscal Year 1999 (Public Law 105-261), I hereby certify to the Congress that the export of fine grain graphite to be used for solar cell applications and for the fabrication of components used in electronic and semiconductor fabrication, and two dual-motor, dual-shaft mixers to be used to produce carbon fiber and epoxy prepreps for the commercial airline industry is not detrimental to the U.S. space launch industry, and that the material and equipment, including any indirect technical benefit that could be derived from these exports, will not measurably improve the mis-

sile or space launch capabilities of the People's Republic of China.

BARACK OBAMA.
THE WHITE HOUSE, March 17, 2009.

NATIONAL WOMEN'S HISTORY MONTH

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, obviously I rise to commemorate some special days, St. Patrick's Day to all of my wonderful Irish friends all over the Nation, and certainly to perpetuate the wonderful relationship that we have with the great nation of Ireland.

At the same time, we have the opportunity to celebrate supporting the goals and ideals of National Women's History Month, and I thank my good friend, Congresswoman LYNN WOOLSEY, for offering H. Res. 211, supporting the goals and ideals of National Women's History Month.

There is so much we can say as part of the great history of the women of this country and around the world, but we all should note that women express and exhibit a very special part of American history.

Today, women account for 51 percent of the world's population, and throughout women's time, we have had countless sisters of brilliance. And so I salute them today and say we must stand for the cause of pay equity, and I am excited that one of the first bills that the President signed was pay equity.

I am also excited to note that I offered legislation to support the placement of Sojourner Truth, a suffragette and an abolitionist, in the House of the United States Capitol, and that will be done.

Let me close by simply thanking all of the great women of this Nation, Barbara Jordan and others, for what they have done and what they have contributed to America's history.

HUMAN EMBRYONIC STEM-CELL RESEARCH

(Mr. LAMBORN asked and was given permission to address the House for 1 minute.)

Mr. LAMBORN. Mr. Speaker, human lives should never be sacrificed for the promotion of science. The very purpose of science is to uphold and protect life. We cannot in one breath say we want to advance science in order to save lives, and in the next support science that devalues the life of the smallest and most defenseless humans. All human life is sacred.

The alternatives to embryonic stem-cell research are vast. There is no reason to force taxpayers to fund research that will destroy human life because the advances we are seeing from adult

stem-cell research hold tremendous promise.

To date, there have been 73 treatments for disease ethically using adult forms of stem-cell research while embryonic stem-cell research has failed to provide a single treatment.

There is no one in this Chamber who does not wish to see science advance. But as we progress, we must be mindful that science is best when it is used within ethical boundaries. In our quest for progress, if we compromise the morals that support us, what good will our so-called progress be then?

OUT-OF-CONTROL SPENDING MUST STOP

(Mr. LUETKEMEYER asked and was given permission to address the House for 1 minute.)

Mr. LUETKEMEYER. Mr. Speaker, families and small businesses all across our country are making sacrifices, yet our government continues to spend like a drunken sailor. And how does Washington propose paying for all this spending? With more tax increases on hardworking families and small businesses, the very businesses that are crucial generators of job creation and economic growth.

The President's budget includes the largest tax increase in history, shouldering our families and small businesses with the cost of an ever-expanding government. Tax increases on small businesses will stifle job creation and economic growth at the very moment our country needs a strong and robust small-business sector to help us get back on solid ground.

The President's cap-and-trade program will increase the cost of energy for all Americans and place a tax of about \$3,000 per household in my district for this very program. Hardworking families and businesses all across my district and America are asking: What is going on in Washington? Does it have a clue how we work hard and how we earn our money and what we are doing with it?

This out-of-control spending must stop.

□ 1530

CONGRATULATING CARROLLTON HIGH SCHOOL LADY TROJANS ON STATE CHAMPIONSHIP

(Mr. GINGREY of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GINGREY of Georgia. Mr. Speaker, I rise to recognize a very talented group of girls from Carrollton, Georgia. The Carrollton High School Girls Basketball team—or the Lady Trojans—defeated a very talented Lakeview-Fort Oglethorpe team 51-31 to claim the Class AAA Georgia High School Association State title this weekend.

The Lady Trojans found themselves down at the half, 24–23. However, Carrollton's defense, led by Karisma Boykin—always helps to have charisma, Mr. Speaker—stole the show in the second half, keeping the explosive Lakeview-Fort Oglethorpe offense scoreless in the third quarter and allowing only seven points in the fourth quarter. As they say, defense wins championships.

Mr. Speaker, we all know that the other thing that wins championships, of course, is hard work and determination, and there was no shortage of that from Carrollton Coach Shon Thomaston and the Lady Trojans.

Mr. Speaker, I ask that my colleagues join me in congratulating the Carrollton High School Lady Trojans on their State championship, as well as all of their hard work that got them there.

PRESIDENT OBAMA SHOULDN'T BE SURPRISED ABOUT AIG BONUSES

(Mr. BURTON of Indiana asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BURTON of Indiana. Mr. Speaker, the President showed some real anger about the bonuses that were paid to AIG executives. The problem is, he either knew they were getting the bonuses or he should have because every one of the spending bills that came through this House went through a conference committee, and the White House was deeply involved in what was put in those conference committee reports.

The stimulus package, the TARP bill, every single bill that gave money to AIG and to others went through the scrutiny of the White House. The President is up there today saying, "Oh my gosh, this is terrible," and he shows real anger. Well, if he didn't know about it, he should have; and if he did know about it, he shouldn't be raising Cain about it.

THE REAL AIG OUTRAGE

(Mr. STEARNS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STEARNS. Mr. Speaker, the previous speaker mentioned the outrage about the bonuses to AIG. That's not the real outrage. The real outrage is that taxpayers have given AIG \$173 billion, and this amount of money was then used to funnel out to other financial institutions.

After months of government stonewalling, on Sunday night AIG officially acknowledged where most of the taxpayer funds had been going. Since September 16, AIG has spent \$120 billion in cash, collateral, and other payments to banks, municipal govern-

ments, and other derivative counterparties around the world. This also includes \$20 billion to European banks. We never intended for this money to go overseas; the taxpayers thought it was going to AIG.

This list also includes American charity cases like Goldman Sachs, which received \$13 billion. This comes after months of claims by Goldman Sachs themselves that they did not need the money. Then why take it?

Mr. Speaker, that's the real AIG outrage.

AIG SHOULD PAY BACK EVERY CENT THEY SPENT ON BONUSES

(Mr. HALL of New York asked and was given permission to address the House for 1 minute.)

Mr. HALL of New York. Mr. Speaker, I was as shocked as all Americans were to learn about AIG, the recipient of more than \$170 billion of taxpayer money, paying out more than \$165 million in bonuses to its executives. Where I come from, when you run your company into the ground, you get fired, you do not get a bonus.

Seventy-three people at AIG received bonuses of more than \$1 million; that includes one bonus of \$6.4 million, six more who received more than \$4 million each. Eleven people received retention bonuses, that is, bonuses specifically designed to keep valuable employees from leaving the company. Well, you know what? They have already left the company—take the retention bonus and then leave; all this from a company that is 80 percent owned by the taxpayer. The people of the United States are not going to stand for this behavior from these people; neither would I, neither should this House.

AIG should pay back every cent they spent on "performance bonuses," and the only reward they should get for their performance is a pink slip.

FORT DUPONT ICE HOCKEY CLUB

(Mr. HIGGINS asked and was given permission to address the House for 1 minute.)

Mr. HIGGINS. Mr. Speaker, the first annual Lawmakers versus Lobbyists Charity Hockey Game took place 2 weeks ago on Friday, March 6. The game was played at the Kettler Capitals Iceplex, the practice facility of the NHL's Washington Capitals.

The game was a fundraiser for the Fort Dupont Ice Hockey Club of Washington, D.C. The club is a developmental program that provides local, inner-city youth with an opportunity to participate in an organized ice hockey program.

More than \$25,000 was raised for this organization. The Lawmakers team was led by Senator JOHN KERRY, Congressman ANTHONY WEINER—who

played goalie with his cat-like reflexes—Congressman PATRICK MURPHY, and me. Also, Bob Fisher, the assistant manager of the Cloak Room, participated in the Members' team.

The Lobbyists were led by Nick Lewis and Jeffrey Kimbell. Lobbyist Captain Nick Lewis and Lawmaker Captain Tim Regan squared off for the ceremonial opening face-off.

The Lawmakers won a hard-earned 6–4 victory in this inaugural contest. The real winners, however, Mr. Speaker, of this game were the kids from the Fort Dupont Ice Hockey Club.

I yield to Mr. MURPHY.

Mr. PATRICK J. MURPHY of Pennsylvania. Mr. Speaker, it was a great charity event.

There are a lot of challenges facing our country right now where our focus is, but we took time out for the kids to make sure that we raised money. These kids could not afford to play the game of hockey, which really demonstrates and embodies the sense of teamwork and goal setting. It was great to be with those kids, with the first African American NHL player, who was also there. And I would also like to highlight the cooperation of the Washington Capitals.

I would like to say that our colleague from New York (Mr. WEINER), who got the puck of the game, who was our goaltender, a lot of folks did say that he had cat-like reflexes. He reminded me of a young Mike Richter, who most folks understand is a New York Ranger, won the World Cup for Team America that was played at the Wachovia Center in Philadelphia. But Mike Richter is from the suburbs of Philadelphia, and I was proud of that comparison of ANTHONY WEINER to Mike Richter. I sometimes question the athletic ability of Mr. WEINER, but that day he really showed his skill.

Mr. WEINER. Will the gentleman yield so I may defend myself?

Mr. PATRICK J. MURPHY of Pennsylvania. I will yield.

Mr. WEINER. First of all, let me join with my colleagues in expressing the gratitude that we all have to the organizers that helped raise so much money for these kids that play in the inner city. They scarcely have rinks, unlike in Buffalo and some of our communities. It was really a terrific program. I'm glad we were able to do it.

"Lobbyists" is a dirty word in this town now—and sometimes they played a little dirty on the ice, but we will put that aside because the result was the same.

I just want to say, being a great hockey player in Congress is kind of like being the one-eyed man in the land of the blind; I'm not sure it says all that much. But I want to thank Congressman HIGGINS—who I believe scored two goals; I learned that by watching the news reports and hearing him say it again and again throughout

his quotes—and also you, Mr. MURPHY. I have never seen a hockey player skate that slowly, but somehow you managed to get to every puck.

This is a great cause. Let's hope that we do it every 10 or 12 years or so because that's how long it takes us all to recover. I thank you very much for what you have done, and I thank you for persuading me to play in the game. It is true, I am cat-like in the crease. I curl up in a ball and just sleep through the game while you guys did the hard work.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. TONKO). Under the Speaker's announced policy of January 6, 2009, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

AMERICA'S ECONOMIC POLICY: SPEND, BORROW AND TAX

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. POE) is recognized for 5 minutes.

Mr. POE of Texas. Mr. Speaker, America's new economic policy is real simple; spend a lot of money, borrow a lot of money, and tax everybody, all in an effort to make the United States a country like socialist France. And the method to pay for these high-dollar programs that the administration is now funding is to tax everything, especially energy.

The first part of the "tax energy plan" is to tax energy consumption. Now we understand that every homeowner in the United States will be taxed approximately \$3,000 a year every year for the consumption of energy in that home. So every time you turn on the lights, you turn up the taxes. You use a little bit of heat to keep warm in the winter, you're going to pay the heat tax, all in an effort to bring revenue in for these high-dollar programs.

There are more ideas to tax energy. One is to increase the gasoline tax—not that we aren't paying enough for gasoline already, now we're going to pay 10 cents more a gallon in the gasoline tax. We use gasoline, we're going to give the government more money.

And then, thirdly, there is the mileage tax that is being proposed. What that means, Mr. Speaker, is for every mile you drive somewhere in the fruited plain, the government is going to track you with GPS, and at the end of the day you are going to get taxed on mileage tax. Being tracked by GPS by the Federal Government sounds a little bit like Big Brother out of "1984" to me.

Contrary to some places in the United States, where I come from we don't have mass transit. We don't have choo-choo trains that run and take ev-

erybody to work. I have an area made up predominantly of rice farmers, suburban areas, petrochemical areas, and we don't have high-dollar trains like the one that is being built from Los Angeles to Las Vegas, or from La La Land to Fantasy Land. People have to drive work trucks, that's what they drive, but now they are going to be taxed for driving. And of course that is taxing the American worker and the consumer.

And now there are going to be new energy taxes on energy companies—you know, those mean old energy companies that produce energy to keep the lights on in this place and other places, and so we can drive our vehicles and that sort of thing. But the energy companies are going to pass that tax on to the rest of us. And what that means, you cut through all the taxes, because of the new energy tax on energy companies, every American is going to add 41 cents to their gasoline; in other words, that's passed on to us. You add on the mileage tax, you add on the 10-cent tax for using gasoline, and now we've got another 41 cents that will be passed on to the American consumer.

Now the new cap-and-trade idea—it really should be called cap-and-tax—is sending energy companies packing their bags. Mr. Speaker, what I mean by that is, they're leaving town. The taxes are too high. They're not going to stay here any longer. It's been reported by different media sources that the new country, the new place for energy companies to move is a place called Zug, Switzerland. You've probably never heard of it. You have to look it up on a map to find it. But the tax rate for corporations in that area of Switzerland is 9 percent. The corporate tax in the United States on those energy companies is 35 percent. No wonder they're leaving town. They can't afford to do business in the United States.

□ 1545

The U.S. energy companies are going someplace else because of the overwhelming tax structure here.

Mr. Speaker, the answer is not to tax more but to allow more energy production, novel thought that that is. Rather than run energy companies out of town, maybe we ought to let them expand in the Outer Continental Shelf. That would actually create thousands of American jobs. We wouldn't be sending money overseas to OPEC. We'd keep that money in the United States. We'd keep the lease revenue that those oil companies have to pay for to get that oil out of the Outer Continental Shelf. We'd keep that lease revenue in the United States. And we'd also keep the tax revenue in the United States.

But, Mr. Speaker, the new French economic plan is tax anything that produces in this country, and now we're going to tax energy out of the en-

ergy business, including consumers that use energy. I guess next year, Mr. Speaker, we'll all wonder why we're just freezing in the dark because we don't have any energy because it all left town.

And that's just the way it is.

SECURITY CHALLENGES ARISING FROM THE GLOBAL FINANCIAL CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. SKELTON) is recognized for 5 minutes.

Mr. SKELTON. Mr. Speaker, students of history know that hyperinflation in Germany was a significant factor in the rise of Hitler. The economic decay of the Soviet Union led to regime change across Eastern Europe. And a serious economic crisis preceded the French Revolution. So the record is clear that economic crises can have consequences for national security of the highest order. Here in the United States, our economic strength has always been the foundation of our national power and our national security. Economics plays no less important a role in the fate of many other nations.

Knowing this, the House Armed Services Committee decided to explore how the current global financial crisis is affecting national security by holding a hearing last week with a distinguished panel of economic and national security experts. We had been working to hold such a hearing since November, but the urgency of this effort was only emphasized when the Director of National Intelligence, Admiral Dennis Blair, stated in this annual threat assessment that the global financial crisis represents the primary near-term concern for U.S. national security. During our hearing, we learned more about the many ways the world has been thrown into serious turmoil by this sudden global shock and that many if not most of the international consequences are yet to come.

We learned that, at a minimum, the global financial crisis will exacerbate an already growing set of political and economic challenges facing the world. In country after country, the crisis is increasing citizen discontent and anger toward their leaders and providing an excuse for authoritarian regimes to consolidate their power. It distracts and strains our allies and generates conditions that could provide fodder for terrorism. Financial turmoil can loosen the fragile hold that many countries have on law and order and increase the number and size of ungoverned spaces.

While most of the experts we heard from agree that the strongest economies will weather this storm, it is the fragile states that worry me the most. Emerging democracies throughout Eastern and Central Europe, Africa,

and Asia will turn to the Western world for support. If we cannot or do not help them, they may be forced into economic alliances of necessity with long-term consequences. When Iceland recently turned without success to its friends in the West, it found a "new friend" in Russia. Jamaica has received significant financial assistance from China. The list of countries in critical regions in need of such assistance is long indeed. Economic pressures within European countries might even become so severe as to seriously weaken or unravel the ties that bind the countries of the European Union and NATO Alliance together.

Perhaps most serious, at a time when U.S. leadership is sorely needed, our international credibility is at an unprecedented low. The crisis is causing the emerging nations to question the Western model of market capitalism. Flawed policies, poor decisions, weak regulation, and questionable behavior have led to a widespread perception that American-style capitalism is unsustainable. This perception may be the most corrosive effect of the current crisis.

Mr. Speaker, our response to the global economic crisis must be far reaching and far seeing. We must restore our economy, maintain and enhance our key instruments of national power, including the Department of Defense, and take an approach with the world that reestablishes our credibility and claim to world leadership. We must support our friends and maintain our alliances. We must not become so self absorbed that we fail to recognize our long-term strategic interests. And we must be very clear, in today's world a strong national defense is not a luxury, it is an imperative.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1388, GENERATIONS INVIGORATING VOLUNTEERISM AND EDUCATION ACT

Mr. HASTINGS of Florida, from the Committee on Rules, submitted a privileged report (Rept. No. 111-39) on the resolution (H. Res. 250) providing for consideration of the bill (H.R. 1388) to reauthorize and reform the national service laws, which was referred to the House Calendar and ordered to be printed.

THE PLIGHT OF THE IRAQI REFUGEES CONTINUES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Ms. WOOLSEY) is recognized for 5 minutes.

Ms. WOOLSEY. Mr. Speaker, the President has announced a plan to re-deploy troops from Iraq, and if you're watching the nightly news or pick up a paper, you might think that the occu-

pation was actually over. But when was the last time you saw a major TV news story from Iraq or some ink at least above the fold about Iraq?

Sadly, the United States' occupation of Iraq is far from over. The need still remains for a stable nation and a stable Iraqi Government that is able to provide basic services and a sense of normalcy and support of the rule of law for everyone in Iraq.

Almost 6 years ago today, the United States military was mobilized in a pre-emptive attack on Iraq. By now we all know there were no weapons of mass destruction. However, destruction was left in the wake of the invasion. Both the Iraqi and American Governments must focus on these immediate pressing human needs rather than continuing military presence. A prolonged occupation is not the answer. Prosperity and stability will not come at the end of a gun. We must support reconstruction. We must support reconciliation efforts. And we must find the best way out of Iraq so that we can begin all of this. And the best way is by bringing our troops and military contractors home from Iraq so then we can give Iraq back to the Iraqis and work with them to rebuild reconciliation and to return to their homes.

Families face unimaginable hardships, from widespread violence and suicide attacks to the destruction of their schools, their hospitals, and utility providers. Some of the devastation can be and is actually visible, and it's rubble that still litters the streets and walled-off sections of neighborhoods.

The more difficult picture to capture is that of the refugees. Millions have fled their homes never to return. Nationwide there are between 1.6 million and 2.8 million internally displaced people, refugees who left their homes but not Iraq. According to the International Organization of Migration, only 288,000 have returned home. Refugees International calls this one of the largest humanitarian and displacement crises in the world. They say "most are unable to access their food rations and are often unemployed; they live in squalid conditions, have run out of resources, and find it extremely difficult to access essential services."

Mr. Speaker, the Iraqi Government has established a program to reimburse Iraqi families who have lost their homes. Most families get about half of their home's value, and that's when someone can safely come into the area to assess the damage. This process is slow going and will never make these families whole.

But to what are Iraqi families returning? Refugees International found that some Iraqis who have tried to return home have found their homes occupied or destroyed, the likelihood of violence still high, a collapse of social services, and neighborhoods divided into sectarian areas.

Sadly, the U.S. occupation has caused this to happen. But the good news is we have a chance to bring our troops home, give Iraq back to the Iraqi people, and let them have their sovereignty and let them get home to their properties. We need to help them do that. What we don't need to be doing is spending more money on the military occupation in Iraq.

THE AIG CASINO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. SHERMAN) is recognized for 5 minutes.

Mr. SHERMAN. Mr. Speaker, the AIG Financial Products unit created a casino. At that casino, people were invited to bet on credit default swaps. Smart people went to that casino, the largest financial institutions, the richest and the most powerful in the world. They were smart. They bet against the mortgage market of the United States. They won. But they broke the bank.

Now when ordinary gamblers break the bank, they have to settle for less than their full winnings. But these, as I said, are the most rich and powerful and best-connected institutions in the world, and they want everything the contract calls for. And that is why American taxpayers have provided \$170 billion in payments and risk assumption so that these gamblers would be paid.

That is not how capitalism is supposed to work. When you're owed money by an insolvent financial institution, that institution is supposed to be in receivership. Those who have insured accounts or insured life insurance policies get paid; everybody else takes a substantial haircut. But, instead, Wall Street is telling us that there is this sanctity of contract; so they must get every penny that Wall Street is supposed to get under the contract.

Wait a minute. Sanctity of contract? Every bankruptcy, every receivership involves setting aside virtually every contract of the insolvent financial institution. And when Richard Nixon was President, he, through wage and price controls, shredded every wage contract in this country.

Receivership is the way to clean up the balance sheets of our financial institutions. But we're not focused on it because it costs the shareholders, it costs the creditors, it costs management, and they would rather give us a "solution" that costs the American taxpayer.

Receivership means that you strip some liabilities off the balance sheet. That is the way to strengthen the balance sheet of our financial institutions. Instead, we're told that the way to improve these balance sheets is to take assets off the balance sheet, albeit the so-called toxic assets. There's nothing

the matter with those assets except they're worth less than they used to be. You do not strengthen financial institutions by taking their assets. You strengthen them by putting them in receivership and removing their liabilities.

Now we're focused on the bonuses being paid to the croupiers of this AIG casino. Receivership would have been the clearest way to prevent those payments from being made, but we weren't told about those outrageous bonuses until hours before they were distributed.

□ 1600

Now all that money is in the hands of the executives. No doubt they have got them in Cayman Island accounts as we speak.

Those bonuses should have been disclosed to us, but there is something this Congress can do, and that is through the Tax Code. Impose on the executives of all TARP bailed-out firms a special surtax on that portion of their compensation which is excess.

I think that ought to be the portion in excess of \$500,000, excluding restricted stock. That is the exact standard put forward by President Obama for his toughest standard on executive compensation.

That tax could be at the 60, 70, 80 percent level, and those executives who did not want to pay the tax could, instead, return the excess portion of their compensation to their employer. It is important that this tax law apply not only to those who received excess payments in 2009, but also those who received the excess payments in 2008.

We have a precedent for having excess profits taxes. We can have a special tax on excess compensation.

We also, though, need to put AIG and others into receivership because this is the way we can deal, not with the bonuses, which are in the hundreds of millions of dollars, but deal with the tens and hundreds of billions of dollars of taxpayer money that are being disbursed to the wealthiest financial institutions of the world, including tens of billions of dollars going overseas.

In order to get this economy moving again, we need banks and other financial institutions with strong balance sheets. The way to get strong balance sheets is to write down liabilities, not to "get rid of" certain assets by calling them toxic assets. It is unlikely that we will pursue this plan because it will lead to substantial losses for the most powerful, richest and best-connected institutions and individuals in this country, but it is the way for us to go forward.

I look forward to working with my colleagues to getting to a plan that serves Main Street, not Wall Street.

SECOND AMENDMENT RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Kansas (Mr. MORAN) is recognized for 5 minutes.

Mr. MORAN of Kansas. Mr. Speaker, I come this afternoon to the House of Representatives to bring a message from Kansans and those who support the Second Amendment.

The United States Supreme Court ruled last year that the Second Amendment guarantees an individual's right to own firearms and that Washington DC's gun ban is unconstitutional. This decision was a win for all Americans and sent a message to governments across the country in support of Second Amendment freedoms.

Unfortunately in recent weeks we have heard from administration officials and gun control advocates that they are pushing to restrict an individual's gun rights, the rights guaranteed by our Constitution. Discussing escalating violence caused by drug cartels in Mexico, U.S. Attorney General Eric Holder last month called for reinstating the so-called assault weapons ban.

This is the wrong approach. Instead of punishing law-abiding American gun owners, our citizens, our country should be working to enforce existing gun laws that outlaw illegal purchases. We should secure our borders, and we should work to increase the cooperation between the United States and Mexican authorities.

Many Kansans are also concerned about H.R. 45, legislation that has been proposed to license gun owners and track firearms sales. I am hopeful that this bill does not have the support to be approved by this Congress.

An article in today's Wichita Eagle, our newspaper at home, highlights an ironic twist. The article reports that news of gun control efforts, along with concerns that crime will increase with a troubled economy, has ramped up the demand for firearms and ammunitions. Shortages are now common as retail stores are having trouble keeping guns and ammunition on the shelves.

I want to restate that our Founding Fathers established a Bill of Rights to our Constitution to make sure that American citizens can live in freedom without government intrusion. Human liberty and limited government are principles I hold in high regard.

I stand with Kansans in opposing efforts that violate the Second Amendment, and I will continue to cast my votes where it's necessary to protect our rights, including those provided for by the Second Amendment.

SALUTING 290TH MILITARY POLICE COMPANY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. KRATOVIL) is recognized for 5 minutes.

Mr. KRATOVIL. Mr. Speaker, I rise today to honor the 290th Military Po-

lice Company of Adelphi, Maryland. Earlier this month I had the honor of attending a welcome home ceremony for the soldiers.

In June of 1948, the "Defenders" received their original Federal recognition and were activated several times during the 1960s and 1970s to quell civil disturbance in Cambridge, Salisbury and Baltimore, Maryland. In 1990, the 290th was mobilized both in support of Operation Desert Shield and of Desert Storm.

On September 11, the 290th was again called to service to secure the crash site at the Pentagon while rescue and recovery operations took place. From there, the 290th was mobilized under Operation Noble Eagle for homeland defense.

The 290th was again called upon to help support Operation Enduring Freedom in Afghanistan. During the mission, the 290th provided force protection for key air bases, including those in Pakistan.

In 2005, when Hurricane Katrina devastated the gulf region, once again the 290th was sent to Mississippi to assist local law enforcement with emergency and relief operations. And, again, in October 2007, the 290th was once again mobilized and deployed in support of Operation Iraqi Freedom. This is a unit that has been asked to serve our Nation all over the world and right here at home, and each time it has responded to the call of duty valiantly and honorably. But now, deservedly, they are home.

Our Nation's greatest strength is the men and women who selflessly give of themselves to defend our ideals, and their families, who make sacrifices every day while their loved ones are in harm's way. I salute the 290th military police company and welcome them home, and pledge to be an advocate for them and all veterans of our Armed Forces.

Celebrating the valor of our Armed Forces is one thing, but here in Congress we must put our money where our mouth is and support the men and women of our Armed Forces, their families and our veterans, or we are merely providing lip service to them.

Mr. Speaker, I submit for the RECORD the members of the unit from Maryland's First Congressional District, who served so honorably.

Name, Rank, City:

Benitez, Luis Enrique, Jr, SPC, Bel Air, MD 21014; Fowler, Allen Mitchell, SGT, Bel Air, MD 21014; Sullens, Jeffrey Lee, SGT, Belcamp, MD 21017; Frederick, Robert, SPC, Preston, MD 21655; Zimmerman, Maria Masha, SPC, Preston, MD 21655; Wood, James Spencer, SPC, Cockeysville, MD 21030; Smack, Derrick Clinton, SPC, Delmar, MD 21875.

Dixon, Kassey Craig, SPC, Elkridge, MD 21075; Dixon, Kim Craig, SGT, Elkridge, MD 21075; Saunders, James Junior, 1SG, Hanover, MD 21076; Baschogeorge, Franklyn L, SGT, Jessup, MD 20794; Buckingham, Victoria Kathari, SGT, Laurel, MD 20708; Sadler,

Brandon Anthony, SPC, Port Deposit, MD 21904; Ward, John Allen, SPC, Port Deposit, MD 21904.

Clayton, John Joseph, SSG, Annapolis, MD 21409; Tull, Thomas David, SSG, Severn, MD 21144; Windisch, Catherine Anne, SSG, Annapolis, MD 21409; Blevins, Richard Earl, SGT, Hebron, MD 21830; Calhoun, Susan Mabel, SGT, Delmar, MD 21875; Cannon, Anitra Chantal, SPC, Crisfield, MD 21817; Dixon, Joel Harrison, SPC, Salisbury, MD 21804.

Henley, Tony Mario, Jr, SPC, Pittsville, MD 21850; Houston, Martin Lee, Jr, SPC, Ocean City, MD 21842; Insley, Amber Joy, SPC, Princess Anne, MD 21853; Marvin, Andrew Michael, SGT, Salisbury, MD 21804; Richards, Johnathan, SPC, Pocomoke, MD 21851; Hunter, Christy Lynn, SGT, Crisfield, MD 21817.

FISCAL RESPONSIBILITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. ROE) is recognized for 5 minutes.

Mr. ROE of Tennessee. Mr. Speaker, while I was running for Congress last year, I noticed that Democrats everywhere were campaigning on the notion that they were fiscally responsible and would make wise decisions for our country based on what we could afford.

Frankly, as the former mayor of Johnson City, Tennessee, who has grown accustomed to balanced budgets and living within our means, this sounded pretty good. It made me excited to come to Washington and get our financial house in order.

My excitement, however, was short lived when I realized how thoughtlessly we would spend a billion dollars. First we approved the second \$350 billion of the Troubled Asset Relief Program, which is what people back home and I call a bailout of our banking institutions. Then we approved \$787 billion for what was called economic stimulus, but what was in reality a laundry list of spending items the Democrats hadn't been able to get funded the past few years and won't produce sustainable economic growth.

Just when I thought things couldn't get worse, we went out and passed a fiscal year 2009 omnibus spending bill that included \$410 billion and an 8 percent increase for our Federal agencies. I am going to pause for a second and let that sink in, an 8 percent increase at a time of record deficits where local county, city and State governments are cutting and balancing budgets.

I think the American people are so skeptical of what's happening in Washington because what they see people in Washington do is disconnected completely from reality. The reality is in Johnson City, Tennessee, they are asking their agencies to fund a 5 percent cut over last year's budget.

All over America, families and State and local governments are tightening their belts and making do with what they have. Only in Washington do we

respond to a huge drop in tax receipts by spending even more money.

Now the administration has proposed a \$3.9 trillion budget, which will be 27 percent of gross domestic product of this country. This will create the largest Federal Government since World War II.

This budget is especially troubling because it's coupled with tax increases, and our job creators have to pay for it. The math of these policies seems to be more government spending, plus higher taxes, equals more jobs and economic growth.

If this equation seems questionable to you, I'm right there with you. This budget spends too much, taxes too much and borrows too much.

I think the American people are beginning to question everything they hear being done in the name of economic stimulus and recovery. They heard "fiscally responsible" during the campaign and assumed that meant we would be looking for savings from ineffective programs and keep income in families pockets where it's most needed. They are getting just the opposite.

My House Republican colleagues prefer a simpler strategy that has proven effective time and time again. First you want to leave the money in the hands of the families to decide how to spend their own money. We proposed lowering the lowest two tax brackets from 15 to 10 percent and 10 to 5 percent respectively.

We would like to create tax incentives for small businesses, the engines of our economy, to create these jobs. We believe it's important to eliminate taxes on unemployment insurance, which will help those who have lost their jobs stay afloat until they find a new job.

And I believe we should invest in our transportation, water, education, and infrastructure. As a fiscal conservative, I generally don't like deficit spending unless future generations will get to enjoy the benefit of the spending.

By leaving a lasting infrastructure in place, our children will be able to enjoy the benefits, even if they are asked to pay for some of the costs. While I am hopeful we can consider these common-sense solutions, the fact is Republicans are in the minority. We don't have the ability to stop these harmful policies from going forward, only President Obama, and Democrats and Congress can.

I urge the American people to ask President Obama and his Democratic colleagues to fulfill their campaign promises of fiscal responsibility and stop these tax increases and wasteful spending, and help restore our economy, which is still the strongest in the world.

OUTRAGED

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from Virginia (Mr. FORBES) is recognized for 5 minutes.

Mr. FORBES. Mr. Speaker, I found it almost comical today, as I watched both on the floor and from my office, as one Member after the other has come to these podiums all across this Chamber, and they pounded on their desk, and they have screamed and they have all used the same word, "outraged."

They are outraged over the \$165 million in bonuses that AIG has paid and the \$90 million that AIG has paid to European banks and Wall Street investment firms. But I am outraged about something different. I am outraged that they are outraged, and the reason is because I am only one of 17 Members out of 435 Members who voted "no" on every single one of these so-called stimulus and bailout packages, for one reason: we didn't think it would work.

Mr. Speaker, as we were trying to raise our hands and just ask intelligent questions about them, we were finding that people were ignoring the rules and they were rushing them through, that there was a whole set of people out there screaming and yelling, if you just didn't pass this bill in this form, the sky was going to fall and the world was going to come to an end, and they pushed these bills through without legislative analysis. While we were trying to just tell people what was going on and simply ask the question nobody wanted to hear, they just wanted to pass the bills.

Mr. Speaker, I have a suggestion: just read the bills. If we had read those bills, we would know what most of the analysts are telling us now, and that is that it would take 100,000 to 250,000 government bureaucrats just to monitor where this money is going and how it's going to be spent.

And instead of coming to the podium and pounding it and saying how outraged they are, wouldn't it be novel if they came and just said "we are wrong. We admit we are wrong. We are not going to make those mistakes again."

But, Mr. Speaker, coming here and saying you are outraged is not some kind of get out of political hot water free card. In fact, it's like a sitcom. Imagine this situation: a husband goes out in this economic situation, buys an expensive new boat.

A few weeks later, the bill comes in the mail, and his wife opens it up. And she is steaming and seething and looking at how they are going to pay this payment.

And he walks in, and he looks at her, and she throws it across the table. And he picks up the bill, and he looks at it, realizes he can't make those payments, looks at her steaming and mad, and all of a sudden he pounds the table and he says, "Honey, I am outraged over this bill that I am having to pay." And that's where Congress is finding itself today.

Mr. Speaker, we wouldn't run our businesses that way. Only the government and AIG run theirs that way. We have a lot of people calling our offices and saying "What can I do?"

Well, here's what you can do. Go find out how people voted and then call them up and ask them why.

The second thing we can do is make sure we are going to stop this bailout madness and then simply do this. Before we take more options away from our children and grandchildren by mortgaging their future, let's simply ask these four questions: Where is the money actually going? How do we know it's going to get there? Will it work once it arrives? And how will we pay it back?

□ 1615

Mr. Speaker, I would submit that perhaps if we do that, next time there will be more than 17 of us justified and actually coming to the podium, beating on it, and saying we are outraged.

CAP-AND-TRADE

The SPEAKER pro tempore (Mr. SCHAUER). Under a previous order of the House, the gentlewoman from West Virginia (Mrs. CAPITO) is recognized for 5 minutes.

Mrs. CAPITO. Thank you.

I rise today to talk about the President's program for cap-and-trade. I'd like to take just a few minutes to explain it a little bit and talk to people about what this is really going to mean to them.

I represent the State of West Virginia. But here in the United States, coal is our most abundant resource. We have recoverable reserves that are sufficient for at least 250 years. Coal currently fuels 50 percent of all the electricity generated in this country.

In my home State of West Virginia, 98 percent of our electricity comes from coal. Our State has abundant resources. We give, and we turn on the lights in America.

There's been a lot of discussion surrounding the future of coal in this global warming debate. The first thing we need to remember is that anything we do, whether or not it's climate change, is inextricably linked with energy policies that are going to cascade across the environmental, economic, and social issues of the day.

So cap-and-trade. It sounds nice. Cap emissions and then trade away. What does that really mean?

It means, basically, a tax increase on carbon dioxide emissions that will lead to a reduction in energy use. That sounds good. But it will also lead to an enormous erosion of America's family budget. This will tax every single American and tax those who are in most difficulty and who have most difficulty making ends meet.

The administration's budget calls for a 100 percent auction of allowances

under a cap-and-trade system to reduce greenhouse gas emissions. Sounds good, doesn't it?

The President's "cap-and-tax" proposal will impose mandates and further regulations on manufacturing and will dramatically increase the cost of energy and electricity. This proposal will create a great transfer of wealth between coal-dependent States like West Virginia and those that rely on alternative resources, with no change in the ultimate environmental outcome of the cap-and-trade policy and a huge estimated GDP loss.

I think there's one thing we know here in this time and right now is that a solid economy is the best way to innovate and create and solve problems that we need help with.

So you say, Where does the money come from? If you're going to trade and buy, where does the money come from? That money will come from the individual consumer because the manufacturers, the electricity producer, all the folks who are going to be trading allowances are going to have to find that money somewhere, and it's going to be tacked on as a form of an energy tax to every single American.

Under the Lieberman-Warner legislation of last year, the EPA estimated a rise in electricity costs between 44 and 79 percent. In West Virginia, the price of our electricity would go up between 103 and 135 percent. That is going to hurt folks on fixed incomes, our elderly, and it's going to hurt the poor the most, who cannot afford the huge chunk out of our budgets that energy takes right now.

The revenue returned to consumers from the President's budget, he says he's going to give money back to folks to help them meet this high cost. But that is not even close to covering the increase in household electricity costs.

When the President was a candidate, this is what he said, "What I've said that if we would put a cap-and-trade system in place that is more—that is as aggressive if not more aggressive than anyone else's out there, so if somebody wants to build a coal-powered plant, they can, it's just that it will bankrupt them because they're going to be charged a huge sum for all that greenhouse gas that's being emitted."

Remember, the State of West Virginia, 98 percent of our electricity is generated by coal.

Manufacturing output will fall considerably if the President's plan goes through. The whole idea is to tax the consumer, to bring down emissions, and no consideration has been made as to what this is going to do to the rank-and-file everyday citizen.

What is the job loss? In West Virginia, under Lieberman-Warner—and I realize that's not the President's bill. The President's bill is even broader reaching than this one. The estimation

of the job loss is between 7,000 and 10,000 jobs between now and the year 2020.

Addressing climate change concerns is a global challenge requiring global solutions. We need common sense. We need to slow down here because unilateral action by this Congress and by the United States will have no impact, or very little impact on global emissions but will also have a great impact on our economy and on our citizens.

We need to innovate and use technology. We could use the development of advanced clean coal technologies; most importantly, CCS, or carbon capture and storage technologies.

We need technology to push as hard and fast as we can. I urge caution. We need to slow down. For the sake of my constituents and those in States like mine, we should not forget this as our debate moves forward.

KEEPING PROMISES MADE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GOHMERT) is recognized for 5 minutes.

Mr. GOHMERT. We've heard a lot about AIG and how they shouldn't have been getting those bonuses they got—\$165 million—but let's take a real objective look here.

These executives took one of the biggest, most important companies in the world, in the country, and they ran it into the dirt. They bankrupted a lot of other companies. But they didn't have to go into bankruptcy because they convinced the government to come in with taxpayer dollars and give them \$173 billion.

Now that's pretty extraordinary. They still have their jobs. Why wouldn't they get a bonus? Good night. You run a company into the dirt and then talk the government into giving you \$173 billion in taxpayer dollars, that's deserving of something, and apparently somebody thought it was worth a bonus.

Well, the fact is they shouldn't have gotten bonuses. They should have been in receivership. But I keep looking for people to finally keep the promises that they have made.

We heard that we were going to get change that people could believe in. We saw with the bailout back in September what some of us knew was a horrible mistake, and we said it then.

Even though I am a Republican, I was looking forward to change from the deficit spending. Yet we have just gotten more and more and more of the same. When are we going to get change? Isn't it about time we quit the deficit spending? It would sure be nice.

We were told that there would be no more lobbyists in this administration. I liked the sound of that. It sounded good. Well, it turned out he meant no lobbyists except for the ones they actually hired to be part of the administration.

We were told there would be new ideas in this administration; we'd go in a new direction; we'd have change. But then we got a Secretary of the Treasury that is given credit for thinking of a lot of the plan that Paulson had, even though I still haven't been able to figure out what plan that was.

So we didn't get change. We're getting more of the same. More and more of the deficit spending. When are we going to get the change?

We have heard from the majority over and over again for the last 4 years that deficit spending is bad. I agreed with them my first 2 years here, 2005 and 2006. So when they took the majority, I thought, Well, the good news is they'll finally stop this ridiculous deficit spending. But they didn't. It got worse and worse and worse.

Then when they found that there was a President from the same party, instead of together, since they control the House, the Senate and the White House, to completely bring an end to deficit spending, it's just gotten worse and worse.

This madness has to stop. We are blessed right now with a President who's one of the most gifted communicators I have ever seen in my lifetime. But what we are finding is that true leadership is not going to be found between the lines in a Teleprompter. You can look at the Teleprompter, you can read from it, but that is not where leadership is.

I heard right here from that podium, Mr. Speaker, at the State of the Union last month these words: "We're going to assure the continuity of a strong, viable institution that can serve our people and our economy," and President Obama said, "I understand that on any given day, Wall Street may be more comforted by an approach that gives banks bailouts with no strings attached, and that holds nobody accountable for their reckless decision. But such an approach won't solve the problem."

He went on to say, "This time, CEOs won't be able to use taxpayer money to pad their paychecks or buy fancy drapes or disappear on a private jet. Those days are over."

And then here we come the following month—there were no strings attached—to say, You know what? You ran this company in the ground. You don't get a bonus with taxpayer dollars.

I'm kind of outraged over that. Like my friend, Mr. FORBES, I'm kind of outraged that people are outraged they didn't stop this, when some of us—you go back to some of our comments on this very floor—we said, Read the bill. It's a problem.

Well, it's time for true change. Let's get what we should have and not what people talk about.

CONSIDER THE FAIR TAX

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. STEARNS) is recognized for 5 minutes.

Mr. STEARNS. I'm here to support the Fair Tax. The current U.S. Tax Code is too big, too complicated, and benefits too many special interests, and must be replaced with a code that is fair and encourages savings and investment.

This code has been amended tens of thousands of times, my colleagues, and it's grown to over 60,000 pages, possibly more. For this, and many other reasons, I rise in support of the Fair Tax and urge my colleagues to consider this new tax simplification program.

The Fair Tax will eliminate Federal income taxes, corporate income taxes, payroll taxes, capital gains taxes, the alternative minimum tax, and the death tax, and replace it with a flat, simple and efficient consumption tax.

Mr. Speaker, Ronald Reagan hit the nail on the head when he described the government's basic view of the economy as: "If it moves, tax it. If it keeps moving, regulate it. If it stops moving, subsidize it."

Unfortunately, Mr. Speaker, this burdensome view taken by our government has resulted in the current problem we face today, where citizens and business owners across this country devote billions of hours and billions of tax dollars just to navigate the process of paying their Federal income tax.

A simpler Tax Code may have prevented former Senator Daschle or current Secretary of the Treasury Geithner the embarrassment of having to explain their failure to properly pay the taxes due to the complicated IRS tax system.

I know many of my constituents in the Sixth Congressional District are aware of how this simple tax reform will work when implemented. They have written numerous letters to me and voiced their support at many town meetings.

I thought I'd take a moment this afternoon to lay out the basic principles of this legislation for those who are not familiar with the Fair Tax.

The Fair Tax will do away with all Federal taxes such as income tax, the death tax, as I mentioned, all the way down to the estate tax. Basically, many Americans with low incomes will receive a check at the beginning of each month from the Federal Government that will cover the cost of the consumption tax on necessary goods, thus increasing the purchasing power of low-income individuals and completely avoiding any unintended tax increase on their purchasing power.

Furthermore, a study conducted by Harvard economist Dale Jorgenson illustrates that roughly 22 percent of the retail price of an item is the direct result of the cost our current Tax Code

places on a product through payroll taxes, business taxes, business taxes, compliance costs, and other taxes.

Therefore, by paying an additional consumption tax, we will be able to fund our entire government, and the taxpayer can keep 100 percent of his hard-earned paycheck. This would lead to increased savings, increased investment, and Americans, not the Federal Government, would decide how to best utilize their wealth.

In addition, Mr. Speaker, the Fair Tax, through its simplicity, will provide transparency to the Federal budget and Federal spending here in Congress. Each time the government claims a needed tax increase to fund runaway spending, as we do, and government expansion, or special district funding requests, the American citizen would be directly affected by this irresponsibility and would be aware of it immediately through the transparency of the Fair Tax system instead of hidden tax increases and budget gimmicks that our government institutes today.

□ 1630

So now, my colleagues, it is time to get rid of this complicated, inefficient, and unfair tax. Now is the time to institute transparency, efficiency, and, finally, fairness in our Tax Code.

Now, for those of us in Congress and perhaps throughout the Nation who are skeptical, I have a suggestion for them, an approach that I think would be possible. Why not take Washington, D.C. as a demonstration project to see if it would work here in Washington, D.C.; allow all residents of this city to pay no Federal taxes, and institute a fair consumption tax, and this consumption tax would be collected by the city and then sent to the Federal Government. Then we could see how it would work and discern its advantages and disadvantages.

The Fair Tax I think ultimately would prove to be very useful, and I urge my colleagues to stand for real change and support this fair solution.

H. RES. 251

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. LATOURETTE) is recognized for 5 minutes.

Mr. LATOURETTE. Mr. Speaker, I rise today to share with you and Members of the House the introduction of a resolution of inquiry regarding the payment of executive bonuses to employees of American International Group, AIG. It is H. Res. 251.

Mr. Speaker, my constituents and I, as well as many Americans across the country, are outraged at the unfurling of events surrounding this freewheeling company which helped to lead us into the financial disaster we now face.

To make matters worse, we find out this week that the administration was

fully aware of the March 15 payment of \$165 million in executive or retention bonuses for many months. Even more troubling is the fact that the one person who was in the dark about the pending bonuses, until last week no less, was our very own Secretary of the Treasury who was supposed to be masterminding our economic recovery and banking recovery.

It is clear from the media reports that AIG did not award these bonuses as a snub to the administration, but instead waited until they had the blessing of the Secretary of Treasury, who apparently believes he did his due diligence by berating AIG and then saying that there was nothing that he could do to stop the bonuses.

The fact that we are rewarding the very people who caused the largest corporate loss in history is astounding. Just recently, the Attorney General of New York has indicated that at least 73 AIG employees received bonuses in excess of more than \$1 million, including nearly one dozen AIG employees who no longer work for the beleaguered firm.

Mr. Speaker, there are millions of Americans who have lost their jobs during this economic crisis, and most did their jobs well with great purpose and performance. There are no bonuses for them. Instead, they risk losing their homes, health care, and more. Meanwhile, AIG employees who engaged in risky, perilous behavior that brought our economy to the brink of collapse are rewarded.

There is a great deal of finger-pointing about how we got into this mess and what Congress and the administration is doing. Let me state just a few facts.

Since the beginning of this Congress, which is about 2½ months old now, only eight bills have been signed into law; and this week is like many others in the House, virtually no substantive legislative activity. This House, within 8 days of one person being attacked in Connecticut by a chimpanzee, rushed through legislation to make it harder to own chimpanzees. Mr. Speaker, where are our priorities? Here we sit, wringing our hands over how to curb bailout abuses, and what have we done to date to show for it?

Today, again, the House was deeply contemplating a series of non-controversial bills under suspension, including two measures naming post offices, and approving a bill supporting Professional Social Worker Month. I like social workers, Mr. Speaker, but who in their right mind thinks that that should be a priority today or this week while the Nation is roiled in anger over these bonuses? We might as well tackle more chimp or monkey legislation.

Mr. Speaker, based upon the Nation's unemployment rate, which hit a new high of 8.1 percent in February, that

translates into 16 Americans losing their job every minute. Americans are struggling to keep their homes. Two hundred seventy-five thousand foreclosure filings were reported in January, with one home in every 440 receiving a foreclosure filing in February. This year, the stock market has plunged 1,750 points and is at its lowest rate since 1997. Millions of Americans continue to lose their retirement security. To date, AIG has received \$200 billion in taxpayers' funds to keep the company afloat and recently suffered the largest quarterly loss of any corporation in American history.

Mr. Speaker, Americans are hurting. We cannot sit by and watch as AIG executives not only keep their jobs but are also rewarded for their actions.

Further, the administration needs to come clean on its discussions with AIG and approving these bonuses. Therefore, today I have introduced a resolution requiring the Secretary of the Treasury to transmit to Congress all communications relating to AIG and its approval of these executive bonuses as well as the use of Federal infusion of taxpayer money. Americans deserve to know the full story, and this Congress must act to get it now.

The excuses on television are, "Well, these are contracts. We can't mess with contract law." Mr. Speaker, recently we have told the Big Three auto makers that if they want Federal Government assistance, they have to cram down the people that work in their auto factories. Those are contracts. Recently, the House has passed legislation on mortgage relief that says that even though a bank gave you \$100,000 to buy a house, if you got that house under false circumstances, we have to cram down how much you owe the bank. That is certainly contract law as well.

The notion that it is an excuse that somehow these contracts were entered into and we must honor them, and we have to pay \$165 million to 73 people, is an abomination. We need to stop it. And I am asking for every Member of this House to cosponsor the resolution.

THE PARTY OF "OWE"

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Iowa (Mr. KING) is recognized for 60 minutes as the designee of the minority leader.

Mr. KING of Iowa. Mr. Speaker, again, it is a privilege to address you here on the floor of the United States House of Representatives, and also to have the chance to lay out here before you and our colleagues and ultimately the American people a point on the cause that we are involved in.

We have dealt with crisis after crisis here on the floor of Congress, and I look back at many of the things that have taken place historically here, and

I could list them long. But I will say that I think the most colossal mistake that this Congress ever made was passing the President's Stimulus Act.

I think we have a budget hanging out today that may be a more colossal error. In fact, this budget that lays in front of us, President Obama's budget, spends too much, taxes too much, borrows too much. And what it turns into is their party, that side of the aisle, Mr. Speaker, has become the Party of Owe, the party of debt, the party of borrow. Not the party of "no," the party of "owe." They can't say "no" to anything; they just want to owe everything and everybody, even to the extent where this budget projects out by CBO to go to 200 percent deficit of GDP. Unheard of. The highest we have ever had in history was 1945, the end of World War II. Now, the President's budget takes this to that place.

This takes us to, in the middle of this economic crisis where we have seen the equity and the stock market drop by a huge percentage, by one-third or 40 percent or, in many cases, even more. It takes us to this point where the President said to us that he believes that FDR's New Deal actually would have worked, it actually was working, and that he just simply lost his nerve and didn't spend enough money. Can you imagine?

When he said that to us back in, I think, early February, I didn't think he was completely serious about having more commitment to spending a massively larger amount of money than FDR did in the New Deal.

But history hasn't served us very well in the way they reported the New Deal, because a lot of young people for two generations have been taught that the New Deal was a good deal and it got us out of the Depression.

Mr. Speaker, by the time the stock market got back to where it was in October of 1929, Franklin Delano Roosevelt had been dead for 9 years; we had fought two wars, World War II and Korea, and finally in 1954 the markets got to where they were in 1929.

There is no way that a logical objective historian can say that the Keynesian idea of borrowing and spending was a good deal when it was the New Deal. Nor is there any model in history that says that the new New Deal, the Obama Uber New New Deal, would be as good a deal as the bad old deal or a better deal than the old New Deal. This is the new New Deal, it is a bad deal, and Keynesian economics have failed wherever they have been tried.

We need to turn ourselves around to real solutions, Mr. Speaker, real solutions for the American people, real solutions that will take America to the next level of its destiny, not the level down, not in the direction where we put our children and grandchildren and our great grandchildren in debt, not to where little babies born today are looking at thousands of dollars in debt, for

every child that is born in America that they are going to have to work off. And we can either print a lot of money and devalue our currency, or we can suppress our economy for generations to come by all of this debt that is on us. And what can transform us as a country? What will ever grow our economy out of this anchor that we are now dragging? They are going to be pitching more anchors off the side of this great economic ship, of the greatest economic machinery that has ever been built in the United States of America, and our free market system.

But in the bailout bill last fall, we pitched an anchor over the side, and we have been dragging that anchor. And then we have the stimulus plan that is another anchor we pitched over the side that we are dragging along bottom. And we have got the President's budget as another anchor that we are going to have to drag. And, now, they are talking about another stimulus plan. And burden after burden heaped on top of the American people, the free market system cannot sustain this kind of a load. We need to do something transformative.

The transformative component that I am advocating here tonight is the one that Mr. STEARNS of Florida advocated a little bit earlier, Mr. Speaker. And I'll take you this way on the fair tax, and that is this:

I was audited one too many years in a row early on when I first started my construction business. The IRS showed up every year for a while, and they decided they were going to justify their existence by milking the little bit of blood that there was out of this fledgling turnip of a company that King Construction was back in those years. And after they audited me one too many years in a row and I shut the doors on my business for 4 days so that I could be there and personally hand them the documents and justify the expenses, so that I could minimize the loss that was going to come to me from the IRS, because I had experience with that, and it cost me money, and I had to make a calculation on whether I was going to—I believe I did everything right. And I had to make a calculation on whether I was going to stand on principle and go and fight the IRS, in which case it was almost inevitable that I would lose my business in the process, because I couldn't afford to be away from my business and still keep it going. Or, borrow the money to pay the IRS a bill that I still don't believe that I owed in order to be able to keep operating.

Well, that was one of the times when I didn't commit suicide on principle for the business, but I borrowed the money, paid the IRS. And then I went out and climbed in the seat of one of my bulldozers, and the smoke went up out of the exhaust stack, and it went out of my ears. And I began to think, what is the IRS doing in my office?

Why are they impeding my production? Why are they making Monday morning quarterback decisions on me and my life when I am doing the best I can to comply with the laws that are passed by Congress? Well, I didn't know then that it was impossible for the new head of the IRS to figure out the Tax Code.

So, Mr. Speaker, when Timothy Geithner can't figure it out even with Turbo Tax, and if Tom Daschle can't figure it out, I guess I shouldn't have felt so angry. But I am glad today that I was angry, because I did a little fast-forward in my mind and it was, I want rid of the IRS. I want to be rid of that intrusive organization that can come in and take away the sweat of my brow and diminish the creativity and the energy and the entrepreneurial spirit that it takes for any business to get started, especially a small business, and especially a highly capital-intensive business like mine was. I understand how this works. So I just leaped to this conclusion. The next day I decided, I want rid of the IRS, and I want to repeal the entire Federal Income Tax Code.

Now, I didn't think about how you get that done. I am working on how you get that done today. But what I thought about was, how do you replace the revenue? Because the government has to have some money to run on, and the only way you replace the revenue is if you go to a national sales tax, and it starts with about three principles to know:

Businesses transfer the cost of those taxes on to their customers. Yes, I wrote a check for those taxes, but I had to pass those costs on to my customers if I was going to stay in business. Corporations don't really pay taxes, businesses don't pay taxes. They are tax collectors for Uncle Sam.

But here is the transformative principle No. 1: Ronald Reagan, quoted by Mr. STEARNS of Florida, and I will give you a different quote from Ronald Reagan. He said, "what you tax, you get less of. A tax is a punishment." But Uncle Sam, the Federal Government, has the first lien on all productivity in America.

□ 1645

If you have earnings, savings or investments, Uncle Sam is there with his hand out. When you walk in and punch the time clock at 8 o'clock on Monday morning, Uncle Sam is right there figuratively with his hand out, and you work until he gets what he wants. Then he puts that in his pocket and figuratively goes away, and then you can start working for the rest of the interest.

If it is earnings, savings or investment, if it is productivity, the Federal Government has the first lien on all productivity in America. So a taxation is a punishment. It is a disincentive. We have less production than we would

have otherwise because we tax it first. We tax all earnings, savings and investment. If you go to a national sales tax, "the Fair Tax," and tax the last stop on the retail for personal consumption of sales and service, that way you're actually levying the tax against the people that are the consumers that are using it. So we lift the tax off of all production in America, off of all earnings, savings and investments in America, then we cut those anchor chains that we are dragging. The cost of tax compliance is a cost to this economy, because we have lawyers that are tied up and business decision makers who have to, in every single business decision, do a tax calculation. We eliminate all of that and take that burden off and cut those anchor chains that we are dragging, and we turn those brains of H&R Block and tax lawyers, tax accountants and people that are strategizing business off of the advice that they get from their tax lawyers, and there are those people that have to make those decisions without the benefit of counsel, all of that mental energy, all of that time goes from, I'm going to just say this in a nice, gentle way since it is St. Patrick's Day, it goes from the parasitic sector of the economy to the productive sector of the economy. And the productive sector is the free market sector that produces goods and services that has value to people. That is the first transformative thing about the Fair Tax, of taking that burden off of the production, the taxation that is on production, and cuts all of those anchor chains, and it puts the taxation over on consumption where we can use a little bit of an incentive for savings and investment. And it lets people decide when to pay their taxes by when they make their purchases.

I watched a little YouTube clip of the majority leader in the United States Senate, HARRY REID. It was just not quite a year ago. He said, "we have a voluntary tax system." Well, it is hard to make that argument stick. No. We have a confiscatory tax system. It is not voluntary. You don't today get to pay taxes when you want to. If you fail to pay your taxes, the IRS will show up, and they will charge you interest and penalty for failure to pay your taxes. If you still don't pay your taxes, they will garnish your wages. They can come in and put a title on your vehicle, assign themselves a new title to the vehicle, sell that vehicle and credit your account. But the interest and the penalty probably is going on faster than you can sell a car to get that back out of there. There is nothing that the IRS can't touch if they are going to collect your taxes. And when they are done, if they think you have avoided taxes, they will encourage prosecution. We have people in federal penitentiaries today for tax avoidance. So it is a confiscatory, mandatory taxation today.

I want to go to what HARRY REID calls a "voluntary tax system." That is the Fair Tax. People volunteer to pay the tax when they make their purchases. There are other components to this, but I want to make one more point before I yield, and that is the other transformative point. The first transformative point is that what you tax, you get less of. The Fair Tax takes the tax off of all production in America. All earnings, savings and investment is not punished. You get to keep it.

The other transformative component is this, and a lot of people have been credited with this statement. I will give the general one, Mr. Speaker, and then we will perhaps give credit all where it is due before this discussion is over. But there have been many of our Founders and statesmen that have referenced what happens to a country that claims to be a democracy, and I will call us a constitutional Republic, when more than half of the people figure out they can vote themselves benefits out of the public Treasury, on that day our democracy ceases to exist. The future of the Republic ceases to exist. Many of us think we have crossed that line already. And if we listen to the promises that were made in the last campaign that came from our now President, Mr. Speaker, about how everybody was going to get a tax cut, even those that weren't paying taxes were getting tax cuts, those are refundable tax credits. It is a transfer of wealth from the wealthy to the unwealthy, a transfer of wealth internally. When that happens, when the American people become dependent upon someone else for their livelihood, when they lose their sense of self-responsibility, that sense of self-sustainability, when they stop teaching their children, Mr. Speaker, that they cannot be a burden on this society, that they must be a contributor to this society, then our freedom is diminished, and perhaps our constitutional Republic ceases to exist.

Mr. Speaker, I will submit this. There is a way we can pass this Fair Tax, and if we do so, no one any longer pays any federal income tax. Everybody gets roughly 56 percent more in their paycheck. And how do we transform this sense of responsibility? In this way, in billions of transactions at a time. When little Michael Dicks stepped up to the counter when he was 8 years old, he said, "I want to buy this." He put a box of Skittles on the counter. It was 89 cents. He counted out his 89 cents. The lady at the check-out register said, "that will be fine. I need 96 cents." And he looked at his father and said, "Dad, I've only got 89 cents. The price says 89 cents and the lady at the register says you have to pay the sales tax for the Governor." He looked at his father with a pained look in his eyes. He said, "Dad, I have to

pay tax on Skittles?" "Yes, you have to pay tax on Skittles, Son."

Think what that does. If every little child growing up in America, when they buy their Skittles or their Barbie doll clothes or their baseball cards, or whatever they spend their money on, if they have to put a couple of dimes up on the counter for Uncle Sam, they will be reminded at every transaction, millions of young people, billions of transactions, how expensive our Federal Government is. When that happens, it will slowly transform America, the core of America, the core of American responsibility. The two things transformational are we stop punishing production and we raise generations of fiscally responsible, independent-minded Americans. Those are the two transformational principles.

I would like to go to whichever one of my colleagues is the most urgently here. So, I would be happy to yield then to the gentleman from Georgia, Mr. NATHAN DEAL.

Mr. DEAL from Georgia. I want to thank the gentleman for yielding. I want to join him in talking about the Fair Tax issue and to thank my colleague, JOHN LINDER, who is here on the floor, who is the primary sponsor of this legislation in the House.

We all talk about change. We all talk about reform. I can't think of a single bill that is before this House, in committee at least, that would have the transformational effect of passing a Fair Tax. As the name implies, it is a matter of fairness. It would do many things, and you're going to hear, in addition to Mr. KING who has already addressed the topic, you're going to hear others today talk about some of the benefits that would be derived from this kind of legislation.

First of all, it gives people a choice, a choice over how they spend their money. We know that our country is in a deficit in terms of savings. This approach to taxation would say to every American, if you choose to save, then you're going to be able to do so, and the government is not going to tax you as a result of making that choice. If you choose to spend and to consume, then that is the basis on which your taxation will be founded. Those are the kinds of things that give people more of an involvement and a control over their own financial destiny. Of course, as has been referred to, it does much to restore our balance in the international trading community.

Coming from a part of the country in the Southeast which was the old textile belt, we have seen those jobs virtually disappear. It happened for a variety of reasons. But one of the things that made it at a great disadvantage was the tax structure that our country has in place. If we are going to compete in the international marketplace, then a system that does not add on a cost at every stage of the production cycle in

the form of taxation is the best way to begin to make us competitive. I think it will be a step toward having those industries, many of whom have left for a variety of reasons, but taxation being one of them, to see them return back to our shores and to restore those job opportunities back to the American people.

For this and many other reasons, I support the Fair Tax. I urge those committees in this House who have jurisdiction over that issue to discharge it from their committee and give this House the opportunity for the elected representatives to express the will of their constituents on this very critical and important reform, the Fair Tax. I thank the gentleman for yielding.

Mr. KING of Iowa. I thank the gentleman for coming down and weighing in on this subject matter. I appreciate each of you as you weigh in. Hopefully we will be able to do this more often in the future weeks.

I would like to then yield to the gentleman from Florida (Mr. MILLER).

Mr. MILLER of Florida. I thank the gentleman for yielding. Thank you for setting up this time this evening to talk about the Fair Tax, something that a great many of us, in fact 51, have signed on as cosponsors of this particular piece of legislation. I do salute my friend, Mr. LINDER of Georgia, for continuing to keep this piece of legislation out in the forefront. It is incumbent upon us as members of the legislative body to do what we can to bring things to the floor for debate. But it is also incumbent on people out there in just good old regular America to call their Members of Congress, to inform them of what they want.

I think of Skip and Loretta Akin back in my district who, every time there is a Fair Tax issue that comes up, they are a part of it. They are wearing their Fair Tax shirts. They have been to the city of Atlanta talking about the issue and bringing the good news forward. But there are just a lot of people that aren't listening. We are in great economic peril now. We all know that. We all have compassion. We want to solve the problems that are out there. But we hear more and more about taxes. We hear class warfare, if you will. And again, my colleague has just talked about the issue of choosing where you spend your money, choosing if you're going to buy something. It even goes beyond that. It is choosing whether you buy something new or whether you buy something existing or used where there won't be a sales tax on it. What is amazing to me is that besides the fact that it does away with all of the other taxes that are embedded out there, it is something that you alluded to, Mr. KING, just a little while ago, and that was that it prohibits funding of the IRS after the year 2013. Can you imagine no Internal Revenue Service after the year 2013? Why? Because each and every one of us remits

at the cash register at the point of sale. We remit the taxes there. So yes, it has already been alluded to, in the administration, where the Treasury Secretary that our President chose could not figure out how to pay his taxes among the overly complicated Tax Code. I hope that Secretary Geithner will join my colleagues and others in supporting this particular bill.

Lastly, Mr. KING, I would like to also remind my colleagues that there are Fair Tax rallies that are being held all across the country. The next one that I'm familiar with is in Jacksonville, in my State of Florida, on the 11th of April. Unfortunately, I will not be able to be there as I will be somewhere overseas visiting with our troops during that time of our break. The people that are keeping this issue forward and in the forefront today are the ones that need to be saluted as well as those that continue to talk about it. I encourage you and will be here every time that you want to bring the Fair Tax issue to the floor.

I thank you again for bringing this to the floor.

Mr. KING of Iowa. I thank the gentleman from Florida (Mr. MILLER) for coming down and standing up for the one big policy before this Congress that will give us back our freedom. He wouldn't be the only individual from Florida who would be on and be a supporter of the Fair Tax. As I cast my eyes around this Chamber, Mr. Speaker, I pick up another one. It would be the gentleman from Florida (Mr. MICA) whom I would like to yield to and ask him if he can add to this cause that is led by Mr. LINDER. As I came to this Congress, I looked around to find JOHN LINDER, because I knew that I wanted to tie up with him on this Fair Tax cause.

I yield as much time as he may consume to the gentleman from Florida (Mr. MICA).

Mr. MICA. I thank you so much. I thank the gentleman from Iowa for yielding to me. I thank him for his leadership and also for calling this Special Order tonight to talk about the Fair Tax and about the subject of taxation which has sort of gotten brushed under the carpet and not been considered in the 111th Congress, or for that matter in the past Congress. The Fair Tax has not been given a fair hearing or a fair chance.

I can't come before the House and talk about the subject without complimenting the gentleman from Georgia (Mr. LINDER). Mr. LINDER certainly is an inspiration for moving this proposal forward, not only in Congress, but across the Nation. We were pleased to have him in my Congressional district to speak on the Fair Tax and other matters before Congress. There is no question that without JOHN LINDER, this topic would be totally forgotten

both in the Congress and across the country.

□ 1700

I come before Congress at a time when we have a new administration, and I think we all wish the President well. We wish him success. The country is hurting economically, and we don't want one person without a job. We don't want one person who has a problem paying their mortgage or losing their home. We don't want people to suffer because they don't have health insurance or an opportunity for education or the great opportunities that this Nation provides.

Unfortunately, this new administration also has not considered the Fair Tax. I think they have considered or are considering just about every other tax. I don't have enough time to cite all of them, but if you ever want to see new taxes, look at the budget that has been rolled out by the new administration. Some are hidden. Some have fancy, clever names. There is the cap-and-trade which would impose higher costs for energy users. Someone told me it is over \$3,128 annually in higher cost for every household. That is a new tax. It has a clever name, but they have no problem imposing another tax on people who are already hurting and having difficulty in paying their energy bills.

The new administration is looking at again a host of other ways to tax people, but not looking at the Fair Tax, which would probably be the simplest, one of the fairest means of assessing costs to run our government. Now they are talking about new taxes on small business, taxes for anyone who makes \$250,000 a year, taxes on charitable giving, taxes on certain housing and financial transactions, bringing back the death tax, and there are some taxes that under the Bush administration needed to be extended and they will let them expire.

So I think they are finding every way to tax but not looking at probably the simplest, most honest approach to again raising revenue, and that we think is the option of the Fair Tax.

It is kind of interesting, too, in the new crowd we have folks we find don't mind raising new taxes because a lot of them haven't been paying those taxes or are having difficulty explaining both to congressional committees and the American public and others that they couldn't figure out the taxes, or their highly paid CPAs or accountants couldn't figure out the morass of regulations and all of the terms in the thousands of pages of Tax Code that everybody has to comply with. This is not a laughing matter, folks. We have buried ourselves in tax law that again would probably reach higher than me if it was all stacked up here on these desks at which I am pleased to speak tonight.

But again, I think that it is vital and I would appeal to the leadership of the House and those on the Ways and Means Committee and other committees in the Congress to give the Fair Tax a fair chance. Give it a fair hearing. Give it a chance to be debated in committee and here on the floor of the House of Representatives. Instead of this long list of new taxes that we hear coming out almost daily from the new administration to raise revenue, to look at a means of a very simple, economical, efficient reasons of raising revenue, eliminating the red tape and eliminating the questionable thousands of pages that people are having difficulty with, whether they are high Wall Street smart executives being considered for the highest posts in our land, or the average taxpayer who is struggling to compile their taxes.

I know that people are saying that Mr. MICA made this up, but I came from my office and almost tripped over a little stack that I have on the floor that I have to get to this week, and that is my taxes, to prepare that complicated—and thank goodness I have been out of business and the private sector for some time—so what used to be probably 2 or 3 inches of tax returns and sitting down for some time with my CPA and accountant is a much smaller, less complicated affair; but nonetheless, it is complicated. And many people, obviously, have difficulty complying with the thousands and thousands of pages and rules and regulations that are interpreted differently.

So this is the time, I think, to give this proposal which has been developed by some here in Congress a fair chance, a fair hearing. Let's not sweep it under the carpet for another 2 years, but let's give it an honest hearing and look at how we can eliminate a huge bureaucracy and red tape. And so important today in creating jobs, whether it is in my district which is hurting for jobs, or across the country, the issue of competitiveness in the world markets, and nothing would allow us to compete more than a fair and equitable tax system that many other nations in the world have turned to, and many of our competitors have turned to, which make us less competitive in our jobs and products, and ability to compete in this global market.

I am here tonight to join my colleagues in asking that we give the Fair Tax a fair hearing and a fair chance and fair consideration in the Congress rather than the host of taxes that are being cast upon us and the Nation to pay by the administration at this time.

I thank you for the opportunity to join you tonight for a few minutes in this Special Order. And again, I praise your work and hope that we get a fair hearing on the Fair Tax.

Mr. KING of Iowa. I thank the gentleman from Florida. I would just add that the Fair Tax does everything good

that anybody else's tax proposal does that is good, it does them all, and it does them all better. And I do that right before I yield to the real American leader on the Fair Tax, an individual whom I met when I was a State legislator at an American Legislative Exchange Council meeting, and I heard from JOHN LINDER in that meeting. I had no idea at the time I was going to get to be his colleague, and I had no idea at the time I would be able to yield some time to our national leader on the Fair Tax, Mr. JOHN LINDER.

Mr. LINDER. I thank the gentleman for yielding and for organizing this Special Order.

I think it might be good right now to repeat what the Fair Tax is.

The Fair Tax would repeal all taxes on income. No more corporate income tax, personal income tax, no more payroll tax. Most Americans pay more in payroll taxes than income taxes. That pays for Social Security and Medicare. We would get rid of the gift tax, the estate tax, the alternative minimum tax. No more tax on income at all. And instead, we would tax a national sales tax on everything that you purchased.

On average today, the average income American gives the government 33 cents out of every dollar he earns. Under the Fair Tax, they would give the government 23 cents out of every dollar they spend and raise the same amount of money.

Now we are going to come to this point because economic forces are going to drive us to this point. I had the privilege of visiting with Chairman Bernanke last week or 10 days ago or so. One day, whether I am here or not, this Congress is going to decide the only way to go is to a more fair tax, that taxes not what you put into society, but what you take out.

Today we know that on average, 22 percent of what you pay for is the embedded cost to the IRS. With all of the companies that it takes to get a loaf of bread to your table, there are payroll taxes, income taxes, there are compliance costs, they get embedded in that price system. That is the only way a business can pay a bill is through price. And you pay that business' light bill, their rent, and their tax bill.

If we have a price system that is inflated by 22 percent because of the embedded cost of the IRS, that makes us less than competitive in a global economy and jobs move into better tax jurisdictions offshore.

Secondly, the Tax Foundation said that last year we spent \$350 billion filling out IRS paperwork. We spend another \$125 billion a year calculating the tax implications of a business decision. If we are spending in excess of \$450 billion a year just to fill out forms to send them in, that is inefficient. That is stupid. It is like paying for a dead horse. You get nothing from the transaction.

Third, the underground economy is about \$2 trillion a year. And the more complex our code gets, the easier it is to go underground and avoid paying taxes. They are not contributing.

Fourth, there is today in offshore financial centers in dollar-denominated deposits \$13 trillion. My point to Chairman Bernanke was this: that is money that would be on shore in our markets, in our banks, if we didn't have an IRS.

All four of those issues: the embedded costs, the compliance costs, the underground economy, and the offshore investments, would be eliminated and fixed by getting rid of the IRS. None of them will be touched by nibbling around the edges of our current tax system.

Fifth is this point. We are having a serious problem starting in real estate in America because people can't afford to pay their mortgages. Some made bad choices, but that is a simple fact. Under the Fair Tax the average income earner would have a 50 percent increase in take-home pay. They would pay their mortgages. Now all of this stuff gets fixed in the economy without spending \$700 billion here and \$700 billion there without raising taxes and everything, as Mr. MICA said.

Lastly, this point: we have never taxed wealth in America; we tax wages. The first thing very wealthy people do is stop getting wages so they pay 15 percent on capital gains and dividends, and if the Obama plan goes through, they will pay a 20 percent tax. But they don't pay anything to Social Security and Medicare because they have no wages.

When Mrs. Kerry had to release her tax return in 2004 during the Presidential election, it showed she had \$5.1 million in income the previous year. She paid a 12 percent tax on it. She paid nothing into Social Security and Medicare. She had no wages. This taxes wealth when it is spent. It is fair to assume that she spent a good part of that \$5 million on several houses and travel. And in that case if she had spent it all, she would have put \$400,000 into Social Security and Medicare, but we don't tax wealth when it is spent today.

Now what would happen if all of this comes to pass? Our studies from outside consultants say that in the first year we would have a 10.6 percent increase in the GDP. I asked Chairman Greenspan when he was chairman if that was inflationary, and he said not at all. We would have a 72 percent in capital spending, and we know that real take-home pay for workers increases in exact correspondence to capital spending.

We would have jobs coming here. An informal study done at Princeton many years ago asked 500 international companies located in Europe and Japan: What would you do in your long-term planning if the United States eliminated all taxes on capital and labor and

taxed only personal consumption? Eighty percent said they would build their next plant in the United States.

If you are selling to Detroit, you would rather be in Detroit because transportation costs are high. But we have driven them off with tax policy.

We have lots of debates on the floor of this House, but punishing people who go offshore, locking up their accounts, they are not leaving because they hate America, they are leaving because we kicked them offshore with confiscatory tax policies.

This will come to pass, and it will be fair, and I hope one day we can give back to the American people and the freest society ever known the privilege of anonymity. No one should know as much about us as our Tax Code. We should have no agency of the Federal Government that knows more about us than we are willing to tell our children. Under this system, there would be no agency that knew how you made your money, how much you made, or how you spent it. You could anonymously go into any store, buy something, have the tax collected there just like we do in 45 States with the sales tax, and we would contract with those States to collect the money and remit it to us. We would have a system of government that was fair.

Let me just close with this comment. During the debate in 1912 when income tax was hot and heavy in the United States, one southern Senator made a statement that was considered so ridiculous and outrageous that he was laughed off the floor of the Senate. Here is what he said. He said, "Mark my words, if we pass this, in time they will be taking 10 percent of everything you earn." It was considered ridiculous, but it did bring back to mind my favorite country song, if 10 percent is enough for Jesus, it ought to be enough for Uncle Sam.

□ 1715

Mr. KING of Iowa. I thank the gentleman from Georgia. I know that this country is going to call upon him many times as we move forward in this debate.

I want to make the point that I have been challenged in the past, and people will say, well, I know that the Fair Tax is a great idea, I'm convinced that you're right on the economics of it—in fact, thinking economists won't disagree; but the rebuttal that I get is, well, you can't get it passed. My answer to that is, if it gets passed under two different scenarios. One is, if we elect a President who has run on it and receives a mandate from the American people for the Fair Tax. And the other one is, when you are in a downward economic spiral and Americans are actively looking for solutions, this is it.

I will yield back to the gentleman from Georgia.

Mr. LINDER. I think that is correct. And in the last Presidential election,

Governor Huckabee did run on the Fair Tax. In your State, he won the Republican primary. And he told me he ran because of the Fair Tax Organization in Iowa. We have organizations in 50 States, and most States have dozens of them. These are people who, no matter that happens to me or you or the folks right now pushing this idea, they are not going to let it die. If you Google "Fair Tax," you will find that they are meeting in every State, every week. Somewhere along the way it winds up in the literature.

The American people are going to demand this. If you remember the debates from the Republican primary, it came up in virtually every debate and brought down the house. So I don't think it is going to go away because the American people are not going to allow it.

Mr. KING of Iowa. I thank the gentleman. This good idea, I don't know that it has ever lost a debate and probably never will.

I am looking around and I am seeing a lot of my colleagues from south of the Mason-Dixon line—I'm glad there is one from the north side of the Mason-Dixon line. But before we go there, I have never met a Republican from Tennessee I didn't like. And we have one on the floor with us tonight, Mr. Speaker, and that's Mr. DUNCAN from Tennessee. I would be happy to yield.

Mr. DUNCAN. I thank the gentleman from Iowa for yielding.

I want to say, first of all, that I will be very brief because there are several other people here who wish to speak. But I want to commend my friend, JOHN LINDER, who has worked so hard in advocating the Fair Tax. And I especially want to commend my good friend, the gentleman from Iowa (Mr. KING), for calling this Special Order tonight. The gentleman from Iowa has been a real leader, a real champion in the fight to reduce our taxes and to try to bring Federal spending under some type of control.

This is my 21st year in Congress. And I'll tell you, I have seen some pretty mindboggling spending in that time, but even I have been shocked and astounded by all the spending that we have seen lately, and it just seems to be almost completely out of control. And in all this spending and legislation that we passed just in the last few months, in the midst of that, we've raised our national debt limit to 12 trillion, 104 billion. That's a mindboggling, incomprehensible figure. And nobody can really understand it or relate to it, but David Walker, as many of you know, the former head of the GAO, the Government Accountability Office, has been going around this country trying to be a Paul Revere to sound the warning to say that as troublesome and worrisome as the \$12 trillion national debt is, that an even

greater problem is what he estimates are now \$56 trillion in unfunded future pension liabilities.

And I used to say that what we were doing to our children and grandchildren is terrible, but actually now I say what we're doing to ourselves, because I don't believe it's going to be more than 10 or 15 years, if that long, before we're not able to pay all our Social Security and Medicare and veterans' pensions and all of the things we have promised our own people with money that will buy anything. What we will do, we will do what governments all over the world have done when they have gotten in this situation, they have just started printing more money. And that never works; it's like a ball going downhill. It just means that what people thought was a good pension is not going to work, not going to support them at all.

And every place in this world where the people have let the government get out of control, what has happened is there have been a few elitists at the top, it has basically wiped out the middle class, and there has been a huge starvation class because that is the only thing big government is good at is wiping out the middle class.

I will say this; there is no good reason why we should have a tax code nearly as complicated, convoluted, and confusing as the one we have, where I have read that even half the advice the IRS itself gives out is wrong.

The Fair Tax certainly has a lot of merit to it. Mr. LINDER has pointed out so many things. But right now the people who are paying their taxes, their honest share of taxes, they're paying the taxes for the illegal immigrants and the drug dealers and those who work in the underground economy. Under the Fair Tax, the illegal immigrants and the drug dealers would have to start paying their fair share of taxes.

In addition to that, we have—I think it's 65 million foreign tourists. They would help us pay a Fair Tax. They don't help us pay an income tax. And as Mr. LINDER just said, we now spend \$350 billion just in filling out the tax forms. It is ridiculous that we have a system that is that complicated.

As the gentleman from Iowa pointed out a short time ago, the administration has submitted a \$3.9 trillion budget. I noticed that Jim Cramer, the famous stock analyst who is on television every night, he said President Obama's budget may be one of the great wealth destroyers of all time. And that is a significant statement coming from a man who has been a six-figure contributor to the Democratic Party. He said President Obama's budget may be one of the great wealth destroyers of all time. We don't need that, especially in this type of economy.

We don't have enough people who realize this; there is waste in the private

sector just like there is waste in the public sector, but the waste in the private sector pales in comparison to the waste that is in the public sector because a business that continually wastes money will very soon go out of business, but a government agency that wastes money just seems to get increased funding. So what that means is that every dollar you can keep in the private sector will do more to create jobs and keep prices low than will any dollars turned over to the government. Yet, I saw on Lou Dobbs last night that in this past year, we've lost four million jobs in the private sector while government employment has increased by 151,000 over the past 12 months. At the same time that individuals and families all over this country are having to cut back, we are giving increases to the government.

The Washington Post, just after the House passed the stimulus—and they supported it, but they said it would mean "a massive financial windfall"—that's the words they used—"a massive financial windfall" for Federal agencies. So that is who is coming out good in this, the Federal bureaucrats, Federal agencies. And this area, which was already one of the wealthiest areas in the country, is going to come out just fine under this stimulus package and under this increased spending we're doing.

But about the time we were voting on this stimulus package, 203 leading university economists ran a full-page ad in the Washington Times and they said this; "We, the undersigned, do not believe that more government spending is a way to improve economic performance. More government spending by Hoover and Roosevelt did not pull the United States economy out of the Great Depression of the 1930s. More government spending did not solve Japan's "lost decade" in the 1990s. As such, it is a triumph of hope over experience to believe that more government spending will help the U.S. today."

And these economists continued and said this: "To improve the economy, policymakers should focus on reforms that remove impediments to work, saving, investment, and production. Lower tax rates and a reduction in the burden of government are the best ways of using fiscal policy to boost growth."

I will just wind up with a couple more comments. Edward Rendell, the Governor of Pennsylvania, when he was the Mayor of Philadelphia, testified in front of a congressional committee and he said this; "The problem with government is that there is no incentive for people to work hard, so many do not. There is no incentive to save money, so much of it is squandered." And that pretty much sums it up. And that pretty much sums up why the more money you turn over to the government, the less it helps the economy.

It helps those who are in with the government, but if you want to really help the poor people and the lower income people in this country, then you will try every way possible to keep more money in the private sector.

We are going in the opposite direction today. I noticed that even the liberal New York Times reporter asked President Obama a few days ago if he was a socialist. And that is the path we're headed down. They may try to deny it. Socialism, though, has not worked anywhere in this world; if it had, the Soviet Union and Cuba would have been heaven on Earth.

I could say more, but I will stop because others want to speak. Once again, I want to commend my friend, the gentleman from Iowa, for bringing us together here tonight. Thank you very much.

Mr. KING of Iowa. I thank the gentleman from Tennessee for coming to the floor and engaging in this discussion.

Mr. Speaker, as we move through this and we get down to the last 10 minutes available in this hour, I would be happy to yield to the gentleman from Georgia (Mr. GINGREY).

Mr. GINGREY of Georgia. I appreciate the gentleman yielding.

I am very happy to be here this evening to address my colleagues on this important issue of the Fair Tax and pay tribute to our colleague from Georgia, Representative JOHN LINDER. Representative LINDER, from the Seventh Congressional District of Georgia, is a long-term Member of this body, is former chairman of the NRCC, long-term vice chairman of the Rules Committee, and now a member of the Ways and Means Committee. And Mr. Speaker, he knows of what he says in regard to the Fair Tax.

I think JOHN is absolutely right. And I am just, as I say, proud to be here and be his colleague and to have an opportunity to weigh in, in support of the Fair Tax. My only regret—or one of my biggest regrets—since I've been here is that when we had the majority on our side of the aisle, we lost the opportunity, didn't take the opportunity. It wasn't because of JOHN's lack of ethics, however. And I think he is absolutely right; if we live long enough—Lord willing—we're going to see the elimination of the 16th amendment, and that is, obliterate the income tax and replace it with the Fair Tax. I think this country will be much more competitive.

I could stand here and take up the rest of the time, but I know my other colleague from Georgia is here and he wants to speak.

I want to thank the gentleman from Iowa for conducting this Special Order tonight. And I thank him for the time that he gave me to weigh in, in support of JOHN LINDER and the Fair Tax. And I yield back.

Mr. KING of Iowa. I thank the gentleman from Georgia, my good, long-time friend from the first day I arrived in this Congress. I look forward to more of these opportunities in this fashion.

To conserve our time, I will happily and quickly yield to the gentleman from Georgia, Dr. BROWN.

Mr. BROWN of Georgia. I thank the gentleman for yielding.

Mr. Speaker, I believe that if a study were done on facial expressions made during a word association test, the results would show that most people's facial expression given the word "taxes" would be strikingly similar to that as when they were asked to recall the last time that they stubbed their toe or they smashed their finger with a hammer. Just as each physical injury has left a memory of pain and discomfort, so has each tax season burned a memory of stress and anger into the minds of most Americans.

As many of you may know, I am an original-intent constitutionalist. I believe the Federal Government was not established to tax and spend; it was established to protect freedom and liberty. Yet, here we are today trying to solve our Nation's economic woes through an outdated and failed philosophy of more taxes, more spending, more borrowing, and an overall belief that more government is the solution. How many times, Mr. Speaker, will we hit ourselves in the thumb with an economic hammer before we realize that this is not the way to approach our problems? As the great Winston Churchill once said, "For a nation to try to tax itself into prosperity is like a man standing in a bucket and trying to lift himself up by the handle."

With the tax filing deadline just around the corner and many Georgia families struggling to figure out how they will pay off Uncle Sam this year, now is the time to do away with our terrible tax system, scrap this tax-and-spend mentality so we can go about a better way to get this country back on track.

Mr. Speaker, I would submit that one great way to reform our tax system would be to institute the Fair Tax, which I'm an ardent supporter, a system that would replace all Federal taxes with one single retail sales tax. Just imagine the money that would flow into our economy if hardworking Americans were actually allowed to keep more of their money that they earned, if they didn't see increasing amounts being taken by a government that can't even pass a balanced budget, much less operate on one.

□ 1730

However, it would be foolish to only discuss reforming our tax system without addressing its soul mate, and that is government spending. Skyrocketing growth in government spending by

both Congress and Presidents, regardless of political party, has grown to a level of astronomical proportions. Spending by the Federal Government has more than doubled since 1980 and tripled since 1965. Recent history has shown us that cutting taxes is not a viable solution if we do not also address our gluttonous spending.

This government exists for the sole purpose of serving the people, but for too many years, government has been merely serving itself. It has taxed and spent itself into a debt that shows no signs of receding.

You see, this is something that seems to have been forgotten by Congress and by this administration. To spend these huge increases as they are proposing, they must first take it away from people through taxes. And what happens when there are not enough taxes to cover all the increased spending? They simply increase taxes, often through new and creative methods, while also increasing our Federal debt.

In 1930 the U.S. Tax Code was a brisk 500 pages long. Today it has swollen to more than 45,000 pages, full of provisions that too often produce negative results. A Fair Tax system, empowering the American people to decide how much taxes they'll pay through their own purchasing decisions, will force this spending-engorged government to change their ways and enact fiscally responsible budgets.

In addition, a Fair Tax system will move the responsibility of taxing citizens back to the States, simplifying the process, and remove the temptation by Congress and the administration to feed their growing appetites at the smorgasbord that is our current tax system.

Often when I'm at home talking with my constituents in Georgia about taxes, I tell them if 10 percent is good enough for the Lord, it ought to be good enough for Uncle Sam. We have to reduce the size of government and government spending to achieve this heavenly goal. Under the original intent of our Constitution, 10 percent would be more than enough to fund all of the functions of the Federal Government as envisioned by our founders.

I call on my colleagues to listen to the American people who are demanding a better system. We can and should give it to them by reducing Federal Government spending and reforming our tax system by enacting the Fair Tax.

I congratulate my dear colleague from Iowa for allowing me to speak and bringing this very, very important issue to the forefront of the American people.

We have to stop spending. We are spending too much. We are taxing too much. We are borrowing too much. And it's going to kill our economy. I call this a steamroll of socialism being shoved down the throats of the American people that's going to strangle our

economy. It's going to slay the American people economically if we don't stop it. Thank you so much.

Mr. KING of Iowa. I thank the gentleman from Georgia for coming down and joining in this discussion, Mr. Speaker, and I am hopeful that we will have many more like this.

I want to reiterate a point that I made at the conclusion of Mr. LINDER's delivery, and that is, as he went down through the list of all the taxes that get eliminated, corporate and personal income tax and payroll tax and inheritance tax and the list goes on and on and on, the Fair Tax provides an incentive for earnings, savings, and investment. Here's my point, and I want to make this clear and I will stand on it and I'll defend it and I have made this statement across the country, and it is this: The Fair Tax does everything good that anybody's tax proposal does that is good for our economy and the American people. It does all of them and it does them all better.

Now, that sounds like a real big position to take, and I'm taking it because I'm solid in that, and I'm happy to debate that. I'd be happy to debate anybody from the other side of the aisle that can come over here and tell me that any part of that's wrong and then let's have that discussion. When you take the punishment off of people who are producing, earning, saving, and investing, and you let them earn, save, and invest all they want to produce, and then you provide that incentive for that savings and investment on the other side, as John Linder said, the Fair Tax eliminates the taxes on capital and labor.

Now, Adam Smith said the sum total of the cost of anything that you produce or buy is the cost of the capital plus the cost of the labor. But we are taxing all capital and labor in America under the Federal income tax along with the whole array of other Federal taxes that we have. We have to be able to give that all back and let people earn, save, and invest all they want to earn, save, and invest. And I just urge that this Congress take a look at this Fair Tax. And let's get some hearings. Let's get something moving through the Ways and Means Committee. Let's continue to make this point.

Also, I will say this: I came to this conclusion in 1980. That's 29 years ago. I have looked at this Rubik's Cube of the Fair Tax every way I can possibly turn it. I turn it one way and another way. The colors show a little bit differently, but every time I turn it again, it looks better and better and better. The more I know about it, the better I like it. And I don't know if anybody has studied it as long as I have, 29 years, before there was anybody that had any science, any background on this. I took this to the people and economists and the tax lawyers that I knew.

I yield to the gentleman from Georgia.

Mr. BROUN of Georgia. I thank you for yielding.

I want to just point out that you have been a leader on this Fair Tax and trying to offer solutions. Republicans have offered solution after solution after solution to energy, to housing, to taxes, to the spending; and the leadership has totally denied us from bringing this forward to the American public. And I congratulate you for being a leader in this regard.

Mr. KING of Iowa. I thank the gentleman from Georgia and all the participants.

THE SUBPRIME HOUSING CRISIS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentlewoman from Ohio (Ms. KAPTUR) is recognized for 60 minutes as the designee of the majority leader.

Ms. KAPTUR. Mr. Speaker, I ask unanimous consent to include extraneous material in the RECORD thereof as I proceed this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Ms. KAPTUR. Mr. Speaker, as our economy continues to oscillate, and the world markets with it, it is good to remind ourselves of some economic fundamentals so we can fix what ails us. Let us return to the opening fact: The proximate cause of America's downturn is the subprime housing crisis. It is not abating. Until America addresses that, our economy will continue to bleed.

Washington is obstinately refusing to address that head-on. Six thousand six hundred homes enter foreclosure across this country every day. That is one home, one family every 13 seconds. Instead, Washington seems to still be just picking at the edges of the glaring headlights facing us.

The President today, in the wake of AIG's giving AIG executives hundreds and hundreds more millions of dollars, taxpayer dollars, in bonuses, has stated the need for overall financial regulatory reform. He is right. America needs more than executive bonus reform, however. That only represents a wart on a very large elephant, of hundreds of billions and, indeed, trillions of dollars irresponsibly managed and the burden of resolution being put on our taxpayers, on their children, on their grandchildren. The executive and legislative branches of our government must dive in and reform this out-of-control financial marketplace. The Republic and our citizens deserve no less. The question for history is whether this Congress will meet its constitutional obligations to protect and defend the Republic.

It is time that Wall Street and the megabanks saw the writing on the wall. Yet they seem hell-bent at resistance. Wall Street's response of putting its head in the sand and their hands in our pockets should be over. AIG's bonuses are merely the latest sign, like a big canary in the mine shaft sign, of Wall Street's high arrogance and its real power, I repeat, its real power, over the American people and the institutions that govern us. The voices of the people are not being fully heard. Wall Street's latest racketeering and ransacking of our Republic trumps anything they have done in the past.

Let us recall the savings and loan debacle back in the 1980s when financial institutions dumped \$150 billion of their bad debts onto the American people, onto their children. It was a huge load. In fact, we're still paying it. It became the third largest share of our Nation's long-term debt. We're paying for it until today. It gets hidden in the overall debt but it's in there. But Wall Street and the megabanks had no remorse. They smelled blood. They got away with what they did. And they learned something from that fiasco. They were able to wash their hands of responsibility. They got away with it.

They then worked like eager beavers to change the laws of this country so that they could do even more. So much more. The savings and loan bailout marks the point in time when the largest financial institutions in this country figured out that they could push this Congress around and the President around, and they were emboldened by what they did. And they not only have ever since, and royally, I might add, but they have done so at a magnitude that is unprecedented. Who knows how deep the hole is this time around? They've already dumped \$700 billion of their bills already directly on the American people, six times more than the last time.

And on top of that, who knows really what debt the Federal Reserve is racking up in its hidden transactions, furiously assembled at its own counting house. Those secret transactions merely tell us how far out of control our elected representatives have been distanced from the government they are sworn to defend against all enemies.

After the big banks were rewarded 20 years ago by forcing the public to pick up their dirty laundry, they enlarged their thievery during the 1990s with a vengeance. Once most of America's thrift and home loan institutions were destroyed along with the savings ethic that had been embedded into the law, the megabanks set in place a massive racket to exploit and draw down the accumulated savings that were left, you can call it equity, of the American people represented in their homes, in the housing market. Wall Street and the megabanks accomplished their

goal. They drew down huge sums of equity from homeowners through scheme after conceivable scheme. Yes, they sucked out the value of what homeowners actually owned, not owed but owned, in their homes. Their schemes were masterful and they were morally wrong.

Look in neighborhood after neighborhood in this country. I bet your property values have come down. If you're not losing your home, you've been impacted by it. Your equity has been lessened. They got to you too. They got to almost every single household in this country.

□ 1745

How did they do it? They had millions of schemes. Take widows' loans, widow, w-i-d-o-w. This was the rotten racket by which Wall Street's sharp-pencil boys preyed on grief-stricken women who had just lost their husbands, unethical money men at white-shoe Wall Street institutions like Citigroup, through its CitiFinancial, no less, drilled into that segment of the market for every penny they could exact.

They promised widows—and they followed the obituaries to find them—they promised widows that now that their husbands were gone, they needn't worry about their finances into the future. Just sign on the dotted line and an equity bonanza would be yielded to that widow.

They failed to mention that in a few years the widow's mortgage payments would more than double. But who was to worry? Tragic, yes, but true. Did it happen, yes, over and over and over again.

And those who worked for CitiFinancial across this Nation, and I am sure some are listening this evening, some refused to do that. They left their firms or they were terminated, but others did it.

And every time they did it, they got a bonus on that widow's refinancing. I can't imagine how those people can sleep at night. That's how they made their money.

Congress needs to hear from those widows. I know they are out there. What happened to them, in my opinion, was criminal.

So the subprime housing implosion is the proximate cause of our downturn. But I have a question, why is our government not fully using the normal institutions that could resolve the crisis on the books of the financial institutions involved, the FDIC, the Federal Deposit Insurance Corporation and the Securities and Exchange Commission. Why aren't we?

Last week we heard from the former chair of the Federal Deposit Insurance Corporation who served both Republican and Democratic Presidents back in the 1980s, Mr. William Isaac, who is published in *Investment Dealers' Di-*

gest this week, an article I am going to quote from. He essentially resolved and successfully resolved over 3,000 insolvent banks back in the 1980s.

Every bank in Texas went down but one. Continental Bank of Illinois went down. He resolved those without a cost to the public. His answer to what we face is follows, a four-point alternative to the bailout bill. Implement a program that would ease the fears of depositors and other general creditors of banks. You do that through the FDIC and the Securities and Exchange Commission.

No. 2, you reinstitute restrictions on short sellers. You do that through legislation or the SEC could do that. They haven't.

No. 3, you could suspend or alter substantially mark-to-market accounting which has contributed to mightily to our current problems by marking assets to unrealistic fire-sale prices. We could authorize a net worth certificate program, that authority still exists. FDIC needs to use it.

We could settle the financial markets, he says, without significant expense to taxpayers. This would leave \$700 billion of dry powder we could put to work in targeted tax incentives, if needed, to get the economy moving again.

But why hasn't Washington done what he suggests? Perhaps it's because the megabanks and their Wall Street patrons relish the world of greed in which they float. And, frankly, they have worked very hard and spent billions in lobbying fees and campaign contributions to set up the world just the way they like it, and they have been rewarded handsomely. They are still being rewarded very handsomely.

They don't want to lose their grip. After all, they have figured it all out. From every angle, they know even that congressional elections are cheap. They are now the largest contributors, Wall Street, that is, to congressional elections and Presidential races. They figure about \$3 million a seat in here and a few hundred million for a President. You add those all up, it doesn't even equal what we put in to the AIG bailout for the entire Congress of the United States.

The castle that Wall Street built, and which it is defending now at all costs, was built at the price of great harm to this republic. I believe that the situation can right itself, but it will take the American people taking back their power through us, those that they elect.

The situation we face did not happen overnight. As I stated, it grew out of the savings and loan crisis. And let's look back at the late 1980s and 1990s, in the 1990s, activities began and a plan was set in place by Wall Street and the largest money-center banks, and I will name them, JPMorgan Chase, Citigroup, Bank of America, HSBC,

Wachovia and Wells Fargo—Wells Fargo and Bank of America down in Charlotte—to overleverage our U.S. housing market through such schemes as mortgage-backed securities and home-equity loans to make extraordinary profits and enrich executives, boards and their shareholders. We know some of their names, but it's amazing how they can avoid the public limelight.

The net result of their combined actions has been to indebt our Nation on the private side with our families and ultimately shift the cost of what they have done, their excesses, to the public realm.

The Wall Street and Wall Street-related institutions lobbied to change Federal laws, along with executive actions, that aided and abetted their plan. In 1994, the Riegle-Neal Interstate Banking and Branching Efficiency Act was passed into law with Congress hastening bank mergers, resulting in the further concentration of financial power in money center banks, most often leading to Wall Street.

And in local communities across this country, what happened was banks that had been headquartered in towns and cities began to disappear, as they were gobbled up by money center banks far from home. And communities across this country became derivative money centers of a headquartered bank a very long way home. Think about where you live. Think about what happened in your community.

With the passage of the Riegle-Neal bill, what changed was this, the traditional concept of community banking where residential lending took the form of a loan which was made on the time-tested standards of character, collateral and collectability, was transformed into a bond and then security, which was broken into pieces and then sold into, ultimately, the international market, where you can't even find it, largely through Wall Street dealers. Essentially, collateral was overvalued, the value of the house became overvalued.

Risk was masked and proper underwriting and oversight of the loans was dispensed with. Thus began the silent eroding of our Nation's community banks. They are not all gone, but they are fewer, and they are burdened unfairly by the economy Wall Street-money centered banks have delivered to them and us.

In addition, in the years of 1993 and 1994, there were changes made at the Department of Housing and Urban Development that removed normal underwriting standards. For example, HUD's mortgage letter, 93-2, "Mandatory Direct Endorsement Processing," gave authority to home builder-owned lenders like KB Mortgage and affiliate lenders like Countrywide to independently approve their own loans.

Then in 1994, HUD mortgage letter 94-54 allowed lenders to select their own appraisers. How do you like that?

Secretary of HUD Henry Cisneros, upon departure from the Department of Housing and Urban Development, became a KB Home board member as well as a Countrywide board member. So as a public servant of the highest order, with the trust of the President and all those at HUD, Mr. Cisneros appears to have leveraged his position to his own benefit. Of course, appearances can be deceptive, and sometimes appearances are spot on.

Continuing on, Mr. Speaker, in 1995 Congress passed, over my objection, the Private Securities Litigation Reform Act. This bill was the only bill ever passed by Congress over a Clinton veto, and it was part of Newt Gingrich's Contract with America. This law made securities class action lawsuits more difficult.

In fact, Representative ED MARKEY of Massachusetts offered an amendment to that bill that would have made those that sold derivatives still subject to class actions. But his amendment was not accepted, and it never passed.

Back in those days, I can remember when the Securities and Exchange chair, Brooksley Born, made public statements talking about the necessity to regulate the derivatives market, what she saw happening. She was forced out of the SEC. I nominate her for a gold medal.

In 1999 Gramm-Leach-Bliley Act passed Congress, and for the first time since the 1930s removed the regulatory barriers that existed between banks and insurance and real estate and commerce. It was like all the rules were thrown out.

Insurance companies got into derivatives, securities houses got into housing and real estate, America's banking system was turned inside out. Over the next several years, the fury of an inflating housing market and mergers of financial institutions increased.

To illustrate the general pattern of behavior, an interesting case to follow is that of investment bank Wasserstein Perella of New York and Chicago. It wasn't the largest, but one can follow and track it.

In 2001, at the height of the mortgage bubble, it merged with Dresdner Bank of Germany, taking with it volumes of U.S. subprime paper. Today, Dresdner, which is the second largest bank in Germany, has been victimized by the subprime crisis and has been put up for sale. It is likely being acquired by Commerzbank in Germany, which is owned by their largest insurance group, Allianz Insurance Group of Germany. They have the same kinds of insurance problems as we do.

The question is, on behalf of which institutions did Wasserstein Perella move the subprime paper? Equally interesting is, effective June 5, 2008, last

year, Dresdner Kleinwort Wasserstein Securities was listed on Federal Reserve Bank of New York's private government securities dealers' list. They are right on the inside. They are more on the inside than my neighbors are back in Ohio where 10 percent of our homes have been foreclosed. This means a foreign institution with severe financial problems is brought under the umbrella of the U.S. Federal Reserve.

In fact, if you review the list of troubled money center banks, most of them are now listed on the preferred primary dealers' list at the Federal Reserve. The Fed is starting to look like the encampment of the most culpable.

This brings me back to A.I.G. This weekend, AIG grudgingly released the names of the banks that they had to pay related to the credit default swaps on securities that failed. So AIG had to pay on those failures.

Who did they pay with taxpayer dollars that bailed them out and continued to bail them out over and over to a level of \$176 billion and beyond?

You know the No. 1 company? As of Monday this week, Goldman Sachs. Well, they got \$12.9 billion, Goldman Sachs. That's where the last two Secretaries of the Treasury have come from, both in Democratic and Republican administrations. We have a new Secretary of Treasury now who came from the New York Federal Reserve.

I will insert in the RECORD the The New York Times article by Mary Williams Walsh.

[From the New York Times, Washington Edition]

FIRMS TO WHICH IT PAID TAXPAYER MONEY
TRACKING THE BAILOUT
FOREIGN AND U.S. BANKS WERE GIVEN BILLIONS
AGAINST BAD DEBT

(By Mary Williams Walsh)

Amid rising pressure from Congress and taxpayers, the American International Group on Sunday released the names of dozens of financial institutions that benefited from the Federal Reserve's decision last fall to save the giant insurer from collapse with a huge rescue loan.

Financial companies that received multi-billion-dollar payments owed by A.I.G. include Goldman Sachs (\$12.9 billion), Merrill Lynch (\$6.8 billion), Bank of America (\$5.2 billion), Citigroup (\$2.3 billion) and Wachovia (\$1.5 billion).

Big foreign banks also received large sums from the rescue, including Société Générale of France and Deutsche Bank of Germany, which each received nearly \$12 billion; Barclays of Britain (\$8.5 billion); and UBS of Switzerland (\$5 billion).

A.I.G. also named the 20 largest states, starting with California, that stood to lose billions last fall because A.I.G. was holding money they had raised with bond sales.

In total, A.I.G. named nearly 80 companies and municipalities that benefited most from the Fed rescue, though many more that received smaller payments were left out.

The list, long sought by lawmakers, was released a day after the disclosure that A.I.G. was paying out hundreds of millions of dollars in bonuses to executives at the A.I.G. division where the company's crisis origi-

nated. That drew anger from Democratic and Republican lawmakers alike on Sunday and left the Obama administration scrambling to distance itself from A.I.G.

"There are a lot of terrible things that have happened in the last 18 months, but what's happened at A.I.G. is the most outrageous," Lawrence H. Summers, an economic adviser to President Obama who was Treasury secretary in the Clinton administration, said Sunday on "This Week" on ABC. He said the administration had determined that it could not stop the bonuses.

But some members of Congress expressed outrage over the bonuses. Representative Elijah E. Cummings, a Democrat of Maryland who had demanded more information about the bonuses last December, accused the company's chief executive, Edward M. Liddy, of rewarding reckless business practices.

"A.I.G. has been trying to play the American people for fools by giving nearly \$1 billion in bonuses by the name of retention payments," Mr. Cummings said on Sunday. "These payments are nothing but a reward for obvious failure, and it is an egregious offense to have the American taxpayers foot the bill."

An A.I.G. spokeswoman said Sunday that the company would not identify the recipients of these bonuses, citing privacy obligations.

Ever since the insurer's rescue began, with the Fed's \$85 billion emergency loan last fall, there have been demands for a full public accounting of how the money was used. The taxpayer assistance has now grown to \$170 billion, and the government owns nearly 80 percent of the company.

But the insurance giant has refused until now to disclose the names of its trading partners, or the amounts they received, citing business confidentiality.

A.I.G. finally relented after consulting with the companies that received the government support. The company's chief executive, Edward M. Liddy, said in a statement on Sunday: "Our decision to disclose these transactions was made following conversations with the counterparties and the recognition of the extraordinarily nature of these transactions."

Still, the disclosure is not likely to calm the ire aimed at the company and its trading partners.

The Fed chairman, Ben S. Bernanke, appearing on "60 Minutes" on CBS on Sunday night, said: "Of all the events and all of the things we've done in the last 18 months, the single one that makes me the angriest, that gives me the most angst, is the intervention with A.I.G."

He went on: "Here was a company that made all kinds of unconscionable bets. Then, when those bets went wrong, they had a—we had a situation where the failure of that company would have brought down the financial system."

In deciding to rescue A.I.G., The government worried that if it did not bail out the company, its collapse could lead to a cascading chain reaction of losses, jeopardizing the stability of the worldwide financial system.

The list released by A.I.G. on Sunday, detailing payments made between September and December of last year, could bolster that justification by illustrating the breadth of losses that might have occurred had A.I.G. been allowed to fail. Some of the companies, like Goldman Sachs and Société Générale, had exposure mainly through A.I.G.'s derivatives program. Others, though, like Barclays

and Citigroup, stood to lose mainly because they were customers of A.I.G.'s securities-lending program, which does not involve derivatives.

But taxpayers may have a hard time accepting that so many marquee financial companies—including some American banks that received separate government help and others based overseas—benefitting from government money.

The outrage that has been aimed at A.I.G. could complicate the Obama administration's ability to persuade Congress to authorize future bailouts.

Patience with the company's silence began to run out this month after it disclosed the largest loss in United States history and had to get a new round of government support. Members of Congress demanded in two hearings to know who was benefiting from the bailout and threatened to vote against future bailouts for anybody if they did not get the information.

"A.I.G.'s trading partners were not innocent victims here," said Senator Christopher J. Dodd, the Connecticut Democrat who presided over one recent hearing. "They were sophisticated investors who took enormous, irresponsible risks."

The anger peaked over the weekend when correspondence surfaced showing that A.I.G. was on the brink of paying rich bonuses to executives who had dealt in the derivative contracts at the center of A.I.G.'s troubles.

Representative Barney Frank, Democrat of Massachusetts and chairman of the House Financial Services Committee, implicitly questioned the Treasury Department's judgment about the whether the bonuses were binding.

"We need to find out whether these bonuses are legally recoverable," Mr. Frank said in an interview Sunday on Fox News.

Many of the institutions that received the Fed payments were owed money by A.I.G. because they had bought its credit derivatives—in essence, a type of insurance intended to protect buyers should their investments turn sour.

As it turned out, many of their investments did sour, because they were linked to subprime mortgages and other shaky loans. But A.I.G. was suddenly unable to honor its promises last fall, leaving its trading partners exposed to potentially big losses.

When A.I.G. received its first rescue loan of \$85 billion from the Fed, in September, it forwarded about \$22 billion to the companies holding its shakiest derivatives contracts. Those contracts required large collateral payments if A.I.G.'s credit was downgraded, as it was that month.

Among the beneficiaries of the government rescue were Wall Street firms, like Goldman Sachs, JPMorgan and Merrill Lynch that had argued in the past that derivatives were valuable risk-management tools that skilled investors could use wisely without any intervention from federal regulators. Initiatives to regulate financial derivatives were beaten back during the administrations of Presidents Bill Clinton and George W. Bush.

Goldman Sachs had said in the past that its exposure to A.I.G.'s financial trouble was "immaterial." A Goldman Sachs representative was not reachable on Sunday to address whether that characterization still held. When asked about its exposure to A.I.G. in the past, Goldman Sachs has said that it used hedging strategies with other investments to reduce its exposure.

Until last fall's liquidity squeeze, A.I.G. officials also dismissed those who questioned its derivatives operation, saying losses were out of the question.

BENEFICIARIES OF A RESCUE

The American International Group on Sunday released the names of financial institutions that benefited last fall when the Federal Reserve saved it from collapse with an \$85 billion rescue loan. The Fed paid A.I.G.'s obligations to the following companies, among others:

| Institution | Amount (in billions) |
|--------------------------|-------------------------|
| Goldman Sachs | \$12.9 |
| Societe Generale | 11.9 |
| Deutsche Bank | 11.8 |
| Barclays | 8.5 |
| Merrill Lynch | 6.8 |
| Bank of America | 5.2 |
| UBS | 5.0 |
| BNP Paribas | 4.9 |
| HSBC | 3.5 |
| Citigroup | 2.3 |
| Calyon | 2.3 |
| Dresdner Kleinwort | 2.2 |
| Wachovia | 1.5 |
| ING | 1.5 |
| Morgan Stanley | 1.2 |
| Bank of Montreal | 1.1 |

But it's very interesting which firms get special treatment. Several of the AIG infusions of money that came from the U.S. taxpayers are foreign based. Societe Generale of France, \$12 billion; Deutsche Bank of Germany, \$12 billion; Barclays of Britain, \$8.5 billion; UBS of Switzerland, \$5 billion; Dresdner, \$2.2 billion; foreign banks paid with U.S. taxpayer dollars?

The American taxpayers are becoming the insurance company for Wall Street and global banks. Think about that one.

There is simply no way for us to pay our way out of this, because without mark-to-market accounting being engaged, that is destroying more capital inside these banks than we can possibly make up for with the debt we are assuming as the risk is passed on to the American people.

□ 1800

Besides Goldman Sachs in our country, Merrill Lynch got \$6.8 billion through AIG; Bank of America, \$5.2 billion; Citigroup, \$2.3 billion; Wachovia, \$12.5 billion. All banks are receiving TARP funds, too. So it's almost like double dipping into taxpayer dollars. Oh, my, is it time for major reform.

Mr. Speaker, this past week Congress took some steps forward toward real reform, and I'd like to highlight a couple of them and thank those who made them possible. I'd like to begin by thanking House Financial Services Committee Chairman BARNEY FRANK for not only permitting, but attending the Subcommittee on Capital Markets, Insurance, and Government Sponsored Enterprises hearing on mark-to-market accounting. This is the bullseye at the center of the target.

In addition, I wish to extend my gratitude for his leadership to the chairman of that Committee, Representative PAUL KANJORSKI, and the ranking member, Representative SCOTT GARRETT, whose opposition to the Wall Street bailout is as strong as mine, for allowing me to participate in that

hearing although I am not on that subcommittee.

I'd also like to congratulate the staff on the subcommittee for a job well done. This hearing was informative on many levels. It is clear that reform of the mark-to-market system is a bipartisan issue. Congress surely would prefer that the industry itself privately, through the Federal Accounting Standards Board, make the necessary changes to properly account for and subsequently protect institutions. But that appears to be log jammed.

Though not an easy task, time and time again in the hearing the Federal Accounting Standards Board, the Securities and Exchange Commission, and the Office of the Comptroller of the Currency in the Department of the Treasury were told to take action or Congress would take action. I hope that they listen, too, because I know my colleagues can take action, and they surely must.

Three weeks was given as the timeline for FASB and its collaborators to take action. Chairman KANJORSKI already has a hearing date blocked out for the week we return from our April break to follow up as necessary. I thank him for that.

Congress is, for now, expecting and hoping that those who are in charge of regulation will do so, so we do not have to. They, together, are the experts, and should see to the necessity for making these improvements.

All in all, his hearing was a very good one. I commend it to those who are listening to look at that RECORD. We heard excellent testimony from not one, but two panels of experts and people in the field. Yet, for me, and some other Members, the day's work was not complete yet, even though the last votes of the week had been cast.

This takes me to my second round of thank-you's. After Representative KANJORSKI's hearing ended, multiple members attended an informational briefing in the Capitol with the two former Chairmen of the Federal Deposit Insurance Corporation who helped America dig out from that big hole of the 1980s and that last banking crisis so we could learn from their experience.

These crises were far larger than what we faced at the beginning of this one, but this one has been mishandled, and every day it gets worse. So we have much to learn from them. Yet, lack of appropriate resolution to date in our current situation made their appearance even more important.

I wish to thank Majority Leader STENY HOYER for his interest in this discussion, and I wish to thank Mr. William Seidman and Mr. William Isaac for traveling here to the Capitol to share their experiences, these two amazing Americans who have so much to say, and we thank them for their records as senior statesmen and as successful regulators who actually did

something right to stabilize our ship of State when it was so desperately needed. We need to hear their voices more.

Tonight, however, I am moderated in my optimism because of those meetings last week and because of Treasury's actions toward AIG. And I want to place on the record some of the following. AIG was the largest insurance company in our country. It collapsed last September due to its mega involvement in insuring mortgage-backed securities.

Prudent lending has been thrown out the window for a very long time, and basically the system that has been set up has taken the individual mortgage loan—let's say this is your mortgage that was arranged at your local lending institution—and what happened across our country in the past was that when you would go to a bank and you would get a mortgage locally, you might have deposits in that bank, and the bank could only loan 10 times more than the level of deposits in that institution.

A system was set up in our country where, when you took the loan out, that loan was purchased. Usually it went to the Federal Housing Administration or the Federal National Mortgage Association here. But it had never really been taken into the international market.

What they did under this new system was rather than having the 10 to 1 lending ratio to capital deposit, what Wall Street did is it had a ratio of 1 to 100. It took \$1 and it turned it into \$100—10 times more than ever had been done in history—terribly imprudent, terribly irresponsible, terribly high risk—and they leveraged the whole Republic.

Mortgage firms will tell you that often the value of your mortgage, the underlying value of your home, was really too small for their tastes. If your house was only worth \$50,000 or \$100,000, or even \$250,000 for them that is small potatoes. And what they wanted to do was figure out a system where they could take lots of mortgage loans. And what they did was they took them from all around the country, hundreds and hundreds and hundreds of loans, and then they figured out what they will do is they will take this mortgage loan, all these mortgage loans, and what they did was they sold them together.

So what they did was they created these instruments where they literally put these loans together and then they sent them up the line of command, and what Wall Street did, they said, Well, let's see. What is that worth? Let's take the risk out of this.

So what they did was they took all these loans and they cut them up into pieces. What they did was they broke the mortgage up into little pieces and then they took all of those pieces and they packaged them—they mixed them all up and they packaged them into a security. Can you find your loan?

All of a sudden, your loan lost its individual character. It's sort of like the walnut shell game. Where is your mortgage in here?

Wall Street cannot unwind the securities that it has now even sold into the international market. That's why what's happening is so hard to unwind. They bundled some really bad loans where they had poor underwriting and poor appraisal practices with very good loans. But when they cut them all up, who knows where your loan really is, and the prudent oversight at the local level, since your local bank no longer really had that loan and you started sending your mortgage check to places far away from home, most of which ended up on Wall Street or in one of these money center banks. Well, you get the picture.

Just to make it more interesting, what AIG did was took all those cut-up securities and they sold insurance that they called credit-default swaps on those mortgage-backed securities, and they had to pay out on that insurance that was sold as our housing market started to deteriorate and mortgages began to fail. But, you know what? They did it through an office in London. This just gets more interesting—where the meltdown of AIG actually began.

You see, the insurance market is regulated, but what they did with it, with credit-default swaps, that isn't regulated. Nobody was really in charge of that. So they hid a lot of this. They hid a lot of what was going on and they created almost like a Ponzi scheme. And I have been saying to homeowners across the country, if you get a foreclosure notice, don't leave your property. Get a lawyer. Because until you actually get your own note back, until they piece it back together and you get your original loan, how do you know that you have signed a legal note?

What if you have a widow's loan and they cheated you? What if you had a predatory loan? Make sure you can get your entire note back, and you need legal representation through your Fair Housing offices in order to do that.

The castle that Wall Street built—and which it is defending now at all costs because it has made an enormous amount of money. Some people have made an enormous amount of money. Some of those houses that securitized these loans, half of their profit went to the executives in those companies.

What they have done has been at great price to our Republic. The situation we face can right itself if the new President and if the leaders of this Congress listen to those Americans who have actually resolved serious banking crises before.

To date, those voices have not been allowed to rise because, in my opinion, Wall Street has too much power and they can block, just like in football, there's somebody that is the quarter-

back. They can carry that ball right down the field. But not without the blockers being there. What is happening is some of these important voices are being blocked by those who have enormous power.

Members of Congress must also remember that we represent our constituents and our communities. Their votes got us here and their votes can return us or not return us. Congress needs to get in and get dirty in solving this problem, just like our predecessors did, and find the truth, whatever it takes.

We saw this begin last week at Representative KANJORSKI's hearing. Congress needs to do what is right and not what is easy. Congress doesn't need to be cowardly. Our Nation and our citizens expect no less than what Daniel Webster's quote says right up on that wall, and that is "to do something in our time and generation worthy to be remembered."

It is far overdue for real banking reform in this country and the return of financial power back to the American people.

Mr. Speaker, I yield back my remaining time.

CARBON TAX AND THE PRESIDENT'S BUDGET

The SPEAKER pro tempore (Ms. KOSMAS). Under the Speaker's announced policy of January 6, 2009, the gentleman from Illinois (Mr. SHIMKUS) is recognized for 60 minutes.

Mr. SHIMKUS. I come to the floor tonight—and I will be joined by a couple of my colleagues—to talk about the President's budget and the issue of the carbon tax proposed therein.

Part of the President's budget submission is \$686 billion raised by a carbon tax. This poses a serious number of questions, and I will highlight the history and then talk about how that addresses a concern from, really, a large part of this country, especially the Midwest.

When the 1990 Clean Air Act passed and was signed into law, a mining operation in my congressional district, Peabody Mine #10, which is located right here, a big facility, very efficient, and the great thing about this facility was that right across the street and down the road was a coal-fired generating plant.

So you have what you hear a lot of people talk about today, a mine mouth operation, where you have the coal located underground and you have the power plant on the surface. So you save in the aspect of transportation either by rail or by truck.

What happened under the Clean Air Amendments of 1990 is what will happen as we move to a carbon-constrained regime when we monetize carbon, is that in this process there will be winners and losers. So I am coming

to the floor tonight to talk about who these people are and why are they in this debate. One of the most clearly identified losers in a cap-and-tax regime are the miners.

□ 1815

Now, we hear a lot about green jobs, but I can guarantee you that the green jobs created will in no way match the loss of the fossil fuel industry in this country. And when I say fossil fuel, I talk about all the fossil fuel regimes, from coal to crude oil to natural gas. And we could go, as we talked about last fall oil shale, we could talk about the tar sands, vast resources of energy which, through a climate change regime, through a cap-and-tax provision, we could lose.

Well, these guys lost out and ladies. This one mine in southern Illinois that had over 1,200 miners was shut down, and it was shut down to meet the requirements of the 90 amendments to the Clean Air Act. So I find it very, very difficult when my colleagues say there will be no effect. And we have been very successful, I think, in this debate to highlight the reality that people will lose jobs as we move to address the climate regime. These guys and these ladies lost their jobs. This is one mine.

I talked to an individual who was a business agent for the United Mine Workers who told me, at one time before these acts were passed there were about 16,000 bargain members of the United Mine Workers in southern Illinois. After this last legislation was passed, he was reorganized into a three-State region and he only was working for at that time 4,000 miners. So he went from 14,000 miners in southern Illinois to 4,000 United Mine Workers in a three-State region. There will be definitely be effects, and it is the blue-collar jobs, the working men and women who have mined our coals.

The historical importance of coal mining is part of the reason why many immigrant families found jobs when they moved here. I am a fourth-generation Lithuanian. My great grandfather came to this country and worked in the coal mine. That story is told over and over and over again and highlights the importance of this debate. So you go from this coal mine, this operation to nothing, you go to this job loss, and then you go to the last revenue for the country.

Now, this is just one story that can be told over and over again in just my State, central Illinois, from central Illinois all the way down to the southern tip, that story of miners losing their jobs. So that is why we come to this debate. And we come fervently to talk about the challenges of a cap-and-trade regime.

In this country, the portfolio of energy, again, in this chamber the electricity produced is by a coal-fired

power plant just two blocks away from here. The electricity generated in this country is generated by 49 percent coal. So just imagine that you take coal out of the equation. Now you have current demand and you have less than half the amount of supply. And if you understand supply and demand, costs will then escalate. Who will that cost escalate to? Well, it escalates to everybody.

We hear about the President is making work pay tax credit, the \$300 to \$400 a year for an individual or the \$700 for a couple, that is for 95 percent of all Americans, as he promised. But what he hasn't been able to explain is how, as he passes this cap-and-tax on to the American public, he is going to tax everybody, 100 percent, because we will pay, the consumer will pay for the energy used across the board, because energy is used in everything that we touch, we eat, we consume in this country, and that cost will be passed on in higher costs.

So now let's just talk about the manufacturing sector. If you think that the manufacturing sector that is in this economic malaise right now, you think it is better served with low energy costs or high energy costs? I think the answer is clear: It is better served with low energy costs. If our manufacturing sector is completing against the likes of India and China in the manufacturing sector, do you think our manufacturing sector is better served with higher costs versus the competitors of India and China? Of course they are not. But this Congress and this President is planning to threaten the economic vitality of this country on this cap-and-tax regime and put thousands and thousands of people employed either in the mines or in the power plants or in the manufacturing sector out of work.

And I am just going to end with this story, and then I will yield to my colleague from Minnesota. People say, well, you know, America has got to lead. We have got to lead the folks from India and China. I was in a bipartisan meeting with senior Democrat leaders talking to a senior Chinese official; and I didn't ask the question, two of my democratic colleagues asked this question. The question was: Will China ever agree to an international cap-and-trade regime that is complied by the worldwide organization?

After answering both questions for about 15 minutes, the answer was the same, and this is a paraphrase. He said: You know, the United States and Western Europe built their middle class by cheap fossil fuel use, and now it is our turn. Now it is our turn.

So for anyone who thinks that they are going to comply just because we have now guttered ourselves and made ourselves less competitive and they are going to be goody two-shoes and going to join, they are wrong, and they are

not understanding this other simple fact. I think in January, more automobiles were sold in China than in the United States. They are only starting their era of fossil fuel use. They are not going to stop their era of fossil fuel use. They are not going to comply with any international standards.

So our pain, our job loss, our inability to get out of this recession or this economic malaise is going to be held hostage to the fact that China is going to do nothing. We are going to tell our blue-collar workers out there, yeah, we are going to shut down this coal mine in the hopes that we can encourage China to join us? Are they kidding me?

So that is why we took to the floor. There is a lot more to talk about. I appreciate my colleague and friend from Minnesota for coming down, and I would like to yield time to her.

Mrs. BACHMANN. I commend the gentleman from Pennsylvania (Mr. SHIMKUS) for all the work that he has done, the tremendous work on energy. The energy fight that we all participated in last summer when we talked about how we needed to adopt an all-of-the-above-energy standard so that we can increase America's energy supply, your leadership was exemplary on that effort.

We all remember how much fun that was last July 4, when we were all paying \$4 and more a gallon, thinking that we were on our way to paying \$6 a gallon, \$8 a gallon. We had no idea where it would lead, because what we are seeing was that the world was diminishing its supply, raising its prices. And here in the United States we adopted a policy that was to not produce more American energy, and that constricted and constrained the American public because they had less supply and they had to pay more money. This was not a scenario that the American people were very happy about, and we can see why.

Now, it is curious that under President Obama's spending plan, and that is what we talked about last week on the floor, that the President's budget spends too much, it taxes too much, it borrows too much. All of this radical historical level of spending is mandating massive tax increases. Mandating.

Just the stimulus plan alone, which we found doesn't do anything to stimulate, was over \$1 trillion in spending. Then we saw after that a \$410 billion budget bill which included almost 9,000 earmarks. And our President, who said he would not sign a bill with earmarks, signed a bill loaded with earmarks, and he did it behind a closed door where no cameras were present. And sandwiched in between all that massive spending was a fiscal responsibility summit. Now, that was a little humorous to me, but now here we are today talking about the budget.

Moving forward. This historic level of spending, \$3.7 trillion, where will the

money come? Where will the money come from to fund all of this massive spending? I can guarantee to the American people, there is no vault back here in the Capitol filled with wrapped \$100 bills. There is no money here. There is no money tree out on the Capitol lawn that produces money every morning that we can shake and go gather that money up and spend on all these programs, socialized medicine, all the programs that the President is envisioning. So where will we go to get this money?

To fuel this radical historic level of spending, we are looking at the system that Mr. SHIMKUS has spoken of so well, and it is the cap-and-trade system, which we all know now is a subterfuge for an energy tax. This is a massive tax. And just as our President stood right here in this room several weeks ago and looked into the camera and said to the American people: 95 percent of the American people will pay no increase in taxation. And that absolutely is not true. We know it, because during the course of those remarks he said he wants to pass a cap-and-trade system.

What will cap-and-trade do? It will increase the price of almost every product and service in the United States. Why? Because think of any commodity that somehow doesn't have energy attached to it. There isn't one.

I hail from great State of Minnesota, Minnesota's Sixth District. I will tell you one thing. When October hits in Minnesota, you turn on your furnace, and your furnace stays on until April. Our furnace is still on in Minnesota. It stays on. Energy is a fact of life. And under this cap-and-tax system, we are looking at a minimum 40 percent increase in the monthly energy bill, the monthly electric bill, let alone the increase in the gas tax when you go to the gas station, let alone when you go to the grocery store the increase in taxation. We know this.

As a matter of fact, we have some quotes from our President. We have a quote just a few days ago when the President said that he wants to pass this cap-and-tax system, but he said we may need to delay implementation until 2012. Why? Because our President said, in our current economic meltdown, we will not be able to afford a cap-and-tax system. Well, we know something about our economy. We engage in business cycles where we have good times and not so good times. What are we going to do, suspend this tax in not so good times? The President by his own words is admitting this will harm our economic future.

In fact, when President Obama was running for President, he said, and I quote, "What I said is that we would put a cap-and-trade system in place that is more, that is as aggressive if not more aggressive than anybody else's out there." So if somebody wants

to build a coal powered plant, they can. It is just that they will bankrupt them, because they are going to be charged a huge sum for all that greenhouse gas that is being emitted.

And then he went on to say, "When I was asked earlier about the issue of coal, uh, you know, under my plan of a cap-and-trade system, electricity rates would necessarily skyrocket."

Coal is the number one energy electricity producer in the United States, and we have coal in abundance in this country. Coal isn't evil. Oil isn't evil. Natural gas isn't evil. It has given us the energy to fuel the greatest economy that has ever been known in the history of man. And I fear that what we will be seeing is the demise of the American economy if we tie cement blocks onto the coal, oil, and natural gas industry. And I fear even the biofuel industry will be negatively impacted, the solar and wind industries I think also will be negatively impacted, because we need to have money in private hands to be able to create these new, wonderful alternative forms of energy that we need to have in the United States. We want to see more nuclear powered plants, zero emissions.

□ 1830

Now, if the President is truly worried about the emissions problem into our atmosphere, why not embrace nuclear power? It produces zero emissions. We should be building nuclear power plants all across this country.

I don't want to take up all the time here, and I would be happy to dialogue with my colleague. Again, I want to thank Mr. SHIMKUS, because Mr. SHIMKUS understands, unfortunately all too well personally in his own district, what the cost has been when government rolls the dice with people's lives and thinks that they have come up with some grand new idea, but that grand new idea, as we have already seen economists forecast, is a loss of at minimum 1 million jobs. How could America accommodate right now 1 million more job losses because of this new tax? I yield back.

Mr. SHIMKUS. I think there is a group that will have jobs in this regime, and it is the Wall Street traders.

Mrs. BACHMANN. That's right.

Mr. SHIMKUS. The cap-and-tax regime, the cap-and-trade regime is predicated on the fact they are going to trade these carbon credits on a trading floor. So we are going to allow folks like Goldman Sachs and Bear Stearns—my colleague from Ohio just left the floor talking about the demise of the economy based upon shady actions. My colleagues on the other side who are on the floor are always throwing bombs at the New York Mercantile Exchange and these traders, the people who trade these instruments on the floor. This is a way for rich people to get richer, when you have a trading floor for carbon.

If my colleagues on the other side were intellectually honest, and I don't think they are being intellectually honest, they would say, let's outright cap, let's tax carbon emissions. Let's put a monetary amount on the carbon emission, and let's make it transparent so the public understands how much they are going to pay to try to mitigate carbon use. But they can't go that route because they can't be intellectually honest in this debate because they know the public will not accept the increase in energy cost and the job losses that are going to incur. So what do they do? They package this cap-and-trade trading floor scheme. And the same people they vilify, the Wall Street traders, are the people they are holding up saying, oh, no, but this system is going to work fine.

So, this carbon tax, I pulled this out, this is the President's "making work pay tax credit." I think we are being generous saying it is \$800. I think it is about \$700. The impact of a cap-and-tax provision as proposed in the budget is \$1,600 per individual. So the net loss to the individual, the household and the family is \$800. We are in the hole. We are not making money on this deal. We are behind.

Who is going to determine where this money goes to? The story I like to tell is that it is like the bank robbers. They rob the bank. They go to the hideout. And they put the loot on the table. And where do the real fights begin? The fights begin as to how they are trying to split the proceeds. What is going on here in Washington now is my friends on the other side are trying to buy off votes to pass this regime promising this largess, which is a tax increase paid for by us, saying, "don't worry, you will get your share." It is just like the bank robbers. And that is why I'm so angry about it.

I yield to my colleague from Minnesota.

Mrs. BACHMANN. I thank you for yielding.

When we are looking at the money and where all of this massive amount of money will be spent, again, the placeholder in the President's budget is \$646 billion. But we are told that is maybe one-third of the true amount of revenue that will be generated. Now just think, that is between \$1.5 and \$2 trillion in new taxation. That is just one new taxation burden on the American people. And the President has already indicated that he may be using that money not to build new nuclear power plants, which would have zero emissions, but to redistribute the wealth, as he is wont to do, with paying for socialized medicine. So we are going to embrace a socialistic view of socialized medicine for the American people which will further be a burden on the American people.

I just wanted to go back on your previous comments on China. There is an

article in today's Washington Times newspaper. Open up the inside of the paper. It said this regarding China, China made the comment that they will not be engaging in a cap-and-trade system. They won't be engaging in reducing their own emissions. Why? Because they said the United States are the consumers of products. Japan is the producers of products. They said, with a straight face, "as the producers of products, we aren't the ones who are truly generating the emissions, it is the consumers." Now they are ignoring the fact that they probably have one of the largest pools of consumers in the world.

They have no intention of paying this tax. And if you would give Al Gore and the people who are embracing the whole global warming narrative, if you would give them every aspect of what they believe, if you presume every premise they believe, and if the United States would implement all of their radical ideas, all of this cap and tax, let's say we did everything, gave it all to them, what would we produce in lowering emissions? By their own numbers, it shows that we would be reducing emissions by the year 2095—which is a long time from now—by less than 1 percent. That is a negligible amount. And we know that China is going to continue to grow as a manufacturer. India will continue to grow. Their emissions will overtake any savings the United States would possibly have.

So we need to recognize the truth of what cap and tax is. Cap and tax, pure and simple, is a big government attempt to reach into Americans' pockets, pull more money out, bring it to Washington, DC, to empower the Federal Government so they can decide to do what they want to do with the American people's money.

I would yield back.

Mr. SHIMKUS. I appreciate that comment. That is really the irony of this whole debate. If all this money was going to go to mitigate carbon emissions or to help us adjust to this change, you may get some people, even though I still don't agree with it, who would say, okay, we know where it is going. But the fact that this money is going to go to grow government just shows you the problem they have with the real debate of what the real reason is that this cap-and-tax regime is being initiated.

I'm happy to be joined by my colleague from Tennessee, Congresswoman BLACKBURN. Thanks for coming down.

Mrs. BLACKBURN. It is so good to be with you. I thank the gentleman for his leadership on this issue. You have just been a stalwart on this.

As we have looked at what it takes to address the energy needs of our Nation and how we should go about that, of course, we all know that one of the things we have to do is look at all of

the above. And we began talking about this last year and spent some time talking about that we needed an all-of-the-above strategy to make certain that we addressed every component that was out there, every possibility that was going to be held. It is an honor to serve on the Energy and Commerce Committee with the gentleman from Illinois. It is also an honor to work with the Select Committee on Energy Independence. We know that this is a direction where we need to move towards energy independence. We know that we need to do this in a thoughtful way. We also know that we need to do this without raising taxes on the American people. Certainly that is possible.

As the gentleman and my colleague from Minnesota were both saying, the taxes that are out there are of tremendous concern to us. I appreciate the poster that the gentleman has where it shows what it is going to cost every family for this cap-and-tax scheme that the Democrat leadership is wanting to put in place. The MIT researchers feel that this tax is going to end up being \$3,100 per family. That is something that is going to far exceed even the \$1,600 that we see there.

It basically is a tax every time you turn on the light switch, every time you plug in the coffee pot and every time you turn on the computer. Every single time you go to use any energy source, you are going to be paying a tax. That means if you freeze your food, you're going to pay more. If you cook your food, you're going to pay more. Everything you use is going to end up costing you more, \$3,128 per family per year. That is not my estimate. It is not Mr. SHIMKUS' estimate. That is the estimate from researchers at MIT as they look at this. And CBO, the Congressional Budget Office, also warns us of the burden that this is going to place on our middle income and our working families here in this country.

Many of my constituents are saying, "what in the world is a cap-and-trade, or what is a cap-and-tax?" And they are asking about how this would go about. And they can't believe that with the greenhouse gasses and the carbon emissions that you would have to go in and buy permits to use this. Indeed, our agricultural community is very concerned about this because what we are hearing from our friends across the aisle is that there would be a tax on every head of cattle. There would be a tax on every pig. What is that going to do? It is going to increase the cost of the food that you eat.

We know that it doesn't stop there, and the taxing doesn't stop there. The gentleman has talked some about coal and clean coal technologies. He has talked about nuclear power and the importance of having that in our strategy of how we solve this problem. What is

the best way to take action? Of course, we know that it is going to be more difficult for our electric power generators to generate the electricity that we are going to need. We know that for anyone that works or deals with hydrocarbons, it is going to drive their costs up. Certainly our trucking and logistics companies are going to see incredible increases in taxes. All of that doesn't get equated and rolled into the \$3,128 per family that this would cost. These are all additional costs that would be seen in the increased cost of commodities that everyone is going to have to pay.

Now, one of the things that I have thought was, it's really quite curious, in all of this discussion, we all know that the best economic stimulus is a job. And you can't go anywhere right now without hearing about the economy. We all are worried about the recession and the length of the recession. We are worried about how we can energize this economy. We know the best economic stimulus is a job. And we know that the stimulus plans and the budget, all these ideas that have come from the Democrat side of the aisle, they tax too much, they borrow too much, and they spend too much. We all recognize this. But jobs growth is one of the things that we have focused on. Certainly with pushing the stimulus, we heard from the administration and the Democrat leadership, well, it was going to create 3 or 4 million new jobs. Well, as we have looked at this cap-and-tax proposal alone, just that portion of it, not looking at any other portion of it, we have seen that there are estimates that have come to us from CBO that the cap and tax could cost us as many as 3 or 4 million jobs. So putting this tax in place in the budget would negate all the jobs that they think they would create by going through the stimulus and the money that they have put out there in the form of spending.

Also, I think that there has been much discussion about green jobs, and would this proposal create new green jobs? There is a good bit of study on this from Heritage Foundation and some others that say, no, such a proposal would actually reduce economic growth, reduce the gross domestic product and reduce employment opportunities. So for those of us who look at this as an issue of how we recover, what are the steps we take for this economy to recover, how do we reduce the tax burden, and then we look at the analysis not from you and me, but from outside entities, we see that this cap-and-tax scheme would be something that would be a jobs killer and a reduction in the gross domestic product of our Nation.

And I yield back to the gentleman from Illinois.

Mr. SHIMKUS. I wonder if my colleague would stay for a minute and

just go into a little dialogue as to in an economic decline, where we are fighting for every job, why would we put an additional burden on our manufacturing sector and the average American citizen in the aspect of raising taxes? Why? It just doesn't seem sensible when you need to get the jobs to get the economy moving again. What do you think is going on?

□ 1845

Mrs. BLACKBURN. Well, my constituents ask this regularly, and I have had an opportunity this week to meet with some of my constituents who are in the auto manufacturing industry and who work in logistics. Their question is always what in the world do people in Washington think they are doing? Are they that removed from what is happening in our communities? Do they not understand how jobs growth takes place?

You've got to have some incentives there for jobs growth to take place. Certainly, it seems there is a disconnect here.

My constituents know you cannot spend your way to recovery, and you cannot build recovery on a foundation of debt. They absolutely understand that. And they are very concerned that in the midst of this recession, which troubles us all, and as you look at the jobs loss that is taking place, the amount of jobs loss that has taken place the first quarter of this year, we know that to increase taxes, you can go back and look time and again at how things have taken place through our history. Certainly you can look at the late seventies. If you want a recent example, look at what transpired in 1977, 1978, 1979 and 1980, I was a young mom at that point in time, 13 percent mortgage on homes, 20 percent inflation. Raising taxes in a recession does not work. We do know that lowering the rate of taxation and spurring economic growth is good for Main Street, it is good for the American people, and it is good for our GDP and for our government and our economy.

Mr. SHIMKUS. I thank my colleague. I think the answer is they have got such a large majority on their side of the aisle that this is the time to pass it. It is a religion now. It doesn't have to be based on facts or the time that is at hand. We can impose an additional burden on business and manufacturing and electricity generation. We can impose an additional burden on the household, but that doesn't matter. But it is going to matter because even in the analysis of the Warner-Lieberman bill, we are talking about thousands of jobs. And that, by the Henry Waxman model, that is a moderate bill. An analysis was done on that bill, and it was summarily dismissed on the floor of the Senate. Why? Because it was a job killer, a job destroyer.

So on this side we are rushing, like we are rushing all legislation, to move

a cap-and-tax bill by Memorial Day which will be even more egregious than the Warner-Lieberman bill which projected thousands of jobs lost. It is a religion that has to have service now versus the needs of our citizens.

You know, here is the tax increase. Here is the mine that was shut down. Here are the coal miners that lost their jobs. You were at the hearing. We had the Ohio Coal Association testify. When I talked about the environmental impact and the loss of these jobs, do you remember how many jobs Ohio lost? They lost 36,000 coal miner jobs in the State of Ohio. That is why some of my colleagues on the other side in the other body voted no.

Fossil fuel, here are some basic facts. When we came on the floor during the energy debate, we said all of the above. In our Commerce hearing, there was a proposal given to one of the panelists, if we allowed the company to shut down the coal-fired power plant and they built a nuclear power plant, would they get some of these credits because they are going from emitting some to emitting none. The answer was no.

We were looking around asking, Isn't that why you are proposing this? Don't you understand that we still need electricity, a 30 percent increase in the next 20 years. I have a teenage son. I have told the story numerous times. At home I go down to the basement, he is watching cable TV, he has his iPod in and he is surfing on the wireless Internet; three times the amount of electricity. That is what America is today.

The demand is going up and we are going to stop the production of electricity, and then people talk about renewables. Let me quote the President, and I use this one quite a bit. This is from his inaugural address. "We will harness the sun and the winds and the soil to fuel our cars and run our factories." No, we won't. There is no possible way.

Mrs. BLACKBURN. If the gentleman would yield, I wish you would read that quote one more time because as we talk about renewables and the renewable standards that are being placed out there that would be so harmful to our electric power generators, I think this is very important.

Mr. SHIMKUS. Before I read it again, the fact that in the renewable fuels debate, there is a debate upon calculation of the use of land which the EPA is going into. So if you are using bio-diesel, soy-diesel, they want to say if you produce soybeans, that encourages the Brazilians to go into the rainforest and so we want to mitigate that loss of the ability to sequester carbon in the rain forest, so we are going to say no to renewable fuels.

But here is from the inaugural address. "We will harness the sun and the winds and the soil to fuel our cars and run our factories." Now I am a big renewable fuels guy. I like ethanol and I

like bio-diesel. I think the thing that really stood out for me is "run our factories."

The stats I use are this. I just ask for one steel mill. I take a steel mill that uses 545 million kilowatts a year. It would require roughly 138 wind turbines on roughly 12,443 acres of land for that total output. However, during peak load at the steel mill, it requires 100,000 kilowatts. For that you would need roughly 825 turbines on 33,000 acres of land to account for peak load. Now that is just one steel plant that may be close to me. Now add to that the second steel mill and add to that the refinery. What we are trying to do in this process is help educate the people. Right now 1.6 percent of our electricity is generated by renewables. So let's double it. That's a good goal. So 3.2 percent of the energy would then be by renewables. You are still going to have 50 percent coal, 20 percent nuclear, 20 percent hydro. It is still going to be part of the electricity generation mix, and a critical part if we want low-cost energy.

Mrs. BLACKBURN. If the gentleman will yield, I hope you will put those figures on the amount of space it would take for the wind turbines and other components to fuel one steel factory. I would imagine your research also shows that one steel factory probably has one power generation area, and it would be interesting to see the amount of acreage required for that. But I would encourage the gentleman to put this on his Website so that constituents of ours who are listening to this debate can pull those down because what we are hearing is as people have moved to growing corn and growing products to make renewable fuels and ethanol and the bio-diesels, but especially the ethanol, we are hearing of food shortages in some areas because corn is not being used for food. And certainly Haiti and some other countries that have food shortages, we have that documented evidence that shows that there is a need to move that production into the food arena and not necessarily into the ethanol area because of the food shortages that are existing in this world today. And certainly also because of the subsidies that are required to make ethanol affordable and to get the amount of energy that is used in producing a gallon of ethanol, to get that down.

Certainly research and innovation will help us with the renewables, but we are not to the point where this can become the primary source of our electricity, or it is going to shut down our manufacturing, our productivity, the movement of our transportation fuels, the use of transportation fuels, the movement of products and commodities around our country, and the ability of people to be able to go from one area of the country to another in a reasonable amount of time.

It is something that is of tremendous concern to us because as I said earlier, the best economic stimulus is a job. And all of the outside research and the data we have been able to compile shows that this is not going to create jobs, it is going to cost us, and there is going to be a negative impact on our GDP.

I yield back to the gentleman.

Mr. SHIMKUS. I thank my colleague from Tennessee for joining me. Many States have power companies. I am fortunate to have some that aren't for profit. They are rural electric coops, like the Illinois Municipal Electrical Association. So their ratepayers are their constituents, so the elected officials are running this electricity generating and operation and distribution system for the people who vote for them.

They have made themselves pretty clear that this cap-and-tax regime will create a huge tax burden on the people who vote for them.

I have some stats that were sent to me. The Illinois Municipal Electric Association revenue requirements, without allowances in 2015 are approximately \$320 million, or \$60 per megawatt. The cost with allowances at \$20 per ton is \$510 million.

This is additional cost incurred to the utility that has not been planned for. When you have an additional cost and you are providing a service or a good, business, whether it is profitable, for profit or not for profit, will cost will pass that cost on to the consumer. That's where we make this claim that a cap-and-tax regime will raise taxes on the individual and it will cost jobs.

One of my colleagues talked about this article in the paper today, "China: Importers Need to Share Blame for Emissions," and it basically says that global warming would not require China to reduce emissions caused by goods manufactured there to meet demand elsewhere. The basic premise is that it is the people who are purchasing the goods who will pay for any burden increase.

Another story, "University of Wisconsin-Milwaukee Study Could Realign Climate Change Theory," and I want to quote one paragraph.

"In climate, when this happens, the climate state changes. You go from a cooling regime to a warming regime or a warming regime to a cooling regime. This way we were able to explain all of the fluctuations in the global temperature trend in the past century," Tsonis said. "The research team that sound the warming trend of the past 30 years has stopped and in fact global temperatures have leveled off since 2001." The most recent climate shift probably occurred at about the year 2000."

That is why the climate-change activists and those who promote the carbon tax regime, that is why they are so befuddled and they want to move this

quickly because what has happened to the temperatures over the last 7 years? Has it gone up? No, it hasn't. The average temperature has gone down, and since it has gone down, it has got them very frustrated on how they are going to sell this cap-and-tax regime to the public.

□ 1900

Madam Speaker, I would like to submit for the RECORD these two articles for submission with this Special Order.

Madam Speaker, in the fall of last year, we really made a concerted effort to talk about the energy needs of this country, and we brought to the floor the basic debate that we wanted a more-of-the-above strategy. We wanted to incentivize coal, we wanted to incentivize nuclear power, we wanted to incentivize wind and solar, renewables, and we wanted them to compete for the public's demand based upon cost so that you would create jobs.

I brought this chart to the floor numerous times over the last Congress to point out the fallacy of not having an all-of-the-above strategy. And why I bring this up now is that this cap-and-tax regime will not help this all-of-the-above strategy, will not broaden the portfolio of fuels that we are able to use and compete for. It will restrict them to a point where we are going to price ourselves out of the ability to use fuels.

This chart is pretty clear; it just shows jobs being created in a—I wish it was a coal mine that is about 3,000 feet under the ground in southern Illinois, but it is an open mine probably in the Wyoming basin in Montana or Wyoming. And you see people working, recovering the coal. Recoverable coal.

Then you take that mine and you move it to a coal-to-liquid refinery. The jobs to build this refinery would be good-paying, building trade jobs. We have an expansion of an oil refinery in my district. Right now, in this economic decline, 1,000 jobs are being created to expand this refinery. That's the type of jobs you could have by building a coal-to-liquid refinery.

Then, wherever this refinery is located, you then develop a pipeline. I saw a natural gas pipeline being laid from my district last fall. It takes a lot of skilled labor, a lot of time, and a lot of patience to move a pipeline. And that is good-paying American jobs.

Then, in this case, the coal-to-liquid debate is a national security issue. We have in the United States an Air Force base where coal-to-liquid has been tested to be used in Air Force planes. This is what the Department of Defense wants for national security purposes to not be held captive to imported crude oil. This proposal, and proposals like this, are dead on arrival here in Washington. Why are they dead on arrival? They are dead on arrival because of this carbon tax provision, this carbon tax regime.

Again, I want to be clear; if my colleagues on the other side want to be intellectually honest, let's just tax it, know how much we're going to receive, and watch the pure transparency of the money going from the payees to the government, who is going to pay up. It is not the best solution, but it is better than setting up a trading floor, like so many that have been demagogued on this floor, of the rich getting richer by working the trading floor markets—the Bear Stearns of the world, the Goldman Sachs of the world, the NYMEXs of the world. And hopefully this will not get passed and signed into law, but I know that if it will, my friends will be down here arguing and complaining about the people who are manipulating that market. And that manipulation is going to cause costs to increase. And there is going to be a lot of wealthy people making a lot of money on a carbon tax regime, and it is going to cost many thousands of people their jobs.

In a slow economy, when you are trying to encourage job creation, job development, the best way to be competitive is to have low-cost energy. When only 1.6 percent of your electricity in this country is generated by renewables, you have to understand that you are not going to get to 90 percent of your electricity being generated by renewables. If we are good, we may get to 3.2. If we are extremely good, we may get to five.

So that begs the question of where the other electricity is being generated. If we want low-cost power, it has to be with the use of recoverable coal in our Midwest States and our northwestern mountainous States that have, arguably—this country has, arguably, 240 years of recoverable coal. That is coal that we can recover and use for practice. Now, we have a lot more, but that is the amount that we know that we can recover and still make money on it because their coal seams are big enough, you can engineer it and the like.

Madam Speaker, I appreciate this opportunity. I have been talking about energy for many years now on the floor. In the Energy and Commerce Committee, we have had numerous hearings on climate change and how to address this.

You will hear the terminology of cap-and-trade. Remember that the trading floor, which people will buy credits, those purchases of credits will raise the costs of people who use energy—whether they are truck drivers, whether they are people who manufacture goods and services and use a lot of electricity, you name it, you buy it, there is going to be an added cost to that good or that service based upon climate change. That money will then go to the table to be split up by legislation that we pass here.

I would just hope that, first of all, we don't do that; but if we do, that that

money goes to mitigate the loss of jobs or the increased cost to the individual consumer, not to grow government, not to create new policies. That money has to go to transform this Nation. I fear it will not. I fear it will not do the job.

My friend from Iowa is here. I only have a couple minutes. If he would like to join me, I would be happy to hear any comments he wants to add.

Mr. KING of Iowa. I thank the gentleman from Illinois. I appreciate the recognition.

I wanted to come down here and thank JOHN SHIMKUS for leading on energy all summer long with an intense effort, and for standing up for the fuel that means so much to the parts of this country, this massive supply of coal that we have, as a big piece of the entire picture of energy that we need to do.

What happens if they put this cap-and-tax on us? We are going to need more and more articulate voices to defend our values and to defend our economy. And the very idea that we can put a tax on energy is a tax on every consumer, it is a tax on our economy, it shrinks the American economy, and it lets the rest of the world out-compete us. And I just appreciate a minute to say so. I thank you. And congratulations to the gentleman from Illinois. I yield back.

Mr. SHIMKUS. I thank my colleague. And I think even my colleagues on the other side will understand the kind of sincerity I bring to this debate. Because in 1992, I was at a rally to save these coal miner jobs. It was at the Christian County Fairgrounds. This mine was closed because of the Clean Air Act Amendments of 1990. They shipped in western coal to meet the standards, and 1,200 miners lost their job.

There was a rally that brought in a lot of politicians who said they were there to fight to save these jobs. One of them whom was there voted for the Clean Air Act that destroyed these jobs. I think that's a little hypocritical. If you pass legislation that is going to destroy these jobs, don't come crying and saying, shame on that company for closing that mine down.

My job, through this whole cap-and-tax debate, is to make sure that, when all is said and done, this body, my constituents, will know that I did everything possible to save the remaining coal mining jobs in southern Illinois and I did everything possible to make sure that coal-fired electricity generation is still part of our portfolio because it is a low-cost fuel, and it will help us in our competitive nature in this country.

And so I want to walk away from this debate—hopefully I'll win, but I want to walk away from this debate saying, it is for these folks that I came down to fight. I know my colleagues on the other side, those who even disagree

with the basic premise I think will appreciate the emotion and the fervor that I am going to bring to this.

[From the Indianapolis Star, Mar. 16, 2009]
CHINA: IMPORTERS NEED TO SHARE BLAME FOR EMISSIONS

(By Dina Cappiello)

WASHINGTON (AP).—Countries buying Chinese goods should be held responsible for the heat-trapping gases released during manufacturing in China, one of its top officials said Monday.

The argument could place an even greater burden on the U.S. for reducing pollution blamed for global warming.

Li Gao, China's chief climate negotiator, said that any fair international agreement to curb the gases blamed for global warming would not require China to reduce emissions caused by goods manufactured there to meet demand elsewhere.

China has surpassed the U.S. as the world's largest emitter of greenhouse gases. But 15 to 25 percent of its emissions are generated by manufacturing goods for export, Li said.

"As one of the developing countries, we are at the low end of the production line for the global economy. We produce products and these products are consumed by other countries. . . . This share of emissions should be taken by the consumers, but not the producers," Li said during a briefing at the Capitol's visitor center.

Li directs the climate changes department at the National Development and Reform Commission and was in Washington, along with negotiators from other countries, to meet with Obama administration officials. President Barack Obama has indicated a willingness to enter into a global agreement to reduce greenhouse gases.

But China's stance could be one of the stumbling blocks facing the U.S., China's largest trading partner, when negotiations to broker a new international treaty begin in Copenhagen in December. Li said China was not alone in thinking that emissions generated by the production of exports should be dealt with by importing countries.

Li also criticized proposals by the U.S. to place carbon tariffs on goods imported from countries that do not limit the gases blamed for global warming. Lawmakers on Capitol Hill are considering it as they draft legislation to control global warming pollution to ensure that U.S. goods can compete with cheaper imports from countries without regulation.

"If developed countries set a barrier in the name of climate change for trade, I think it is a disaster," Li said.

Neither China nor the U.S. ratified the last agreement, the Kyoto Protocol, which expires in 2012.

China has long insisted that developed nations bear the main responsibility for cutting emissions. As president, George W. Bush refused to sign the Kyoto Protocol because he said developing nations like India and China should not be exempt.

Negotiators from other governments at the Monday briefing, including the European Union and Japan, said that they would not support China's proposal to unload a portion of its greenhouse gas emissions on importers.

"I think the issue here is we take full responsibility and we . . . regulate all the emissions that come from our territory," said Artur Runge-Metzger, who heads the climate change strategy and international negotiations unit at the European Commission. Runge-Metzger said that if China's approach were adopted, it would require allowing

other countries to have jurisdiction and legislative powers to control emissions outside their borders.

Li was joined by Vice Chairman Xie Zhenhua of the National Development and Reform Commission in his visit to Washington.

Xie met with U.S. climate envoy Todd Stern at the State Department on Monday. The talks in Copenhagen were among the topics discussed, said State Department spokesman Robert Wood.

"There's a willingness, particularly on the Chinese side, to really engage on the subject of climate change, and we welcome that," Wood said.

UW—MILWAUKEE STUDY COULD REALIGN CLIMATE CHANGE THEORY—SCIENTISTS CLAIM EARTH IS UNDERGOING NATURAL CLIMATE SHIFT

MILWAUKEE.—The bitter cold and record snowfalls from two wicked winters are causing people to ask if the global climate is truly changing.

The climate is known to be variable and, in recent years, more scientific thought and research has been focused on the global temperature and how humanity might be influencing it.

However, a new study by the University of Wisconsin-Milwaukee could turn the climate change world upside down.

Scientists at the university used a math application known as synchronized chaos and applied it to climate data taken over the past 100 years.

"Imagine that you have four synchronized swimmers and they are not holding hands and they do their program and everything is fine; now, if they begin to hold hands and hold hands tightly, most likely a slight error will destroy the synchronization. Well, we applied the same analogy to climate," researcher Dr. Anastasios Tsonis said.

Scientists said that the air and ocean systems of the earth are now showing signs of synchronizing with each other.

Eventually, the systems begin to couple and the synchronous state is destroyed, leading to a climate shift.

"In climate, when this happens, the climate state changes. You go from a cooling regime to a warming regime or a warming regime to a cooling regime. This way we were able to explain all the fluctuations in the global temperature trend in the past century," Tsonis said. "The research team has found the warming trend of the past 30 years has stopped and in fact global temperatures have leveled off since 2001."

The most recent climate shift probably occurred at about the year 2000.

Now the question is how has warming slowed and how much influence does human activity have?

"But if we don't understand what is natural, I don't think we can say much about what the humans are doing. So our interest is to understand—first the natural variability of climate—and then take it from there. So we were very excited when we realized a lot of changes in the past century from warmer to cooler and then back to warmer were all natural," Tsonis said.

Tsonis said he thinks the current trend of steady or even cooling earth temps may last a couple of decades or until the next climate shift occurs.

ALTERNATIVE ENERGY

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from Oregon (Mr. BLUMENAUER) is recognized for 60 minutes.

Mr. BLUMENAUER. Madam Speaker, I enjoyed listening to my colleague from Illinois. In fact, this is the second time today I have heard him speak on the floor and I have seen him point to the picture of the coal miners and talk about the problems of the Clean Air Act. And I hope every American was listening to that because that is exactly what we are talking about today.

We had, for decades, people burning dirty coal, turning rivers and lakes in other parts of the country, acid rain, destroying forests, posing problems to people's health. And what this Congress did, in a bipartisan effort, was create a mechanism to make it so that it was no longer free to pollute the air with dirty coal that created acid rain and destroyed lakes and forests.

My friend didn't want to talk about the problems to health, didn't want to talk about the issues that relate to the damage to the environment, or the fact that we were able to create the most effective market system in history that was able to solve a real problem to the environment, to health. Life went on. Yes, there were some changes in terms of the economy. There were some people who didn't—when it became too expensive for them to foul the air, spoil our lakes, and destroy our forests, then they shifted. Well, I would suggest, Madam Speaker, that any independent observer would suggest that that was a solid program and a good tradeoff.

I don't hear my friend from Illinois coming to the floor and saying, repeal the Clean Air Act so we can have a few more miners at work creating dirty coal that is going to ruin our environment and destroy health. That issue is over.

We are facing a very real challenge today about what we are going to do to protect the future of the planet. I will get into, in a moment, talking about some of the discussion that we have heard from our friends on the other side of the aisle, but one of the things that is very, very important to note is that they have no answer in terms of what we do to the slow cooking of the planet. They ignore the costs that are being incurred right this minute. Temperatures in Alaska have already gone up several degrees, permafrost is no longer permanent, roads are buckling, coastal villages washed away. These are costs and consequences that we are already seeing as the ocean levels slowly, imperceptibly to most of us, but very clear to scientists when they see the fabled Inland Passage in the Arctic Ocean free of ice, when we watch the habitat shrink for arctic animals, when we watch diseases shifting from vector

control—West Nile disease, for instance, popping up in places where it shouldn't be, where invasive species are infesting our forests. These are costs and consequences that we are seeing now that my friends on the other side of the aisle refuse to come to grips with.

But we are not going to be able to have the same head-in-the-sand attitude that we saw from the Bush administration alone—of all the major governments in the world, alone—denying the imperative of global warming, withdrawing from opportunities to be collaborative on a national scale.

□ 1915

What we had to have in the last 8 years, where the other side of the aisle simply accepted that sort of behavior from their administration and, in fact, aided and abetted and supported it, we had over 900 cities across the country come forward and say wait a minute, we're not going to wait for the Bush administration and the Federal Government. We are going to take it upon ourselves to deal with climate change and global warming and move to change our local economy, to prepare it for the future, and to help slow this damage to the environment by carbon pollution.

I come from a community in Portland, Oregon, where we have actually reduced greenhouse gas emissions for 4 years in a row. We're very close to being Kyoto compliant. It gave us an opportunity, frankly, to create new green jobs. We were competing with Houston and Denver for being the wind energy capital of the United States because we've been serious about energy conservation, transportation choices, land use, all of the things that are going to be part of a comprehensive solution to the threat of these changes to the climate and the carbon pollution. We've actually been able to make some progress and be positioned to deal with a carbon-constrained economy.

We need, Madam Speaker, for people to reflect on what is happening now. Just like my friend from Illinois didn't talk about the cost of acid rain. It didn't matter to him. He was concerned about a few miners in his district and didn't care about the damage to forests and human health and lakes and fishing. But we are already seeing the damage that is occurring as a result of climate change.

Speaking of acid rain, one of the things we are seeing is that the ocean is slowly becoming more and more acidic. This increased acidic content of the ocean is having a consequence in terms of damaging coral reefs. I mean these are the rain forests of the ocean. This is where billions and billions of different animals and plants reside up the food chain throughout the ecological system of the ocean that makes a difference in terms of how people on

this planet are going to be fed. We are watching what has happened. There may be consequences in terms of the Earth's climate because of the change in the ocean's current and acidic level.

We are seeing across the country increases in extreme weather events, exactly what the scientists told us would happen. Yes, the world's atmosphere is increasing in temperature. Yes, we're seeing an increase in the sea level that could be 2 to 6 feet by the end of the next century. But we are already seeing vast stretches of this country in the flame zone being subjected to increased forest fires, to drought. In your areas in the Southeast, you have seen drought where it has not been a problem for years. In the Southwest, Lake Mead that supplies the city of Las Vegas is going down, causing massive disruption. We are watching changes that are taking place in terms of snowpack. My good friend and colleague from the Pacific Northwest, Mr. INSLEE, and I depend on snowpack for water supply and energy production. This makes a great deal of difference.

Madam Speaker, one of the concerns I have as I am listening to our friends on the other side of the aisle make things up about what is going to happen with a proposal to reduce carbon pollution and put a price on it, they assume somehow that this is going to result in money disappearing, that somehow this is just a tax that goes into the great government maw and there is nothing that comes out the other end. Well, as a practical matter, and I'm confident that in the course of this hour as I work with my friend Mr. INSLEE, who I see poised here in the front of the Chamber and I am hoping that he's willing to enter into this conversation with me because he knows a great deal about it, we hope that we will be able to encourage, if not our Republican friends, at least the American people to look at the President's budget. Look at what he has proposed to begin a comprehensive approach to transform our energy supply and slow global warming.

Yes, he recommends putting a price on carbon pollution, but he also recommends that this money would be generated by having the carbon polluters pay for the privilege, just like we did with acid rain so successfully that my friend from Illinois now is against. There are opportunities to be able to put this back into place because the program, and I'm just quoting from the President's budget, would be implemented through a cap and trade, like we did with acid rain, that will ensure that the biggest polluters don't enjoy a windfall. The program will fund vital investments in a clean energy future, which I think my friend Mr. INSLEE may have some thoughts about, \$150 billion over the course of the next 10 years. The balance of the auction revenues are to be returned to the people,

especially vulnerable families, communities, and business, to help the transition to the clean energy economy.

You know, there's a great NRDC blog that talks about Newt Gingrich's assertion that climate change will result in a \$1,300 tax per household. And they point out it's simply voodoo economics.

First of all, he ignores the value of the carbon market. It just disappears. He assumes that the money doesn't get returned to the taxpayers. Well, based on what New Gingrich and the Republicans did with their bridges to nowhere, with their profligate spending in Iraq, with their driving up the budget deficits and giving benefits to a few taxpayers at the expense of the many, I can understand the skepticism. He assumes that it won't be invested in energy conservation, saving us money. He assumes that communities aren't being helped. He assumes that it's not going to address regional differences in the cost of cutting global warming. He just assumes that somehow it's locked up someplace in a vault. Well, that's wrong. The President has outlined an approach that captures the value and makes America stronger, more energy reliant, and allows families the tools to reduce their escalating energy costs.

And I will conclude on this point and then yield to my colleague from Washington State if he's interested in joining in. But I want to say that we are facing now the consequences of an energy policy that was designed looking in a rear-view mirror for failed fossil fuels, lack of energy conservation, and not dealing with the technologies of the future. And as a result, energy bills are going up. As a result, we saw \$4.11 a gallon gasoline last summer. We saw \$700 billion leave this country to petroleum potentates when there's a different vision of the President and of those of us who want to do something not just about global warming but to retool and revitalize our green economy.

And with that I would like to yield to my colleague Mr. INSLEE, who's an author in this arena, a noted spokesperson who has been working for years in Congress before, as they say, it was fashionable, to talk about how our economy and our environment could look different.

Congressman INSLEE, welcome.

Mr. INSLEE. I appreciate, Mr. BLUMENAUER, coming forth to talk about this issue because we're about to really make a pretty big decision here, whether we're going to just continue doing nothing about our energy problems, this sort of inaction model. Some of my colleagues on the other side of the aisle basically are saying everything is hunky-dory and we should do nothing about the energy challenges we have. Or should we take a real step forward to try to move to transform our economy, to build millions of green

collar jobs, to wean ourselves off of Middle Eastern oil and at the same time reduce the amount of global warming that is occurring?

We think we need to move. We think we need action. We don't think the current state of the economy is good enough for America. We think America is better than this for ways I'd like to talk about a little bit. And I don't think it's good enough to adopt this sort of approach some of my colleagues earlier were talking about to just say it's okay to be addicted to Middle Eastern oil, it's okay to allow the jobs of building electric cars to go to China.

It's not okay to let the jobs building wind turbines to go to Denmark. It's not okay to let the job of building solar cells go to China. We don't think that's okay. We want an American response to build those products here, to build those green collar jobs here.

Now, I meet with a lot of groups about energy. I was very heartened last weekend. I went to the Boston area to go to the Massachusetts Institute of Technology, the MIT Conference on Energy, and there's a group up at MIT of students, mostly post-graduate science and engineering students, and they have an energy club, and and once a year they have a meeting about energy. So I went up there to address their group. There were about 150, 200 students, and about 300 entrepreneurs and business people. And I was so excited to listen to what they saw as a vision for this country.

And for those who think we can just stay in the status quo, I wish they could meet these MIT students. These folks were telling me about the jobs we can create in the solar industry with concentrated solar energy power, like the Ausra Company that just built the first manufacturing plant for concentrated solar cell energy in Nevada. Just 2 months ago they opened up this plant. And these MIT students are chomping at the bit to start working in that technology. We were talking about the AltaRock Company, a company that's now exploring engineered geothermal up in the State of Washington. These MIT students just can't wait to start going out and start businesses around technology like that. We talked about the Sapphire Energy Company, a company that now is building production facilities to use algae to make biofuels. We talked about the A123 Company in Boston, which makes lithium-ion batteries so we can power our plug-in electric hybrid cars.

And what these MIT students told me is, Mr. Congressman, you build a structure to drive investment into these new technologies, and we will build the companies of the future and the jobs of the future to deliver a clean energy transformed economy for the United States.

And for anybody who is a pessimist about our ability to wean ourselves off

of fossil fuel and wean ourselves off of Saudi Arabian oil, you ought to go out and meet these MIT students.

□ 1930

But the businessmen there told us something, and this is the important point, I think. What the business people, these were venture capitalists, these were CEOs of major corporations, what they told us is that future will not come to pass, the green-collar jobs we are talking about, unless we adopt some rules of the road for a market-based economy that will not give such an advantage to fossil fuels but, in fact, will level the playing field.

And what they told me is that basically there is a couple of things we can do. One thing we can do is to essentially level the playing field between these new technologies and some of the older companies that have been subsidized for so long, like the oil and gas industry.

Now, basically, we can do that through a system that will drive investment towards these new jobs of the future. And, by the way, those new jobs of the future may include what we call sequestered coal. Some of my colleagues were here earlier talking a lot about coal. The folks up at MIT were telling me that we may be able to find a technology to sequester carbon dioxide when you gasify coal. It may be a possibility.

So we need some research dollars to make that come to pass. Well, we have a way of doing that, and President Obama has proposed a way of generating funds that can be used to essentially develop that technology, and he has proposed what's called a cap-and-trade or a cap-and-invest system which is, basically, it's pretty simple. We would establish a cap, a limit on the amount of pollution that polluting industries are allowed to put into the air.

We have done this to great success in acid rain, sulfur dioxide, which is the pollution that causes acid rain. Congress several years ago passed a cap, a limit on the amount of that acid rain pollution that we put into the atmosphere.

Now, President Obama has proposed doing the same for the pollutant that causes global warming, principally carbon dioxide. And then we would simply have the polluting industries buy, at auction, the permits to do that, and use the market system to establish a price for that.

Now, here's the important part about this approach. Number 1, it does, it takes action. It recognizes that the status quo is not good enough. And we are here tonight to say that America needs a better energy policy than the one we have right now. So, number one, it takes action.

Number two, when you do this, what the business people have told me all across this country, when you do this,

it starts to drive investment into these new technologies that can create the green-collar jobs that we need so much in wind power, in solar power, in enhanced geothermal power, in electric cars and potentially in sequestered coal to use coal in that way. But to do that you have to put a price on carbon dioxide, and you have to limit the amount of this pollution that's going into the atmosphere. So we are here to say that we are capable of building a new transformed economy.

I want to make one other comment if I can, people have said that when you make an investment like this it costs some money. Well, any investment costs some money, when you buy a house, it costs some money. When you build an electric car, it costs you some money. But the people who want us to just stay in the status quo don't understand that the door of inaction is going to cost us a heck of a lot more money.

Go ask the people up in Alaska whose homes tonight are washing into the Arctic Ocean because the permafrost is melting, these are Americans. There is a town in America that is going to have to be moved at the cost of about \$30 million because it's basically melting into the Arctic Ocean because the tundra is melting underneath them. That's costing Americans a lot of money tonight. We need to figure that into the proposition.

Go ask the farmers in California, who are losing their farms tonight because we have this horrendous drought, an unprecedented drought in the western United States, who are losing their farms and their livelihoods. Ask them if there is a cost associated with global warming.

Ask the folks who are losing salmon, the salmon fishermen on the west coast—I am from Washington, Mr. BLUMENAUER is from Oregon—ask them the cost of inaction of losing their livelihood because we lost salmon runs because there wasn't enough water in the rivers last year to have a salmon harvest.

Americans are getting costs tonight that we cannot ignore, and we know those costs are going to be greater than any investments that we make. By the way, those investments that we make under our plan, here is what is going to happen, and this is President Obama's plan. Polluting industries are going to do what they should do, which is to have to pay some cost to put pollution into the atmosphere.

You know, when you and I go to the dump, we pay \$25 to dump our junk in the garbage dump. We can't just dump it for free. And under our plan polluting industries will pay some cost associated with putting pollution into the atmosphere, as determined by the market. They will bid against each other, and the highest bidder will get the permit.

So they will get to finally recognize the atmosphere as not a personal

dumping ground for a coal-fired plant but, in fact, something we share that has a market value. So they will put money into the pot to buy those permits.

That money will then go back to the American people in a variety of ways. First it will go back to the American people in making an investment for America in common to build these new industries to do the research and development it takes so these jobs will be here, not China. It will go back to the American people as an investment to build research facilities to build lithium ion batteries here in this country rather than China and Korea, that's number 1.

Number two, it will go back to the American people in a substantial tax cut, probably the largest tax cut America has seen for the middle class, to make permanent some of these tax cuts. It's going to go right back to the American people.

Third, it will go back in a way, and there are several ways we can do this, to help some of the communities that might be disadvantaged, potentially, by job loss and energy-intensive industries around steel mills and the like. The point is it will go back to the American people, and it go in a way that will reduce the cost for Americans, not increase it.

Now, if you think I am just making this stuff up, people can go check an authoritative view, an assessment of the cost of this, and it basically concluded as this has net positive costs. I mean, it doesn't have costs relative to what's going to happen to our economy if we do not act, and that's from an assessment done on the GNP that predicted we would have a 5 percent reduction.

Lloyd Stern, a very well respected economist from England, he and his team did this assessment. They concluded we will have net negative costs relative to this inaction.

So we are here to say we have a vision based on confidence that Americans still have the right stuff, that people who put a man on the Moon still have the right stuff. And if we go out and make these investments, we are going to put Americans to work building these green-collar jobs right in this country. If we don't, we are going to lose jobs.

Mr. BLUMENAUER. I very much appreciate the perspective you bring to this discussion, and I very much appreciate you referencing the Stern report. This is an opportunity, we both serve on the Speaker's Select Committee for Energy Independence and Global Warming, having a chance to deal with the British Parliament hearing and Sir Nicholas Stern lay out the result of his research.

And by a 5-1 margin, the cost, the risks, the costs that we are looking at were far greater than any cost of im-

plementation, and as you have outlined in great detail, there are many opportunities, if we do this right, to revitalize our economy, to reduce costs right now to American families.

Just four categories of climate damage alone, hurricanes, higher energy bills, property lost to rising sea level and water-supply impacts are predicted to cost the average family \$2,000 a year by 2025; by 2050, that increases another 50 percent to \$3,000 a year; and by the end of the next century, \$11,000 per family, just for those elements.

Now, those estimates ignore, because they are a little hard to quantify, but as you pointed out, they are real. The added cost of drought, flood, wildfires, the mud slides that follow, agricultural damage and the value of lost life. We saw thousands of people lose their lives a few years ago in Europe, in France. We saw hundreds of people die in the Midwest.

These are real problems that our friends on the other side have no answers for. They are, instead, paying—I am stunned that they would come to the floor and argue against.

Mr. INSLEE. I just had a thought, as you were talking. I have seen this movie before of those who didn't want to take action, and I am trying to remember where I saw it before and I just flashed on where it was. It was in Katrina, because if you think about some of my colleagues who don't want to take action to protect against natural disaster, it's kind of like the response of the administration to Hurricane Katrina in New Orleans where they did not make a response to a natural disaster.

And we are now experiencing a natural disaster of enormous implications and costs. What I think this is like is if we had come forward the day before Katrina with meteorological evidence that this hurricane is coming, and we went to President Bush and we said, if we make this investment, we can build these levees real fast and protect this city from this known damage that's coming our way.

You know what our friends across the aisle would have said? Costs too much money. It's just another socialist experiment. And that's pretty much what the administration's attitude was in Katrina even when that was happening.

Now, we have a slow-motion disaster which is a lot worse than Katrina. But their philosophy is the same, which is to not spend a dollar for investment against a known risk. And so I just want to suggest it's a similar situation.

Mr. BLUMENAUER. Well, I appreciate your clarification and amplification. It is stunning to hear my friend on the other side of the aisle think that the Clean Air Act failed, and because a few people admittedly lost their jobs mining dirty coal, that somehow it wasn't worth stopping the

damage to lakes and forests and human health. We put a price on a pollutant, as you pointed out, sulfur dioxide.

People paid and pretty soon we had reversed the damage and we were cleaning it up. There are costs now that the American public is paying. There are greater, future costs that we can avoid, an opportunity to strengthen America and strengthen our economy.

I see we have been joined by our colleague from Colorado, Congressman POLIS, if you would wish to enter into this dialogue, I know you have been an avid supporter of a strong environment. You come from a community that cares deeply about this, and we would welcome your thoughts and observations if you would care to join us.

Mr. POLIS. Here in Congress, and as a new Member going through the budget process and looking at a lot of these issues for the first time, I am really struck by the fact that as we discuss numbers on the cost side, we are not accounting for the cost of not taking action which, in many cases, particularly with regard to reducing our carbon emissions, are far greater than a lot of the costs that we are looking at with regard to the actions we need to take.

So a more comprehensive and an integral approach to kind of how we look at costs is absolutely critical here.

You mentioned as well, the Clean Air and Clean Water Act. There are ways, economic ways to put a value, a beyond the moral value of preserving our rivers and preserving our trees. There is a very legitimate moral value, whether you derived that from a faith-based position or another position, there are actual economic costs of our value of our natural heritage and our natural assets. When minerals or oil and gas are extracted, they are extracted once, they are gone.

We are losing a national asset. It's not a renewable energy source. And these are not looked at in terms of coming from the financial calculations with regard to the programs that we are proposing.

So I think it would be some benefit in trying to apply some more integral accounting and economic modeling and budgetary techniques to looking at the real cost of doing nothing and, in fact, the real savings from taking action. When you are taking action to preserve our rivers and streams and forest, for instance, you might look at the direct economic cost of that to businesses, but you also have to look at the natural capital that is preserved, that is a true form of capital wealth for our great country that deserves every bit as much consideration as the direct dollars and cents associated with implementation of these policies.

Mr. BLUMENAUER. I very much appreciate your observations. We have been joined by my colleague from New

York, Congressman TONKO from Albany who, in a prior life, as I recall, was CEO of the New York State Energy and Research Development Authority. You have got some practical applications, both in your private sector experience and your work for years in the New York State Assembly. We will welcome thoughts and observations that you would have to add to the conversation.

□ 1945

Mr. TONKO. Thank you, Congressman. I think it's absolutely important that we move forward with progressive policy in the energy area. I chaired the Energy Committee in the New York State Assembly for 15 years. And, you're right, went on to serve as president and CEO at NYSEERDA, where we focused on renewables, efficiency, research and development. The investment that we saw was tremendously powerful to the economy and where we worked on several projects that really promoted efficiency and conservation measures.

What I think is important to note here is that this President, this administration, has shared a vision with a laser-sharp focus and shared with a very direct boldness about the opportunity we have now as a Nation.

We have witnessed the last several years of conflicts in the Middle East, and so many believe that was over the commodity of oil. We know that that fossil-based dependency pollutes the environment and that we have an opportunity here to not only address our future and job creation, but our environment and greening up the outcomes, leaving not only this generation, but certainly those to follow much cleaner air to breathe and a stronger sense of environment-friendly policy.

Where I think the significance comes here is that we can grow our energy independence. We can strengthen that outcome by reducing what is a glutinous dependency on fossil-based fuels, oftentimes imported and from some of the most troubled spots in the world that have unstable governments. And it's why we were drawn into a conflict, I think, because of our dependency on that area for our energy commodities.

While we can reduce that dependence on fossil-based fuels, we can strengthen our energy security, which is a good thing. It's a great bit of policy initiative that we should have pull us along this roadway of progressive politics as it relates to energy generation and energy usage.

We also, when we reduce that dependency and grow the energy security, we grow and strengthen our national security, which is an important factor in the international concepts. We are able to move forward in a way that I think promotes a much more stable national security outcome for our Nation and generations, again, to follow.

So, as we do this, I believe the investments we can make now by the policies that will build an investment in renewables, in shelf-ready opportunities to grow energy efficient outcomes, to retrofit our businesses, to retrofit our farms. We did projects through NYSEERDA that spoke favorably, overwhelmingly favorably, to dairy farmers, who are dealing with perishable products, who are dealing with perishable produce, that were dealing with a very important bit of nature. They couldn't avoid at times the peak periods where they could perhaps avoid priciest power. They needed to have some sort of addressing of those situations.

What we were able to do is retrofit those dairy farms and allow for them to reduce their energy costs, which allows for them to feed this Nation in a more effective way.

So, also, as we create these opportunities through investment and research and development, we are growing significant jobs, tremendous jobs that will call upon the engineer out there, the inventor, the innovator, and we know that there's a great career ladder we can build there.

We are investing in the trades because the trading out and the retrofit of these systems, they will maintain, operate, and repair these situations so that, again, job creation galore here that can really allow us to breathe freer in terms of creating the energy that we need and how we use that energy.

What I also would make mention of is that R&D, research and development, should be seen as economic development. I believe that by investing in that sort of future, by creating the funds that will allow for a blueprint for our energy future, that allows us to take that intellectual capacity as a Nation, to take our brain power as Americans, and put it to work so that we can deploy these success stories into the commercial sector, where we can do cutting edge, where we already have ready opportunities, they need to be inserted into the outcomes here in the States, and we also can move forward with many, many new opportunities in this energy-driven, innovative economy that is so boldly expressed by this President and certainly by Speaker PELOSI and the leadership of this House.

So I see a great opportunity here for this Nation to respond favorably to the energy needs of this country, to do it much more independent of reliance on some of the most troubled spots in the world, and doing it in a way that creates significant career ladders for people across the strata of job opportunities, from trades on up to those who hold bachelor's and master's and doctorate degrees that can assist this Nation.

Mr. BLUMENAUER. We deeply appreciate your adding a voice of experience as somebody who dealt not just with the policy but the practice to demonstrate how this money somehow doesn't disappear, but is reinvested, creates wealth, creates economic opportunities for a wide variety of people.

Mr. TONKO. Certainly. As we struggle through these very difficult economic times, job creation, job retention is at the forefront of the work we do. We all talk about it every day. This is a good way that not only grows jobs but grows that energy independence and strengthens the energy outcome, and it does it in an environmentally friendly way.

So it's a powerful statement that we can make here as legislators.

Mr. BLUMENAUER. I appreciate that very much.

Mr. INSLEE.

Mr. INSLEE. Thank you. I want to continue this discussion of job creation. I want to address—some of our colleagues may be watching tonight, possibly—a couple of industries that are concerned about this. One is the coal industry and one is the auto industry, two great industries doing hard work for a long time. And I want to address how our proposals tonight I believe long term will help those people working in those industries. Not hurt them, but help them, which we want to do. These are great, hardworking people.

I want to address the auto industry first. We know the difficulty we have right now with many thousands of Americans who are in difficult straits in the auto industry right now. I believe that what we are proposing here can be a great tool for the rebirth of the American auto industry. Here's the reason I believe this.

Right now, we are in a race to build the next generation of the new car of the next couple of decades. We know it's going to be different than the car of the last several decades. We know it has to be. It has to not use as much Saudi Arabian oil so we would be addicted to Saudi Arabian oil as much.

We know it has to be advanced on materials. We are in a race to preserve the jobs of the American auto industry against folks in China who want to take these jobs and against folks in Korea who want to take these jobs. We are in a race right now with them to get these jobs in this country.

Well, to get these jobs in this country, we know we have to have the technology here to build these next generation of cars. We know to do that, we are going to need an investment to help the research and to help the retooling of these domestic auto industries to retool to start to build electric plug-in cars and the aerodynamic cars and the cars that can move to these new technologies with the new biofuel cars.

We have to win this race with China and Korea. To do that, we need an investment pool to help the auto industry to do that. Where are we going to get this pool? We are not suggesting we get it from some tax of lower- and middle-income Americans. We are suggesting we get it from an auction of the right to put pollution into the atmosphere and then use those funds to help auto workers build the cars of tomorrow and, for those who can't, to be retrained to help in some other industries, which is an important part of this.

Let me tell you why retraining is important. There's a company in Washington State called Infinia. Infinia makes a Stirling engine, a concentrating solar power system that basically it's a big parabola and concentrates the sun's energy and uses thermal energy from the sun to create electricity.

Guess who's the perfect workers to build those? It's auto workers. Because this technology is essentially right out of Detroit. Whatever you use to build a car, you use to build this Stirling engine, which could be one piece of the puzzle. They are now selling tons of these Stirling engines to Spain, and they are worried about having to build—not this company, but others in Spain—because Spain has policies like we are now advocating to try to move Spain forward. We need this right in this country.

Move to coal. People are concerned about coal. A company called Ramgen, which is a company that has figured out a way to compress carbon dioxide so you can stick it under the ground to continue to burn coal. We know we need to have those technologies if it's going to be a meaningful player in the future.

Thanks.

Mr. BLUMENAUER. Super. As we move into our last 10 minutes, I would like to turn again to my colleague from Boulder to share some of your further thoughts in terms of where you think we are now and how we move this forward.

Mr. POLIS. I'd like to build on some of my colleague from Washington's arguments about the opportunity for growth in the green economy.

My district and, in particular, Boulder, Colorado, has been a center of growth in the green jobs industry. In fact, when President Obama signed the Recovery Act a few weeks ago, he did so in Denver, and invited a company from my district, Namaste Solar, a company that had three people 3 years ago, now is up to 45 people, install solar home panels.

This has been—and, like many districts in the country, of course my district has been hit by this recession. We have seen unemployment rise. One of the biggest sectors we have seen job growth in is these green economy

jobs—solar energy, the research and development.

It's not only areas that have strong solar and wind geophysical characteristics. We are also talking about energy conservation. There are several model homes in my district that are net energy positive. Put energy back on the grid. They get there, yes, with solar panels, but also by reducing their energy consumption, looking at insulation, a smart grid, and Boulder is the pilot for allowing energy consumption when there is more power on the grid and turning many homes into net energy producers during part of the day, as well, and having an intelligence aspect to appliances so they can draw from the grid when we have extra capacity.

Researching, developing and, yes, manufacturing these products are going to be a major sector for economic growth across our country in the future. When we talk about where America can still be competitive and will be competitive in manufacturing, it's in these high-tech items.

We do have a hard time, and we have been losing jobs to other countries in some of the manufacturing jobs that gave our middle class strength in the 20th century. But I am optimistic that we can grow in some of these short order, smart appliances, which traditionally have been and will continue to be developed and brought to market right here in this country, and be a critical part of this new economy.

I have had the chance to visit with a number of companies in our district. Our district is really a hot bed of entrepreneurial activity. And there are others in other parts of the country.

The more that public policy can embrace this, the more that we can serve the dual goal of fostering economic development as well as preserving our natural heritage, reducing our carbon emissions and reliance on foreign oil, and all the issues which a number of my colleagues have so ably discussed that are critical reasons to invest in the green economy boom.

Mr. BLUMENAUER. I appreciate you zeroing in, both of you, talking about the value that is added. A wind turbine, for instance, has more than 8,000 parts. There's cement, steel, ball bearings, copper, wiring. It goes up and down the production line. As soon as that order is placed, it moves out throughout the economy.

Congressman TONKO.

Mr. TONKO. Right, Congressman BLUMENAUER. I'm enthralled by the comment made by Congressman INSLEE about the auto industry and the work that we can be doing on investing in new ideas and new concepts. Just in our recovery package that we did a few weeks ago was a major investment in advanced battery technology. That advanced battery technology can speak to not only transportation sectors in

our economy, but to energy generation. And it may hold the secret to an awful lot of progress that we can make.

If we continue to invest in that R&D, I'm convinced we will have the automobile of the future. Also, when we look at some of these investments in R&D, they will incorporate other sectors of the economy like the ag economy, where you can diversify that ag economy to grow the produce that would be required to go forward with some of the fuels that we can create simply by using cellulosic formulas that include perhaps switch grass or soy products or whatever and go forward in a smart way that will look at the best outcomes that we can encourage by the government, based on energy required to create new energy, impacts on the ag, impact on environment, do those quantifiable studies and then determine what path to follow.

□ 2000

But we can do this with a great degree of skill and analysis that will move us into a new generation of thinking. But it takes the boldness, it takes that major step forward.

To your point about some of the opportunities with renewables, we are bringing in all aspects of opportunity from R&D from the highest technical sense on to the trades that will install these facilities and allow us to move forward with a smart grid to connect all of this, the smart metering concepts that we need to invest in so that we are using the power at the right time and making those consumer judgments that are in our best interests individually or household-wise and also collectively in a way that has the smartest energy consumers possible with the choices being placed before us and the job creation that is embraced by this sort of an agenda.

So I am really encouraged by the work that is being done in this House. I know that in a caucus that we have created that deals with sustainable energy and environment outcomes, that is a powerful place to share these ideas and grow the synergy that will produce the policies that take us forward.

Mr. BLUMENAUER. I appreciate that. And as I turn to my friend from Washington to conclude this session for us this evening, I do hope that our friends who are watching this program on TV, on C-SPAN, go to the President's budget. I hope they look on page 21. It is available at www.budget.gov. There are copies available in libraries. Look on page 21 where the President outlines his goal. He is talking about putting a price on carbon pollution, yes, returning the benefit to the American consumer, the American economy to be able to reduce our dependence on foreign oil, to reduce costs for paying for utilities, to be able to spark that green economy.

You know, I am struck by people who are making things up about what is in

the President's plan and outlandish numbers that are associated with it, and I think we have gone a long way tonight towards debunking that and talking about the real cost that the American consumer and the environment is paying right now. But I am hopeful that people will embrace this, like we embraced the Clean Air Act where, on a bipartisan basis, people decided that it wasn't fair to pollute the atmosphere with sulfur dioxide; that we were going to have acid rain, that we are going to poison lakes in your area and kill forests. We put a price on it, and we were able to make remarkable progress with a very light touch as far as the government is concerned. We have this opportunity with carbon pollution to do exactly the same thing. The stakes, if anything, are higher.

I hope that our friends on the other side of the aisle stop this line of argument that somehow the Clean Air Act was a mistake, that a few polluting jobs were worth the damage that it inflicted on the environment, and ignore the lessons that we have learned.

Congressman INSLEE, I would appreciate it if you would kind of take us home.

Mr. INSLEE. Well, I would take it home to say this is an American approach to a problem. It really is. We basically are following in the footsteps of what Americans have always done when they are presented with a problem.

Number one, when Americans are presented with a challenge, we act. We don't just sit around on our hands. Some people are saying we should do nothing about this. We believe we need a new energy transformation of our economy to deal with this. So that is number one, we act. We are not a passive people.

Number two, we act with confidence in our ability to innovate and find solutions to these problems based on technological solutions. Other people think we are just too dull to figure out how not to just burn fossil fuels. We think we are smart enough that the people who went to the moon and invented the cup holder ought to be able to invent ways to solve this problem. So we act with confidence.

Third, we would like to act in a bipartisan way. You know, you would think that growing green collar jobs and saving the planet from global warming would be a bipartisan thing; but, unfortunately, so far in this debate we have advocated an action plan, and there is a thousand ways to skin this cat, there is various ways to deal with regional cost disparities, there is various ways to distribute the pool of revenue between research and helping low income people. There is all kinds of permutations that we are going to find a consensus on eventually. But, unfortunately, our friends across the aisle have just adopted a favorite movie of

Ian Fleming, "Dr. No." They have just said no. And I hope that over time some of our friends across the aisle will join us in finding a consensus on how to move forward. If we do that, we are going to continue to enjoy successes in building jobs for Americans like we have in the wind energy industry.

I will just close with this one comment. People 4 or 5 years ago said that wind turbines were kind of child's play; they were a fancy toy of a bunch of fruitcakes out on the West Coast who were dreaming in their teepees of how to solve this problem. Today, America is the leading producer of wind power in the world, and more people work today in the wind power industry than in the coal mining industry and it is the fastest growing of energy in the United States.

This is the kind of future that we believe we can move forward in. It doesn't mean that we are going to replace coal necessarily. We are going to use this money that we are going to generate from this plan to try to find a way to burn coal cleanly, because we think we ought to look at all possible approaches to this problem. So we are going to act, we are going to be confident, we are going to believe in bipartisanship, and we are going to believe in innovation. That is the American response to this problem, and I look forward to when we get this done. Thank you, Mr. BLUMENAUER.

Mr. BLUMENAUER. Well said.

Mr. Speaker, we yield back the balance of our time.

ETHICAL ISSUES THAT NEED TO BE RESOLVED

The SPEAKER pro tempore (Mr. MAFFEI). Under the Speaker's announced policy of January 6, 2009, the gentleman from Texas (Mr. CARTER) is recognized for 60 minutes.

Mr. CARTER. Mr. Speaker, I appreciate being recognized for this time.

I have been coming down here now for 2 or 3 weeks talking about fact that we have some ethical issues that need to be resolved, and that is something I think is important. I am going to try to frame that so you can understand why I think it is important.

Tonight, we have been talking about Mr. Obama's budget. I just enjoyed immensely the argument that was just made a few minutes ago about energy. And I really wish, sometime it would really be nice up here if we could do one of these things where we talk back and forth and ask questions. I would like to address that a little bit, because it is a big part of this budget. It is going to be this huge tax program that is being put together, and I would like some questions answered.

It seems to me that what I heard argued just a few minutes ago was that we have a real crisis with carbon, carbon dioxide. I think most Americans

know that we are major producers of carbon dioxide. If you don't think so, take a big breath and then let it out, and you will have just produced carbon dioxide. So I think we realize that it is kind of a natural process that is going on. But if we need to fix that, then we need to slow down the amount of carbon dioxide going out into the atmosphere. And as I understand the proposal is that let's say you have a widget plant that is belching out carbon dioxide into the atmosphere in record numbers because it is burning, let's just use that horrible substance they were discussing, coal. And even though it is being scrubbed for the sulfur dioxide, which the Clean Air Act dealt with, it is still putting out carbon dioxide, the substance that is the part of the fuel of photosynthesis in plants across the entire globe, including the microscopic plants that grow in the oceans of the world, and it is just too much.

Now, the plan they are proposing in the President's budget, as I understand it, is that they will have to pay a tax that the government would say this is the amount of carbon dioxide we are going to allow to come out of one source, and the government would determine what that ceiling would be. It is called a cap. And then they would say, every bit that you put out above that cap, we are going to tax you on it because we are going to use the tax money to acquire some kind of credits that the people are selling that don't pollute. Or maybe they are not even going to that. Maybe they are just saying, we are going to tax you so we can do research and development on new energy, which is what they seem to be saying tonight. If that be the case, then how does that tax stop that carbon emission out of that plant? I don't get that. Maybe someone can explain it to me.

Now, I guess, yes, you could stop it if the tax were so onerous that the plant owner said the product that I am producing, and let's say on that particular plant rather than it being widgets it is electricity, that this is going to make my cost of electricity so onerous that I won't be able to sell my electricity so I will just shut down my electricity plant. That is the way economy works. At some point in time when the cost is such that you can't make a profit from the product that you are producing, maybe you would shut it down. I don't understand how that would help particularly the energy problems of the United States, and I don't think that is what would be envisioned.

I think what would really be envisioned is that the evil corporation, if you will, would have to pay the tax and eat the tax. In other words, it would come out of their profits. Now, the evil corporation is really a group of American citizens and maybe other country citizens who have bought stock in the

evil corporation, and they have invested their money in it in hopes that they would make a profit. And so is the solution that you think the corporation is going to do is that this tax that has been put on this coal emission is going to be paid by the corporation, which means by the stockholders, the owners, so they are just going to take less profit. At what point in time are the owners, that is the stockholders, going to be happy with their profit being reduced until they make no profit? I don't think very long. So then they would close down our power plant. But that is not what the solution is, either.

The reality is, and it is in every case in every industry demonstrated every day across the world, is that tax will then go to the consumer of the product that that company is selling. Therefore, the cap tax we just heard about from our colleagues on the other side of the aisle would be paid by the consumer. Unless you are sitting in the dark watching television by candlelight, you are probably using electricity in your home. I say that tongue in cheek, because I guess you could watch television with a battery. But the facts are you are burning electricity every day, and you are going to pay the tax.

Now, they are going to put a tax on oil and gas products because they create carbon emissions, CO₂, the same as you create carbon emissions, by breathing. So they are going to tax the oil and gas industry. And guess who is going to pay the tax; the oil and gas industry is going to pass that tax on to the consumer. So if it is a nickel on a gallon of gasoline, the nickel is going to be yours to pay. If it is 50 cents on a gallon of gasoline, the 50 cents is going to be yours to pay, and the price of gasoline is going up.

□ 2015

The price of gasoline is going up.

There is a bigger picture here you need to see. If you could look around this room, this gigantic House of Representatives, you would see leather and wooden seats, beautiful carpeting, gorgeous lights everywhere, all these various paintings and tapestries on the walls, glass, brass, steel, concrete and stone. All of that is in this room right here. How do you think it got here? How do you think the wallpaper up there got here? Did somebody bring it up here with a horse? Did they pack it on their back? No. They put it in a truck or on a train. And that truck or train delivered everything in this room to this building to be installed by the workers who got here in automobiles and pickups. So everything in this room was brought to you by motor fuel, including diesel fuel that burns in our trains that pull our freight cars. So everything in this room was brought to you by diesel or gasoline. So if tomorrow

you were rebuilding this room, and if our new and wonderful "nobody in the middle class will have to pay tax increase" that we were just told by our colleagues, if that is there, then if it costs the wallpaper people extra money to get the wallpaper here because the price of diesel has gone up 20 cents a gallon, then the price of wallpaper is going up 20 cents a roll, or some equivalent, to make it up. If the brass manufacturers, if they are not using any kind of fuel to make brass, but they are shipping it here somehow magically, they are going to use diesel, because that is what drives our trucks. And the brass is going up, the concrete is going up, and the leather is going up. Everything in this room is going up because we have placed a new tax on fuel.

Now, is any of that fuel not being burned? No. That fuel is still being burned. Is there carbon going into the atmosphere? Yes. There is carbon going into the atmosphere. Guess who is paying this tax? You are. And you're going to pay it if you make \$10,000 a year, and you're going to pay it if you make \$10 million a year because you're a consumer. And so the tax is going to be passed down to the consumer. So when you say this is not a tax on the middle class, it is a farce.

That comes back to the issue of people need to make trustworthy statements when they say things around here. People need to explain things in a clear picture so the public can understand it. Then the American public needs to decide what is right and what is wrong. To me, I would like anybody to explain to me how this stuff would get here if it wasn't for a diesel truck or a train. I would like anybody to tell me how that would happen. Or maybe they fly an airplane in here on air freight, which is even more expensive and which is going to have an even bigger tax on it because it is a fuel guzzler and it creates carbon.

So what we have been told here tonight is that there is going to be no tax on the middle class. Yet, people who do something that I wouldn't do for a living, but sit around and calculate an estimate of what these things might cost, are saying that this new energy tax, this tax on energy is going to cost every household in America \$3,128 annually. Now maybe for somebody making \$250,000 a year, that hurts a little bit. But, boy, it hurts the heck out of the teacher in Round Rock, Texas, making \$32,000 a year. It hurts the heck out of that truck driver that drives that truck that maybe makes \$30,000 a year or \$35,000 a year. If he is really a hustler, he makes \$50,000 a year. Everything he is going to use, plus the fuel he is burning, is going to cost him more. And the freight charges are going up.

So, wake up. You can't put a tax on something that everybody uses and not expect everybody to have to pay for the

tax. It is just that simple. This is not rocket science. This is basic logic 101.

The reason we need to have ethical issues resolved in this House is because the American people need to learn to trust us to try to shoot straight with them. And those people who don't have a track record of shooting straight, at least you can make that conclusion because of accusations made against them, maybe you should worry about their leadership. Now, the question I would ask myself and you—and what my whole position has been on ethics issues is that these ethics issues need to be resolved so that you know you can trust when somebody stands up at that mic or that one over there or this one right here and tells you something, and you say, yeah, but what about that accusation? Hey, maybe it's not true. Okay, maybe it is not true. But it ought to be resolved. This body ought to resolve accusations that are made against the people that they have done something that is unethical.

Now, I'm not making the accusations. I'm telling you that the newspapers are making the accusations, the talk shows are making the accusations, the TV news at 6 o'clock is making the accusations, and people that claim to be the watchdogs of American politics are making the accusations. I just want them resolved. I want the Ethics Committee or the courts or whoever it takes to resolve the issues to resolve the issues, so that when somebody stands up here and tells you there is not going to be a tax on the middle class, but we are going to tax every kind of carbon-burned fuel, when 90 percent of the fuel, probably 95 percent of the fuel used for every purpose on the face of this Earth is carbon based, then do you know what? You're going to say, "I would like to know if that is somebody that is very trustworthy that I ought to be listening to."

I hope that is not convoluted logic. But I sit here and ask you, if you assume that what these gentlemen said tonight was true, and they are going to use this stuff for research to come up with alternative fuels, you tell me when is the first truck going to be invented with an electric motor big enough to haul freight down the highways of the United States? When is it going to happen? Nobody is talking about that. They are not talking about it because the electric engine that it would take to haul the loads of freight down the interstate to bring stuff to your home so you have the goods and the services of this Nation, that electrical engine would be as big as that podium or bigger than the Speaker's tonight. In fact, they even make some electric engines that size in my district for ships in the sea. And they are gigantic, half as big as this room, to get the kind of torque, to get the kind of power out of electricity to pull a heavy load. So, think when you hear these

things being talked about, how long will it take to get to a point that goods and services can be brought to you the way they are brought to you now without this tax being imposed upon you? I would submit, it is not decades. It may be centuries.

So, I'm a little off the subject. But when you start talking about this budget, this is the kind of thing we want to talk about. Can you honestly think that you're getting a straight shot when you hear about some of this stuff?

I'm very happy to see my friend from North Carolina. She is one of the real tough ladies in this House. VIRGINIA FOXX is here to join me. And I'm glad to have her. I will yield whatever time the gentlelady may use up.

Ms. FOXX. Well, I thank my colleague from Texas for starting this Special Order tonight and giving me a chance to come down and be you with you and spend some time talking about several different issues. I certainly agree with you that it is important for the American people to have faith and trust in their elected officials. And I think that there is a great deal of cynicism in this country. And people wonder what can they believe in? I think that it is important that when they hear us speaking on the floor, or they get letters from us, or they have other means of communications from us, that they know that we are telling them the truth.

When I first came here, we had folks speaking on the floor almost every night. A group of us who were new in the Congress that year, in 2005, were so concerned about the things that were being said that we established a group called the "Truth Squad." And we would come down at night after that group would speak and set the record straight by giving out what we thought were true statements. They were often very different from the statements that were being made by our colleagues. I think it is important that we do this on every occasion, because frankly, I think in the last 3 years or so, the American people have really been sold a bill of goods.

All of us would like to see things easier, better and less expensive. We would like to think that life would be a lot easier than it is. But we have challenges that we deal with every day. It is not likely that the government is going to be able to make our lives easier for us. Yet, that is what has been sold, I think, to the American people. We haven't had the benefit of having a large segment of the media on our side in order to be able to counteract some of those things that were said.

I want to give a little detail, put a little meat on the bones of some of the things that you have been talking about in terms of what would this cap-and-tax plan do to us in the country? We have been told that everybody mak-

ing less than \$250,000 is not going to be taxed in this country and that 95 percent of the people are going to get a tax cut. But let's talk a little bit again about the particulars of this. It is actually \$250,000 per couple. It is not \$250,000 for an individual. It doesn't exempt small businesses who often are taxed at the individual rate. So there are some minor little details in there in what has been told about taxes and about the budget that has been presented.

To go to your point about what the increase in taxes are going to do to the American people, you are absolutely right. Every single family is going to be paying for these ideas that are being brought up under the guise of "scientific knowledge." I don't know about you, but I haven't seen any conclusive proof presented that the science can support this. We know that President Obama himself said, "under my plan of a cap-and-trade system, electricity rates would necessarily skyrocket." So we know that is going to happen. But no one has explained to the American people how that is going to happen.

There was a piece done by FOXNews just a few days ago, I think somewhere around March 4, where an energy analyst, Margot Thorning, said: "In dollar cost terms, it is probably an additional \$700 to \$1,400 per family per year starting around 2012." That is right around the corner. So what the President says he is going to give is a tax cut. But that is going to amount to about \$600 to \$800, and at the same time, the families are going to be charged about \$1,400 more in energy costs. So what the government is going to give, it is also going to take away.

I think, again, what you're doing is great. I have pointed out many times that the North Carolina State motto is "to be, rather than to seem." I have brought that up several times on the floor because I think that is what the American people want out of us here in Congress.

□ 2030

The American people don't want us to seem rather than to be; and yet what is being done here in the name of science and in the name of protecting us from the climate change that they believe is occurring is going to be a pretty expensive trial as to whether or not this is going to work. And we don't know. It is an experiment, really. It is not proven science. We don't know that we are causing global warming with carbon. We have had global warming and global cooling even before human beings were on the Earth.

So I think it is a great thing that you are doing, to tie programs, budgets, proposals and policies to this issue of ethics because they are tied together and are very important. I want to commend you for doing that.

We have been joined by some of our very articulate colleagues here tonight, and I want to give them an opportunity to share their knowledge, their enthusiasm for this issue.

Mr. CARTER. Let me point out, I have a poster board here. Now some might think I have been picking on Chairman RANGEL too much, and I don't intend to do that, but this is to make my point. Chairman RANGEL is in charge of taxation. That is his job. He is the tax man of this House.

We have a little quote here from a real conservative news source we all love and adore, the New York Times, January 3, 2009, "Rangel Pushed for a Donation; Insurer Pushed for a Tax Cut." It is written by David Kocieniewski. "On April 21, 2008, Representative Charles B. Rangel met with officials of the American International Group, the now-troubled insurance giant, to ask for a donation to a school of public service that City College of New York was building in his honor," and I will point out named after him.

"Mr. Rangel had already helped secure a \$5 million pledge for the project from a foundation controlled by Maurice R. Greenberg, one of the company's largest shareholders and its former chief executive. And CCNY officials, according to the school's own records, had high hopes for AIG—a donation of perhaps as much as \$10 million."

Some may have heard of AIG. It has been a little bit in the news lately.

Now my point is that is an accusation made by the New York Times, not by me, not by any Member of this House. That is an accusation made by the New York Times that should be resolved because it is about our number one tax man, and our number one tax man along with the President of the United States is going to be championing the Democrat budget of \$3.6 trillion, a number that almost defies imagination.

We have gotten used to trillions in the last 60 days because we have seen lots of them. They are everywhere. This administration is throwing trillions around like tennis balls at Wimbledon and we are sitting here looking at a new little slight glitch of \$3.6 trillion. I would think that the average American looking at this budget would like to know that the people that designed it and the people that put it together shoot straight, deal ethically with issues. And they would like to know that, but they have an accusation from the New York Times that says contrary to that.

So is there a place to resolve that? Yes, we have one. It is called the Ethics Committee. But there is no action out of the Ethics Committee. It just kind of sits there.

So I guess our famous Rangel rule which now is on everybody's tongue about special privileges for Mr. RAN-

GEL, I guess we add this to the Rangel rule. I don't know what else to do with it. If you have accusations and the Ethics Committee doesn't act, then they just go away. Trust me, everything is okay because the Ethics Committee hasn't acted. Well, I think they should.

I will start, beauty over the beast. I have both MICHELE BACHMANN and LYNN WESTMORELAND here, and so I will turn to MICHELE BACHMANN to talk about the budget and about trusting those who are going to be giving us these numbers and these ideas and shouldn't we have the ethical issues resolved as they lead this Congress down a \$3.6 trillion path.

Mrs. BACHMANN. Mr. Speaker, I thank the gentleman from Texas, Judge CARTER, for yielding on that point. You could not have set up this segment better to talk about ethics and talk about those who are writing our budget, that they need to live under the laws that they are creating. You quoted from the New York Times article that said there are high hopes for AIG.

The American people had very high hopes for AIG, the largest insurance company in the world. They should, after all, the American people own AIG now. We own 80 percent of AIG. The American people have been forced to invest \$173 billion in this company. And they just found out that \$165 million, perhaps as much as \$450 million, has been paid out in bonuses to some of the executives at AIG. And the American people are outraged. They realize that is their money, and that money is going out on bonuses.

But then along came a story from CNN. And CNN said guess what, in President Obama's stimulus package earlier this year, we remember, that is the over-trillion-dollar bill that none of us were allowed to read because the Obama administration wouldn't release that bill until after midnight, and we started debate the next morning at 9 in the morning, contained in that stimulus bill is an interesting provision that was put in by the head of the Banking Committee on the Senate side, Senator CHRIS DODD.

Senator CHRIS DODD inserted a provision into the stimulus bill that said essentially this: it said that the bonuses that would be given out to any of these companies can stay with the people who get the bonuses unless they are given after February 11, 2009. In other words, these bonuses that AIG received are prohibited by the language in the stimulus bill from being recouped by the U.S. Government. We are prohibited. Our hands are tied. This is President Obama's stimulus bill and the chair, the Democrat chair of the Banking Committee, inserted an amendment that prevented the taxpayer from recouping any bonuses that would be paid out to the executives.

Now this is a curious thing because CNN also reported that the largest ben-

eficiary of campaign donations in 2008 from AIG was Senator CHRIS DODD. So Senator CHRIS DODD, CNN said, was the largest recipient at over \$103,000, managed to slip into President Obama's stimulus bill, which he didn't give any time for any Member of Congress to read, a provision that would have prevented the American people from recouping any of these bonuses.

Now I think that raises questions I would suggest along the line of the gentleman that you've been raising about the ethical requirements of the people who are serving the American people.

With that, I yield back to the Judge.

Mr. CARTER. I yield to the gentleman from Georgia, Mr. LYNN WESTMORELAND.

Mr. WESTMORELAND. I want to thank my friend from Texas for yielding.

Judge, I think what we have to look at is connecting the dots. We see in a lot of these children's puzzle books and stuff, you connect the dots to see the big picture. I think if we could see the picture of all of these dots connected, it would be hypocrisy that has come down from the Democratic leadership and we could go back to even when they first became the majority in January of 2007, because prior to that they talked about they had a way of lowering gas prices. Judge, you will remember gas prices went to over \$4 a gallon in some areas. They never told us how they were going to get that down. The only way that came down was what we did in August of that year, and really exposed the energy situation for what it was. And I think the speculators finally realized that we were serious about doing something for our own energy policy.

Then if you look at the problems that Mr. RANGEL has had. Just to list a few, the loan-subsidized apartments that he had, the fact that he was using letterhead to solicit some of these campaign contributions, the fact that he received the money from AIG and the other people who received some of this bailout, the fact that he didn't pay his taxes, if you look at that, that is not anything in itself, but if you connect the dots with all of the other things that are going on, I think that shows a picture that they did what it took to get elected.

We can look at that with what President Obama's campaign promise was, that he would drive the lobbyists out of the White House. And now he is writing waivers. It seems like every time he does an appointment, he has to write a waiver because they are a lobbyist. We have Mr. Geithner who was approved by the Senate as the Treasury Secretary who has similar tax problems. So you connect all of the dots, and what seems to be happening is we see a chain of events that may seem separate, but they are really kind of all tied together.

And then if you look at what President Obama's chief of staff Rahm Emanuel said, and I can't remember the exact words, but he said never let a crisis pass without taking advantage of it.

And so if you look at this financial crisis and what has happened and what has taken place, look at how they are taking advantage of it with this \$3.6 trillion budget that they are proposing, with a cap-and-trade, which is another tax that is going to be on the 95 percent that he promised would never have a tax.

If you look at the bonuses for AIG, well, the reason that they are getting the bonuses is because the government intervened into that business. If the government had not intervened and saved AIG, I don't know what kind of financial calamity would have been out there, but I promise you these guys wouldn't have gotten a bonus. So we enabled them to do that. So now what's the government going to do? Everybody is in an uproar over these bonuses being paid to these executives, as well they should. But now is the government going to say we have a crisis, we need to step in and intervene in contracts between employers and employees? And so this is another one of these crises, for the government to take one more step into our lives and into our businesses.

So this is a connect-the-dot picture that we have got to keep in mind. This is a lot bigger than what we ever anticipated or that the American people would think that they were getting.

Mr. Daschle was another one. Ron Kirk. We could go on. Ms. WATERS, and others.

Judge, has the Ethics Committee met, because if I remember correctly back in November, Speaker PELOSI said that she was going to have this Rangel problem resolved by the end of December of 2008. I guess she did that for the elections, but it is not resolved yet, and I have not even heard of them having a hearing.

Mr. CARTER. I haven't heard a peep out of them. Just recently, we have another story that has come out from the Congressional Quarterly, "Waters Calls TARP Meeting for her Husband's Bank." This is by Bennett Roth, part of CQ staff.

"Watchdog groups claimed Waters took inappropriate actions on behalf of OneUnited Bank which received financial assistance from the Federal Government last fall. Waters, a senior member of the Financial Services Committee which oversees banking issues, last year requested a meeting between Treasury Department officials and representatives of minority-owned banks, including OneUnited on whose board her husband, Sydney Williams, had previously served. He also held stock in the bank."

That's not our accusation, that's an accusation by a publication that is

read regularly in the halls of Congress and informs us of what is going on. That is an issue that should be addressed by the body that is required to address it, the Ethics Committee.

□ 2045

Is that unethical behavior? Possibly not. Possibly it is. But she is the chairman of the Subcommittee on Housing and Community Opportunity, which means that whatever housing there may be in the Obama bill, this \$3.6 trillion Obama bill—and Lord, for that much money there ought to be a couple of houses in there anyway—then if that is the case, she would be the spokesman for the housing attitudes of the U.S. Government of the majority party, the Democratic Party—who run this place, by the way. If nobody gets it yet, the majority rules in the House of Representatives. So when you have 38 more votes than the other guys, you win, they lose. That's the way it works. If you've got one more vote and everybody stays with you, you win, they lose.

So they own all of this. This Bush bashing that we hear around here, wake up. The man is hanging out in Crawford chasing cattle; he's not doing this job anymore. This is your job, the Democratic Party's job. They are doing this job here, with the leadership of Barack Obama, their President. He, with their help, proposed \$3.6 trillion.

And when it comes to housing, we must rely upon MAXINE WATERS, the leader of that subcommittee. That issue ought to be resolved. I think that's important.

This is the whole point of this whole thing. You know, this banking thing, we are all worried to death about this banking thing. And I don't think any Member of Congress—or for that matter, any American—isn't concerned about this tightening, choking down of credit that has taken place in the United States. And therefore, the entrepreneurial spirit of America is being choked down because of stupid mistakes that were made by the government. And let's maybe talk about those for just a little bit. And I will first yield to MICHELE BACHMANN.

Mrs. BACHMANN. I thank the gentleman for yielding. And I am wondering when it will be that Congress will finally have hearings on itself and on the culpability of Members of Congress for this housing meltdown.

We look at individuals who were involved in shielding Freddie and Fannie for years from any sort of tightening, any sort of regulatory burden, any sort of accountability, any sort of transparency—for years. We look at comments that were made even by the current head of the Financial Services Committee. I sit on the Financial Services Committee. And the chairman of our committee, BARNEY FRANK, had made statements when he was con-

fronted by former Treasury Secretary John Snow that Freddie and Fannie were in deep trouble. And he also foretold of a housing collapse that he was portending on into the future for the United States. And the comments from Representative FRANK were, don't worry, everything's fine; there's no problem with Freddie and Fannie. People knew we were looking at a meltdown.

When are we going to have those hearings? When are we going to hear from Members of Congress, their culpability in bringing about this housing meltdown, about the Members of Congress who loosened and relaxed the platinum level standards of lending in our country? We had platinum levels of standards of lending for over 200 years in our country. Those lending standards were so reduced, that created our subprime mortgage mess. It even created a problem in prime mortgages because the lending standards were so reduced. That just didn't happen in the free market, because private businesses, they want to limit their risks. It was the Federal Government that forced these private businesses to maximize risk. With what? The promises that good old Uncle Sam, the chump called Joe taxpayer would bail these businesses out—AIG, Freddie, Fannie—if anything went wrong. We need to have a hearing where Members of Congress are called on the carpet for their involvement in leading to this housing collapse.

I yield back.

Mr. CARTER. And just another little news story here that broke. This is a former colleague of ours. He is now maybe in one of the most powerful positions in the United States, he is the Chief of Staff of the White House, Rahm Emanuel. This is from ABC News, a very conservative source. "Emanuel was Director of Freddie Mac during the scandal. \$25,000 Freddie to Emanuel equals \$200 billion taxpayers to Freddie," written by Brian Ross and Rhonda Schwartz.

"President-elect Barack Obama's newly appointed Chief of Staff, Rahm Emanuel, served on the board of directors of the Federal mortgage firm, Freddie Mac, at a time when scandal was brewing at the troubled agency, and the board failed to spot red flags, according to government reports reviewed by abc.com. The actions by Freddie Mac are cited by some economists as the beginning of the country's economic meltdown."

"The Federal Government this year was forced to take over Freddie Mac and his sister Federal mortgage agency, Fannie Mae, pledging at least \$200 billion in public funds." And that is not my news story, that is ABC's news story.

And of course our Ethics Committee, bless their hearts, I don't think they have to deal with Mr. Rahm Emanuel.

I think maybe the White House has to deal with the issues of Mr. Rahm Emanuel, and maybe they should. But it is the White House budget that we're talking about, and he is the chief policy officer of the White House. So I would assume that Mr. Rahm Emanuel's fingerprints are all over this budget. And I would expect Mr. Rahm Emanuel to be a spokesman for this budget. And we all can watch, in breathless anticipation, and see if I'm telling the truth. But let's watch and see. But those sort of things ought to be cleared up with the American people because at least one news source is saying this was the start of the crisis we're in, and he was right in the middle of it. So those are the kinds of things we have to look at.

Mr. SCALISE has joined us. I will yield such time as you would like to have to comment on what we're talking about here today.

Mr. SCALISE. Well, I want to thank my friend from Texas for hosting this and really helping unravel the mess, as Americans all across the country are very frustrated, they are angry about what's happening with our economy, they are angry when they read about what happened with AIG. And then I think they get cynical when they see some of the very people who helped create this mess going on all of these talk shows over the weekend, pointing their fingers everywhere else other than themselves and saying it was this administration or that administration.

You can find more than enough blame to go around, but if you really go back to the root—and I think you've started to touch on it—the problems that existed with Fannie Mae and Freddie Mac, going back to the Community Reinvestment Act, going back to the 1990s when a gentleman who represented part of my State from Louisiana, Richard Baker from Baton Rouge, who actually sat on the Financial Services Committee, he had the guts to go and take on Fannie and Freddie back in the 1990s, and he exposed all of this. And this is all out there on the Internet, it's information you can actually go and verify. You can look at those hearings—and many Americans already have. And for those who haven't, it would be a really good history lesson to go back and look at those hearings that he had as he was calling on the government to finally reform these institutions who were being encouraged—not by some bank on Wall Street, not by George W. Bush, this goes back to the Clinton administration—but it was people in Congress, some people who are right now chairmen of these very committees that have oversight, and he was fighting and saying we have got to reform Fannie and Freddie because this entire situation is going to melt down.

We've got institutions that are encouraging people, using the strength of

the Federal Government, encouraging people to give out loans to people who don't have the ability to pay. And Members of Congress who are in leadership positions today were giving edicts to Fannie and Freddie saying go out and give those loans to people who don't have any ability to pay, when people all across our country—people in my district, your district—people who are playing by the rules today go out and want to get a home mortgage, they have to prove their ability to pay, they have to prove that they've got equity, they have to put up maybe 20 percent, they've got to fill out a bunch of forms. And ultimately they make their payments. Over 90 percent of the people in this country, even in these tough economic times today, are making their payments on their mortgage. Yet, you have a small group of people—some who actually lied on their application, but some who were encouraged by the Federal Government to get loans that they didn't have the ability to pay by these institutions, Fannie and Freddie. And people like Richard Baker, back in the 1990s, were saying we've got to reform this corrupt system. And yet, some of the very people who are now yelling at the top of their lungs at the top of this Capitol saying, blame this guy and blame that guy, they were there defending Fannie and Freddie. And it's all out there on the Internet, you can actually go and see it.

And yet, when you look at what happened with AIG just 2 weeks ago—and of course, again, you've got the record to go and check it—President Obama's spokesperson was asked about the next \$30 billion that the Federal Government released to AIG. And they said, what do you think about the money that AIG has already gotten so far, the \$150 billion they had already gotten; they said, do you think that that money has been spent properly? And the White House actually said yes. They said, yes, we think AIG has done good things with the money.

Now, clearly AIG has not. AIG has been caught giving bonuses, hundreds of millions of dollars—up to \$6.5 million for some executives—in bonuses with taxpayer money. And some of those very same people are yelling and screaming at the top of their lungs. And we are all outraged, but Americans that are outraged are looking at this and they are getting very cynical because they are saying, wait a minute, we can actually go back and unravel this, we can look and see some of these same people. And those of us who voted against the financial bailout last year because we knew this was the wrong approach, we knew giving taxpayer money to help these financial groups on Wall Street who made irresponsible decisions, we knew that was bad public policy, but yet some of those very same people who voted to give the money are now yelling about

how the money is being spent, even though they allowed the money to be spent that way. It was a wrong approach then. We should have never done it. We're seeing how flawed that system is now. But I think people across the country, they do get it. They are seeing what's happening out there and they are realizing that some of these very same people that are yelling at the top of their lungs and expressing outrage were the ones who actually voted to give that taxpayer money away.

Mr. CARTER. Reclaiming my time, you mentioned Wall Street. And Wall Street has taken a big hickey here lately. And you know who really took the hickey was the American people. And one of the things that I think everybody dreads doing almost as much as taking out the garbage is looking at their 401(k) or their pension plan after this last 60 days of the Obama administration and this trillion dollar leadership of this Democrat-led House of Representatives.

Mr. WESTMORELAND. Can I interrupt the gentleman? It's not the last 60 days, this is his first 60 days.

Mr. CARTER. First 60 days, yes. Thank you for correcting me.

And then, lo and behold, under the President's budget, taxes on capital gains and dividends would increase from 15 to 20 percent, increasing their taxes on investments by \$398 billion over 10 years. So if the poor old guy whose 401(k) is almost used to wrap the garbage in, if he starts to have any kind of rally on the stock market at any time in the foreseeable future—at least the next 10 years—this budget we are being asked to pass, this \$3.6 trillion budget, is going to raise the taxes on his poor little old beat-up 401(k), or on your pension plans. This is a direct tax on American families.

And believe me, contrary to popular belief by the other side of the aisle, there are a lot of people in this country who make a whole lot less than \$250,000 a year who own stock in corporations in America because they believe in the free enterprise system. They have invested in a way they feel is adequate to be good for their families, and they will be hit by this capital gains tax.

I will yield to Mr. WESTMORELAND.

Mr. WESTMORELAND. I thank my friend from Texas.

You were talking about Wall Street, the large banks that got the bulk of this TARP money. Our local community banks and some of the smaller banks did not get this. And the whole reason that this Congress—and I didn't vote for it, but I think a reason that the people that did were sold a bill of goods by then Secretary Paulson that this was going to unfreeze the credit market, but it has not done that.

And what has happened to the FDIC—and I'm not sure if the gentleman has heard this yet, but I had

some of my local bankers call me, going from \$100,000 to \$250,000, their premiums are going up. That is the way the FDIC is funded is through premiums on this deposit guarantee. And so they are going up on the premium. And so now they are not only having to pay a high premium on \$100,000, but the high premium on \$250,000. But here's the kicker; they are going to be charged a one-time fee from the FDIC on their deposits—I think it is, or their assets.

To my friend from Texas, I was told today by somebody in our Georgia banking community that if you took all the profits of all the banks in Georgia and added it together, the fees that these banks were going to be charged would be more than the money that they made all last year. Now, that is a double whammy on the small community banks that have been basically responsible for funding our small businesses in our communities that have not had access to this TARP money.

□ 2100

So what has happened is the big banks and the FDIC and the others who have let this situation get way out of hand are here again sticking their money down and getting the investors and the shareholders from these local banks their money. And these banks are owned by local people.

I know we're getting short on time, but I want to thank you for doing this. And I think we need to remember that we need to continue not only with some of these ethics that you brought up, but we need to connect all these dots and get the clear picture of where this new administration and this larger majority is trying to take this country.

Mr. CARTER. Well, I agree.

Reclaiming my time, I thank Mr. WESTMORELAND for pointing that out. And, actually, I have talked to my community banks too, and they are very concerned about the massive increase in their assessment by FDIC and the fact they're going to have to pay a premium. But also what's really sad is they're the guys who made good loans. See, what people don't realize is that these community banks can hold their heads up high. They're not asking for TARP money because they didn't make bad loans. They stuck to the banking principles that their boards of directors made, and they stayed away from the pressure, with some exceptions, but in the vast majority of the cases across this country, the community bank system made sound, good business decisions. And now, unfortunately, because of the way it works, they are going to have to pay the penalty for those people who went off and made bad loans.

Now, we understand and I think our bankers will tell you they understand that's how the FDIC works and it's a program that they rely upon. But it

still is part of that old "taint fair" system that you and I have been talking about for the last couple of days.

I want to bring up just one more thing that's in this budget that I think is going to be a real issue for some awfully important people in this country. This budget that they've got out here caps the value of itemized deductions at 28 percent for those who have income over \$250,000 married or \$200,000 single, which will reduce charitable giving in this country by \$9 billion. You know, I don't know why in the world you would want to hit the charities, the Cancer Society, the Heart Fund, the First Methodist Church, or the Third Baptist Church, why you would want to hit those people's pocketbooks to fund \$3.6 trillion, but to me, that's questionable. We ought to be questioning that, and we ought to be saying why in the world do we have to basically put a burden on charities? And then tomorrow, tomorrow, we're supposed to vote on a bill to pay volunteers with taxpayer dollars. So we're going to pay volunteers with taxpayer dollars rather than encourage private sector donors to take care of community problems that they all work hard to take care of. This is nuts. This is European socialism at its best.

Americans have hearts of gold. One of the things that the American people liked that Ronald Reagan said about them was he reminded them that deep down inside every American there burned that flame of liberty and freedom that made them good people who were all heroes because they got up in the morning and they went to work and they took care of their families. And yet it seems that whoever put together this budget doesn't view America that way. They view it differently.

Finally, something that I have been appalled with forever is taxing death. A guy works all of his life. He pays his taxes. He takes care of his bills. He works double shifts and works hard. He acquires some property, and that property gains value, whatever the property may be. And he's happy because he's been an honest taxpaying citizen. And then he dies, and lo and behold the United States Government wants to come in and tax him on his death.

Now, I have a good friend, and I'm not going to use his name because I don't have his permission to use it, but he is from Clayton, New Mexico, and he'll know who he is, who had a beautiful ranching operation in Clayton, New Mexico, when I knew him at Texas Tech University and he was a buddy of mine. And he had two really nice ranches in that area, the home place and another ranch. I ran into him in Rocksprings, Texas, a while back, and I asked him how he was doing, and he said, "Well, I'm living in Texas now. I'm ranching in Texas."

I said, "What happened to Clayton, New Mexico?"

He said, "The taxman took it." He said, "When my dad died, I had to sell land, and the only land I could sell was the home place, which was the best place; so that only left me with our worst little ranch. I traded that for a small place down here in Texas, and I'm down here scratching out a living on about a third of what my daddy worked and fought for and my great-granddaddy and my granddaddy died for in fighting to tame that part of New Mexico."

I don't know. I find that's pretty offensive to me. Why does the United States Government deserve to put the fourth generation of that family out of the ranching business so they can tax a guy that has already paid his taxes? But that's headed our way in this new \$3.6 trillion budget.

I'm not going to tonight go into the rest of the examples that I have here. We'll go into those another time. But I hope I've made it clear that my purpose to get up and talk about these ethical problems is not to make the kind of accusations that were made two Congresses ago against the Republican Party about "culture of corruption" because I don't think that's appropriate. I am only pointing out there are issues that have been raised by the watchdogs of this Congress, the press, that should be resolved.

Mr. Speaker, I appreciate your patience and thank you for this evening.

HEALTH CARE REFORM

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2009, the gentleman from New Jersey (Mr. PALLONE) is recognized for 60 minutes.

Mr. PALLONE. Mr. Speaker, I came to the floor this evening to talk about a topic that's very much on the minds of my constituents and many Americans, and that's health care reform. I think that many of us know that President Obama has paid a lot of attention to this. It was a major focus during the campaign. And since he's become President, he's already addressed health care reform in some significant ways, both in the SCHIP, or Children's Health Care expansion legislation, that was passed in the House and the Senate and signed by the President about a month ago, as well as in the economic recovery package, which has several initiatives related to health care reform. I would like to talk a little bit about those tonight, but I'd also like to talk about where we go from here.

The President had a health care summit about 2 weeks ago where he talked about health care reform and outlined what might be done in this Congress. He said he wanted to get the health care reform bill passed and on his desk this year if at all possible. And he's also in his budget outlined some ways of paying for it through cost efficiencies and other means. So this is an

issue that's very much on the mind of the President and certainly on the mind of this Congress, and, also, we have begun to move in the committees of jurisdiction. I happen to chair the Health Subcommittee of the Committee on Energy and Commerce. We have already had 2 weeks of hearings on health care reform, and we are going to continue doing this for the next few weeks and then begin the process of drafting legislation.

Now, I wanted to stress that this is an economic issue because some, not many, but some have said, well, the economy is in bad shape, Congress is so focused on trying to revive the economy, whether it involves the banks or it involves unemployment or involves the economic recovery package in an effort to try to stimulate the economy. Why are we talking about health care reform right now? Can't we delay? And the President and those who attended the health summit that President Obama held a couple of weeks ago, both Democrats and Republicans alike, as well as the business community and the health care providers, the doctors, the hospitals, but, interestingly enough, even some of the people who have opposed significant health care reform in the past were all united in saying that this is the time to do it, that we shouldn't wait. And the reason they say that it's important to do it now even with the recession is because increasingly the health care system gobbles up, if you will, a larger and larger part of our gross national product. It goes up maybe 1 or 2 percent every so many years in terms of the amount of our gross national product that is dedicated to health care. And as those costs escalate, and they escalate exponentially sometimes, the health care inflation, if you will, increasingly makes the system unsustainable and, as a result, has a direct impact on our economy and drags down the economy in many ways. So health care reform is an economic issue. It needs to be done now. And a big factor in the reform is how can we slow the growth, keep down the inflation, take some of the savings that would be generated from cost efficiencies and use it to provide health insurance for everyone? Because the goal, obviously, is to provide health insurance for every American.

Now, in the context of this, the other important aspect that I think came out of the President's health care summit and that he continues to stress is the fact that we want to make these changes in the context of the existing system. We're not looking for radical changes in the way that we deliver health care or the way that people are covered by health insurance. We're not looking towards, for example, the Canadian model or the Western European models where they have a single payer system or perhaps where the government even runs a significant part of

the system. What we want to do is build on what we have, and that really encompasses three areas, three general areas.

One is the existing public health programs like Medicare, Medicaid, SCHIP for children, and there are many others like the Indian health care system or the system for the military. We want to make those betterment. We want to make those more efficient. We want to make sure that they have adequate coverage and that they don't result in too much money having been spent out of pocket by the average American. So that's the first part of this reform. What can be done to improve those existing government programs like Medicare?

The second aspect of this is what can we do to improve employer-sponsored health insurance? Most Americans still get their health insurance through their employer. The number has actually decreased significantly in the last 10 or 20 years as a percentage of Americans who get their health insurance through their employer, but it's still pretty big. It's still certainly a majority of the people who do receive health insurance through their employer. Well, the second part of our health care reform is to make sure that that system is shored up, in other words, so that employers continue to provide coverage for their employees, perhaps even get more employers to do that by giving them some kind of a tax break or a subsidy or looking at other ways of encouraging them to cover their employees.

And then the third aspect of this reform, if you lack at it in sort of a general overview, is to deal with those people that can't get insurance either through an existing government program like Medicare because they're not old enough or they're not kids or they are not poor enough for Medicaid; they can't get insurance through their employer because the employer doesn't provide it at all or because it's too prohibitive in terms of how much they have to contribute; so they try to get health insurance through the individual market, just going out on their own and finding an insurance plan individually through an insurance policy that might cover them, but when they do that, the cost is so overwhelming, they simply can't afford it. So for those individuals, what we have talked about, and, again, this is in discussion and we'd like to get bipartisan support; so I'm just talking about it in general terms, is that we have the government basically work with private health insurance companies to either negotiate a group policy in terms of lower premiums and having a standard policy that provides good coverage and then the government gives those options to individuals who haven't been able to get health insurance through the individual market.

□ 2115

So they now become part of a larger group plan that has some government regulation to bring costs down and significantly brings cost down, because now you are part of a group policy rather than going out in the individual marketplace.

We do that now with Federal employees. Some States, like Massachusetts, have actually implemented this type of system, they call it a health marketplace because you can basically go to the State and buy your insurance through the State government through these private insurance companies.

That's the broad outline of the kind of reform that we are looking at, but there are so many other aspects of it, many of which I would like to discuss further tonight, but I see that I am joined by the gentleman from Arkansas (Mr. SNYDER) who also happens to be a physician.

And if I could say, I didn't tell him I was going to say this, but I will say it that an important part of this health care reform is how to address the concerns of providers, health care professionals. Whether they are physicians, whether they are nurses, whether they are home health care aids, one of the biggest concerns we have right now is that we face a crisis with health care professionals.

For example, with doctors, we are having a hard time getting doctors to go into primary care. A lot of times my constituents will complain that even if they have good health insurance they can't find a primary care doctor, they even go to an emergency room sometimes because they can't find one. We know we have a nursing shortage.

So an important part of this, as the gentleman knows, is health care professionals. I don't know if that's what you want to discuss, but I couldn't help it, because I know that you are a physician.

I yield to the gentleman from Arkansas.

Mr. SNYDER. Thank you, Mr. PALONE. Here we are in Washington DC, the Nation's Capital and there is a good number of people tonight celebrating St. Patrick's Day. And for us, for you and I, it has come down to wearing green ties on the floor of the House tonight talking about health care.

But I was in my office, and I heard you talking, and I appreciate all the work you have done through so many years now talking about this issue.

I just want to share two or three stories, if I might, and they are somewhat personal stories. As you know, 3 months ago my wife had three babies, three baby boys, Wyatt, Sullivan and Aubrey, in addition to our 2-year-old boy, Penn Snyder.

Then shortly after the delivery, about a week later, my wife ended up in the coronary care unit and had an

extended hospitalization of about 11 days. So I remember going back home one day, running back from the hospital and talking to one of my neighbors. She said, "How is everything going?" And I said, "Well, two-thirds of our family of six is in the intensive care unit," because I had three babies in the neonatal care unit and my wife in the coronary care unit. I thought, okay, that's quite a burden for a family.

But my wife has insurance, she is a Methodist minister, she has good insurance through where she has worked. You and I are Federal employees, and we have insurance. We pay for our insurance like all Federal employees do. We have good insurance.

And one of the things I did not worry about during that period was who was going to pay the horrendous cost of the incredibly good care that we can get in this country. So all evening my wife has been sending me pictures of our four boys out on the lawn wearing green outfits with shamrocks on them, I guess just to brag about how nice the weather is in Arkansas this evening. But it brought home, here we are 3 months out and everybody is doing great and she is doing well.

Last week, I met with a young woman that I think if anyone in Congress would meet with, we would say she is just a gifted young woman, a medical student in her mid-20s, in her final year of medical school making decisions about where she is going to do her residency. We got to talking about some of the issues of medical students like they have got too much debt.

We are expecting them to pay for all this in medical school on their own. They are ending up with tremendous six-figure debt coming out of medical school. They don't get paid a lot as residents.

But in the course of the discussion it came out that while she was a medical student she was diagnosed with insulin-dependent diabetes and, of course, she is in a medical school. She knows where good resources are. She is at the best resource in Arkansas, except the health insurance that she has, by being a student, doesn't cover the cost of an insulin pump.

So she doesn't have it, and five shots a day doesn't give her the kind of control that we know helps prevent long-term problems. So here is this wonderful young woman, gifted young woman. She is our future, she is going to be taking care of you and I. And yet we, as a country, are not taking good care of her, even though she is in one of the medical centers of the world.

So I contrasted what happened with my family and me, and we do have health insurance, with what happens with a person who has health insurance, but it's just not the kind of coverage that they need. So I applaud you tonight for talking about this topic. I

hope that we will make the kind of progress that you have been yearning for probably a couple of decades.

In the olden days, I was a family doctor before coming to this job here, and I always remind myself, people always come to me and say, oh, you are a doctor, you understand all this about health policy. I said, no, I used to do sprained ankles, nosebleeds and urinary tract infections. Health policy is that kind of mysterious nebulous world that many, many people don't understand. We are health care providers, we are patients, we are family, we are business people who try to go provide for our employees.

But we have this opportunity right now for all of us, whether we are providers or patients or business people or legislators or business people, to get up to speed on these topics. Because I think there is a real opportunity, with the mood of the country, with the international challenges we face from our economic competitors, that don't have the same kind of health care plan that we do and with the commitment of President Obama and his administration to do something.

I also think this really needs to be worked through with all components of our country. We talk about being across the aisle. Across the aisle is fine, but we need the business community and the providers and the hospitals and the insurance companies and patients and providers and all the advocacy groups and the research advocates to come together as best we can.

This is not going to be a 435-0 vote on whatever we do, but as best we can to listen to each other and move ahead. I think you gave an excellent outline on the kinds of issues that we need to be talking about.

But I believe that it is a very doable challenge that we have. I commend you for talking about this this evening.

Mr. PALLONE. I appreciate you coming down and talking about this, but you made very good points that I just wanted to follow up on briefly.

First of all, I always stress that this is an economic issue, and that's why it's important to do it now. And it does relate to our recovery, if you will, from the recession, and coming back with a strengthened economy.

You mentioned that, because you said that, you know, it has to do with our ability to compete with other countries. You know, you remember at one time, I don't know if it was a year or two ago when some of auto companies—they were in better shape then than they are now—but all three, Ford, GM and Chrysler came down here a couple of years ago and said that we need health care reform, because the bottom line is it's hard for us to compete with foreign car manufacturers when we have most of the burden, or all of the burden, of health care costs on us, whereas that's not true if a car

is made in Canada or if it's made in France or Italy or some other country where the government, you know, takes on the full responsibility—not that we are suggesting that here—but takes on the full responsibilities of those costs. I remember something like \$2,000 of every car that was produced in the country was reflected somehow in paying health care costs. So it is an economic issue.

The other thing that you pointed out is that even if you have health insurance, even if you have good health insurance, you are a big part of this debate. As the cost of health insurance continues to escalate, and health care costs in general continue to escalate way above inflation for everything else, it just becomes unaffordable ultimately for almost everyone. What they end up having is if they have a policy, there is a cutback in what's covered, or they have a higher copay, or the premium goes up, so that overall they are impacted.

I could just use a couple of stories, if I could, because I tend to be a little wonky sometimes and not tell the stories, but I will give you two stories. One is one of my employees who works for me back in New Jersey in my congressional office. He is part of the Federal employee program just like you and I.

He, on two occasions, could not find a primary doctor, a primary care physician, and ended up going to the emergency room for matters that were not of emergency room nature like a strep throat or something like that, which could have been handled by a visit to just a general practitioner.

Well, if someone who essentially has, you know, Blue Cross Blue Shield, Cadillac plan in this case, can't see a general practitioner, who can? I mean, you wonder.

Then the other example, I remember going a couple of years ago to a union organizing effort—well, actually, it wasn't a union organizing effort, the employees were members of the union, the service employees, I think, at a nursing home in my district. But they didn't have any health care coverage. In other words, the employer didn't provide that option, or, if he did, it was so prohibitive they couldn't afford it on their salary. So that was the irony here of people who spend their day and their job taking care of the health care needs of other people, but don't get health insurance themselves.

Now, I wasn't there, you know, to condemn the employer. I mean, I do think that he should have provided coverage. But, you know, the problem is for a lot of the employers now, it's just becoming so prohibitive. So there are so many stories like this, and I appreciate you bringing them up.

Mr. SNYDER. I have seen that myself as a family practice doctor. I never owned a clinic, I worked at other people's clinics and met some wonderful

people. But health care providers are business people too. They have got to pay their employees. Some health care programs don't reimburse as well as they would like.

Some clinics are in places that they may end up giving free care or have a group of patients that are not able to pay so well, and so it's like any business. It can be a strain to find the money for health care. It's one of the challenges we have to have.

You mentioned the economic issue, the one of our ability to compete internationally. I think that's an important one.

I want to also mention the national security issue, and I don't think this one has gotten as much attention as it probably deserves. We have had a lot of discussions about, you know, mental health coverage for our young men and women that come back that we think needed their families. The reality is we are expecting the military health care plan, or military health care programs and the VA health care programs to solve a national problem, which is we do not have a good network of mental health care in any of our States, particularly rural areas. But it's just difficult to find the kinds of providers you want for that kind of care.

I want to go before they go over. We had an issue, when we first started mobilizing our troops to go to Iraq and Afghanistan. When we were mobilizing our reserve component forces, about one-third of our troops were on some kind of a medical hold.

Now, a lot of it was for dental, a lot of it could be taken care of reasonably quickly. But the reality was, we had a situation. These are men and women who have been going on their weekends once a month for their training.

They go every 2 weeks in the summer and yet they are showing up on mobilization orders. We are finding out that they were not, under military standards, medically fit to be mobilized. I think for a lot of us that were on the Armed Services Committee, that was a bit of a wake-up call too.

Because one of the issues for dental, although I was in medical and not dental school, I actually think my teeth are part of the body and should not be divorced from the whole system, because we know it has tremendous ramifications on the overall health. Dental health is part of this overall picture.

And here we have a situation where you make a pretty good argument, our national security efforts were slowed down and more inefficient because of the kind of health care plans that we have.

Now, having good health insurance doesn't necessarily get everybody to the dentist, but I guarantee you, if you don't have good health insurance or dental insurance you are much more likely not to get preventive care. So that's an issue too.

Mr. PALLONE. Well, you raised, again, two very good issues that I would like to briefly comment on.

When I was talking before about the first part of this, which is to upgrade or make more efficient existing government programs like Medicare, SCHIP, Medicaid, you made me think of two aspects of that. One of them was with SCHIP, when we passed that bill that the President signed just a few weeks ago.

Not only did it upgrade, if you will, the children's health initiative by expanding the coverage to maybe another 4 or 5 million kids that were eligible under the SCHIP program, but we just didn't have the money with the States to pay for them.

But it also provided guaranteed dental coverage for the first time. In other words, before that bill was passed under the old SCHIP program, States had the option of covering dental care, but it wasn't required. Now it is.

And that is very important, because I remember going around to a lot of community health centers that just did not have dental coverage. And they would tell me that the biggest problem they had was providing dental coverage and getting dentists and how it affected kids.

We had the one instance with a young person in Maryland that actually died because his teeth weren't properly treated.

□ 2130

Mr. SNYDER. I took my little boy to the State Fair in Arkansas this year. Me and my little boys. Anyway, we're walking down the Midway and a couple were coming the other way in the crowd there, and he was a paraplegic in a wheelchair. And he stopped me. A very polite young man. And he obviously had had some significant health issues that he was dealing with—had been dealing with.

But he said, Man, is there anything you can do to help me with this. And he had an obvious need for dental work. But here's a man you would think would be in the system somehow—our system. But it just pointed out once again the inadequacy of the coverage in the country that can do the best job of solving his problem if we get him to the right person.

I want to bring up another issue, and I think it's one that you have had an interest in, too, and it's the issue of medical education. I think it's one that we will need to pay attention to as we go through the very important democratic process of looking at changing our health care system.

We need to be sure that we recognize at our hospitals that are involved in medical education that it is more inefficient and more expensive to teach while you're doing something. It is much quicker for a doctor, an experienced doctor, to come in and see the patient and get on to the next patient.

We have to recognize that there are additional costs for our teaching institutions. We make allowances for that through some of our government health care programs, probably not as well as we could or should, but it's certainly something that we need to watch to be sure that our teaching institutions, whether it's for nursing or doctors, that we recognize that there is an extra expense and inefficiency for them to provide the kind of quality teaching that takes additional time to sit down, not with the patient, but with the student.

Mr. PALLONE. You're absolutely right. I'm not suggesting that under the rubric of this reform this year that we are going to be able to address all these problems. But it always drives me crazy that more and more, and I don't know what the percentage is, but more and more of our health care professionals are trained overseas, either Americans that go overseas to medical school, or people that we bring here as immigrants, either nurses or doctors, because we are not graduating enough doctors or nurses here in the United States. I don't think that that trend can continue forever.

I give you an example. In my State of New Jersey, we have a University of Medicine in Dentistry that basically has three divisions: Newark, New Brunswick, and down in south Jersey in Stratford. I think total they graduate—I may be off a little—maybe 700, 800 physicians every year in the State of New Jersey. We have what, 8 million people, and we are graduating in our university system only 700 or 800 physicians per year?

Now, sure, a lot of New Jersey physicians go elsewhere for their education. But how can you justify that with a population of 8 million people? I just find more and more that we are relying on doctors and nurses that are trained overseas, and maybe it's a way for us to cut costs because we don't have to pay for their education or training, and the other countries do it.

Somehow it seems to me that that has got to be reversed. And maybe it's going to cost more money, but it just doesn't make sense to me.

Mr. SNYDER. It's particularly a poignant issue for you and me, Mr. PALLONE, as we get older, because a lot of our doctors are going to be retiring and we are expecting these generations coming to take care of this big swell of the aging population as the Baby Boomers retire. So it's really important.

We are not going to get to where we want to go though in this process of doing health care reform and trying to find ways to save money, which we all want to do, if we don't recognize the cost of medical education.

Mr. PALLONE. The other thing that I really want to stress, and I haven't tonight, and you did touch upon it also,

is new ways of doing things. I mean one of the things that President Obama did in this economic recovery package is that he actually put in pots of money that would be used to try to change the way we do things with health care.

So there's a pot of money for prevention programs, there's a pot of money for wellness programs. There are going to be pilot programs through grants for what we call comparative effectiveness, where you would actually look at certain operations or certain procedures or the use of certain drugs to determine whether they are even effective from an economic point of view. It may cost you more, but are you really getting anything for your money.

In addition to that, there's a major initiative—I think it's \$20 billion—for health information technology to upgrade doctors' and hospital offices so that records and other things are done electronically.

It's not just a question of covering everyone or reducing costs, but it's a question of doing things differently, because if a person can go to a general practitioner on a regular basis and get a checkup, then it's a preventive measure that prevents them being hospitalized and costing more money to the government or to the system later.

I mean these really haven't been played out much in this economic recovery package. Most of the talk has been about infrastructure and transportation and all that. There are major changes envisioned in the way we look at health care that the President has taken the leadership on, and the Congress, too, since we passed this bill.

Mr. SNYDER. I think this issue of the health information technology is really important. I notice that since the bill passed and the bill has been increasingly studied by people in the press and policymakers, that the health IT part, the health information technology piece of that bill, is starting to get a lot more attention.

There's been articles in the papers in the last couple of days. Wal-Mart is starting to look at doing some things.

The challenge—I mean, I'm somebody who most of my career was working for doctors who had small practices. And so there have been hospitals that have moved in this direction, large practices have moved in the direction of having a modern electronic medical record.

The problem has been that most doctors are in small offices of maybe one to five or six people. When the studies have been done about what does it take for that kind of an office to move to an electronic medical record, the kind that most patients will want, it takes several months from the time they start until it's where they want to be.

It takes several months to get back to that same level of efficiency as seeing patients; the installation, learning the new ways of doing things, just figuring out how to do things.

Now everyone recognizes, even the ones who don't have it, that ultimately it makes it more efficient, it's safer for their patient, safer for them because no doctors want to make mistakes, nurses don't want to make mistakes. There's nothing worse than having to have a clerk sit there and Xeroxing medical records off because you have got a patient that you have had for 40 years that's moving across the country. You can do it electronically and it just moves things.

I think the money that is in this bill is really going to motivate both physicians, physicians' offices, the folks that manage their practices, but also those kinds of business people out there who say, Wait a minute. Here's a chance to move America forward, to invest in our health care infrastructure and, by the way, create some new jobs, make some money for my business, and do some good things for the American people in anticipation of these changes that I hope will come in our health care system as part of President Obama's proposals. So I think that is very exciting.

I was talking to one of my Republican doctor friends who voted against the bill. I certainly understand his reasons for voting against the economic recovery bill. But I said, I want to know, what do you think about the health information technology piece? He said, Oh, I like that. He might quibble with little details of it.

But we have liked the bill before, as doctors. The problem has been for the last several years is finding the money to pay for it, and the opportunity came along through the stimulus package. And I think this is a real opportunity to be a good investment in the change that our health care system needs. So I find that very exciting.

I want to say a point about prevention. And I recognize that I am probably in the minority on this view. My own view is that we ought to not sell preventive measures, which I think are so important, but I think we ought to not sell them or oversell them as ways to save dramatic amounts of money.

My own view is that prevention is a quality of life issue. If I can work with a patient when they're 25 years old to get them to stop smoking, I know, I know their quality of life is going to be better. I know there are diseases they are not going to get when they quit smoking or if they never start smoking because of good health education programs when they're 16, 17, and 18.

Now, where I have a problem with this prevention-saves-money argument is if somebody lives to be 90, I know at some point they are going to need health care. But, God bless them, that is a good problem to have. I would so much rather deal with the infirmities of a 90-year old than the emphysema and COPD and heart disease of a 45-year old who smoked for 25 years, since they were 20.

So I have a little different view on that. I think you can find arguments on both sides. But I don't think that we should ever be defensive about saying, You know, some preventive things cost money. But the quality of life, if you can keep a family from losing a family member from cancer, if you can cut down the number of kids that go to emergency rooms because their parents smoke, or whatever it is, it's a quality of life issue, and that can really turn into additional years of life and the pursuit of happiness for that family in this great country.

So I'm pleased that prevention is part of this.

Mr. PALLONE. I appreciate what you're saying. I think that in fact when we had the health care summit, in maybe a little different context President Obama actually said, Look, we do need additional money if we're going to have health care reform and provide people quality health care and cover everyone, because a lot of that is going to have to be upfront.

In other words, if you talk about new ways of doing things, whether it's health information technology or preventive care, whatever, a lot of times you do need money upfront to pay for some of it. But then in the long run you do actually save money.

So I agree with you that the better quality care is ultimately more important. But it can over the long-term save money.

I use the example with one of my community health centers where I went. An incredible part of the building was devoted to keeping the medical records. I can't say exactly whether it was a third of the building or 25 percent of the building.

But I looked at where they stored all these handwritten or typed records because they didn't have them on a computer, and I said, Gee, if we could just get—I don't know how much it will cost so I'll pick a number—\$100,000 dollars to put all these records into the computer, you'd now have all this space available that you're not really utilizing right now.

So maybe upfront it's going to cost you \$100,000, but in the long run you're saving money.

I think you can use the primary care doctors. I use the example of my staff person who goes to the emergency room because he can't get a primary care physician. Primary care physicians say we don't have enough of a reimbursement rate. If you gave us a higher reimbursement rate under Medicare, there would be more primary care physicians.

I don't know if that is necessarily true, but assuming it's true, it is going to cost you more money upfront. But, in the long run, if the person goes to the doctor when they have strep throat rather than going to the emergency room, do you save money. But it's oftentimes hard to actually put a dollar

figure on how prevention saves you money.

Mr. SNYDER. This will be a true confession here tonight about a mistake that I made practicing medicine one time. It was about 15 years ago, I had a young boy, I think he was about 7 or 8, kind of a quiet boy, brought in by his grandmother. And he was there for a cold or something. I dealt with his cold or ear infection.

Then his grandmother started talking about some behavioral stuff he was having. We talked about it for a few minutes, and I didn't have much to offer.

It was like about 2 months later I was reading an article about Tourette's syndrome. And I thought, That's what that little boy had.

Well, the clinic I worked at had a wall about as big as the wall behind the Speaker here tonight that was all handwritten medical records. One of my nurses aids and I—we did it on Saturday because we were slow enough when we worked on Saturday, we could do this—we began systematically going through every one of those handwritten charts to see if we could find that little boy because I was going to call his family and say, Hey, I think I figured what you were talking about with this little boy. The reality is in Tourette's syndrome a lot of time they are underdiagnosed and, unfortunately for the family, it takes a while to sort it out sometimes.

We never did find that chart even though we systematically went through every handwritten chart. Well, if we had had a computer system we would have been able to pull up the names of appointments seen in the last period of time or probably could have pulled it up by approximate birth date.

There's so many tools that a good health information technology system gives you for the benefit of patients.

□ 2145

Efficiency of doctors, more prompt payment of doctors, less mistakes, but ultimately it is for the benefit of patients; and I think that is what you were talking about, looking ahead to doing things differently, doing things better. It is not just figuring out how to pay for the kind of care we are getting now, but it is better care in the future as part of this. And I think that is important.

Mr. PALLONE. I appreciate your input on all this. I know you said you haven't practiced for a while, but there is no question that having a physician who has had experience in a lot of this makes a difference in terms of relating what we have to do.

Mr. SNYDER. It is interesting, we have a good number of physicians in the House now.

Mr. PALLONE. It wasn't true when we first started, but it is now.

Mr. SNYDER. Physicians have figured out more and more, number one,

that this Nation wants us to do something about health care. And I always tell my doctor friends, we can either do it with you, or we can do it to you. And most doctors have figured out they would like to have it done with them.

The other thing, though, is, and I have clearly seen this change in the time I have been in medicine, doctors have figured out that the programs that help people are the programs that help doctors. So they are here to help make those programs better. Now, we may have philosophical differences about how to get there and how to pay for it, but we recognize that there is a role for government in trying to make sure that whatever that number is, 47 million, 48 million people who don't have health insurance over a year's time actually are able to participate in this system that we call American health care.

I want to ask about another topic, Mr. PALLONE, medical research. We had a pretty good run there for a time under the leadership of Speaker Gingrich and President Clinton in terms of increasing the research dollars available for NIH. My own view of the last administration over the last 8 years has been very poor with regard to research, all kinds of research. There are, and I am talking now specifically about medical research, medical research funds in a variety of different budgets, from the military budget, veterans budget, NIH, agriculture budget, Department of Agriculture, they have research. Well, this is another place that is part of the kind of quality care we want for all of us. We need to be investing in that kind of research, because the reality is medical jobs are good jobs.

In fact, when you look at the numbers, as people have been losing jobs, the thing that stands out the most in terms of who is gaining right now is health care. It is kind of counter-cyclical. There are medical jobs out there that don't get filled that people will look at. Now, we need to do I think a better job of helping nursing home aides get paid and all. But there is a tremendous opportunity to create the kind of technology and new jobs and new treatments that this country can be selling all over the world, and we need to be the leaders in a lot of these things.

I think the whole issue of stem cells has gotten a lot of attention. Regardless of where you come down philosophically on the issue of stem-cell research, there is a ton of things out there that would benefit from more research dollars, and it has to be part of this picture, too. You mentioned the comparative effectiveness. That is probably too fancy a name. It kind of got bad-mouthed in some of the media when that bill came out. The reality is, why wouldn't we want to see what works the best for the least amount of cost? We would do that as a family.

If I go in to my doctor and he said, here is my prescription, it is \$180. And I say, well, is there anything better? Oh, yeah, there is a generic. It is like \$14. Why don't I take the generic for \$14? I mean, why not go for something that would work as well, perhaps even better, but be dramatically less expensive? I mean, we all are responsible as a country for these health care plans and making sure we pay for things. And somehow the idea that we would actually want to pay attention to what things cost and what works and what doesn't work, and are we prescribing things that we don't really need? I mean, that is just common sense, and I think families want that. They don't want us to prescribe things that are not effective or there could be something cheaper that would work just as well. So I think that is part of this picture.

Maybe I am making the universe bigger than it needs to as we are talking about health care and health care coverage, but it is all part of this investment in our future. And medical researchers will do better with a health information technology system. Those people who are responsible for paying the bills, who are processing claims will do better if that health IT system is more efficient. All this stuff builds on each other. Ultimately, we want to lead to better coverage for the best price that we can give.

Mr. PALLONE. You make such a good opinion. And, again, we are always talking about the budget. So much of the discussion here is about the spending in the economic recovery package or the spending in the budget. The fact of the matter is that the economic recovery package had a significant amount of money for medical research at NIH and at other institutions, and the President's budget also significantly increases funding for medical research. And I remember that, actually—and I am not trying to be that partisan tonight. But some of the Republicans did actually criticize the economic recovery package because it had that medical research money in it, because they said, well, how is that a stimulus?

The fact of the matter is, it is a tremendous stimulus; because when you give money to medical research, it is always matched either by the university or by private sources of funding, pharmaceuticals, whatever. And if you look at what it generates, it generates a lot more. For every one job that is generated through the public money, there are two or three or more that are generated through the private money, and it is actually a tremendous stimulus. So it makes sense to include it in an economic recovery package.

The fact of the matter is that in the beginning of President Bush's administration, he actually did increase funding significantly for NIH and medical

research, but then gradually lessened and lessened it to the point where it was an actual cut. And I got particularly annoyed. I probably shouldn't even mention it, but I am going to, because I heard on one of the talk shows that they were picking out pieces of the research in the economic recovery package and criticizing it. Like, I think there was money for research on venereal disease and somebody was saying on one of the talk shows, why are we spending money on that? There is an epidemic in some of these venereal diseases and they have become resistant to a lot of the drugs and things that have been traditionally used. So why not spend money on research?

You can pick these things apart, but the bottom line is that if you have problems and you are trying to address the diseases, you have got to spend some money on research. And the few Federal dollars capture private and other money and actually do a lot towards not only finding a cure but creating jobs.

Mr. SNYDER. We also have learned in a very difficult way for a lot of American families the challenges of what happens to our men and women in uniform overseas with the traumatic brain injury and some of the kinds of injuries that have occurred. And what happens in every war is, sadly, we have opportunities to learn new things and get better at treating these. And there are some real opportunities of helping these families in terms of looking at traumatic brain injury and how we respond to them.

Looking over the long run, we are just a few years into this thing, what impact will this have on their lives 10 years and 20 years and 30 years and 40 years from now? And what opportunities will there be for them 10 and 20 and 30 and 40 years from now depending on what we do in terms of investing in research? And we have had these discussions before, both in the Armed Services Committee and the Veterans Services Committee. There are research projects out there that can be funded if we have adequate funding for them. And that is not part of civilian health care for them; that is part of our responsibility as a government to be sure that we adequately fund medical research. And a lot of it is going to be done in our civilian facilities, also, whether it is medical schools or veterans hospitals. The research needs to go on, and it needs to be well funded.

Mr. PALLONE. I wanted to mention one last thing, if I could, because I don't know how much time we have left.

But when you were talking about doctors, when we had the health care summit with the President a couple weeks ago, there were many things that struck me, but one thing that struck me was there were so many groups there represented demanding

health care reform now that 15 years ago, whenever it was that President Clinton and Mrs. Clinton came up with their health care initiative, and of course it failed. But many of the groups that opposed the initiative then were present at the summit saying we have to do something. And I don't know that the doctors were in that category, but all the doctor groups were represented at the summit and they were all saying we have got to do this, we have got to do this now. The trade group from the health insurance companies, which opposed and actually ran the ads against the Clinton plan 15 years ago were there saying, we are here because we want to participate and we need health care reform. The small business representatives, the National Federation of Independent Businesses were there and said the same thing: We were against the Clinton reform 15 years ago. We are for what you are saying now, because we know that something has to be done.

Mr. SNYDER. If I might intervene for a minute. I think it is perfectly consistent for somebody to have been opposed to the plan in 1993 and be for something now. There is a broad spectrum of ideas out there. I am hoping that, and I think President Clinton would acknowledge, that we have learned from that experience 15 years ago, 16 years ago.

So I think that is a very important point you make, because we don't know what the ultimate product is going to be; but, hopefully, it is going to be something that will be shaped so you won't have somebody out there doing a huge media bite trying to kill a plan when the country is trying to come together to make something work. And I am not sure if everybody will be happy, but I am hoping that almost everybody can live with the ultimate result, because we all come from different perspectives.

Mr. PALLONE. I think the other difference is that we are trying to make this bipartisan. We are trying to have it come from the House and the Senate. In other words, we are not actually getting something from the Obama administration and saying, this is what we want you to do, this is what we want you to pay us. We will give you some principles, but we want this thrashed out in the House, in the Senate, with Democrats and with Republicans, going through the committees and all that.

And I did want to mention, because I am not sure if I did, that we are really determined to do this this year. I mean, the timetable essentially would be that sometime between now and the August recess that we would actually pass bills that would come to the floor of the House and come to the floor of the Senate, and then in September, October, in the fall we would try to work out the differences between the House

and the Senate and send something to the President by the end of the year. I know it sounds ambitious, but I am optimistic.

I really think, when I talk to Members, we had a hearing today and our ranking member, the Republican, Mr. BARTON from Texas, said: I want you to know that I want this done, and I am going to participate in this and the Republicans are going to participate in this. So the atmosphere is very good in terms of trying to work out something that can pass.

Mr. SNYDER. May I close out my contribution here this evening. I want to tell you another story. And I appreciate your talking about this evening.

I began by talking about my four little boys who are age 3 months, three of them are 3 months and one is 2 years old, and how much we benefited not only from the quality of health care we had but also from the quality insurance plans that my wife and I had.

Over the weekend, Senator BLANCHE LINCOLN had an event in Little Rock, and Vice President BIDEN was there and her family was there and there were a lot of people there. I was looking for her grandmother-in-law. Her grandmother-in-law, her husband's grandmother, is Mrs. Ruth Lincoln. Mrs. Ruth Lincoln is 111 years old. She is delightful. And I thought, well, surely she would be here. Well, she had fallen about a month ago and broke a bone I think in her pelvis. And I thought about that and felt badly about that, and then I thought later, well, of course I assumed she is going to bounce back from that, get healed up, and I am going to see her again. On her birthday she always does something special like cross the Arkansas River on a bridge. She always does a very special thing. And when you talk to her, she talks about how she loves growing old. She has loved growing old at age 111. And I think in a way that is what we aspire to through this health care reform. We want everyone to say, whether they are young with young children who benefit from our health care system, or people who go through the very frail years, that throughout they can say that I have loved growing old. Now, maybe we won't live to be 111, but if we all do this right, we will increase the chances of more people being able to have those kinds of long, long years.

I applaud you once again for spending this time this evening.

Mr. PALLONE. I think I am going to end with that, because I like that ending of our hour this evening.

Mr. Speaker, I yield back the balance of my time.

HIDDEN TAXES

The SPEAKER pro tempore (Mr. FOSTER). Under the Speaker's announced policy of January 6, 2009, the gentleman from Louisiana (Mr. SCALISE) is recognized for 60 minutes.

□ 2200

Mr. SCALISE. Mr. Speaker, I appreciate the opportunity to address the House and talk about the economic crisis that our country is facing and also to go through and walk through some of the things that got us here, because as you talk to Americans all around the country, they are frustrated. They realize the problems that we are facing in our economy. But then they start to see a lot of these proposals that are coming out of Washington, and they don't see how any of these relate to the problems that we are facing today and how they are going to get our economy and our country back on track.

I have got to say that there are a lot of us here that share that same frustration and share that same feeling that Washington still doesn't get the message of what is happening out there in the country and what it is going to take to get the economy back on track.

I think what really underscored it in the last few weeks was when the President released his budget, which really shows the first outline of which direction President Obama wants to take our country and how he plans on dealing with these problems that our country faces. I think what most people have now realized is that the President's budget spends too much money. It taxes too much, and it leaves too much debt behind for our children and grandchildren.

Really, if you look at that in a theme, it really underscores how it misses the point of what is happening out there in the country, the fact that people all across the Nation are tightening their belts. They realize that there are tough economic times out there, and they are dealing with it in each individual family. You hear a lot about the problems with the banking industry. And we will talk a little bit about the banking industry and really how that problem still has not been addressed by this President or by his budget director or by his Treasury Secretary and the fact that a lot of the problems facing our economy still go back to a tightened credit market and a failure in the banking system that we can address and there are ways to address it. And we will talk about that too.

But unfortunately, rather than focusing on those areas, those very narrow areas that can get our economy back on track and get small businesses creating jobs again—the ability is there for us to do that—unfortunately, the budget that the President submitted goes in the opposite direction. At that point, a lot of us who really care about this country and really feel that we have got to make sure we chart the right course have been standing up and saying that there is a better way to do this.

Some people might want to just criticize people who don't just go along and

blindly vote “yes.” And we have seen so many bad policies coming from people who are just blindly voting for the next thing that is laid on this floor here in the House of Representatives. Yet, there is no accountability and there are no actual benchmarks to get us to where we need to be. There is a better way. And people know this is the greatest country, with all of our flaws, the greatest country in the history of the world. And we know we can get to a better place. Yet, as we stand here tonight, we wonder why we do this. Why do we fight to make this a better country? A lot of it is because we want to leave behind a better place than we have today.

Tonight is a special night because tonight is my daughter's second birthday. I'm here in Washington, and unfortunately, I cannot be with her, and I want to say “happy birthday” to Madison. But I want to be here to fight to make it a better country so that my daughter, and everybody else's daughter and son, has a better place, that they can still pursue that American Dream, that dream that makes people come here from all across the world, that they would give up everything to go beneath the Statute of Liberty and look up and see what that represents.

That vision of America is still out there. And it is still in the hearts of people all across this country. But I think for too many people, they don't see that same vision, that same spirit here in this Chamber dealing with these problems. We have been here for 3 days now as we have come back from the break, and all that has been brought up by the Speaker has been votes on post offices and ceremonial resolutions. People want us to be here dealing with these tough issues. People want us to be here tonight, late at night and going into the midnight hour dealing with these tough issues, because they know we can get through this. And they know there is a better way. And that is what we are going to be talking about tonight.

We have some other people that are going to talk with us. But first, I want to talk about some other parts of the President's budget that have caused so much concern for people across the country. I want to talk about how much money it spends. This budget gives a record deficit of \$1.7 trillion in deficit spending this year. It is an amount that is unseen in past budgets, an amount that none of us think is a tolerable level. This is all money we don't have, money that will be left to our children and grandchildren to have to pay off. But if they also look—and this is what is sending shock waves throughout the rest of this country now—as people start to read the fine print, they are looking at these tax increases. These are tax increases that President Obama submitted in his own budget. And if you look here, he is pro-

jecting to raise \$1.4 trillion in new taxes at a time when our economy is in such disarray. We are in a recession, possibly heading toward a depression, because of some of the decisions being made here. We have got the ability to stop that from happening. But you surely don't fix tough economic times by adding \$1.4 trillion in new taxes on to the backs of hardworking people, small businesses.

Look at these tax increases, \$636 billion would fall on to the backs of small businesses in our country, the people who create 70 percent of the jobs in our country. Then look at the cap-and-trade legislation. This is a tax on energy. There is actually an energy tax in the President's budget. And while he said here on this floor just a few weeks ago that 95 percent of the people in this country would not be paying a dime in new taxes, what they failed to mention was the next day when he submitted his budget, he had a \$646 billion energy tax which is paid for not by those rich people in the top 2 percent, but paid for by every family out there who actually uses energy. And that is going to be roughly a \$1,300 tax on everybody who uses power.

So we have laid out a little bit of a framework of what is in this President's budget, what causes us concern and how there is a better way. With that I want to introduce my friend from Georgia (Mr. WESTMORELAND) to also share some of his thoughts on this.

Mr. WESTMORELAND. I want to thank my friend from Louisiana for hosting this hour tonight and giving us a time to come talk to each other and the American people to give them an idea and maybe be able to connect some of the dots of what has been going on in this Chamber for the last 50-plus days of the new administration that we have.

What we have seen in the gentleman's chart where it talks about small business and investors, \$636 billion in tax increases on small business. And with that, a small business, a Subchapter S, if they make over \$250,000—and if you're in business, you need to make that so you can reinvest in your company—they are taxed as individuals. So, this is a big tax increase. And the interesting part is that yesterday, President Obama came out with a \$15 billion small business loan program which, if my figures are correct, is about 2.5 percent of the amount that he is going to increase the taxes on small business. Then the other startling thing when we started looking at this \$15 billion—and I want to commend the President for doing the \$15 billion and trying to help small businesses after he is burying them in this additional tax burden—but only 5 percent of the small businesses, only 5 percent of the small businesses get their loans from the SBA. So it means the other 95 percent get their loans from their community banks, their local banks.

As the gentleman from Louisiana might remember, one of the reasons that this huge stimulus package or bank bailout bill, there has been so many of them I get confused, but one of the reasons the bank bailout bill was done was to unfreeze the credit market. Well, within 2 days after the bill passed in both Chambers, then-Secretary Paulson took a different track and decided to bail out some of these investment houses on Wall Street. And we can see how that has turned out. But credit was never unfrozen. And so these small businesses are hurting because their community banks can't loan them the money that it takes to make their payroll or do new investment or really just keep their business running.

So what we see is that now, all of a sudden, the government is saying, well, we will make this loan available to you through the SBA. What that does is, it says, we will decide who gets the loans.

In other words, it gives the government the ability to pick the winners and losers of who is going to be able to get these government-backed small business loans. It takes the ability away from these community banks. They don't have the money to lend as a result of the mark-to-market rules and the other rules that have come down because of the catastrophe that we have had on Wall Street. Their assets, their loanable product and their cash reserves have gone down because of the mark-to-market rules. And so they don't have the money to loan to these small businesses in their own community.

If you have a nail shop or a barber shop or an auto repair facility, that community banker knows that community and your ability to repay that loan better than anybody else. But now you're going to have to jump through all the hoops and the red tape that the government has in trying to get an SBA loan. And they will be the ones to pick the winners and losers, rather than the people in the community itself.

So I think you have to look at the big picture of what all of this means. We look at the charitable contributions. If you make over \$250,000 a year, which these small business guys will, you can only deduct your charitable contributions or your home mortgage up to 28 percent of your taxable income. Well, what does that mean? Well, the government said, well, the reason we are doing that is because we had money for the charities in the stimulus bill. So what happens? Now, the government is picking the winners and the losers in the charity business. They are not wanting us to be able to take our money and do the things that we normally did with it. We gave to the United Way or to our church or to an overseas ministry or wherever it was, where we wanted our money to go. Now

the government is saying, "no, we are going to limit your ability to do that. We will take care of that for you. We will take your tax dollars and we will reward and give to the charities that we want to give to."

So you can see the gentleman from Louisiana has greatly explained the cap-and-trade which is going to be a tax on everybody that uses energy. I don't think the American people are going to continue to buy that 95 percent of the people are not going to have a tax increase. That is a misrepresentation. Because if we do the cap-and-trade, everybody that uses energy—and as far as I know, everybody in this country uses some sort of energy—is going to pay more for that energy. That is a direct tax increase.

So I want to thank the gentleman for hosting this Special Order. And I will sit down now and let some of your other friends and my friends get up and talk and continue the conversation.

Mr. SCALISE. Reclaiming my time. Again, I want to thank the gentleman from Georgia for talking on that point about that cap-and-trade tax. And interestingly, about 1 year ago, Peter Orszag was the head of the Office of Management and Budget. He is actually now the President's budget director. The person who today is the President's budget director said that this tax, this energy tax, while decreasing emissions would also impose costs on the economy. Much of those costs will be passed along to the consumers in the form of higher prices for energy and energy-intensive goods.

So what the President's own budget director said was, this energy tax that he has proposed in his budget will actually increase the cost of energy for every American family in this country. But it also will increase the cost of every energy-intensive good, meaning any time you go to fill up your tank at the gas station, you're going to be paying more in energy taxes. Any time you go and buy goods at the grocery store you will pay more because those products you buy, the food you buy, the can of soup you buy, they are trucked in from somewhere or it was shipped in on rail. All of those have costs. And those costs, as the President's budget director said, will be passed on to the consumer.

In fact, we have got estimates that right here, according to an analysis by MIT researchers, the total energy bill for the average American household will increase by up to \$3,128 per year based on Congressional Budget Office testimony. So this energy tax right here, this \$646 billion that is in the President's budget, we are not talking about some bill that somebody filed that is never going to see the light of day. This has already been filed just 2 weeks ago in the President's budget, a day after he said here on this House floor that no American family that

makes less than \$250,000 will pay a dime. And the key was a dime. And I guess he was right. He won't pay a dime. According to the Congressional Budget Office, you will pay \$3,128 in new energy taxes.

And all of this is coming at a time when our economy is in such a troubled period. We are in a recession. We are trying to get out. And you surely don't get out by throwing \$1.4 trillion of new taxes on to the backs of every small business and every consumer of energy, every family in America. We especially want to talk about freeing up these credit markets and getting our banking system working, because that is the problem that got us here in the first place. Some people want to say that there are no alternatives on the table, and there is one way, or "my way or the highway," and it is just their approach or nobody else's. And maybe they don't want to listen to other opinions. And that is unfortunate.

□ 2215

We live in a democracy, and that means that we exchange ideas and not everybody has a monopoly on great ideas. In fact, with 435 people in this body, you will get some good ideas, and some bad ideas too. I think some of them we have just talked about. But there are good ideas on the table.

One idea still on the table, going back to the first financial bailout, H.R. 7223, this is a bill that was filed, almost a hundred-page bill. I was a cosponsor of this bill. This was our alternative bill to the first financial bailout, about 6 months ago, when that first \$700 billion bailout passed which many of us said was the wrong approach to fixing the financial crisis in our country. There was definitely a financial crisis. There still is a financial crisis.

The problem is now the taxpayers are on the hook for \$700 billion because the approach they used was to just throw taxpayer money at the problem and not go to the root and say why are banks not lending to banks? Why is it that people who have good credit ratings are having trouble getting loans?

So what we did was we put an alternative on the table. It is kind of an interesting point now that we look at the problems going on with AIG and the fact that we see these egregious bonuses being paid to people, who in many cases were people who ran their company into the ground. The folks over at AIG who were getting \$165 million in bonuses, they actually got \$173 billion in taxpayer-funded bailouts from that financial bailout. In fact, they were the very people, many of these, who ran that company into the ground.

So why is that a bad approach? I think the American public that is looking at this knows it is a bad approach. They are offended that their tax dollars, their hard-earned tax dollars and

money that we don't have, money that our children and grandchildren are going to have to pay, are going to give executives of a failed company up to \$6.5 million each in bonuses during these tough times.

So this bill that we filed that is still out there, this is still a solid alternative that I would suggest would help address and fix our economic problems, H.R. 7223, from the 110th Congress.

What it did basically was set up a workout, not a bailout. It allowed and made these companies who ran their companies into the groundwork, actually go and work themselves out by going in and establishing a price for mortgage-backed securities, which is the problem which started all of this. A lot of the problems with subprime mortgages and then Fannie and Freddie giving loans to people who didn't have the ability to pay, all those things that still have not been reformed that need to be reformed, this bill actually addressed that problem, but it went one step further.

My friend from Georgia talked about the mark-to-market accounting rule. Our bill addresses that and suspends it. There is a rule out there, it is a financial accounting rule, that many bank executives will tell you is currently forcing a lot of these mortgaged-backed securities to be valued at zero dollars, even though they have some value. Nobody knows what the value is today. But because the value is unknown, they have to literally mark them down to almost zero which means they have no ability to loan to anybody. By suspending that accounting rule alone, you would free up liquidity in the markets.

One other change we were going to make that still is on the table today, it is still in this proposal and it is called repatriation.

Back in 2005, Congress actually for 1 year lowered the capital gains rates for U.S. companies who have foreign profits. Believe it or not, there are still U.S. companies that are making profits. And some of them work and have businesses in other countries. Unfortunately, not enough of them bring those profits back to America to help the American economy. They leave them in foreign countries because they are taxed. Today, they are taxed on bringing that money back.

or 1 year they tried suspending that tax. They lowered it from 35 percent down to 5 percent. You know what happened, \$300 billion of money came into our economy because those U.S. companies said we want to bring that money back and help the U.S. economy because the Federal Government is not going to tax us at such a high rate.

That worked so well, you know what happened when the Democrats took control of Congress in 2006, they revoked that law. So the tax went back up, and you know what happened. Be-

cause the tax went up, those profits from those U.S. companies went back overseas. And they are still sitting in foreign banks helping foreign countries. But they could be here helping our country. Not taxpayer money, \$300 billion by that one change could be here helping our country get back on track.

These are just a few examples of what is in the alternative bill that was filed over 6 months ago that is still an alternative and we still offer up to the President. If President Obama really wants to get serious about addressing the banking problem, this is one way to go, to not put taxpayers on the hook, but actually use the markets and use the people that created this mess, and then use some smart changes that have been proven over time to put real liquidity back in the marketplace.

I am joined by one of our bright new shining stars, a freshman Member from Utah, Mr. CHAFFETZ.

Mr. CHAFFETZ. I thank the good Member for allowing me to join in this conversation because I think the American people are so frustrated. I am so frustrated. Here we have the greatest opportunity, the greatest country on the face of the planet, and yet we see this excessive spending and these taxes that will continue to grow and take away our liberty and freedom and ability to grow as families and as people. And that borrows so much.

I think inherently the American people know that we can no longer afford to run this country on a credit card. I was touched by the mention of your daughter, Madison, and being 2 years old.

As a father, I have three kids at home, and one of the hardest things about being in the House of Representatives is being away from your family at night. To do the work and argue about the issues of the day is a great privilege, but it is so hard to be away from that family. And you look into the eyes of your daughter or of your son, or you have a loved one who has maybe lost a job, or a friend who has lost a job or has a business that is struggling. I have people in my own community who had home building businesses, and they have literally fallen apart.

The question is how are we going to solve these problems? How are we going to move this country forward? There are some on the Democrat side of the aisle who will argue that only government can solve these problems. It is not only government. In fact, I would argue it is only the American people that will actually go forward and solve and create and build this country back up to where it should be, as the economic and military leader in the world. That is done through entrepreneurs. It is done through building businesses.

I was so satisfied. Actually, I felt a bit of vindication when I saw the Presi-

dent stand up and make the case that I have been making for a long, long time: that small businesses are the ones that are going to build jobs in this country, that small businesses are the drivers of this economy.

And yet, that was the same argument that I used to say look, the trillions of dollars that are going to be set aside for stimulus and bailouts and all of that, isn't going to drive our economy forward. The last stimulus bill that we had, the Republicans in the House of Representatives united. Not one of them voted in favor of it. That was because it expanded 106 Federal programs, 33 new programs and a whole host of other programs, that got money sprinkled across it, but it did nothing for the Madisons of the world, for my son, Max, and Ellis and Kate, and for Burtis Bills, the mayor of Payson, and even my brother's father-in-law, Bob Johnson of Topeka, Kansas, who owns a transmission shop. I had to talk to these people and look them in the eye and convey to them that we weren't doing anything to help them. We were growing government, we weren't growing jobs. We were building all-time, record-high debt, debt that ultimately has to be paid.

So I look at what we are doing in this government, the amount of spending and the amount of taxes and the amount of borrowing, and say it is just too much. If we are truly going to grow the United States of America, it is going to be that entrepreneur. It is going to be that small business owner that is going to propel this country forward.

Mr. SCALISE. I appreciate the passion and the examples that my friend from Utah gives of real people out there in this country and the things that they are dealing with. And, of course, the way that they deal with it is a lot different than unfortunately the way it is not being dealt with here in Washington. And especially when we know there are proven ways to address these problems.

A lot of us kind of get a little irritated when we hear people complaining that the Republicans were in power and they did this and that so that makes it okay to do what they are doing today.

If we talk about spending, and let's talk about the spending that has gone on. There is a lot of blame that can go around. I sure don't support the deficit spending that has been going on, but what we are seeing today, the deficit spending we are seeing today is historic. It is record levels. While some of our friends may want to criticize spending that had been done in the past, the spending that is going on today makes people in the past look like amateurs on spending. It is levels we have never seen before.

Here is a chart that shows deficits over the last 4 years, and it is \$400 billion, trickling down below \$200 billion

in 2007, definitely going in the right direction. We want to have surpluses and we want to run a balanced budget. I am a cosponsor of a bill to balance the Federal budget. We should require a balanced budget, but at least the direction was trending downward. And then we see the 2010 budget that was just submitted goes to \$1.7 trillion in deficit spending in 1 year alone. And those record numbers continue on for years. In fact, the first 4 years of the President's budget would be over a 50 percent increase in the national debt.

In those 4 years combined with every budget since President George Washington, so if you take George Washington and go through President Bush, and in just 4 years, President Obama will add 50 percent to the national debt because of this level of spending. This is again money our children and our grandchildren will have to inherit. In fact, the budget, that spending bill, and some people called it a stimulus bill that passed just a few weeks ago, the \$800 billion spending bill that ended up spending billions of dollars on a high-speed rail from California to Las Vegas, and research for a field mouse, and massive growth of government, that one bill alone added over \$3,000 in new national debt, \$3,000 for every man, woman and child in this country.

People say what did my State get for it? What is my community going to get for it? I think as they look, they will realize over the next few months, as they see more of these egregious spending programs that came out of that bill, they are going to realize that they didn't get \$3,000 worth out of that bill.

That is why when we talk about the entrepreneurial spirit, and I think my friend from Texas has some good insights on that, and great entrepreneurs and the fact that government can encourage a way out of this problem, but government spending cannot solve this problem. We can look back to the Great Depression, and we will talk about that and the mistakes made during the Great Depression.

Mr. CARTER. I would like to point out something that seems to be a mistake that is made by a lot of people.

The 2008 budget which would be argued here on the floor of the House was Bush's budget. The reality of spending, we up here, this House of Representatives has responsibilities as well as rights. And the real world is the President proposes a budget, but the Congress adopts the budget. It is the Congress's budget when we get through with it.

So the 2008 budget that shows the increase over 2007 fairly substantially is the Congress's budget. You are not seeing George Bush's budget, you are seeing the Democrat-controlled Congress's budget in 2008.

Now their President has proposed, the Democratic Party's President has proposed a 2009 budget that goes off the

charts. It is kind of interesting because we hear, "I will reduce the budget by 50 percent." So let's see, if you raise the budget 300 percent and you reduce it 150 percent, you have reduced it 50 percent. We are still 150 percent over where you were.

□ 2230

And that chart exactly shows what we're talking about. If you look at those lines, we're taking the President at his word, as we go all the way down here, what is that last one? 2018?

Mr. SCALISE. If I can reclaim my time for a moment, and then I will yield back to my friend from Texas. What you're talking about right here in 2008, and this is when the Democratic-controlled Congress ramped up that spending. But even here, it is below \$600 billion. And then in the first year of President Obama's budget, it goes up to \$1.7 trillion in deficits. This isn't the size of the budget—the budget is over \$3.5 trillion—this is just the size of the deficit. And then if you look, by the fourth year of the President's budget, it is still roughly \$600 billion. So it's higher in his fourth year than the first budget that he inherited.

And so, while he would say he is reducing it by 50 percent, it is actually larger than the first budget that he inherited because his first budget adds over \$1.7 trillion in deficit spending.

And I will yield back.

Mr. CARTER. That's right. That is my whole point. That chart clearly shows you that if your criticism was of the Bush administration for deficit spending—which we heard a lot of noise about that—then if you look at those red columns, none of those drops down to even equal with the largest Republican-led Congress deficit. Okay. They are almost double the Republican-led Congress' deficit all the way to the end of your chart.

But yes, they do reduce that big line by more than 50 percent. If you want to talk about voodoo chart drawing, that's voodoo chart drawing. That's saying, if I jack it up to \$3.6 trillion, then, yes, I can drop this thing big time down the road, but you are still way over what you were dealing with back in 2004. So this whole concept of trying to smoke and mirrors the world, it's time to stop all that.

There is a young man I was just talking to out in the hall who has a little business, and he wants to go out and expand his little business. And his world is this, that he looks at it, he gets taxed as ordinary income even though he's a small business, and he says to himself, why should I stick my neck out for another couple hundred thousand dollars in debt to try to expand my business when all I'm going to do is get myself up into a tax bracket that I'm going to be going downhill?

So, that's exactly the example. Or a young man I talked to, walked up to

me at an event in Killeen, Texas, and he said, you know, my wife and I started a business 5 years ago. He said, we have taken this idea up to a business that employs 40 people. We are now at a point where we have to make a decision; do we expand our business by borrowing about a half a million dollars, indebting ourselves as a couple, and have the potential to maybe employ 80 people—which, gosh, isn't that what we want? Isn't that what we're talking about, creating jobs? He said, but we look at it, and we see what is coming down with this cap-and-trade and the cost that that's going to put on me, when we see what's coming down on the tax increase for people earning over \$250,000, and we're concerned that will put such a burden upon us that we might actually lose this business. So now we're looking at it and saying, maybe we should shore up what we've got and lay off a few people to be sound in hopes that somebody will get sanity back in the taxing of our people in this country. And let's hold on until logic comes back into the world.

That's not the way we want to cause people to expand and have a better life. And that's exactly what we're talking about with this budget that's proposed by the President and looks like is overwhelmingly going to be adopted by the majority in this House.

We've got real issues here that the American people have to think about. Because with your 2-year-old daughter—and I wish her a happy birthday—that's where you should be focusing all your attention. And I should be focusing all my attention on what we're leaving—not just to her little generation at 2 years old that's going to grow up in this country, but the children that she is going to have and the children they are going to have. If we keep going down the road that we're going down right now with the kind of unbelievable spending that has gone on in the first 50 some-odd days of Obama's first term as President of the United States, if this keeps up, how will our descendants ever pay this back?

Mr. SCALISE. Reclaiming my time, the gentleman from Texas makes some wonderful points. And I appreciate your concern for what happens when Madison, my daughter, grows up and what kind of country she is going to be left with and what kind of debt she is going to inherit. And I think when the American people across the country look at this—and they've started to look at it in, I think, a very close way. And what they're telling me when I go back home, and those of us that have gone throughout the country to our districts, they're telling us that this budget spends too much and it taxes too much. And it borrows too much from future generations at the expense of our ability to get our economy back on track to help those small businesses.

And then they look and they say, well, what are all of these deficits? What is all of this spending going toward? And what they see, they see that first stimulus bill, they look at this TARP money, they look at what's happening with that TARP money and AIG and companies that are getting this money. In some cases, you can't even find out what they did with the money. And then when you find out what they did, it makes you even more angry because you see they are giving it in bonuses to people who helped run those companies into the ground. These are people who truly would be unemployed because they bankrupted their own companies, and today the only reason they have a job is because of these Federal bailouts of these companies. And then they are using that money—not to make loans, but something even more egregious. And as angered as we are hearing about these bonuses that they're paying—\$160 million in bonuses that AIG paid to its executives—we also found out today that AIG used \$26 billion of that taxpayer money to give to French and German banks—not American banks, to help our American banking system, but \$26 billion of that TARP money went to German and French banks, which might be helping their economies in those countries, but it sure isn't helping America. So for those of us who voted against those bailouts, saying I told you so doesn't help anybody, but saying this madness has to end.

And people are looking at this. And then they are seeing the budget that's proposed. And they're seeing these huge spikes in deficit spending and this huge amount of new government socializing of different systems and forms of our economy, and it's scaring people. Because when you look at the stock market, the stock market is an indication not just of what's happening to those individual companies, but of consumer confidence. In fact, since this President took office in January, the stock market is down about 25 percent. That means 401(k)s out there, families who are investing in those markets, their retirement savings are down over 25 percent just since January 20. We're not talking about something that has been going on for over a year now, we're talking about something that is maybe 2 months in the making, a 25 percent decrease because people are seeing these plans—these spending plans, these tax plans, this massive borrowing—and they are realizing somebody has to pay for this.

And what are we doing with this money? And you can't even go find it. It's not helping our country get back on track; because, again, if you go back to the Great Depression—and we said we are going to talk about this a little bit—during the Great Depression in the 1930s, it wasn't because they didn't spend enough money. They actually

spent money for years and years and the depression stayed as bad as it was. For over 8 years they spent money. And there is an old saying, if you don't learn from history, you are doomed to repeat it.

Back in the 1930s, the budget director, the Treasury Secretary under FDR, Henry Morgenthau, actually said, "We're spending too much money." After 8 years of them spending money, they were still at double-digit unemployment. We were still in a Great Depression. In fact, some people said we were in a recession then, and the spending brought us into a Great Depression. And FDR's own Treasury Secretary in the 1930s said it's the spending that's giving us all this massive debt, and it's not doing anything to help our economy. It wasn't until World War II that we got back on track.

And so people are looking at that and saying, wait a minute; we sure don't want to make the mistakes of history's past if we learn how we are going to get ourselves out of this problem today.

If the gentleman has anything else to add—

Mr. CARTER. If the gentleman would yield for just a moment, because I actually happened to be thinking about that on my way up here this week.

We are experiencing that rare time that all Members of Congress who travel back and forth have to deal with called spring break. And I think that everybody that flew on an airplane coming up here knows that there were thousands and thousands and thousands of young people going all over the country and all over Mexico—and who knows where—on spring break. And it reminded me of something that Will Rogers said during the Great Depression, he said, "America is a funny place. We may be the only country in the world that's driving to the poor house in an automobile." The whole point was, we need to remind ourselves, as we debate about this issue, that we are Americans who, if given the right tools, can incentivize our way out of any mess we get into.

We are still the most blessed Nation on the face of the Earth. We need to fix this banking crisis. And we don't need to fix it by indebting our grandchildren and our great grandchildren with special projects to meet campaign promises that were made. We need to concentrate on the issue, which is getting credit back in the market. And then that young man out in the hall and that young man in Killeen, Texas, can go borrow their loan from their bank and go invest it in the future for their children and grandchildren, and our country will continue to send all these beautiful children off on spring break.

I think we realize who we are. We can do anything we set our mind to if the government will just get out of the

way and give us a chance to do it. I yield back.

Mr. SCALISE. Reclaiming my time. And I thank the gentleman from Texas for sharing that because that is the reason that we're here tonight because we know that there is a better way, there is a way out of this problem. And people across this country know. They know that we put a man on the moon because we, as a nation, set our mind to it and we said we are not going to accept failure. And so as people look at these proposals and they look at these record deficits, they know this is not the way out. They know that if spending would solve this problem, we would have the best economy in decades. And so, clearly, spending and taxing is not the answer.

But there are proven answers; and some of those answers are rooted in the very things we've been talking about, the alternative proposals we've been talking about, ways to help small businesses get back on their feet and hire more people. The people that employ 70 percent of our workforce today are being faced with \$640 billion in taxes by this budget, and obviously that has had a ripple effect. And we can unravel that by stopping this from happening.

And people across this country know that, too. That's why you are seeing these tea parties sprout up all across the country where people are saying, we are not going to take it anymore, and we want to stand up and let the government know—because government does answer to the people, especially here in this House, of all places, the People's House. So this is the voice of the people, and we're trying to express that voice. And another great voice is my friend from Texas as well, Mr. BURGESS.

Mr. BURGESS. I thank the gentleman for yielding. And I really appreciate your energy and enthusiasm with coming to the floor at this late hour of the night. You and I serve on the same committee, and our committee has been extremely active for the past several weeks. I think we spent 10 hours today talking about health care. We will spend many hours tomorrow talking about the carbon tax that is going to be enacted before Memorial Day. And then on Thursday we will have another lengthy hearing dealing with food safety; all terribly important issues to the American people. It's good to be up here doing the people's work. Unfortunately, on the floor of the House this week we're not really doing very much, but at least in our committee there is a great deal of work going on.

I will say that I am grateful that this week the President chose to stop talking down the economy and Wall Street, and we perhaps had a little bit of a respite from the inexorable downward spiral that we had seen from Inauguration

Day forward. That has been a welcomed respite, I know, to my constituents back home.

I so appreciate the gentleman having the poster which shows the differences in the deficit by the time we lost control of the House with the 2006 election. We were told that we lost the election for the majority of the House in 2006 because of spending, because we had a deficit of \$160 billion at the end of that fiscal year. Mind you, that was a year that had seen Federal expenditures go up because of Hurricanes Katrina and Rita, the continued fighting of two wars in the Middle East. We had a tsunami that we had to help with right after the 2004 election. There were some significant expenditures which were really once-in-a-lifetime expenditures, and our deficit was \$160 billion.

Now, 3 years later, we are looking at a projected deficit 10 times that much, 10 times \$160 billion. And we're told, don't worry, all is well, we can, indeed, spend our way out of this crisis. But I will tell you, I have not been in favor of any of these spending bills that have come through the House of Representatives in the past year. I think, going back to January of 2008, the so-called stimulus bill of \$170 billion at that time was an error; it was wrong, and it didn't deliver as intended.

□ 2245

The bill to bail out Fannie and Freddie in July that had to be redone in September didn't have the intended result, and then finally the big bailout that occurred right at the end of September, the first of October, in the election process clearly was a spending bill that we should not have undertaken.

Now, it's instructive to know if you're spending all this money and you're not bringing it in in tax revenue, we are intending or at least the signals are there that the Democrats are intending to raise taxes considerably on every American, as has already been alluded to, this carbon tax. Yes, you won't pay more tax if you earn less than \$250,000 a year, unless you turn the lights on, in which case you're going to spend more in taxes, unless you drive a car, in which case you're going to spend more in taxes. So there will be massive tax increases visited upon the middle class of this country. But if you can't tax enough to cover this much spending, where do you get it? Well, you either print it or you borrow it, and right now we are in the process of borrowing this money.

Just a little less than a month ago, I spent an interesting afternoon down at a Federal agency called the Bureau of Public Debt. The Bureau of Public Debt that day was having its third of three auctions. Each auction was to be \$32 billion, so roughly \$100 billion which was going to be auctioned off that day. Each auction lasted 30 minutes. Each

auction, fortunately, was fully subscribed, in fact, oversubscribed. So the notes that we had to sell as a country to keep our economy afloat did sell. The interest rate was not terrible. It was 1½ percent. At the same time, a month ago we were selling about \$160 billion in paper every week. A year before, it was a little less than \$100 billion, and it has obviously gone up every year, year over year, and will continue to do so.

What is the effect of putting \$2.1 trillion in new paper on the market in a very short period of time? Well, one of two things can happen: Your interest rates will go up or the paper won't sell. If the interest rates go up, that crowds out the private sector, which is also competing for that money to borrow to expand business and grow business. We're going to make it that much harder to add new jobs because we're going to add to the expense of a business growing or expanding. In addition, the tax burden that we are going to be adding in the energy sector alone will be a job-killing crush that most people at this point, quite frankly, haven't engaged upon. They do not comprehend the danger that is coming their way as we seek to recover our economy and grow new jobs and grow new sources of revenue.

One of the things that I have been so concerned about is here we are talking about a very enormous budget, an enormous amount of Federal spending. Have we really corrected the problems that were the underlying difficulties before? And I'm not certain we had. I came to Congress in 2003. I was elected in 2002 and was sworn in in 2003. We had just come through a very significant economic downturn. We had just come through some very significant corporate malfeasance with the implosion of Enron. We had new regulations enacted in Sarbanes-Oxley. And the feeling was that we had done all we needed to do and we had gotten it right. But the reality was there were still problems and we hadn't gotten to the bottom of it.

I urged the prior administration to proceed upon a course with engaging—I don't like to use the term "Special Prosecutor." Perhaps we should call it a "Special Inspector General"—to look into the problems in the financial institution that caused us to be in this place. That did not happen.

Within the next 2 days, I am going to be introducing with another member on the Joint Economic Committee, another Member of the House, a bill to ask for a commission to study the problems that brought us to this point. I am not a fan of commissions. I think, in fact, most of the time they detract from congressional power and they are something that we should not do. But in this instance, the stakes are so high and the price we will pay if we get this wrong yet one more time will be so

large that I, frankly, do not know if the country can sustain that. So I will be introducing legislation to ask for a commission to study not only what went wrong but who should be held accountable at this point. The same as we did with 9/11. The same as we did with the Iraq Study Group. I was not in favor of those commissions, but I think in this situation it does warrant that type of intervention because we cannot allow this to happen again.

And I don't know about you, Mr. SCALISE, but when I go down to Denton, Texas, when I go home to Fort Worth, Texas, or Lewisville, Texas, and I talk about these problems, everyone wants to know who is responsible and when are we going to see someone held accountable? And the fact that we see more people receive bonus money for driving their companies into the ground because, oh, I'm so sorry, it's contractual obligation; so we have no way around it. Nonsense. Ask any Delta pilot what happened to their contractual obligation about their pension. Ask any United pilot what happened to the contractual obligation with their pension, and they will tell you what those contractual obligations were worth. These contractual obligations to AIG border on criminal. There is no defense for our continuing down this road, and those need to be stopped.

I do hope that people will take a look at the concept of having a commission to study this problem because I do believe that the difficulties are so deep and so entrenched that if we do not correct them, if we do not get rid of the dry rot that's in the system, we will build an entirely new house of cards on an unstable foundation, and we know where that will lead.

But I do thank the gentleman for bringing this forward. Again, I know it's been a very long day at least for members of our committee. We will have a long day again tomorrow. We'll have a long day again Thursday. I wish our floor schedule mirrored that. Unfortunately, right now we don't seem to feel the same urgency on the floor of the House that the American people are feeling every single day as they watch the job losses mount in their communities and their area.

But I thank the gentleman very much for allowing me a chance to talk on this.

Mr. SCALISE. I want to thank my friend from Texas for sharing that with us. And really it is important that we unravel this mess, that we not only fix these problems but also that we hold those accountable who got us in this mess in the first place because in some cases some of those same people are still out there today using taxpayer money to enrich themselves when so many people across the country are struggling.

And when we go back to these charts and we look at these record deficits, we

look at the fact that, yes, in 2004, 2005, 2006, and 2007, we had deficits and they were too high. But they were too high while they were less than \$200 billion. Today we're facing a deficit that's over \$1.7 trillion. An exorbitant amount of money. An amount of money that's going to saddle future generations.

And when we look historically at our national debt, we started with about \$10 trillion in national debt at the beginning of this year. We're already closing in on \$12 trillion in national debt, and this chart shows how it continues to rise in the years ahead with these record deficits and these taxes that are going to kill jobs in our country. So that's what we are trying to stop. We are not saying this is something that has already happened when we get beyond 2008. We're talking about things that are proposed that we can stop.

So I want to go back to my friend from Utah who's got an interesting insight as well to talk about what we can do to stop this and where this national debt leads us if we don't stop it from happening.

Mr. CHAFFETZ. I thank the gentleman for yielding.

This chart should be concerning to every single American because what it shows is a doubling, a doubling, from \$10 trillion to over \$20 trillion of debt. Somebody has to pay that. It's going to be our kids and our grandkids and future generations. We continue to leave this country in a state of debt that is not sustainable.

I didn't create this mess, but I am here to help clean it up. I'm a freshman here. But I think we all have to take some responsibility and hold our government leaders accountable for the mess that we're getting in. I think they would appreciate it a lot more if there were more sacrifice. The President talked about going line by line, item by line. We were going to get rid of earmarks. We were going to get rid of this; we were going to get rid of that, go line by line. That hasn't happened. The very day after the President said those words, we were presented a bill that was \$410 billion and it had over 8,500 earmarks, 8,500-plus earmarks. The President had just asked for zero, for none. And yet it passed. It went to the President and he signed it. That just doesn't sound like the type of responsibility and accountability that I would expect from my own kids, from the President of the United States. So there has to be this degree of responsibility.

And I also want to touch on the AIG thing because that's on the top of everybody's mind. Really what we have seen is a redistribution of wealth. We have seen the government misuse the role of government in reaching into people's pockets and then redistributing that, picking winners and losers like AIG and others, and saying it's

better that we take that money out of the people's pockets and put it in their pockets. And then with this audacity, this greed, this unsustainable, unacceptable passion, they go out and misuse this money.

Don't you just wish these executives that were going to get these bonuses—why don't they just step up and do the right thing? I wish there would be a sense of pride within these people to say it's just not right for me to get a bonus. It's like when I was a little kid and I was playing soccer or baseball or something like that. I was taught that what you were supposed to do is if you stepped over the line, if you didn't actually make it, you're supposed to call it yourself instead of saying, well, that wasn't me, instead of getting tied up in some technicality that would allow them to do something that they really should not have been doing.

So what I would hope that people would do is to take this personal responsibility. The government's not. We are here to fight to make sure that it does become more accountable. But it's this underlying greed that, oh, my goodness, please, step up and do the right thing.

But that debt, that is something we can do something about. And that's why I think you see so many of us stepping up and saying the President's budget spends too much, it taxes too much, and it borrows too much.

Mr. SCALISE. I thank my friend from Utah again because I think what he touches on is this lost direction, this lost focus on the real problem that we are facing right now. And those of us that are here tonight are staying here as late as we can to try to get this administration back on track, focused on fixing the problems of this economy, on fixing the problems in our banking system.

Again, that bill is still out there, H.R. 7223, from the 110th Congress. We are still ready to present these ideas. These are good solutions to solve the problems our country faces today. But instead what do we get? Instead of that line-by-line scrutiny that we need, for the last 2 weeks we've had the White House, people in the White House, picking on media personalities, talking about what Rush Limbaugh is saying on the radio or what Jim Cramer is saying on CNBC. If that's the focus of this administration, it's no wonder why people are so mad out there in the rest of the country saying what about the focus on the real problems that we are facing and the things that need to be done, the things the White House needs to be doing to address those problems, going line by line and cutting out the waste and the fraud and the corruption that exists in this government and in this budget instead of picking on media personalities or filing bills to tax small businesses or families on their energy bill?

Just last week we saw a bill filed called Card Check. A bill that literally would take away an employee's right to a secret ballot in a vote over whether or not to form a union. This is something for decades that's been in law. There's a process. If somebody wants to form a union, there is a process they go through, but it involves a secret ballot in the end to decide whether or not those employees actually want to form a union, and it's a protection for the employee so that they are freed from the intimidation and the coercion that has gone along in years past, in decades past, times in our history we sure don't want to repeat. That bill was filed last week to take away an employee's right to a secret ballot and forcing arbitration on companies.

The U.S. Chamber of Commerce has come out with reports that show that bill alone would cost our country 600,000 jobs in the first year, 600,000 jobs if that bill passed that would go overseas. And the President said he would sign that bill. So people look at this and they say we're facing real problems in our country, but we know, because we're America, because we are the greatest country in the world, we know we can address and fix these problems. But what they are very disappointed in is that they don't see solutions coming out of the leadership here in Congress and the White House. So that's why we are going to continue to talk about it and find solutions and find a better way.

□ 2300

TAKING US IN THE WRONG DIRECTION

The SPEAKER pro tempore (Mr. FOSTER). Under the Speaker's announced policy of January 6, 2009, the gentleman from North Carolina (Ms. FOXX) is recognized for the remaining time until midnight.

Ms. FOXX. Mr. Speaker, I want to congratulate my colleagues on the great job that they have done this evening in presenting information about the budget, the deficit, the challenges that we are facing in this country, and I particularly want to agree with Congressman CARTER from Texas for the statement he made about the fact that we live in a wonderful country.

In fact, I tell my friends all the time, the first thing I do in the morning when I wake up is say thank you, Lord, for letting me live in this country. And the last thing I say, before I go to sleep at night, is thank you, Lord, for letting me live in this country.

We are the most blessed people in the world, I believe that God has given us tremendous opportunities and responsibilities. And for those of us who have been here tonight and other nights and other days talking about what's happening in our country, we are really

motivated by the fact that we know we live in the greatest country in the world, and we want it to remain that way.

And what we see happening in this country is people taking us in the wrong direction in order to maintain the greatness and the opportunities that this country has always had and always presented.

One of the things nobody said tonight is the fact that we, as Republicans, we, as conservatives, I would say—not all Republicans are conservatives, but those of us who are conservatives and who have been here talking about these issues are not alone. There are many Democrats who share our concerns too.

I want to just share some quotes from some of our colleagues who have expressed their own concern and their own apprehension about the proposals that have been made by this Congress and by this President.

Senator EVAN BAYH, Democrat of Indiana. “I do think that before we raise revenue we first should look to see if there are ways we can cut back on spending.” As for the tax increases on high-income earners called for in Obama’s plan, BAYH said, I do think that before we raise revenue, we first should look to see if there are ways we can cut back on spending. This was in *Politico* March 3, 2009, “Moderates Uneasy With Obama Plan.”

Again, Republican conservatives are not the only ones that are worried about the direction that we are going. Senator BEN NELSON, Democrat of Nebraska, “I have major concerns about trying to raise taxes in the midst of a downturn of the economy.”

Then he says, “On the one hand, you’re trying to stimulate the economy. On the other hand, you’re trying to keep money from going into taxpayers’ pockets. It’s very difficult to make that logic work.” Again, *Politico*, March 3, 2009.

Representative SHELLEY BERKLEY, Democrat, Nevada.

“Representative Shelley Berkley, (D-Nev) called the proposal ‘a nonstarter,’ telling Geithner, ‘I’d like to think that people give out of the goodness of their hearts, but that tax deduction helps to loosen up their heartstrings.’ Outside the hearing, Berkeley said the proposed tax increase was ‘the number one issue on the minds of her constituents over the weekend. Reminded that the provision is intended to raise hundreds of billions of dollars to finance an expansion of health insurance coverage, Obama’s top domestic priority, she said, ‘We can find another way.’”

We know that going in this direction, and these Democrats know, that this is not the way that we should be going. We should not be taking more money from the American people. Cutting back spending would be the appropriate way to go.

I have a couple of other articles that I want to share, actually three articles

that I want to share pieces of, because, again, they show, I think, the direction or the concern that people are having about these proposals that have been made in the last 50 days.

This article is from Stewart Taylor, Jr., it’s in the *National Journal*, March 7, 2009. Stewart Taylor is known as a very strong liberal. He has been described in other terms even stronger than that, in terms of his liberalism, but I am just going to call him that tonight.

The title of this article is “Obama’s Left Turn.” It reads, “Having praised President Obama’s job performance in two recent columns, it is with regret that I now worry that he may be deepening what looks more and more like a depression and may engineer so much spending, debt, and government control of the economy as to leave most Americans permanently less prosperous and less free.

“Other Obama-admiring centrists have expressed similar concerns. Like them, I would like to be proved wrong. After all, if this President fails, who will revive our economy? And when? And what kind of America will our children inherit?

“But with the Nation already plunging deep into probably necessary debt to rescue the crippled financial system and stimulate the economy, Obama’s proposals for many hundreds of billions in additional spending on universal health care, universal postsecondary education, a massive overhaul of the energy economy, and other liberal programs seem grandiose and unaffordable.

“With little in the way of offsetting savings likely to materialize, the Obama agenda would probably generate trillion-dollar deficits with no end in sight or send middle-class taxes soaring to record levels or both.

“All this from a man who told the Nation last week that he doesn’t ‘believe in bigger government,’ and who promised tax cuts for 95 percent of Americans.

“The President’s suggestions that all the necessary tax increases can be squeezed out of the richest 2 percent are deceptive and likely to stir class resentment. And his apparent cave-ins to liberal interest groups may change the country for the worse.”

Then he goes on to say, “Such concerns may help explain why the Dow Jones Industrial Average plunged 17 percent from the morning of Inauguration Day (8,280) to its close on March 4 (6,876). The markets have also been deeply shaken by Obama’s alarming failure to come up with a clear plan for fixing the crippled financial system—which has loomed since his election 4 months ago as by far his most urgent challenge—or for working with foreign leaders to arrest the meltdown of the world economy.

“The house is burning down. It’s no time to be watering the grass.

“This is not to deny that the liberal wish list in Obama is staggering \$3.6 trillion budget would be wonderful if we had limitless resources. But in the real world, it could put vast areas of the economy under permanent government mismanagement, kill millions of jobs, drive investors and employers overseas, and bankrupt the Nation.”

Let me say again, these words are not being written or spoken by a conservative, they are being spoken by a person who calls himself a moderate but is described by most people as quite a liberal.

He goes on to say, “Meanwhile, liberal Democrats in Congress are racing to gratify their interest groups in a slew of ways likely to do much more harm than good: Pushing a union-backed ‘card check’ bill that would bypass secret-ballot elections on unionization and facilitate intimidation of reluctant workers; slipping into the stimulus package a formula to reimburse States that increase welfare dependency among single mothers and reduce their incentives to work; defunding a program that now pays for the parents of some 1,700 poor kids to choose private schools over crumbling D.C. public schools; fencing out would-be immigrants with much-needed skills.

“Not to mention the \$7.7 billion in an omnibus spending bill to pay for 9,000 earmarks of the kind that Obama campaigned against: \$1.7 million for research on pig odors in Iowa; \$1.7 million for a honey bee factory in Texas; \$819,000 for research on catfish genetics in Alabama; \$2 million to promote astronomy in Hawaii, \$650,000 to manage beavers in North Carolina and Mississippi; and many more.”

The article goes on and on as I said, but I want to share, not all of it, but a couple of more pieces of it, because I don’t want to spend all the time reading from this article.

I want to skip over to where he says, “Small wonder that liberal commentators who complained about Obama’s initial stabs at bipartisanship are ecstatic about his budget. And small wonder that some centrists, who have had high hopes for Obama—including New York Times columnist, David Brooks, my colleague, Clive Crook, David Gergen and Christopher Buckley—are sounding alarms.

“In a March 3 column headed ‘A Moderate Manifesto,’ Brooks wrote, ‘Those of us who consider ourselves moderates—moderate conservative, in my case—are forced to confront the reality that Barack Obama is not who we thought he was. His words are responsible; his character is inspiring. But his actions betray a transformational liberalism that should put every centrist on notice. The only thing more scary than Obama’s experiment is the thought that it might fail.’”

Then I will share the end of the column, “I still hold out hope that Obama

is not irrevocably 'casting his lot with collectivists and status,' as asserted by Peter Wehner, a former Bush aid and a leading conservative intellectual now with the Ethics and Public Policy Center."

"And I hope that the President ponders well Margaret Thatcher's wise warnings against some collectivist conceits, in a 1980s speech quoted by Wehner: 'The illusion that government can be a universal provider and yet society still stay free and prosperous. The illusion that every loss can be covered by a subsidy. The illusion that we can break the link between reward and effort, and still get the reward.'"

Again, my point in sharing this is that it isn't just conservatives who are concerned with the direction in which we are going in this society.

There is another article on an Internet Web site called GOPUSA that many people who use the Internet and use e-mail will be familiar with. The title of it is "George Orwell Would Be Impressed With Barack Obama," and it's written by Doug Patton and it's dated March 2, 2009.

"There he was, standing before a joint session of Congress, promising America the Moon 1 minute and sounding like a deficit hawk the next. President Barack Obama and his Democrat cohorts had just rammed through the biggest pile of pork in the history of the republic, and yet there he stood, before the whole Nation, telling us he was going to go through the budget 'line by line' finding ways to cut waste. In fact, he intended to 'slash the deficit' he 'inherited' by almost exactly the amount he and his Democrat Congress had just spent. What a coincidence."

The article goes on to say, "Obama is a combination of Ronald Reagan and Big Brother—by which I mean that he uses his considerable communications skills to sell the agenda of the huge, intrusive government, and that he does it in a 'Newspeak' that would impress George Orwell.

"Those who have read Orwell's prophetic little tomorrow, '1984,' will recall that 'Newspeak' was a language in which the line between contrary concepts was so blurred that words either had no meaning at all or could be used to create concepts that were contrary. When words no longer had meaning, the concept of truth was not far behind."

I want to say to those who are watching this tonight, if you have never read "1984," or if it's been a long time since you have read it, I will urge you to reread it now, because I think you will be startled by it and by the analogies that are being made by this author here tonight.

So what will Obama's America look like if he gets all that he wants? It won't happen overnight, but if he has his way, eventually it will be a very

dreary place, much like the old Soviet Union. Having followed the old Marxist axiom of making everyone equal, Obama will have brought about the same kind of quality instituted by the old Soviet Politburo. Gone will be the quality of opportunity we have enjoyed for more than 200 years, the right to experience life, liberty and the pursuit of happiness. In Obama's America, as in the failed Soviet State, a quality of outcome will be the preferred result. The idea is to make everyone equally prosperous.

This sounds good in theory until one considers that the only way governments have ever accomplished this is by making men and women equal in their poverty, misery and squalor.

□ 2315

And how does the President pay for it all? It doesn't seem to matter to most Americans. He talks about taxing the rich in order to pay for his schemes. Yet, if our government confiscated 100 percent of the income of everyone in this country making more than \$75,000 a year, he would barely have enough to cover this year's budget. And we don't even have universal health care yet.

Human beings are endowed with our rights by our Creator. Our Founders recognized that principle. This President and the majority in Congress believe our rights come from them. No one, until now, has been able to sell that idea to the American people. Barack Obama is doing his best to sell it to us now, and George Orwell would be very impressed.

The last article I want to share is an article from the Saturday-Sunday March 7-8, 2009, Wall Street Journal. I think another thing that hasn't been clear to the American people is that there are many things said by the President, by the leadership in this Congress, that if you look behind the curtain, as we do in the Wizard of Oz, you will see that what is being said and what is actually being done are not exactly the same thing.

More and more people are beginning to talk about this, but few have brought out really good examples of it as well as this article in the Wall Street Journal does.

The title of it, and it's an editorial, the title of it is: Obama Channels Cheney. "The Obama administration this week released its predecessors post-9/11 legal memoranda in the name of transparency, producing another round of feel-good Bush criticism.

"Anyone initiated in President Obama's actual executive power policies, however, should look at his position on warrantless wiretapping. Dick Cheney must be smiling.

"In a Federal suit, the Obama legal team is arguing that judges lack the authority to enforce their own rulings in classified matters of national security. The standoff concerns the Oregon

chapter of the al-Haramain Islamic Foundation, a Saudi Arabian charity that was shut down in 2004 on evidence that it was financing al Qaeda. Al-Haramain sued the Bush administration in 2004, claiming it had been illegally wiretapped.

"At the heart of the al-Haramain case is a classified document that it says proves that the alleged eavesdropping was not authorized under the Foreign Intelligence Service Act, or FISA.

That record was inadvertently disclosed after al-Haramain was designated as a terrorist organization; the Bush administration declared such documents state secrets after their existence became known.

"In July, the ninth circuit court of appeals upheld the President's right to do so, which should have ended the matter. But the San Francisco panel also returned the case to the presiding district court judge, Vaughn Walker, ordering him to decide if FISA preempts the state secrets privilege. If he does, al-Haramain would be allowed to use the document to establish the standing to litigate.

"The Obama Justice Department has adopted a legal stance identical to, if not more aggressive, than the Bush version. It argues that the court-forced disclosure of the surveillance programs would cause exceptional harm to national security by exposing intelligence sources and methods. Last Friday, the ninth circuit denied the latest emergency motion to dismiss, again kicking matters back to Judge Walker.

"In court documents filed hours later, Justice argues that the decision to release classified information is committed to the discretion of the executive branch. And is not subject to judicial review. Moreover, the court does not have independent power to order the government to grant counsel access to classified information when the executive branch has denied them such access.

"The brief continues that Federal judges are ill-equipped to second-guess the executive branch. That is about as pure an assertion of Presidential powers as they come, and we are beginning to wonder if the White House has put David Addington, Mr. Cheney's chief legal aid, on retainer.

"The practical effect is to prevent the courts from reviewing the legality of the warrantless wiretapping program that Mr. Obama repeatedly claimed to find so heinous, at least before taking office.

"Justice, by the way, is making the same state secrets argument in a separate lawsuit involving rendition and a Boeing subsidiary.

"Hide the children, but we agree with Mr. Obama that the President has inherent Article II constitutional powers that neither the judiciary nor statutes like FISA can impinge upon. The FISA

appeals court said as much in a decision released in January, as did Attorney General Eric Holder during his confirmation hearings.

"It's reassuring to know the administration is refusing to compromise core executive branch prerogatives, especially on war powers. Then, again, we are relearning that the "Imperial Presidency" is only imperial when the President is a Republican. Democrats who spent years denouncing George Bush for spying on Americans and illegal wiretaps are now conspicuously silent. Yet, these same liberals are going ballistic about the Bush-era legal memos issue this week.

"Cognitive dissonance is the polite explanation, and we wouldn't be surprised if Mr. Holder released them precisely to distract liberal attention from the al-Haramain case.

"By the way, those Bush documents are Office of Legal Counsel memos, not political directives. They were written in the immediate aftermath of a major terrorist attack, when war seemed possible, and it would have been irresponsible not to explore the outer limits of war powers in a worst case scenario. Based on what we are learning so far about Mr. Obama's policies, his administration would do the same."

"I think, again, it's important that even late at night, when maybe not too many people are paying attention, we reveal some of the cognitive dissonance that exists in this administration and in this Congress in ways that it discussed the previous administration, actions of the previous administration, and the things that it is doing now.

"We have to hope that once he became President, President Obama did learn that there are some things that the President must do that he may have railed against as a candidate, and hope that there's a maturity there that will service us all well."

I want to end my comments tonight on a totally different subject. Today, we passed a resolution celebrating Women's History Month. I was not able to be here during that time. But I often point out the situation with women in the Congress and with the role that they have played in our country over the years, and celebrate that role, as I think it is important to our country.

Most people know very little about the history of women in our country; about the history of women and their voting rights. So I am going to share just a little bit with you on that issue. And I have learned some of these things since coming to Congress.

Some people may not know that in 1790, the New Jersey colony granted voting rights to all free inhabitants. But then, in 1807, they took back from New Jersey women the right to vote.

In 1869, the Wyoming territory gave women full suffrage; 1870, Utah. And it goes on and on with other States, other territories giving women the right to

vote. In fact, the first woman who was elected to Congress was elected in 1916 before women in this country had the right to vote. She was from Montana—Jeannette Rankin.

She was elected there, and women got the right to vote in the West because women were valued much more in the West in the early days of our country, and that was one of the ways to attract women to come out West.

Let me give you a little history of the women in the Congress. Thirty-seven women have served in the United States Senate. Only 37. I don't have the total number of the men who have served, but I have been told that approximately 12,000 men have served in the Congress. Only 37 women in the Senate. Seventeen are currently serving.

Two hundred twenty-nine women have served in the U.S. House of Representatives. Seventy-four of them are currently serving. That totals 266 women that have ever served in the United States Congress; 91 currently serving. So 12,000 men, 266 women.

I am the fourth woman from the State of North Carolina. The first woman was elected in a special election in 1946. She served 1946 and 1947 and didn't run in the general election for re-election. Eva Clayton from the first district was the first woman to serve. She was elected in a special election. SUE MYRICK, who's currently serving, was the second woman to be elected. North Carolina has had two women Senators; Elizabeth Dole, who served from 2003 to 2008, and KAY HAGAN, who is currently serving.

I think most of us wish we would have more women serving in the Congress on both sides of the aisle because we believe that it adds to the Congress in terms of the perspectives that we bring, is as it adds to the Congress that we have men serving who have been in many, many different professions and had many, many different experiences.

I see that my colleague from Texas has joined me. Before I yield back my time, I would like to see if he has some comments that he would like to make. This is Mr. GOHMERT from the great State of Texas. I would remind him that he and I are the only two things standing in the way of adjournment tonight.

Mr. GOHMERT. I do thank my dear friend, Ms. FOXX, for the things that she's pointed out tonight, Mr. Speaker, and also for the good that she's done. I hadn't realized. I guess we don't notice gender around this body, but apparently one of the few women. I didn't realize there had been that few. But what a powerful contribution, Mr. Speaker, that Ms. FOXX has made, and is making. It makes me very proud to be serving with her, as we came in together.

But there is something that we have discussed and have in common, and that is a concern about the morality of

this Nation. Chuck Coulson talked about in a recent Bible study group we had, quoted Michael Novak, using the metaphor of the three-legged stool on which a government and a country like ours is seated.

Now many have used the metaphor of the three-legged stool, but he was pointing out that really the three legs are composed of morality, economic freedom, and political freedom, and that you need all three legs.

What we have seen in this country is a breakdown of the morality leg. As we look at the struggles in our economy, it seems that there has been a real problem with this nagging issue of greed and jealousy and envy, covetousness. People see what others want and they want that and they want more.

□ 2330

And as we have seen greed take over good sense, then it affects the economic freedom. And as that has impacted the economy and the economy has gotten in trouble, what we see throughout history is that when people have a choice between order and freedom, they will give up freedom just to have order, and that it puts our entire political freedom at risk when we have had a breakdown in morality affecting the economy, and then the third leg goes, our political freedom.

I have been visiting with a group tonight, and I know the rules of the House are that we don't call attention to anyone in the gallery so I will not do that. But I have been visiting tonight with friends from Lufkin, Texas, Mayor Gordon and his wife, and Paul Parker and his wife and their grandson, Josh. They understand this issue of morality. They understand that a country cannot be perpetuated where you lose that leg of the three-legged stool.

We even see it in Washington, where people get envious: Well, somebody got something in their district, I want something in mine. And if they put what they want or their district's wants over the needs of the Nation, then we come in here and we pass bills that have 9,000 earmarks in them that don't help with the stimulus, they don't help the country go in the right direction. And it is really kind of a moral leg that is affected there as well, which affects the economy because it doesn't stimulate the economy, which can throw the economy into chaos, at which time people are willing to give up political freedom in order to have the security of some order in this Nation.

I have been inspired by some of the words of our President, President Obama. But as we have found, leadership is not found in the lines on a teleprompter; leadership is something you have got to do, how you live. And George Washington, we know, struggling as we was to win freedom, he

knew that his life had to be transparent, that he had to be humble, and he had to be a man of complete honesty; otherwise, it wouldn't survive. And his quote was: Men unused to restraint must be led; they will not be driven. And that is what we need more of, not just pretty words that are read from a teleprompter. We need leadership. We need people not to say we are not going to allow greed to get \$165 million worth of bonuses after driving a country into the dirt. Not at all. No, we need leadership that doesn't just say these things. They follow through, and make sure he appoints honorable men, honorable people. And by that I mean generically men and women, because of the contribution.

We were just down to Statuary Hall, and I was pointing out the first woman to address a group in Congress was a Christian evangelist, I think it was before 1820, that delivered the Sunday nondenominational Christian sermon down in Statuary Hall back when it was the House of Representatives. But men and women have inspired this place, but they don't inspire anyone unless their life is transparent enough so that people know that they mean what they say.

So as we continue to have these issues arise of the lack of morality; Ms. Coleson once said: You can't have the morality of Woodstock and not have tragedies in this country. If you have the morality of, "If it feels good, do it," then you are going to have some catastrophes, because some people will want to see how it feels to do different catastrophic, greedy, terrible things. So we have got to get back to our moral underpinnings and moral anchoring so that we can move forward. But we need leadership from the White House to the Senate to this House to be in order so that they can lead by example, and not put earmarks in that may help some people but not help the economy and not help the Nation move forward and not help the generations to come.

Ms. Foxx has heard me say, Mr. Speaker, before. As a judge, I know if a parent were to have come before me and that parent had been to the bank and said, I can't control my spending, I just can't stop spending, so please make me a loan; and my children and my grandchildren, maybe my great grandchildren who aren't even born, will pay it all back some day because I can't and I can't control my spending. Well, that parent wouldn't get to keep the kids much longer, and especially if the kids had kids. That raises issues.

But in any event, we have got to get back to morality of good leaders here. We don't spend our children's money, we don't spend our grandchildren's money and our great grandchildren's money. That is irresponsible. And if we are going to do the business of this Nation with which we have been trusted,

we have got to just reestablish the moral leg, the humility, the strength of character that Washington displayed, and that I have seen in my friend, Ms. Foxx. I appreciate your yielding and I appreciate the chance to speak here.

I have seen that same moral strength in a group that is here at the Capitol tonight from Murray State University, a group of Christians that are here.

So thank you for yielding and allowing me to speak tonight. And thank you for taking this time.

Ms. FOXX. I want to thank my colleague from Texas for coming in tonight and sharing this time with me and ending the evening on the appropriate note.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ABERCROMBIE (at the request of Mr. HOYER) for today on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Ms. WOOLSEY) to revise and extend their remarks and include extraneous material:)

Mr. SKELTON, for 5 minutes, today.

Ms. WOOLSEY, for 5 minutes, today.

Mr. DEFAZIO, for 5 minutes, today.

Mr. HALL of New York, for 5 minutes, today.

Mr. SHERMAN, for 5 minutes, today.

Ms. JACKSON-LEE of Texas, for 5 minutes, today.

Ms. CORRINE BROWN of Florida, for 5 minutes, today.

(The following Members (at the request of Mr. POE of Texas) to revise and extend their remarks and include extraneous material:)

Mr. POE of Texas, for 5 minutes, March 24.

Mr. JONES, for 5 minutes, March 24.

Mr. ROONEY, for 5 minutes, March 18.

Mrs. CAPITO, for 5 minutes, today.

Mr. LATOURETTE, for 5 minutes, today.

Mr. SMITH of New Jersey, for 5 minutes, March 18.

(The following Members (at their own request) to revise and extend their remarks and include extraneous material:)

Mr. KRATOVIL, for 5 minutes, today.

Mr. GOHMERT, for 5 minutes, today.

Mr. STEARNS, for 5 minutes, today.

ENROLLED BILL SIGNED

Lorraine C. Miller, Clerk of the House, reported and found truly enrolled a bill of the House of the fol-

lowing title, which was thereupon signed by the Speaker:

H.R. 1127. An act to extend certain immigration programs.

ADJOURNMENT

Ms. FOXX. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 11 o'clock and 36 minutes p.m.), the House adjourned until tomorrow, Wednesday, March 18, 2009, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 8 of rule XII, executive communications were taken from the Speaker's table and referred as follows:

893. A letter from the Acting Administrator, Department of Agriculture, transmitting the Department's final rule — Olives Grown in California; Increased Assessment Rate [Doc. No.: AMS-FV-08-0105; FV09-932-1IFR] received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

894. A letter from the Acting Associate Administrator, Department of Agriculture, transmitting the Department's final rule — Grapes Grown in a Designated Area of Southeastern California; Decreased Assessment Rate [Doc. No.: AMS-FV-08-0107; FV09-925-2IFR] received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

895. A letter from the Acting Associate Administrator, Department of Agriculture, transmitting the Department's final rule — Tart Cherries Grown in the States of Michigan, et al.; Final Free and Restricted Percentages for the 2008-2009 Crop Year for Tart Cherries [Doc. No. AMS-FV-08-0089; FV09-930-1FR] received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

896. A letter from the Acting Administrator, Department of Agriculture, transmitting the Department's final rule — Nectarines and Peaches Grown in California; Changes in Handling Requirements for Fresh Nectarines and Peaches [Doc. No. AMS-FV-08-0108; FV09-916/917-1 IFR] received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

897. A letter from the Administrator, Department of Agriculture, transmitting the Department's final rule — Irish Potatoes Grown in Washington; Relaxation of Handling and Import Regulations [Docket No.: AMS-FV-08-0036; FV08-946-1 FIR] received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

898. A letter from the Administrator, Department of Agriculture, transmitting the Department's final rule — Fruit, Vegetable, and Specialty Crops-Import Regulations; Proposed Revision to Reporting Requirements [Docket No.: AMS-FV-07-0110; FV07-944/980/999-1 FR] received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

899. A letter from the Director, Regulatory Review Group, Department of Agriculture, transmitting the Department's final rule — Farm Program Payment Limitation and Payment Eligibility for 2009 and Subsequent Crop, Program, or Fiscal Years (RIN: 0560-

AH85) received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Agriculture.

900. A letter from the Acting Under Secretary of Defense for Personnel and Readiness, Department of Defense, transmitting a letter on the approved retirement of Lieutenant General James N. Soligan, United States Air Force, and his advancement to the grade of lieutenant general on the retired list; to the Committee on Armed Services.

901. A letter from the Acting Assistant Secretary For Export Administration, Department of Commerce, transmitting the Department's final rule — Removal and Modification of Certain Entries from the Entity List; Person Removed Based on Removal Request and Clarification of Certain Entries [Docket No.: 0812241647-9151-01] (RIN: 0694-AE51) received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Foreign Affairs.

902. A letter from the Acting Assistant Secretary Legislative Affairs, Department of State, transmitting correspondence from Speaker Luka Bebic of the Croatian Parliament; to the Committee on Foreign Affairs.

903. A letter from the Acting Director, Office of Personnel Management, transmitting the Office's final rule — Federal Employees Health Benefits Program Acquisition Regulation: Miscellaneous Clarifications and Corrections (RIN: 3206-AL66) received March 3, 2009, pursuant to 5 U.S.C. 801(a)(1)(A); to the Committee on Oversight and Government Reform.

904. Res. 214: Mr. LEE of New York, Mr. HUNTER, Mr. MCHENRY, Mr. MCCARTHY of California, Mr. KINGSTON, Mr. LINCOLN DIAZ-BALART of Florida, Mr. ROE of Tennessee, Mr. CHAFFETZ, Mr. LANCE, Mr. HARPER, Mr. BONNER, Mr. BAIRD, Mr. MCMAHON, Mrs. DAHLKEMPER, Mr. KRATOVIL, Mr. DUNCAN, Mr. CARTER, Mr. THOMPSON of Pennsylvania, Mr. COFFMAN of Colorado, Mr. POSEY, Mr. LATTA, Mr. AUSTRIA, Mr. UPTON, Mr. CASTLE, Mr. KISSELL, and Ms. MARKEY of Colorado.

H. Res. 215: Ms. MATSUI, Mr. WU, Ms. BORDALLO, Mr. GRIJALVA, Ms. HIRONO, Ms. CORRINE BROWN of Florida, Ms. CLARKE, Ms. EDDIE BERNICE JOHNSON of Texas, and Ms. ZOE LOFGREN of California.

H. Res. 223: Mr. POSEY, Mr. KING of Iowa, Mr. ETHERIDGE, and Mr. COBLE.

H. Res. 234: Mrs. MCMORRIS RODGERS, Mr. MCGOVERN, Mr. BRALEY of Iowa, Mr. SCHIFF, Ms. CLARKE, Ms. MOORE of Wisconsin, Ms. BEAN, Ms. BALDWIN, Mr. ARCURI, and Mr. CARNEY.

H. Res. 244: Mr. BURTON of Indiana, Mr. EHLERS, and Mr. KING of New York.

PETITIONS, ETC.

Under clause 3 of rule XII,

18. The SPEAKER presented a petition for the Legislature of Rockland County, New York, relative to Resolution No. 12 of 2009—Expressing Support for Israel, Recognizing Israel's Right To Defend Itself Against Attacks From Gaza, And Supporting The Israeli-Palestinian Peace Process; which was referred to the Committee on Foreign Affairs.

EXTENSIONS OF REMARKS

CONGRATULATING PEBBLEBROOK
HIGH SCHOOL

HON. DAVID SCOTT

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SCOTT of Georgia. Madam Speaker, I rise today to congratulate an exceptional high school choir in my district, Pebblebrook High School Performing Arts Chamber Choir of Mabelton, Georgia, which has been chosen to perform at New York City's legendary Carnegie Hall on March 20, 2009.

Pebblebrook High School Performing Arts Chamber Choir was selected out of dozens of high school choirs across the country for this performance. The concert will feature 200 students from four states, and is the capstone of Carnegie Hall's yearlong National High School Choral Festival. The concert will be conducted by Dr. Craig Jessop, esteemed Director of the Utah State University Music Department and former director of the Mormon Tabernacle Choir, who has been working with the choirs and their conductors throughout the year. Apart from their world-renowned performances, Carnegie Hall brings innovative music education programs to students across the nation. I am delighted that these young constituents have been given this opportunity.

Led by George Case, the Pebblebrook High School Performing Arts Chamber Choir performs works from all periods of classical music with a strong emphasis on 20th- and 21st-century compositions with a focus on choral/orchestral masterworks. The Choir has shared the stage with the Atlanta Symphony Orchestra and Cobb Symphony Orchestra, and has entered numerous competitions and adjudications at which they have consistently received superior ratings and awards. Choir members are actively involved in extracurricular performances and are given the opportunity to work with top professionals in the arts from the Atlanta area and throughout the United States.

I am honored to have one of the four schools in the nation chosen for the Carnegie Hall National High School Choral Festival residing in my Georgia district. They should be proud not only of their musical achievement, but their embodiment of the quality musical education the State of Georgia provides. I commend these students and their leaders for their success, and wish them the best of luck on March 20 when they perform at Carnegie Hall.

IN HONOR OF JUSTICE SEAN
RYAN; SUPREME COURT JUDGE
OF IRELAND

HON. DENNIS J. KUCINICH

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. KUCINICH. Madam Speaker, I rise today in honor and recognition of Justice Sean Ryan, High Court and Supreme Court Judge of Ireland, as I welcome him to Cleveland, Ohio on St. Patrick's Day, March 17, 2009.

For the past thirty years, attorneys Tim Collins and Thomas Scanlon have organized the St. Patrick's Day Party and Parade—a joyous event that brings people together in the heart of Cleveland. This treasured event promotes and preserves the rich traditions of their beloved Irish homeland. As in years past, downtown Cleveland will once again spring to life as a sea of green and the spirited sound of drums and bagpipes wind their way along Euclid Avenue. This enchanted day promises old friendships renewed, the discovery of new ones, and the spirit of all those joining together to celebrate Irish culture.

Justice Sean Ryan studied in Dublin at University College and at Dublin & King University where he studied law. After being called to the Bar in 1972, Justice Ryan practiced as junior counsel in the South Eastern Circuit of Ireland until 1983, when he was appointed to Senior Counsel. For the next twenty years, Justice Ryan worked diligently in Ireland's High Court and Supreme Court on a wide range of cases and issues, including constitutional law, law of torts, criminal law and administrative law. Since 2001, Justice Ryan has focused his energy and expertise on investigating cases of child abuse and working as an advocate for victims of child abuse.

Madam Speaker and Colleagues, please join me in honor and recognition of Justice Sean Ryan, as we welcome him to Cleveland on St. Patrick's Day. Please also join me in recognition of Tim Collins and Thomas Scanlon for organizing this wondrous St. Patrick's Day Celebration again this year, as they have for the past thirty years. "Ni dheanfaidh smaoineamh an treabhadh duit—You'll never plough a field by turning it over in your mind" Old Irish Proverb.

A TRIBUTE TO TRACYE RAWLS-
MARTIN

HON. EDOLPHUS TOWNS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. TOWNS. Madam Speaker, I rise today in recognition of Tracye Rawls-Martin, proud daughter of Henry Sr. and Shirley M. Rawls,

wife of Arnold V "Woody" Martin, stepmother to Britt'ney D. Clarence and "Nana T" to Woody's oldest daughters' son, Charles Lovell 3rd.

Tracye Rawls-Martin, MS ATC is a Certified Athletic Trainer and one of 5 African American Athletic Training Education Program Directors in the United States. She is "mother", advisor and professor to more than 16 Athletic Training Students within the BS/MS Degree Program in Athletic Training & Sports Sciences at Long Island University Brooklyn Campus. She began her academic career as a Dance Education major and progressed to a Pre-Physical Therapy major and fell in love with an Athletic Training major. After completing two semesters in the Pre-Physical Therapy program at Kingsborough Community College, she decided it was time to move on to a more exciting and productive field—the field of Athletic Training and Sports Sciences. The field of Athletic Trainers was made for her because it is designed for Health Care Professionals who specialize in prevention, assessment, treatment and rehabilitation of injuries and illnesses that occur to athletes and the physically active. All Certified Athletic Trainers must have at least a bachelor's degree in athletic training, which is an allied health profession, must pass a comprehensive exam before earning the ATC credential, must keep knowledge and skills current by participating in continuing education and must adhere to standards of professional practice set by a national certifying agency.

The combination of dance education & athletic performance was a winning combination for her personality because she loves helping people, teaching, watching and participating in sports. In addition to nurturing her students through academic requirements for the program, she has had the honor and privilege of working with over 1000 athletes worldwide; high school, junior college, division one collegiate athletes, semi professional and professional. Her current responsibilities as Director of Athletic Training Education Programs at Long Island University, Brooklyn Campus include teaching (18 credit hours teaching a variety of sports medicine topics which include risk management, injury prevention, orthopedic examination & diagnosis, medical conditions and disabilities, acute care of injuries and illnesses, therapeutic modalities, conditioning, rehabilitation exercise and pharmacology, psychosocial intervention and referral, nutritional aspect of injuries and illnesses and health care administration), administrative (direct and administer BS/MS Degree Program and Advanced Master's Degree program in Athletic Training and Sports Sciences, maintain guidelines and standards set forth by the accrediting agency, work with the Clinical Coordinator to establish and maintain affiliations,

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

Matter set in this typeface indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

conduct and publish research/scholarly activities in areas of expertise, advise students, develop and implement internal/external marketing strategies for the Athletic Training Education Programs, assist in the recruitment of faculty, continue to encourage good citizenship and professional conduct among all students and faculty so as to promote the best interest of athletic trainers, maintain continuing education credits, participate/coordinate and conduct committees within the Division, School of Health Professions, the University and the Brooklyn Committee), service (active member with the local, regional and national athletic training organizations, Athletic Training Students Club/Members and Faculty noted on national website, Instructor for American Heart Association, Book reviewer for Lippincott Williams and Wilkin publishing company, participant in several health events for children, i.e. TEAM L.I.U.-Teenagers Educated About Asthma Management).

In addition, Tracie Rawls-Martin is an entrepreneur and a top executive for one of the world's largest direct selling telecommunications providers. On a part time basis she has reached the first earned executive position in the company. She is well on her way to helping hundreds and thousands of individuals achieve financial freedom and continue to live out their life long dreams whether it be to have more time with their families or to explore the beaches of the world.

Tracie will continue to pursue her passions and would like to contribute her success to the Lord, her family and her students. She will not rest until she has fulfilled her life's long mission—to take care of children of all ages, to feed them, clothe them, teach them and love them; in the end to develop a place they can call home and a place they can always return to a "University for Children."

HONORING THE ACCOMPLISHMENTS OF DETECTIVE LESTER J. NERI

HON. JIM GERLACH

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. GERLACH. Madam Speaker, I rise today to honor a dedicated public servant in Chester County, Pennsylvania, who has retired after 33 years of loyal service in law enforcement.

Detective Lester J. Neri started his career in 1975 with the Springfield Township Police Department and faithfully served the Tredyffrin Township Police Department for the last 27 years.

Detective Neri earned the respect of fellow officers and supervisors with his outstanding leadership and analytical skills over the course of his distinguished career.

He has been a tremendous asset to the department due to his wide range of skills, including crisis negotiations, homicide investigations, undercover investigative techniques and fingerprint processing.

Despite retiring in December, Detective Neri continues to serve the 42,000 men and women who pin on a badge each day in his

position as State President of the Pennsylvania Fraternal Order of Police.

Madam Speaker, I ask that my colleagues join me today in praising the outstanding service and dedication of Detective Lester J. Neri, and all those who take an oath to serve and protect their communities.

TRIBUTE TO THE GERMANTOWN BULLDOGS

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to a championship team from Germantown, Illinois.

The Germantown Bulldogs beat Mt. Vernon-St. Mary 35–32 to clinch the 2009 Southern Illinois Junior High School Athletic Association Class S state championship. The Bulldogs brought home the trophy after finishing the season with a stellar 28–1 record.

To win the title, the Bulldogs built an early lead, then had to hold off an intense second-half rally, but they showed poise under pressure, and held on to get the win.

I want to congratulate Coach Gerard Alpers and his assistant coach, Jeff Lampe, on their fine work with this group of student athletes. I also want to extend my congratulations to the members of the 2008–2009 Germantown Bulldogs state championship boys basketball team: Seth Haake, Nick Hitpas, Jalen Albers, Drew Poppe, Grant Haake, Kevin Haar, Kyle Kohnen, Brandon Becker, Mitchell Langenhorst, Christian Kohnen, Kyler Scheer, Jordan Lampe and Travis Wuebbels.

This outstanding group of young men represented themselves, their school, families and community in a first-rate fashion. It is my privilege to congratulate them on a job well done.

TRIBUTE TO BILL GHENT, INC.

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to a community institution in Harrisburg, Illinois, celebrating its 100th birthday.

Bill Ghent, Inc. began business in 1909 as J.C. Robertson, and boasted as its slogan, "Friends may sympathize, but we pay cash." Bill Ghent joined the business in the late 1930s, and in 1957, Bill Ghent, Inc. was established. In the early days, the only worries this small-town insurance agency was concerned with were fire and lightning. "Now, we've got all kinds of perils to deal with," Bill Ghent, II, told the local newspaper.

These days, Bill Ghent, Inc. insures not just private citizens and their property, but also looks after the schools of the area. Insuring schools is something of a tradition for Bill Ghent, Inc. In Mr. Ghent's office, behind glass, is the 1909 to 1911 policy for the Bramlet

School in Raleigh, Illinois. It insured the school building for \$500 and the contents for \$100.

Bill Ghent, Inc. has served the residents of Harrisburg and southeastern Illinois from the days of horse and buggies to today's modern world. I want to congratulate Bill Ghent and all the employees of Bill Ghent, Inc. on one hundred years of service to the community, and to wish them one hundred more.

TRIBUTE TO SERGEANT BRIAN SCHAR

HON. JOHN J. DUNCAN, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. DUNCAN. Madam Speaker, Albert Caswell is one of the finest tour guides in the United States Capitol Guide Service. But what many may not know about Albert is that he is also a gifted poet.

Oftentimes, when I run into Albert in the Capitol, he shares his work with me. Recently, he gave me a poem about a man from my District in East Tennessee, Sergeant Brian Schar.

Sergeant Schar served our Nation valiantly during the War on Terror, and in doing so made a sacrifice only few could imagine.

Albert's poem is a tribute to Sergeant Schar's courage and strength as he adjusts to life as a double amputee. While we often hear on the news of the lives lost in the War, we also need reminding of the thousands more who suffered life-altering injuries.

Madam Speaker, I would like to call Albert's poem to the attention of my colleagues and other readers of the RECORD, and I pray many will be inspired by his words.

Everyday, magnificent men and women like SSG Schar go off to war and leave their loved ones behind. All for the greater good, putting themselves last while putting their nation first. Many lie in graves as the ultimate sacrifice. While, others like Brian . . . must come home and fight another battle. While all the time teaching and inspiring us, with their undying faith and courage to inspire us.

ONE THING . . . FOR SCHAR

Throughout the course of our nation's history . . .

There have come so many fine patriots who have blessed her so indeed . . .

And many all from this great state of Tennessee . . .

Men like Crockett all in their glory . . .

And Sargent York, all the more he . . .

Who, fought and died . . . all so we could be free . . . their story . . .

Men, who went straight into that face of hell . . .

With hearts of courage full, which swelled . . .

Who all in that moment of truth . . .

Have so showed us the proof . . .

That on this earth, angels dwell . . .

For there have been so many Tennesseans, such fine lives would create . . .

Men who have so blessed our nation, and this their state . . .

But, One Thing For Schar . . .

The Tallest of All Tennessean's by far . . .

Are but men like this young star . . .

Men who so bravely lived and died . . .

Who come home without arms and legs . . .
 And don't ask why? . . .
 For they have a higher calling . . .
 As they wipe those tears from their eyes . . .
 For he won't moan and he won't beg . . .
 As a new war he must wage . . .
 As on this day he stands taller, than any
 other man with legs . . .
 As he must go through hell and back, all so
 you can say . . .
 I am free this day . . .
 As one of The Tallest of Tennessean's, he
 now stands . . .
 As it's his heart that which now so com-
 mands . . .
 Teaching us . . .
 Reaching us . . .
 Into your our very souls to make us under-
 stand . . .
 Why we are free, and how beautiful a heart
 can be . . .
 Blessing us all, you and me . . .
 As the high cost of freedom we so see . . .
 As from his heart he speaks!
 Saying, I will not be stopped . . .
 I will not be slowed . . .
 As a force of nature, as onward he goes . . .
 As his fine heart climbs mountains tops . . .
 And if I ever have a son . . .
 I but hope and pray that he could but be like
 this fine one . . .
 But, one thing I ask . . .
 One, Thing . . . For Schar . . .
 As you go home this night . . .
 Holding, your family warm and tight . . .
 As all in your world, all seems so right . . .
 Remember, the great price of freedom paid
 . . .

Get down on your knee's . . .
 And thank this young man so brave . . .
 And all of his brothers and sisters in arms,
 who now so lie in soft quiet graves!
 Just, One Thing For Schar . . .

ALBERT CAREY CASWELL ©, 2009

FAOY This poem is dedicated to a real
 American Hero Brian Schar . . . he was in-
 jured on September 9th 2007 in an IED blast

 bat Engineer from Sevierville Tennessee.

TRIBUTE TO KENT OLSON, EXECU- TIVE DIRECTOR OF THE PROFES- SIONAL INSURANCE AGENTS OF NORTH DAKOTA

HON. EARL POMEROY

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. POMEROY. Madam Speaker, I rise to
 honor the distinguished career of Kent Olson.
 I am pleased to have known Kent Olson for
 the many years he served as the Executive
 Director of the Professional Insurance Agents
 of North Dakota working with him on important
 insurance issues for North Dakota farmers.

Kent Olson is a model of the highest stand-
 ards of honesty, integrity and professionalism.
 As Mr. Olson prepares to begin retirement, I
 want to pay tribute to his leadership of the
 professional insurance agents in North Dakota
 focusing on the importance of quality contin-
 uing education for its members that trans-
 lated into excellent service for families and
 farmers in North Dakota. Throughout the
 years, quality education for professional insur-
 ance agents has been known by one name:
 Kent Olson.

Among his many achievements, Kent Olson
 is an expert in crop insurance and has been
 passionate in support of the key role that crop
 insurance plays in the farming economy of our
 state and of our entire nation.

In addition to his work in our state, Kent has
 contributed his many talents to the national
 PIA agents association, putting on seminars
 and getting personally involved every year. His
 involvement typifies his belief in our democ-
 racy and embodies the motto of PIA as being,
 "Local Agents Serving Main Street America."
 Kent believes passionately in the value that
 local professional insurance agents always
 provide. And with equal passion, he believes
 that insurance should continue to be regulated
 by the State, not by the federal government.

I am pleased to note that although Kent will
 be retiring, he will never give up his passion—
 whether they are for the Main Street insurance
 agents, who have come to call him a close
 friend, or for his family, or for his music.

Kent Olson is one of those people whom
 everyone respects, and with many good rea-
 sons. I have had the pleasure of calling Kent
 Olson a colleague and a friend, and that will
 never change.

I am pleased to congratulate and commend
 Kent Olson on the occasion of his retirement
 as executive director of the Professional Insur-
 ance Agents of North Dakota.

RECOGNIZING AT&T FOR JOBS CREATION AND COMMITMENT TO CLEAN ENERGY

HON. JOE BACA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. BACA. Madam Speaker, in this time of
 economic uncertainty, I rise to thank one com-
 pany who is actively working to create new
 jobs and practice a clean, environmentally
 friendly business model, AT&T.

Through a new \$18 billion initiative, AT&T is
 pledging to increase its broadband capacity.
 Not only will this initiative increase Internet
 speed and accessibility for customers, but per-
 haps more importantly it will create 3,000 new
 jobs.

Over the next ten years, AT&T also plans to
 create or save an additional one thousand
 jobs through a plan to invest \$565 million in
 replacing its current fleet of vehicles with
 15,000 domestically manufactured Com-
 pressed Natural Gas and alternative fuel vehi-
 cles.

Research shows that this new fleet will save
 49 million gallons of gasoline over the next ten
 years. It also will reduce carbon emissions by
 211,000 metric tons in this same time frame.

Madam Speaker, I applaud AT&T for its ini-
 tiative in taking the lead in the movement to
 green our economy. Not only will these new
 initiatives help lead our nation out of its cur-
 rent economic downturn, but they also help to
 create an environmentally sustainable future
 for our children and grandchildren to enjoy.
 These actions set AT&T apart as an exem-
 plary company, and I hope that others will
 soon follow their lead.

TRIBUTE TO THE OMEGA PSI PHI FRATERNITY

HON. KENDRICK B. MEEK

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. MEEK of Florida. Madam Speaker,
 today I rise to recognize my fraternity, Omega
 Psi Phi Fraternity, Incorporated, the first Afri-
 can-American national fraternal organization to
 be founded at a historically black college, for
 their 7th Annual Florida Political Summit in
 Tallahassee, Florida.

For nearly 100 years, my fraternal brothers
 have faithfully carried out their mission of fos-
 tering the growth of men, both college and
 post college, by providing an outlet and oppor-
 tunity to serve the community as set forth by
 our founders at Howard University, Edgar A.
 Love, Oscar J. Cooper, Frank Coleman, and
 Ernest Just.

Since its inception in 1911, Omega Psi Phi
 brothers have been advocates of taking lead-
 ership to prevent violence against women and
 children in the African-American community,
 supported efforts of the United Negro College
 Fund and the Congressional Black Caucus,
 and most recently partnered with the American
 Cancer Society and the National Association
 of Basketball Coaches in Coaches vs. Cancer
 in empowering basketball coaches, their
 teams and local communities to make a dif-
 ference in the fight against cancer.

While attending Florida Agricultural and Me-
 chanical University, FAMU, in Tallahassee,
 Florida, I had the distinct honor of serving as
 Basileus of the Upsilon Psi Chapter of Omega
 Psi Phi. My experiences as Basileus have
 served as the cornerstone in my education
 and leadership skills that I have carried over
 into this esteemed Chamber in representing
 the 17th Congressional District of Florida.

In an esteemed effort to continue Omega
 Psi Phi's mission, I know the men of Omega
 Psi Phi Fraternity will discuss their legislative
 concerns ranging from civil rights, health care
 reform and veteran's affairs to public edu-
 cation, foreign policy, and economic issues
 while sharing their experiences and raising
 awareness of issues affecting our daily lives.

Madam Speaker, I encourage my col-
 leagues to join me in wishing my brothers of
 Omega Psi Phi Fraternity a successful political
 summit as these men continue to build a
 strong and effective force of men dedicated to
 its Cardinal Principles of manhood, scholar-
 ship, perseverance, and uplift.

REMEMBERING THE LIFE OF MUSIC IMPRESARIO RALPH MERCADO

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. RANGEL. Madam Speaker, I rise to ask
 my colleagues to pause and remember the life
 of a good friend, Ralph Mercado, the leg-
 endary Latin music executive who recently
 passed away on March 10, 2009. As much an

icon as the musicians that he worked with and promoted, Mercado was a visionary innovator who helped popularize tropical music worldwide, including New York's mixture of popular Latin rhythms known as "salsa."

Mercado etched his name in the history books by building a record label whose various components (from a publishing company to a video and film production arm) helped make and take salsa to some of the largest stages around the world. A catalog of award-winning international hits across three decades transformed the Latino music industry, bringing respect not only to talented artists but also providing young Latinos with a way to connect with their parents, their roots and their communities.

It all started in Brooklyn on Sept. 29, 1941. The son of a Dominican dockworker and a Puerto Rican factory worker, Mercado often commented that he learned merengue, the typical dance from the Dominican Republic, in the hallway of the family's fifth-floor walkup as soon as he could walk. He first fell in love with the rhythms while at the Palladium Nightclub when he was only 16, watching the big bands of Machito, Tito Puente and Tito Rodriguez. As a teenager, he was famed for producing "waistline parties" in apartment building basements where a couple's admission was a penny per inch of their dates' waistline.

Using the same concept, he then opened the 3 & 1 Club where he began booking local Latin bands such as Eddie Palmieri and Richie Ray & Bobby Cruz, among many others. This led to Mercado's first management, booking, and promotions company called Showstoppers. He promoted legendary R&B acts that included James Brown, Aretha Franklin, Gladys Knight & the Pips, the Stylistics, the Chi-lites, starting a salsa-soul music trend.

Mercado also continued to open many doors to up and coming artists. He helped to expand the Fania All-Stars, promoted dances at the Cheetah Nightclub, and presented Latin jazz at the Red Garter and, later, at the Village Gate and other downtown venues. His partnership with Jack Hooke, the late Tito Puente's longtime manager, helped create the Salsa Meets Jazz Series at the Village Gate and the Latin Jazz Jam as part of the JVC Jazz Festival.

A great judge of talent, Mercado opened RMM Management in 1972 representing Eddie Palmieri and Ray Barretto. He went on to manage virtually every name in the industry, including its two biggest stars: Tito Puente and Celia Cruz. His concerts grew more popular and by 1987 the wildly successful "Latin Tinge" nights at the Palladium on New York's 14th Street were bringing 3,000 "salseros" to dance every Thursday night. Mercado managed these events until 1992, when he refocused his energies on the creation of a record label, RMM.

Mercado expanded his venture into numerous companies including RMM Records, RMM Filmworks, and two publishing houses. With over 140 artists signed to RMM Records, the label sold millions of recordings a year. The recipient of countless awards and proclamations, Ralph Mercado was honored with a Lifetime Achievement Tribute by Billboard Magazine in 1999.

Always an innovator, Ralph Mercado pioneered the presentation of salsa music in Africa, South America, Asia, and Israel. He was one of the first to bring Latin music concerts to such prestigious venues as Radio City Music Hall with Julio Iglesias' New York performance; Lincoln Center's Avery Fisher Hall; the Beacon Theater; and Madison Square Garden.

The truth of course is that Mercado's death this week leaves a tremendous void in the hearts of not just his family and friends but also countless Latin music fans around the world. However, his body of personal and professional work leaves a distinguished legacy whose impact can be seen not just in the industry he helped create, but also in the countless lives that his music touched. Little boys and girls can dream of singing the songs that their parents know and love thanks to Ralph's extraordinary commitment, energy and discipline.

So Madam Speaker, rather than mourn his passing, I hope that my colleagues will join me in celebrating the life of Ralph Mercado, Jr. His is an inspirational story for all Americans, one that exemplified greatness in every single way.

HONORING MAYELA ROSALES

HON. MARIO DIAZ-BALART

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. MARIO DIAZ-BALART of Florida. Madam Speaker, I rise today to honor an exceptional businesswoman, journalist and community activist from Naples, Florida, Mayela Rosales. As Executive Vice President of Azteca America SWFL and host of the most popular Spanish language TV show in Southwest Florida, D'Latinos al Dia, Mrs. Rosales is an example of what can be achieved through hard work and dedication.

With a degree in Journalism and Communications from the University of Zulul in her native country of Venezuela and 12 years of experience in the field, she came to the U.S. 13 years ago. Since then, she has worked towards ensuring that the fast-growing Hispanic community in Southwest Florida has access to news and information through Spanish language television programming and print. In 2003, Media Vista Group, the company she owned, integrated with Media Vista Publications and now produces the D'Latinos Magazine, D'Latinos online and D'Latinos al Dia program. Mrs. Rosales is Executive Director of the monthly magazine and host of the television show, which has been the only live, Spanish language program in the area for six years and airs every weekday in more than 400,000 homes.

In 2006, Mrs. Rosales, in partnership with her husband Orlando Rosales and others, acquired local TV station WTPH 14 Azteca America Southwest Florida in Naples. The station serves as a venue for Spanish language programming and news including D'Latinos al Dia.

In addition to her business ventures and career in journalism, Mrs. Rosales is a dedicated

wife to husband Orlando and mother of two boys, Gabriel and Daniel. She is also active in a number of civic and charitable organizations including the Greater Naples Chamber of Commerce, the Children's Museum of Naples, the American Heart Association, the Fifth Third Bank, the Ronald McDonald House, Hospice of Naples, Catholic Charities and Literacy Volunteers, and was the founder of the Council for Hispanic Business Professionals.

As we celebrate Women's History Month, I ask you to join me in congratulating my dear friend Mayela Rosales for her invaluable contributions to the Hispanic community and her dedication to professionalism and communicating accurate and valuable information to residents of Southwest Florida.

TRIBUTE TO THE BARTELSON BRAVES

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to an outstanding group of student athletes from Bartleso, Illinois.

The Bartleso Braves of Bartleso Elementary School, defeated Centralia Trinity Lutheran 49-26 to capture the Southern Illinois Junior High School Athletic Association Class S State Championship. The win followed victories in the quarterfinals over Rome and in the semifinals over Waltonville.

I want to congratulate Coach Gigi Kohrmann and Assistant Coach Abby Winkler for all of their work with their team. I especially want to congratulate the members of the 2008-2009 Bartleso Braves state championship basketball team: Emily Koelling, April Gebke, Madison Thole, Kaitlyn Albers, Katlyn Albers, Paige Varel, Torre Kohrmann, Nicole Loepker, Noel Loepker, Jillian Menkhous, Erin Brueggemann, Sophie Rickhoff, Elle Gebke, Chloe Beckmann and Madison Haake.

These young ladies have made our community proud, and have brought home the championship trophy to Bartleso. I wish them all the best in their future academic and athletic endeavors.

HONORING MILCA GUTIERREZ

HON. GEORGE RADANOVICH

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. RADANOVICH. Madam Speaker, I rise today to congratulate Milca Gutierrez upon being named as the Children's Miracle Network's "California Champion Across America" for 2009. Miss Gutierrez will be honored on Tuesday, March 17, 2009 at Children's Hospital Central California at an event to kick off the local and national public awareness program.

Milca Gutierrez, of Fresno, California, was diagnosed when she was four months old with a rare disorder called ontogenesis imperfecta, commonly known as brittle bone disease. This

rare disorder affects the connective tissue and causes bones to break easily and without any apparent reason. At the age of eleven, Miss Gutierrez has been seen at Children's Hospital Central California over 180 times and has undergone over ten operations; she remains positive with her motto "It's just a bone."

Miss Gutierrez is a constant source of brightness and support, whether to herself or others, she has a unique ability to always help those around her. Once a year she and her family travel to their native hometown in Mexico to provide clothes, toys and stuffed animals to families in need. She is able to live an active and full life; she loves swimming, math and dreams of becoming a doctor. Her unique situation has placed her in a position to advocate for children's hospitals across the nation, serve as a "Champion" for the State of California and act as an ambassador for the seventeen million children who are treated at children's hospitals every year. The Children's Miracle Network sponsors a variety of events to help raise money for children's hospitals; including the Champions Across America initiative, where one child from each state is selected to serve as a champion to help highlight the importance of a children's hospitals. Miss Gutierrez, along with her fellow champions, and her family will travel to Walt Disney World to participate in the Children's Miracle Network Celebration and to Washington, D.C. to highlight the vital work of children's hospitals.

Madam Speaker, I rise today to commend and congratulate Milca Gutierrez upon her achievements and strength. I invite my colleagues to join me in wishing Miss Gutierrez many years of happiness and success.

IN HONOR OF JOHN KURKOSKY

HON. MICHELE BACHMANN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mrs. BACHMANN. Madam Speaker, I rise today to honor John Kurkosky of Annandale, Minnesota for creatively using his song-writing and singing talents to support his neighbors in need.

A self-professed "shower singer," John makes a hobby out of writing and singing country, rock and gospel songs. Five years ago, he wrote a song, "Ice Fishin' My Buddies and Me" that gained popularity last year when it was featured on the local news story about Minnesota ice houses. Though John has recorded about 40 songs, his tale about one of Minnesota's most popular pastimes seems to be everyone's favorite. So popular is this local song that if you Google "Kurkosky fish house song," you'll get hits all over the web, including YouTube.

His CD, "John Kurkosky: My Mixed Up Music" sells at a shop in Annandale, Minnesota and is also available by mail. As a construction worker, John doesn't plan to quit his day job anytime soon, but since March is Food Share Month, he is using his talent to set up fundraising events in Central Minnesota for local food shelves. In addition, John already donates a portion of every CD sale to food shelves. This March campaign is the

largest food drive in the state, supporting work at 260 food shelves across Minnesota.

Madam Speaker, I rise today to congratulate and honor John Kurkosky on his musical success and his charitable efforts. It is Minnesotans like John that make our communities better places to live, work and raise a family.

PERSONAL EXPLANATION

HON. TIMOTHY V. JOHNSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. JOHNSON of Illinois. Madam Speaker, unfortunately last night, March 16, 2009, I was unable to cast my votes on H.R. 987, H.R. 1217, and H.R. 1284. I was dealing with the death of a very dear friend of mine over the weekend and was visiting with his family Monday night.

Had I been present for Rollcall No. 125, on suspending the Rules and passing H.R. 987, naming the John Scott Challis, Jr. Post Office, I would have voted "yea."

Had I been present for Rollcall No. 126, on suspending the Rules and passing H.R. 1217, naming the Specialist Peter J. Navarro Post Office, I would have voted "yea."

Had I been present for Rollcall No. 127, on suspending the Rules and passing H.R. 1284, naming the Major Ed W. Freeman Post Office, I would have voted "yea."

TRIBUTE TO THE ALTAMONT LIONS CLUB

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to an important community institution. The Altamont Lions Club in Altamont, Illinois, celebrated its 70th Anniversary on January 15 at the Immanuel Lutheran Church Parish Hall.

Since January 1939, the Altamont Lions Club has been doing good deeds in this small town in Effingham County, Illinois. Each year, the club gives two Lions Club scholarships to deserving students in the community. Through the Lions' nationwide commitment to assisting the sight-impaired, they hold candy days fundraisers to purchase large-print Readers' Digests for the local library, and donate funds to enable blind youth to attend Space Camp. This commitment has also led to the club purchasing eyeglasses for community members in need. In recent years, the Altamont Lions have sponsored youth soccer and basketball leagues, giving area children a positive opportunity for healthy recreation.

I want to congratulate Club President Jim Strange and the members of the Altamont Lions Club on 70 years of good work, and wish them all the best for the next 70 years and beyond.

EARMARK DECLARATION

HON. TODD TIAHRT

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. TIAHRT. Madam Speaker, in accordance with the February 2008 New Republican Earmark Standards Guidance, I submit the following in regards to the Fiscal Year 2009 Omnibus Appropriations Act found in H.R. 1105: Department of Agriculture—Preharvest Food Safety

H.R. 1105, the FY 2009 Omnibus Appropriations Act contains \$142,000 for Preharvest Food Safety, Kansas, in the Cooperative State Research Education and Extension Service's Research and Education Activities Account. The entity to receive funding for this project is the Kansas State University, located at 110 Anderson Hall, Manhattan, Kansas 66506.

The funding would be used to expand its research in emerging threats of food-borne and zoonotic diseases associated with food-producing animals.

No matching funds are required for this Department of Agriculture project.

Department of Agriculture—Karnal Bunt
H.R. 1105, the FY 2009 Omnibus Appropriations Act contains \$508,000 for Karnal Bunt, Manhattan, Kansas, in the Agriculture Research Service's Salaries and Expenses Account. The entity to receive funding for this project is the Kansas State University, located at 110 Anderson Hall, Manhattan, Kansas 66506.

This funding will be used to develop breeding lines of wheat that are resistant to existing and emerging diseases, including Karnal Bunt, leaf rust, and UG99 stem rust.

No matching funds are required for this Department of Agriculture project.

HONORING FLYING CROSS RECIPIENT ROBERT P. CHRISTIANSEN OF HOMOSASSA, FLORIDA

HON. GINNY BROWN-WAITE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Ms. GINNY BROWN-WAITE of Florida. Madam Speaker, I rise today to honor an American hero and Distinguished Flying Cross recipient, Major Robert P. Christiansen of Homosassa, Florida. His extraordinary achievement while participating in aerial combat flight during an engagement in Southeast Asia in 1968 and his service to our Nation will forever be remembered by this Congress. Mr. Christiansen bravely encountered dangerous and life-threatening events during his time in the Air Force.

Born in Philadelphia, Pennsylvania, Mr. Christiansen graduated from West Point in 1957. He bravely served our country as a fighter pilot for the next 15 years, including service in Southeast Asia. On May 1, 1968, Mr. Christiansen bravely participated in an aerial combat mission.

On that night, Mr. Christiansen and his navigator bombardier dutifully responded to an urgent call to attack a convoy of hostile vehicles

in a heavily defended and strategically important area. Mr. Christiansen made three attacks and was credited with destroying five vehicles and causing two significant secondary explosions. The professional skill and personal devotion displayed by Mr. Christiansen reflect his immense commitment and sacrifice.

Madam Speaker, soldiers like Robert P. Christiansen should be recognized for their service to our Nation and for their commitment and sacrifices in battle. I am honored to congratulate Mr. Christiansen on his long overdue Flying Cross award. His family, friends and loved ones should know that we truly consider him one of America's heroes.

**THE HOME OFFICE DEDUCTION
SIMPLIFICATION ACT (H.R. 1509)**

HON. JOHN M. McHUGH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. McHUGH. Madam Speaker, yesterday, March 16, 2009, the Gentleman from Oregon, Mr. SCHRADER, and I introduced legislation, H.R. 1509, the Home Office Deduction Simplification Act. This legislation, which was H.R. 6214 in the 110th Congress, is designed to reduce the complexity of the tax code and provide Americans with the ability to elect to take a standard deduction in the amount of \$1,500 for home office expenses.

In 1976, Congress enacted Section 280A of the Internal Revenue Code, which as amended in 1997, provides the limited circumstances in which an individual or an S corporation may take a deduction for expenses related to an office in the home. Generally, deductions are limited to those parts of a home that are exclusively used on a regular basis as a principal place of business or to meet with patients, clients, or customers.

As a result of technological advancements and other significant changes in our economy over the past 40 years, many more small businesses are now able to effectively operate out of the home. Not surprisingly, there has been a growth in the use of home offices; according to the Internal Revenue Service (IRS), the home office deduction was taken on 3.3 million self-employed business returns in tax year 2006, an increase of 700,000 from tax year 2002.

Nonetheless, the IRS reports that "a substantial number of taxpayers with home office expenses are not claiming them on tax returns." According to the IRS, the deduction might be underutilized because "understanding and complying with the rules for deducting home office expenses can be difficult for small business and self-employed taxpayers." This is borne out by an IRS analysis that found almost half of the taxpayers claiming a home office deduction made errors.

Small businesses are unquestionably the backbone of our nation's economy. In fact, some 27 million American small businesses represent more than 99 percent of all employers, provide 51% of private sector employment and 45% of its payroll, and produce approximately 50% of the nation's private, nonfarm GDP. I could not overstate the importance of

the nearly 66,000 small businesses I have the privilege of representing to the economy of Northern and Central New York.

The importance of this measure to small businesses is evident by the fact that it is supported by a coalition that includes the Alliance of Visual Artists, American Homeowners Grassroots Alliance, Associated Builders & Contractors (ABC), Association for Enterprise Opportunity (AEO), National Association for the Self-Employed (NASE), National Federation of Independent Business (NFIB), National Small Business Association (NSBA), Professional Photographers of America, Small Business & Entrepreneurship Council, Small Business Legislative Council (SBLC), and Women Impacting Public Policy (WIPP). The Home Office Deduction Simplification Act is also supported by the SBA Office of Advocacy.

Given the importance of small businesses to our economy, it is imperative that Congress act when presented with opportunities to reduce or remove costly regulatory burdens. The current home office deduction presents such an opportunity, which Congress can reduce, by enacting the Home Office Deduction Simplification Act. Accordingly, I ask my colleagues to join with Mr. SCHRADER and me to enact this important measure.

**HONORING ST. PATRICK'S DAY
AND THE INDY SPORTS FOUNDATION**

HON. ANDRÉ CARSON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. CARSON of Indiana. Madam Speaker, today I rise in recognition of Saint Patrick, the patron saint of Ireland. As we celebrate St. Patrick's Day, I would like to honor the Indy Sports Foundation for their continued dedication in civic engagement and preservation of the rich Irish heritage in Indianapolis, Indiana.

The Indy Sports Foundation has done an excellent job of hosting the Annual Indianapolis St. Patrick's Day Parade and Celebration along with the Annual Shamrock Run/Walk. With nearly 2,000 participants and over 20,000 spectators, the Indy Sports Foundation celebrates the vibrant Irish culture and Irish contributions to American society.

For the past 25 years, the Indy Sports Foundation has played an invaluable role in our community to promote athletics and youth engagement. They have sponsored events such as the Special Olympic Camps, summer programs for disabled children, and provided mentorship for children from disadvantaged backgrounds.

Each year, the Indy Sports Foundation recognizes an outstanding individual who's dynamic and selfless contributions have impacted the public good. I would like to congratulate Pat Cronin, the first female to be named "Indianapolis Irish Citizen of the Year." I thank her for her service to the Irish community and her ceaseless efforts to advance the philanthropic mission of the Indy Sports Foundation.

I urge my colleagues to join me this St. Patrick's Day in recognizing the Indy Sports

Foundation for their ongoing involvement in the Greater Indianapolis community.

**INTRODUCTION OF LOWER BRULE
AND CROW CREEK TRIBAL COM-
PENSATION ACT**

HON. STEPHANIE HERSETH SANDLIN

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Ms. HERSETH SANDLIN. Madam Speaker, today I am pleased to reintroduce the Lower Brule and Crow Creek Tribal Compensation Act. This bill would fully compensate the Lower Brule Sioux Tribe and the Crow Creek Sioux Tribe in South Dakota for the lands that they lost as a result of the federal government's construction of the massive dams on the main stem of the Missouri River.

The Lower Brule Sioux Tribe and the Crow Creek Sioux Tribe reservations border on the Missouri River in central South Dakota and are connected by the Big Bend Dam. The 1944 Flood Control Act flooded and devalued tribal lands. The flooding also took an enormous toll on the people of both tribes and their economies. It is critically important that we seek to fully reimburse these tribes for the lands they lost.

Congress created a trust fund for the Crow Creek Sioux Tribe in 1996, and a separate trust fund for the Lower Brule Sioux Tribe in 1997. These trust funds sought to compensate the tribes for the value of their land that is now permanently inundated as a result of the construction of the Big Bend Dam.

Regrettably, the compensation amounts varied between separate but similarly-situated tribes along the Missouri River. The result was unfair and inadequate compensation trust funds for Lower Brule and Crow Creek, and therefore, Congress should revisit the compensation levels provided to these tribes in the 1990s. This act is designed to create consistency among the affected tribes and to bring some long-overdue closure to the people of Lower Brule and Crow Creek.

Compensation for these tribes would give the tribes the tools they need for economic recovery in the face of lasting impacts from the 1944 Flood Control Act. This compensation would enable the tribe to improve their community facilities and fix their roads. It would mean better health care and newer schools. Most importantly, it would mean a real chance for these tribes to provide future generations with the tools that so many of us take for granted.

I am hopeful that the House will move quickly in the 111th Congress to advance this important legislation. An earlier version of this bill was reported by the Senate Committee on Indian Affairs in the 108th Congress and ultimately passed the Senate. In the 109th Congress it was amended in the Senate after further hearings and then reported. In the 110th Congress, the Committee on Natural Resources Water and Power Subcommittee held a legislative hearing on an identical bill.

In closing, I respectfully ask my colleagues to support the Lower Brule and Crow Creek Tribal Compensation Act and work with me to

enact legislation that would fairly and appropriately compensate members of the Lower Brule and Crow Creek Sioux Tribes.

INTRODUCTION OF THE PATHWAY FOR BIOSIMILARS ACT

HON. ANNA G. ESHOO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Ms. ESHOO. Madam Speaker, the field of biotechnology is the future of medicine. Scientists and doctors are just beginning to scratch the surface of the potential to harness the extraordinary power of biology and the astounding natural processes which occur in the human body, in animals, and in other living organisms to advance breakthrough medical discoveries and treatments. While ordinary pharmaceuticals primarily treat the symptoms of a disease or illness, biotechnology products—"biologics"—can be manipulated to target the underlying mechanisms and pathways of a disease.

Through the study of biotechnology, the potential exists to develop effective treatments for cancer and AIDS, many of which are already saving lives. We will cure diabetes. We will prevent the onset of deadly and debilitating diseases such as Alzheimer's, heart disease, Parkinson's, multiple sclerosis and arthritis. We will save millions of lives and improve countless more.

The development of biologics is expensive and extremely risky. Bringing a biologic to market can require hundreds of millions of dollars in research and development costs and can take several years. For every successful biologic, there are another 10 or 20 that do not pan out, making the incentives for investment in this field extremely sensitive for any changes in the regulatory structure for biologics.

In 1984 the highly successful Hatch-Waxman Act was enacted, establishing a new market for generic versions of pharmaceuticals. Today, patients can buy generic drugs that are safe and save them money compared with brand name drugs. The Pathway for Biosimilars Act will accomplish the same thing for biologics.

In the relatively young industry of biotechnology, many of the original patents on biologics are beginning to expire and it's appropriate for Congress to consider how "follow-on" biologics or "biosimilars" are considered and approved by the FDA, and the impact these products will have on patient health and safety, health care costs, and incentives for innovation.

As a primary matter, it's important to recognize that traditional "small-molecule" pharmaceuticals and biologics are fundamentally different in their development, their manufacture and their chemical makeup. A traditional small-molecule drug is manufactured through synthesis of chemical ingredients in an ordered process, and the resulting product can be easily identified through laboratory analysis. A biologic is a large, complex molecule, which is "grown" in living systems such as a microorganism, a plant or animal cell. The re-

sulting protein is unique to the cell lines and specific process used to produce it, and even slight differences in the manufacturing of a biologic can alter its nature. As a result, biologics are difficult, sometimes impossible to characterize, and laboratory analysis of the finished product is insufficient to ensure its safety and efficacy.

The pharmaceutical drug production process is easily replicated and a "generic" drug product is virtually identical to the original innovative product, so generic drug manufacturers are permitted to reference the original testing data submitted by the innovator companies when the original drug is submitted to the FDA for approval. With biologics, the manufacturing process is unique to each biologic and is not generally disclosed as part of the published patent. A biosimilar manufacturer would have to have intimate knowledge of these proprietary processes in order to "duplicate" the biologic product, and even then it is extremely difficult—no two living cell lines are identical, so no two biologics manufacturing processes have identical starting materials or proceed in the same way.

It's also important to note that because biologics are produced with cells from living organisms, many of them can cause an immune reaction which is normally benign and does not affect safety. However, some of these reactions can negate the effectiveness of the biologic or even cause side effects that are more dangerous. Most of these reactions can only be observed through clinical trials with real patients.

Any expedited regulatory pathway for biosimilars must account for all these factors and I'm proud to join with Congressman JAY INSLEE and the Ranking Member of the Energy and Commerce Committee, Rep. JOE BARTON, to introduce the Pathway for Biologics Act. Our bill builds on the significant progress the Senate, led by Senators KENNEDY and ENZI, already made during the last Congress, as well as the significant level of consensus we have heard on our Committee about this issue. The Pathway for Biologics Act will establish a new statutory pathway for biosimilars guided by three principles:

1. Legislation to facilitate the development of biosimilars should promote competition and lower prices, but patient safety, efficacy and sound science must be paramount.

2. We must preserve incentives for innovation and ensure that patients will continue to benefit from the ground-breaking treatments biotechnology alone can bring.

3. We must strive to protect the rights of all parties and resolve disputes over patents in a timely and efficient manner that does not delay market entry and provides certainty to all parties.

The regulatory pathway set forth in the Pathway for Biologics Act embodies each of these principles and sets forth a sensible, scientifically sound process for approval of biosimilars. The legislation allows for input from all interested parties and provides FDA appropriate flexibility to protect patient health by requesting analytical, animal and clinical studies to demonstrate the safety, purity and potency of a biosimilar. The FDA will be empowered to require the tests and data it deems necessary, but the results of clinical

testing for immunogenicity will always be required as part of this data unless the FDA has published final guidance documents advising that such a determination is feasible in the current state of science absent clinical data and explaining the data that will be required to support such a determination. Since biologics are derived from human and animal products, immune reactions are a major concern for any new biologic product and are now impossible to detect without actual human testing.

Our legislation also addresses the important issue of interchangeability of biosimilars for the reference product. Some legislative proposals would allow the FDA to permit pharmacists and insurers to substitute a biosimilar for a physician's prescription for an innovator biologic product even when they cannot be demonstrated to be identical in their composition or effectiveness. Interchangeability of generic pharmaceuticals for brand name drugs is entirely appropriate since traditional generic drugs are chemically identical to the reference product. However, if the state of science is such that a complex molecule cannot be fully characterized and a precursor biologic cannot be adequately compared to a proposed biosimilar, then the biosimilar should not be fully substitutable for the precursor product without a physician's direction. The Pathway for Biologics Act makes it clear that the FDA cannot make a determination that a biosimilar is interchangeable with a reference product until it has published final guidance documents advising that it is feasible in the current state of scientific knowledge to make such determinations with respect to the relevant product class and explaining the data that will be required to support such a determination. This requirement is consistent with the recommendations of the Chief Scientist of the FDA.

An essential element of any new regulatory scheme for the biotech industry is a careful balancing of incentives for innovation and opportunities for new entry by competitors. To preserve incentives for innovation, the Pathway for Biologics Act provides 12 years of data exclusivity for new biologic products, which ensures that biosimilar applications that rely on the safety and efficacy record of existing biologic products will not be permitted to enter the market for 12 years following the approval of the innovator product. The 12-year exclusivity period is meant to preserve existing protections biotech companies receive from patents. The Congressional Budget Office has found that the effective patent life for pharmaceuticals is about 11.5 years, so a data exclusivity period of 12 years is consistent with that finding. Data exclusivity is necessary to provide additional protections and incentives for biologics because biosimilars—unlike generic drugs—will not be chemically identical to the reference product and will be less likely to infringe the patents of the innovator.

The legislation also includes incentives for additional indications and pediatric testing. New indications are critical for biologics and are often more significant than the indications for which approval was granted. Incentives for continued testing on new indications must be included to promote access to new treatments and cures, and this bill provides an additional two years exclusivity for new indications. I also believe it's important to provide incentives

similar to those given traditional pharmaceuticals under the Best Pharmaceuticals for Children Act to biologics, so the legislation provides an additional six months of data exclusivity for testing for use in pediatric groups.

In order to protect the rights of all parties and ensure that all patent disputes involving a biosimilar are resolved before the expiration of the data exclusivity period, the Pathway for Biosimilars Act establishes a simple, streamlined patent resolution process. This process would take place within a short window of time—roughly 6–8 months after the biosimilar application has been filed with the FDA. It will help ensure that litigation surrounding relevant patents will be resolved expeditiously and prior to the launch of the biosimilar product, providing certainty to the applicant, the reference product manufacturer, and the public at large. The legislation also preserves the ability of third-party patent holders such as universities and medical centers to defend their patents.

Once a biosimilar application is accepted by the FDA, the agency will publish a notice identifying the reference product and a designated agent for the biosimilar applicant. After an exchange of information to identify the relevant patents at issue, the applicant can decide to challenge any patent's validity or applicability. All information exchanged as part of this procedure must be maintained in strict confidence and used solely for the purpose of identifying patents relevant to the biosimilar product. The patent owner will then have two months to decide whether to enforce the patent. If the patent owner's case is successful in court, the final approval of the application will be deferred until the patent expires.

Madam Speaker, I believe the Pathway for Biosimilars Act sets forth a straightforward, scientifically based process for expedited approval of new biologics based on innovative products already on the market. This new biosimilars approval pathway will promote competition and lower prices, but also ensure that patients are given safe and effective treatments that have been subjected to thorough scrutiny and testing by the FDA. The Pathway for Biosimilars Act will also protect the rights of patent holders and preserve incentives for innovation in the biotechnology sector to develop the next generation of life-saving, life-changing therapies.

I strongly urge my colleagues to support the Pathway for Biosimilars Act.

TRIBUTE TO HARRISBURG JUNIOR BULLDOGS

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to a championship team from Harrisburg, Illinois.

On February 18, the Harrisburg Junior Bulldogs beat previously-undefeated Carlyle 52–43 to clinch the 2009 Southern Illinois Junior High School Athletic Association Class L state championship. Finishing with a record of 26–1, the Junior Bulldogs gave Harrisburg Middle School its first state championship in boys basketball.

Facing a strong, talented opponent, the Junior Bulldogs stayed cool under pressure, held off a late rally and then came from behind to seal the win. This year's team exemplifies teamwork. As Coach Kevin Dowdy told the local newspaper, "Everyone had their part."

I want to congratulate Coach Dowdy and his assistant coach, Marcus Questelle, on their fine work with this group of student athletes. I also want to extend my congratulations to the members of the 2008–2009 Harrisburg Junior Bulldogs state championship boys basketball team: Tyler Smithpeters, Capel Henshaw, Ryne Roper, Brian Berkel, Caleb Bailey, Justin Younger, Cody Hall, Isaac Ingram, Caleb Bartok, Gabe Oglesby, Phillip West, Brandon Pate and Chris Wilsey.

This outstanding group of young men represented themselves, their school, families and community in a first-rate fashion. It is my privilege to congratulate them on a job well done.

INTRODUCTION OF THE PRESERVATION OF ANTIBIOTICS FOR MEDICAL TREATMENT ACT

HON. LOUISE McINTOSH SLAUGHTER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Ms. SLAUGHTER. Madam Speaker, I rise today to reintroduce legislation that is critically important in preventing our current stock of antibiotics from becoming obsolete. As a mother, grandmother, and microbiologist, I cannot stress the urgency of this problem enough.

Two million Americans acquire bacterial infections during their hospital stay every year, and 70 percent of their infections will be resistant to the drugs commonly used to treat them. As a result, every day thirty-eight patients in our hospitals will die of those infections.

Sadly, children and infants are particularly susceptible to infections caused by antibiotic resistant bacteria. For example, Salmonella causes 1.4 million illnesses every year. Over one-third of all diagnoses occur in children under the age of 10. Infants under the age of one are 10 times more likely than the general population to acquire a Salmonella infection. In 1995, 19 percent of Salmonella strains were found to be multi-drug resistant. That means that our children are left to undergo multiple treatments for otherwise simple infections because we have allowed traditional treatments to become ineffective.

And the cost to our already strained health care system is astronomical. In fact, resistant bacterial infections increase health care costs by \$4 billion to \$5 billion each year.

Currently, seven classes of antibiotics certified by the Food and Drug Administration (FDA) as "highly" or "critically" important in human medicine are used in agriculture as animal feed additives. Among them are penicillin, tetracyclines, macrolides, lincosamides, streptogramins, aminoglycosides, and sulfonamides. These classes of antibiotics are among the most critically important in our arsenal of defense against potentially fatal human diseases.

Penicillins, for example, are used to treat infections ranging from strep throat to meningitis. Macrolides and Sulfonamides are used to prevent secondary infections in patients with AIDS and to treat pneumonia in HIV-infected patients. Tetracyclines are used to treat people potentially exposed to anthrax.

Despite their importance in human medicine, these drugs are added to animal feed as growth promotants and for routine disease prevention. Approximately 70 percent of antibiotics and related drugs produced in the U.S. are given to cattle, pigs, and chicken to promote growth and to compensate for crowded, unsanitary, stressful conditions. The nontherapeutic use of antibiotics in poultry skyrocketed from 2 million pounds in 1985 to 10.5 million pounds in the late 1990s.

This kind of habitual, nontherapeutic use of antibiotics has been conclusively linked to a growing number of incidents of antimicrobial-resistant infections in humans, and may be contaminating ground water with resistant bacteria in rural areas. In fact, a National Academy of Sciences report states that, "a decrease in antimicrobial use in human medicine alone will have little effect on the current situation. Substantial efforts must be made to decrease inappropriate overuse in animals and agriculture as well."

Resistant bacteria can be transferred from animals to humans in several ways. Antibiotic resistant bacteria can be found in the meat and poultry that we purchase in the grocery store. In fact, a New England Journal of Medicine study conducted in Washington, DC found that 20 percent of the meat sampled was contaminated with Salmonella and 84 percent of those bacteria were resistant to antibiotics used in human medicine and animal agriculture. Bacteria can also be transferred from animals to humans via workers in the livestock industry who handle animals, feed, and manure. Farmers may then transfer the bacteria on to their family. A third method is via the environment. Nearly 2 trillion pounds of manure generated in the U.S. annually contaminate our groundwater, surface water, and soil. Because this manure contains resistant bacteria, the resistant bacteria can then be passed on to humans that come in contact with the water sources or soil.

And the problem has been well documented.

A 2002 analysis of more than 500 scientific articles and published in the journal *Clinical Infectious Diseases* found that "many lines of evidence link antimicrobial resistant human infections to foodborne pathogens of animal origin."

The Institute of Medicine's 2003 report on *Microbial Threats to Health* concluded "Clearly, a decrease in the inappropriate use of antimicrobials in human medicine alone is not enough. Substantial efforts must be made to decrease inappropriate overuse in animals and agriculture as well."

As the impact of MRSa continues to unfold, there is little doubt that antibiotic resistant diseases are a growing public health menace demanding a high priority response. Despite increased attention to the issue, the response has been inadequate. Part of the problem has been the FDA's failure to adequately address the effect of the misuse of animal antibiotics on the efficacy of human drugs.

Although the FDA could withdraw its approval for these antibiotics, its record of reviewing currently approved drugs under existing procedures indicates that it would take nearly a century to get these medically important antibiotics out of the feed given to food producing animals. In October 2000, for example, the FDA began consideration of a proposal to withdraw its approval for the therapeutic use of fluoroquinolones in poultry. The review, and eventual withdraw of approval, took five years to complete. Under its regulations, the FDA must review each class of antibiotics separately.

The legislation I am reintroducing today, the Preservation of Antibiotics for Medical Treatment Act, would phase out the use of the seven classes of medically significant antibiotics that are currently approved for non-therapeutic use in animal agriculture. Make no mistake, this bill would in no way infringe upon the use of these drugs to treat a sick animal. It simply proscribes their nontherapeutic use.

Madam Speaker, when we go to the grocery store to pick up dinner, we should be able to buy our food without worrying that eating it will expose our family to potentially deadly bacteria that will no longer respond to our medical treatments. Unless we act now, we will unwittingly be permitting animals to serve as incubators for resistant bacteria.

It is time for Congress to stand with scientists, the World Health Organization, the American Medical Association, and the National Academy of Sciences and do something to address the spread of resistant bacteria. We cannot afford for our medicines to become obsolete.

I urge my colleagues to support the Preservation of Antibiotics for Medical Treatment Act to protect the integrity of our antibiotics and the health of American families.

TRIBUTE TO TRINITY EPISCOPAL CHURCH

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to an important community institution in Mt. Vernon, Illinois.

In February, Trinity Episcopal Church celebrated its 100th anniversary. Since the first service was held at 1100 Harrison Street in Mt. Vernon on January 3, 1909, thousands of people have visited Trinity Episcopal to worship with their neighbors. Generations of families in Mt. Vernon and Jefferson County have been welcomed into the congregation.

Today, Trinity Episcopal is an important part of the spiritual fabric of the community and serves as a good neighbor to families in need throughout the area. Through a century of the congregation's generosity, many have found a helping hand, warm embrace, and comfort in times of despair.

I want to congratulate Father Gene Tucker of Trinity Episcopal, all members of the congregation, and the extended Trinity Episcopal family on 100 years of service and thank them for the important role they play in our community.

RECOGNIZING AND COMMENDING THE NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA), THE JET PROPULSION LABORATORY (JPL), AND CORNELL UNIVERSITY FOR THE SUCCESS OF THE MARS EXPLORATION ROVERS, SPIRIT AND OPPORTUNITY, ON THE 5TH ANNIVERSARY OF THE ROVERS' SUCCESSFUL LANDING

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. CALVERT. Madam Speaker, just over 5 years ago, two engineering marvels—the Mars Exploration Rovers Spirit and Opportunity—captured the imagination of the American public and the world when they landed on Mars to begin a 3 month-long NASA mission. The mission objective was to search for signs that water may have been present for long periods of time—signs that could tell us whether the Red Planet had been hospitable to life in the past. Within the first several months of the Mars mission, the NASA Web site experienced over a billion site visits. The Mars Exploration Rovers have been a wildly successful mission, with more than 13 miles of harsh Martian terrain traversed and over a quarter million awe-inspiring images from the Martian surface captured, in addition to many thousands of scientific spectra that lends to our study of Mars.

Spirit and Opportunity have made many important discoveries over the last 5 years. One of the most significant discoveries was evidence of water and geological information that supports an understanding that ancient Martian environments included periods of wet, possibly habitable conditions.

I wholeheartedly support H. Res. 67, the resolution offered by my friends and colleagues from southern California, Mr. SCHIFF and Mr. DREIER to honor NASA, their team from the Jet Propulsion Laboratory, and Cornell University on 5 years of great engineering and scientific discovery.

TRIBUTE TO Y-YARD AUTO AND TRUCK, INC.

HON. JOHN SHIMKUS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SHIMKUS. Madam Speaker, I rise today to pay tribute to Y-Yard Auto and Truck, Inc. of Effingham, Illinois.

Y-Yard Auto and Truck, Inc. was awarded the Automotive Recyclers Association CAR Star award in recognition of their commitment to environmental stewardship in the automotive recycling industry.

I would like to congratulate Y-Yard Auto and Truck, Inc. for this achievement, earned by upholding the highest in standards of environmental consciousness, safety, and customer service setting a leading example in their industry and community.

PERSONAL EXPLANATION

HON. SUE WILKINS MYRICK

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mrs. MYRICK. Madam Speaker, I was unable to participate in the following votes. If I had been present, I would have voted as follows:

Rollcall vote 125, on motion to suspend the rules and pass H.R. 987, the John Scott Challis, Jr. Post Office Designation Act, I would have voted "aye."

Rollcall vote 126, on motion to suspend the rules and pass H.R. 1217, the Specialist Peter J. Navarro Post Office Building Designation Act, I would have voted "aye."

Rollcall vote 127, on motion to suspend the rules and pass H.R. 1284, the Major Ed W. Freeman Post Office Designation Act, I would have voted "aye."

TRIBUTE TO MAJOR GENERAL ROBERT E. DUIGNAN

HON. KEN CALVERT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. CALVERT. Madam Speaker, I rise today to honor and pay tribute to an individual whose dedication and contributions to the community of Riverside, California and to the United States of America are exceptional. This country has been fortunate to have dedicated, honorable, and steadfast leaders who willingly and unselfishly give their time and talent to make our communities better places to live and work. General Robert E. Duignan of the United States Air Force is one of these individuals and today I thank him for 36 years of service to our great nation. On Sunday, January 25, 2009, General Duignan was honored with a retirement celebration at March Air Reserve Base in Riverside, California.

General Duignan took his first plane ride at the age of 13, traveling from Seattle to New York, and from that moment he knew that he wanted to fly airplanes. He attended the University of Washington on an ROTC scholarship and earned a bachelor's degree in business. He entered the Air Force during the Vietnam War, a time when it was not popular to be in the military, and he experienced firsthand the objection to the war on his college campus. However, he never changed course and after graduation he spent 14 years at Travis Air Force Base, flying C-141 cargo planes on missions across the world, sometimes to pick up a single wounded soldier.

In 1989, General Duignan was promoted to Deputy Commander of Operations for the 459th Military Airlift Wing. While serving in this post, General Duignan witnessed the September 11, 2001, attack on the Pentagon and focused his efforts on the Global War on Terror as the Director of Plans and Programs at Headquarters AFRC. After two years, he returned to March Air Reserve Base and has worked tirelessly in support of the wars in Iraq and Afghanistan. As the Commander of the

4th Air Force he has supervised the Reserve's long-range airlift and air refueling units located throughout the continental United States, Hawaii and Guam. It is also important to note that during his career, he has accumulated more than 5,000 flying hours as a pilot flying the C-141, C-5, T-38 and T-37 aircrafts.

As we look at the incredibly rich military history of our country we realize that this history is comprised of men, just like General Robert Duignan, who bravely fought for the ideals of freedom and democracy. Each story is unique and humbling for those of us who, far from the dangers they have faced, live our lives in relative comfort and ease. Today I offer my gratitude for the decades of service and I salute Major General Robert Duignan as he retires from the United States Air Force.

FAIR TAX

HON. HENRY E. BROWN, JR.

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. BROWN of South Carolina. Madam Speaker, I rise today to highlight a unique and innovative economic stimulus proposal that doesn't rely on large amounts of government spending, borrowing from foreign governments, or rebate checks. Instead, the Fair Tax would be a permanent economic stimulus that would have none of the transparency issues of conventional spending, or of the current tax code under the IRS. As a co-sponsor of H.R. 25, the Fair Tax Act, I believe that simplification of the 45,000 page tax code will empower the American people through returning their earned spending power to them, and by reducing government spending.

The Fair Tax replaces all federal income and payroll based taxes with a progressive national retail sales tax, a prebate to ensure no American pays federal taxes on spending up to the poverty level, dollar-for-dollar federal revenue neutrality, and, through companion legislation, the repeal of the 16th Amendment. It abolishes all federal personal and corporate income taxes, gift, estate, capital gains, alternative minimum, Social Security, Medicare, and self-employment taxes and replaces them with one simple, visible, federal retail sales tax administered primarily by existing state sales tax authorities.

As April 15th approaches, imagine this: no tax forms to wade through, no worries about deductions, withholding, or underpayment, and no payroll tax. Instead you, just like every American, would have more take-home income that could be put towards things like mortgage bills, thereby addressing one of the root causes of this economic crisis.

I hope that in the future we will consider such innovative proposals as the Fair Tax, and I thank my colleagues Rep. JOHN LINDER from Georgia who has done so much to publicize the idea of the Fair Tax, and Rep. STEVE KING of Iowa who called this Special Order.

Madam Speaker, we can do something better than haphazard spending to get us out of this economic mess. We can simplify a tax code that destroys wealth, and replace it with one that lets Americans keep their entire pay-

check. It's time for new solutions, and not more of the old tax and spend.

HONORING THE KNIGHTS OF PETER CLAVER, INC. AND THE CENTENNIAL OF THEIR FOUND- ING

HON. EDDIE BERNICE JOHNSON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Ms. EDDIE BERNICE JOHNSON of Texas. Madam Speaker, I rise today in recognition of the 100th anniversary of the Knights of Peter Claver, Inc. and to celebrate this group's century of dedication to God, Church, and Community through Charity.

In November of 1909, a group of forty African American men became the first initiates of a Catholic fraternal order called the Knights of Peter Claver. This group was founded in Mobile, Alabama with the aim of creating a Catholic fraternal society for men who were traditionally not able to belong to such organizations. Today, the Knights of Peter Claver, Inc. has over 18,000 members, is active in over thirty states, and includes divisions for men, women and children. In my home state of Texas, this group is particularly active and has been involved with numerous community outreach programs throughout the state.

The Knights of Peter Claver and other such organizations have made incredible contributions to society. Throughout its history, this group has supported community efforts, scholarship and various charitable programs. Additionally, during times of strife for the African American Community, the Knights of Peter Claver supported non-violent actions to fight many social injustices.

This August, The Knights of Peter Claver, Inc. will celebrate the centennial of their society at their 94th National Convention in New Orleans, Louisiana. I ask my fellow Members of Congress to join me in honoring this group and to celebrate their hundred years of dedication to God and service to community.

CONGRATULATIONS TO ROBERT HALE

HON. STEVE AUSTRIA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. AUSTRIA. Madam Speaker, I rise today to congratulate Robert Hale, for his outstanding service to the community on the occasion of his retirement.

On behalf of the people of Ohio's Seventh Congressional District, I am honored to congratulate Robert Hale on being recognized by the Filipino-American community, his business associates and employees, and his family upon his recent retirement.

His dedicated service to the citizens of Dayton and the Filipino-American community is both admirable and commendable. Hale spent the last 25 years working at Dayton Mailing Service, Inc., a company he founded in 1984.

He recently retired and his daughter has taken over daily operations of the company.

Robert has been an avid supporter of the Philippine-American Society of Greater Dayton, the Association of Philippine Physicians of Greater Dayton, Filipino-American Ladies Organization of Dayton and the former Philippine Folk Arts Society. Hale is a member of the Optimist Club and joined the Peace Corps in 1962.

He has been a driving force within the business and Filipino-American communities in the Dayton area and has earned the respect and admiration of all those with whom he has served and the gratitude of the people that have come to know him.

The people of Ohio's Seventh Congressional District and I extend best wishes upon retirement and ongoing success in all endeavors.

THE INTRODUCTION OF THE EVERY STUDENT COUNTS ACT

HON. ROBERT C. "BOBBY" SCOTT

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. SCOTT of Virginia. Madam Speaker, I rise today to introduce the "Every Student Counts Act," legislation that will prioritize graduation of all of our Nation's high school students. My friend, Senator TOM HARKIN, the Senator from Iowa, is also introducing this legislation in the Senate.

Madam Speaker, as you know in 2001, The No Child Left Behind Act passed with broad bipartisan support. The purpose of No Child Left Behind was to ensure that every student in America would receive a quality education. However, over the past eight years, NCLB has not lived up to its promises. Certain aspects of the law are difficult to implement and are not bringing about the results we thought it would. One of the major shortcomings of NCLB is its failure to hold schools accountable for dropouts. Although we believed we addressed this issue in the original NCLB legislation, this portion of the law has not been implemented as we had hoped. Instead, under current law, the only meaningful accountability standard for high schools is students' scores on standardized tests, with virtually no concern given to how many students graduate or drop out of school. Unfortunately, this myopic accountability standard has created an incentive for high schools to push out students who are struggling academically, so that their test scores are not counted in the assessments. Furthermore, the current accountability system also has allowed States to report graduation rates inconsistently and in misleading ways. Finally, NCLB does not require the disaggregation of graduation rates by subgroup, leading to incomplete data on how our schools are doing with one subgroup compared to others.

What is clear is the fact that the current high school accountability system is failing both our students and our Nation. Each year, about 1.23 million secondary school students, approximately one-third of all secondary school students, fail to graduate with their peers. In

addition, nearly 2,000 secondary schools—roughly 12 percent of all secondary schools in the United States—produce about half of the Nation's secondary school dropouts. In these schools, the number of seniors is routinely 60 percent or less than the number of freshmen three years earlier. And almost half of the Nation's African-American students and nearly 40 percent of Latino students attend these so called "dropout factories," while only 11 percent of white students do.

In Virginia last year, nearly 30,000 students did not graduate from high school with their peers. But the numbers are worse for minorities—only about 50 percent of African American students and 60 percent of Hispanic students graduate on time with a regular diploma, compared to 75 percent of whites.

These numbers are just the tip of the iceberg. Research shows that the lifetime earnings difference between a high school dropout and a high school graduate is about \$260,000. This loss in potential earnings of a dropout can cause serious hardships throughout their lifetime. We cannot sit back and allow this problem to escalate, or our inaction will create a generation of lower and stagnant earnings and a poorer quality of life. We must reverse this trend and hold schools accountable for graduation rates and dropouts, so all students are graduating with a high school diploma and improving their outcomes in life.

Additionally, reducing dropouts improves America's position in both the global economy and workforce. Attaining a high school diploma is the first step in becoming a member of the educated workforce. Having unprepared workers sets us back considerably, diminishing our role as a global leader in the economy. The major competitive advantage America has in the global economy is an educated workforce. Yet, with an estimated 3.5 million Americans ages 16 to 25 who do not have a high school diploma and are not enrolled in school, we are slowly losing this advantage. Because of the need for well-educated workers to keep our country competitive, we can't allow—or afford—our Nation's high school students to dropout and not reach their full potential.

Until recently, federal policy did not place nearly enough importance on graduating the Nation's high school students. The regulations released by the Department of Education in October 2008 did much to correct the lack of attention to graduation rates in the federal accountability system: they require a uniform graduation rate calculation and improvement in graduation rates over time. Though these regulations are a laudable step in the right direction, they do not go far enough in setting consistent, high graduation rate goals and aggressive, attainable graduation rate growth targets. Without clear guidance and meaningful accountability, most secondary schools can continue to achieve Adequate Yearly Progress, AYP, by making negligible annual improvement in graduation rates and can do so with a consistent, or even growing, graduation gap.

The Every Student Counts Act will bring meaningful accountability to America's high schools by requiring a consistent and accurate calculation of graduation rates across all fifty states to ensure comparability and transparency. The legislation builds on the National

Governors Association's Graduation Rate Compact, which was signed by all 50 of the Nation's governors in 2005. Under the Every Student Counts Act, graduation rates and test scores are treated equally in AYP determinations. Moreover, the Every Student Counts Act would require high schools to have aggressive, attainable and uniform annual growth requirements as part of AYP. This will ensure consistent increases to graduation rates for all students by meeting annual, research-based benchmarks with the long-term goal of reaching a 90 percent graduation rate. The bill would also require the disaggregation of graduation data by subgroup to make certain that schools are held accountable for increasing the graduation rate for all of our students and require that school improvement activities focus on closing any achievement gaps.

Recognizing that some small numbers of students take longer than four years to graduate, the bill will give credit to schools, school districts and states for graduating these students while maintaining the primacy of graduating the great preponderance of all students in four years. The Every Student Counts Act will provide incentives for schools, districts and states to create programs to serve students who have already dropped out and are overage or under credited. Some credit has to be given to those who get a GED and also those who take more than one or two years and maybe even three years longer than others to graduate. If no credit is given, the school system has no incentive to continue these important programs.

In order to truly ensure that all children have access to a quality education, it is imperative that we take steps to immediately end America's dropout crisis. We must ensure not only that graduation rates increase, but that earning a high school diploma is a meaningful accomplishment. We must use the indicators of student achievement and graduation to know which high schools are doing their job. Those who are must be recognized and supported. Those that are not must be rehabilitated with targeted interventions, whole school reform, or replacement strategies to ensure the standard of accountability with graduation rates and standardized tests are met.

Making sure accountability with graduation rates and standardized testing are met, Virginia's education leaders and the Virginia State Board of Education recently became the first state to give equal consideration to dropout rates and standardized tests when judging AYP. The new standard in Virginia will take effect with the start of the 2011–2012 school years. It also sets an 85 percent graduation rate, well above the dreadful benchmark of 61 percent set for Virginia under the No Child Left Behind Act.

It is my hope that with the Every Student Counts Act, we can make greater strides nationally toward graduating more of America's students and preparing them to succeed in college, the workplace and in life. So, I ask my colleagues to join me in passing this bill and seeing to it that it is quickly enacted into law to ensure, at a minimum, every child becomes a high school graduate.

H.R. 1106, THE HELPING FAMILIES
SAVE THEIR HOMES ACT

HON. MARCY KAPTUR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Ms. KAPTUR. Madam Speaker, the bill before us is far from perfect. Though it will help some homeowners who are facing foreclosure, this bill requires asking a few additional questions.

Why would Congress want to pass a bill that uses bankruptcy as the first option to resolve only some loans, and not all loans, as opposed to invoking the full power of the FDIC and SEC to handle all loans?

This legislation will "protect mortgage services from legal liability." Why would we do this at the same time as we are sending individual homeowners to the bankruptcy gallows?

Why would we pass a bill that eliminates the government's share of any appreciation in the home's value at sale?

Madam Speaker, these are some of the questions for which this bill does not provide answers to those critical questions.

Most of all, this bill continues to reinforce the seriously flawed mortgage securitization approach to the U.S. housing market. The overarching concentration and securitization of the housing mortgage market by Wall Street bond houses and money center banks are continued in the bill rather than replaced by an approach that restores prudent Main Street lending practices again.

Our housing finance system is far too concentrated. Its system-wide imprudent practices centered in the securitization process, itself, have done enormous damage domestically and internationally and have ripped neighborhoods and communities apart across our Nation.

Responsible lending requires that our financial system re-empower the local banking, local underwriting and local mortgage markets first. This bill merely rewards the wrongdoers by letting them fall in the government basket of FHA, FNMA, and Freddie Mac.

A real reform plan should be the foundation stone that precedes any legislation that proposes to transfer hundreds of billions of dollars more to the very money center banks and servicing companies that have produced the chaos that ails our mortgage lending system today. Reform must come first, not last. No matter how well-intentioned any housing bill is, there must be a broader policy context in which it is advanced.

In sum, this plan does not do enough to address the fundamental cause of the financial crisis—widespread and overuse of concentrated securitization practices, mortgage and appraisal fraud, and the seize up of credit markets due to improper use of federal instrumentalities in attempting to resolve the situation.

This bill nips at the edges of a very troubled system, picks up some of the casualties, and lets the Titanic continue to chug toward some iceberg.

Our citizens deserve full justice, not continuing reliance on the very institutions that brought us to this fork in the road.

CONGRESSIONAL BUDGET OFFICE
COST ESTIMATE, H.R. 1388, THE
GENERATIONS INVIGORATING
VOLUNTEERISM AND EDUCATION
ACT

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, March 17, 2009

Mr. MILLER of California. Madam Speaker, I insert into the RECORD the Cost Estimate from the Congressional Budget Office on H.R. 1388, the Generations Invigorating Volunteerism and Education Act.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, March 17, 2009.

Hon. GEORGE MILLER,
Chairman, Committee on Education and Labor,
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Congressional Budget Office has prepared the enclosed cost estimate for H.R. 1388, the Generations Invigorating Volunteerism and Education Act. If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Christina Hawley Anthony.

Sincerely,

DOUGLAS W. ELMENDORF.

Enclosure.

H.R. 1388—Generations Invigorating Volunteerism and Education Act

Summary: H.R. 1388 would amend and reauthorize programs established under the

National and Community Service Act of 1990 (NCSA) and the Domestic Volunteer Service Act of 1973 (DVSA).

Assuming appropriation of the estimated amounts, CBO estimates that implementing the bill would cost \$481 million in 2010 and about \$6 billion over the 2010–2014 period. Enacting the bill would not affect direct spending or receipts.

H.R. 1388 contains no intergovernmental mandates as defined in the Unfunded Mandates Reform Act (UMRA) and would impose no costs on state, local, or tribal governments. H.R. 1388 contains no private-sector mandates as defined in UMRA.

Estimated cost to the Federal Government: The estimated budgetary impact of H.R. 1388 is shown in the following table. The costs of this legislation fall within budget function 500 (education, employment, training, and social services).

By fiscal year, in millions of dollars—

| | 2009 | 2010 | 2011 | 2012 | 2013 | 2014 | 2009–2014 |
|--|-------|-------|-------|-------|-------|-------|-----------|
| SPENDING SUBJECT TO APPROPRIATION | | | | | | | |
| NCSA and DVSA Spending Under Current Law: | | | | | | | |
| Budget Authority ^a | 1,084 | 0 | 0 | 0 | 0 | 0 | 1,084 |
| Estimated Outlays | 927 | 688 | 359 | 177 | 89 | 58 | 2,299 |
| Proposed Changes: | | | | | | | |
| Estimated Authorization Level | 0 | 1,312 | 1,580 | 1,860 | 2,151 | 2,454 | 9,356 |
| Estimated Outlays | 0 | 481 | 951 | 1,249 | 1,515 | 1,785 | 5,980 |
| Spending Under H.R. 1388: | | | | | | | |
| Estimated Authorization Level ^a | 1,084 | 1,340 | 1,611 | 1,894 | 2,189 | 2,496 | 10,440 |
| Estimated Outlays | 927 | 1,169 | 1,310 | 1,426 | 1,604 | 1,844 | 8,279 |

Note: NCSA = National and Community Service Act; DVSA = Domestic Volunteer Service Act.
^a The 2009 level is the amount appropriated for that year for NCSA and DVSA programs.

Basis of estimate: For some programs, the bill would authorize the appropriation of specified amounts for fiscal year 2010 and such sums as may be necessary for each subsequent year through 2014. For those programs, CBO estimated the authorization level for fiscal years 2011 through 2014 by adjusting the amount authorized for 2010 for anticipated inflation. For the remaining programs authorized by H.R. 1388, the bill would authorize such sums as may be necessary for each fiscal year. CBO estimated those authorization levels based on historical program costs for similar activities, anticipated inflation, and the bill's stated goal of achieving 250,000 participants by 2014.

For this estimate, CBO assumes the bill will be enacted by October 1, 2009, and that outlays will follow historical patterns for those programs.

Programs funded under NCSA and DVSA received appropriations of \$1.1 billion for fiscal year 2009, including \$200 million in funding from the American Recovery and Reinvestment Act of 2009 (Public Law 111–5).

Specified Authorizations: Under H.R. 1388, specified authorizations for 2010 would total \$472 million. Specifically, the bill would authorize the appropriation of the following amounts for 2010:

Foster Grandparent Program (\$115 million),
VISTA (\$100 million),
Learn and Serve America (\$97 million),
Retire and Senior Volunteer Program (\$70 million),
Senior Companion Program (\$55 million), and
National Civilian Community Corps (\$35 million).

CBO estimates that implementing those programs would cost \$1.9 billion over the

2010–2014 period, assuming appropriation of the specified amounts for 2010 and adjusting those amounts for anticipated inflation for 2011 through 2014.

Indefinite Authorizations: The bill also would authorize the appropriation of such sums as may be necessary for fiscal years 2010 through 2014 for other programs, including AmeriCorps and education awards funded through the National Service Trust. CBO estimates those indefinite authorizations would total \$840 million in fiscal year 2010 and would rise to nearly \$2 billion by 2014.

H.R. 1388 includes a stated goal that participation in all AmeriCorps programs (including the National Civilian Community Corps and VISTA) should increase to 250,000 people by 2014 (participation in those programs was about 75,000 in 2008). For this estimate, CBO assumes that sufficient funds would be provided to meet that goal—\$3.6 billion over the 2010–2014 period, CBO estimates. Those funds would be used primarily to provide grants to states, territories, tribes, and nonprofit organizations to operate volunteer service programs. CBO estimates that outlays for those programs would total \$2.7 billion over the 2010–2014 period.

Most participants in AmeriCorps programs (and some VISTA participants) earn education awards for completing specific terms of service that can be used to repay certain student loans or to pay for future education expenses. In 2009, the maximum award is \$4,725. Beginning in 2010, the maximum full-time education award would be pegged to the amount authorized for Pell grants under the Higher Education Act of 1965. Those amounts are \$6,400 in 2010; \$6,800 in 2011; \$7,200 in 2012; \$7,600 in 2013; and \$8,000 in 2014. CBO estimates that over the 2010–2014 period another \$2.4 billion would be needed to fund education awards for AmeriCorps participants.

Assuming the appropriation of those sums, CBO estimates outlays would increase by \$0.5 billion over the five-year period (with significant additional outlays in subsequent years).

CBO also estimates that over the 2010–2014 period, the bill would authorize the appropriation of funds for:

Administrative expenses, including support to state service commissions and evaluation of programs (\$0.6 billion),

Various demonstration programs (\$0.2 billion),

Training and technical assistance programs (\$150 million), and

A new Congressional Commission on Civic Service (\$1 million).

In total, CBO estimates that outlays would rise by \$0.8 billion over the next five years, assuming appropriation of the estimated amounts.

Intergovernmental and private-sector impact: H.R. 1388 contains no intergovernmental or private-sector mandates as defined in UMRA. The bill would authorize grants to state, local, and tribal governments to support national service programs including AmeriCorps, VISTA, and the National Senior Service Corps. CBO estimates state, local, and tribal governments could receive grants totaling more than \$4 billion over the next five years. Any costs to those governments would be incurred voluntarily as a condition of receiving federal assistance.

Estimate prepared by: Federal Costs: Christina Hawley Anthony; Impact on State, Local, and Tribal Governments: Burke Doherty; Impact on the Private Sector: Patrick Bernhardt.

Estimate approved by: Peter H. Fontaine, Assistant Director for Budget Analysis.

SENATE—Wednesday, March 18, 2009

The Senate met at 9:30 a.m. and was called to order by the Honorable TOM UDALL, a Senator from the State of New Mexico.

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

O merciful Lord, enlighten our lawmakers with a clear and shining inward light and remove the shadows from their hearts. Control their wandering thoughts and prepare them to face the inevitable temptations that come. Lord, give them the peace of knowing that their times are in Your hands and that You are willing to fight the battles of all who trust in the power of Your Name. Fill their hearts with Thanksgiving, and may they take time throughout this day to praise You for Your goodness. Help them to maintain a pure conscience as the light of Your truth illumines their path. Join them to You with cords of love, and may they rejoice as they remember Your direct involvement in all the details of their lives.

We pray in Your sacred Name. Amen.

PLEDGE OF ALLEGIANCE

The Honorable TOM UDALL led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. BYRD).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, DC, March 18, 2009.

To the Senate:

Under the provisions of rule I, paragraph 3, of the Standing Rules of the Senate, I hereby appoint the Honorable TOM UDALL, a Senator from the State of New Mexico, to perform the duties of the Chair.

ROBERT C. BYRD,
President pro tempore.

Mr. UDALL of New Mexico thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

SCHEDULE

Mr. REID. Mr. President, following leader remarks this morning, the Senate will be in a period of morning business for up to 1 hour. Senators will be recognized for up to 10 minutes each. Republicans will control the first half; the majority will control the second half. Following morning business, the Senate will proceed to executive session to debate the nomination of Ronald Kirk to be U.S. Trade Representative. There will be up to 90 minutes for debate on that nomination, with the majority controlling 30 minutes and the Republicans controlling 60 minutes. Upon conclusion of the debate, the Senate will resume consideration of H.R. 146, the lands bill. We expect to lock in the vote on confirmation on the Kirk nomination for 2 p.m. today. We also hope to be able to line up three votes on amendments that Senator COBURN has offered following the confirmation vote. Therefore, Senators should expect a series of up to four votes at 2 o'clock this afternoon.

MIDDLE-CLASS TAX RELIEF

Mr. REID. Mr. President, President John Kennedy famously said that "a rising tide lifts all boats."

The economic policies of the past 8 years may have lifted the privileged few to greater wealth, but they left the rest of our country to drown in shallow waters. With this new President, with this new budget, we begin to turn the page. President Obama's 2010 budget honors the middle class. It honors the middle-class values of hard work, responsibility, and opportunity.

After years of falling incomes and rising costs across the board for health care, education, groceries, gas, and retirement, this budget finally begins to bring the American dream back within the grasp of middle-class families once again. We are cutting taxes for 95 percent of working families and ending the irresponsible tax giveaways the Bush administration doled out to the superwealthy. Ninety-five percent of American households will get to keep more of each paycheck to save or spend on a mortgage payment, a doctor bill, a new car, or maybe a used car. We will expand the child tax credit for all families and increase credits available for larger families, who are more likely to live in poverty. We will help families afford the rising cost of college by making a \$2,500 tuition tax credit permanent. We will help to encourage a new generation of savers by providing automatic enrollment in retirement accounts and expanding tax credits to

reward the choice to save for retirement. Also, because we understand that every dollar the Federal Government invests comes from American taxpayers, we will ensure that high-level transparency and accountability exist. The taxpayers deserve this, and certainly taxpayer money deserves to be transparent and accounted for.

After 8 years of misplaced priorities, corporate greed, and failed oversight, we are facing a severe economic crisis. And that is an understatement. Senior citizens are delaying their retirement, workers are losing their jobs, and families are losing their homes. Although this hour is difficult, President Obama's budget sets the path toward recovery, and when our economy does recover, we will ensure that this time not just the yachts but all boats are lifted with the coming tide.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The Republican leader is recognized.

AIG

Mr. MCCONNELL. Mr. President, the situation at AIG is an offense to the taxpayers, and we are going to get to the bottom of it even if the Department of the Treasury hasn't.

Here is a company that has been taking billions and billions of dollars from taxpayers in the middle of what could be the worst economic downturn since the Depression. Now we hear that those taxpayer dollars were going in the front door, supposedly to keep the company afloat, and then right back out the back door into the hands of those corporate officials who got us into this mess in the first place.

The Treasury Department was supposed to be minding the store. They had the authority to disburse the funds and to provide oversight. It was Treasury's responsibility to watch how these funds were being used. Obviously, they fell asleep on the job. The Treasury Department was completely asleep on the job. They need to wake up. Americans are fed up with their hard-earned tax dollars going to people who got us into this mess in the first place. They deserve to know how this happened. The American people deserve to know how this happened. The administration and the Treasury Department need to reassure the American people that this will never, ever happen again.

THE BUDGET

Mr. McCONNELL. Mr. President, the American people are starting to get an idea about the administration's budget. They understand that it taxes too much, it spends too much, and it borrows too much, especially in the middle of an economic crisis.

On taxes, the budget includes the largest tax hike in history, diverts billions of dollars from charities here at home at a time when Americans are looking to those charities even more than they would be in normal times, and it raises taxes on small businesses.

Small businesses account for nearly three-fourths of all new private sector jobs here in our country. The budget's tax on small businesses would cause many of them to see their taxes go up significantly. This tax hits the general contractor down the street, the family restaurant, the startup technology firm, and many other businesses people deal with or work at all across our country every single day. These businesses are the engines of our economy. They are struggling, and they will struggle even more once these tax hikes go into effect. Small businesses with more than 20 workers, which account for two-thirds—two-thirds—of the small business workforce, get hit particularly hard. The President's budget includes a tax increase on more than half of those businesses. These businesses are run by men and women who make decisions based on considerations such as how much they are taxed, and if they have less money coming in as a result of higher taxes, they cut jobs, put off buying new equipment, and they take fewer risks, the kinds of risks that have always made our economy so vibrant and so innovative. These risks will be squeezed out as a result of these higher taxes.

Hundreds of thousands of Americans are losing their jobs every month. Many of these jobs are with small businesses. Higher taxes will only force these businesses to shed even more jobs. I understand the administration's desire to make good on its promises, but taxes on job creators in a recession is not the right approach. With the highest unemployment rate in 25 years, most people don't see the sense of raising taxes on small businesses, and they are absolutely right.

Mr. President, I yield the floor.

RESERVATION OF LEADER TIME

The ACTING PRESIDENT pro tempore. Under the previous order, leadership time is reserved.

MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction

of morning business for up to 1 hour, with Senators permitted to speak therein for up to 10 minutes each and with the time equally divided, the Republicans controlling the first half hour and the majority controlling the second half hour.

The Senator from Oklahoma is recognized.

Mr. INHOFE. Mr. President, it is my understanding I have the first 15 minutes, and I would ask the Chair to advise me when I have 1 minute left.

The ACTING PRESIDENT pro tempore. The Chair will do so.

THE BUDGET

Mr. INHOFE. Mr. President, I don't think my State of Oklahoma is any different from any other State when you go home and you find out that people are looking at these monstrous expenditures never even dreamed of before in the history of this country. They talk about the auto bailout, \$17 billion; the housing bailout—I think probably the worst one was the first one, the bank bailout that gave the authority to unelected bureaucrats to do what they are doing today. We have the economic bailout, the stimulus package. I am here today to say that as bad as all of this is, if you look at the one that is in the budget—the climate bailout—it is far worse because at least these are one-shot deals, and that would be a permanent tax every year. Over the next few weeks, we will be talking about it.

I spent nearly 10 years on this issue in the capacity of the ranking member and the chairman of the Environment and Public Works Committee. To tell the truth, for a long time I was a one-man truth squad, and now more and more people realize that the science that was supposed to be there really is not there. But that is not the important thing. As I said in the debate against the Boxer bill a year ago, let's go ahead and concede the science, even though it is not there, so that it doesn't take away from the economic arguments.

So, in my view, I think the President did a good thing, including an estimate in his budget as to how much this is going to cost. Now, his estimate was understated, I understand that, but it allows us to have an honest debate about the cost of a program of this magnitude to the American people, not to mention the enormous redistribution of wealth for pet projects and programs under the umbrella of clean energy. In fact, according to a new report by the Center for Public Integrity, the number of lobbyists seeking to influence Federal policy on climate change—that is what we are talking about here—has grown more than 300 percent in 5 years. This represents more than four lobbyists for every Member of Congress, with a slew of new

interests from Main Street to Wall Street, clamoring for new taxpayer-funded subsidies.

I don't think anyone questions that in the Senate. Our Halls are inundated with people who want in on this deal. The administration's decision to include cap and trade, and the revenues it generates in the budget, forces my colleagues in the Senate to quit hiding from this issue. They are going to have to talk about it. They can no longer prevent a discussion of what a program of this magnitude is.

The public is finally beginning to pay attention. To put it simply, they are realizing cap and trade is a regressive energy tax that hits the Midwest and the South the hardest, and it hits the poor disproportionately. I don't think anyone now is questioning that because everyone has been talking about it.

While a number of lobbyists and the companies are lining up inside the beltway, Washington businesses and the consumers are coming to realize that cap and trade is designed to deliver money and power to the Government, and there is nothing in it for the taxpayers or consumers or even for the climate.

Let me further explain at this time that with the recession and economic pain, the administration and the proponents of mandatory global warming controls now need to be honest with the American people. The purpose of these programs is to ration fossil energy by making it more expensive and less appealing to public consumption. It is so regressive in nature. All you have to do is calculate it in any State, including Colorado and Oklahoma. The poor people spend a larger percentage of their money on heating their homes and driving their vehicles—using energy.

If you need proof, the President's own OMB Director, Peter Orszag, is on record making the statement:

The rise in prices for energy and energy-intensive goods and services would impose a larger burden, relative to income, on low-income households than on high-income households.

That is the OMB Director, who also said:

Under a cap and trade program, firms would not ultimately bear most of the costs of the allowances, but instead would pass them along to their customers in the form of higher prices for products such as electricity and gasoline. The higher prices caused by the cap would lower real inflation-adjusted wages and real returns on capital, which would be equivalent to raising marginal tax rates on those sources of income.

No one questions this. Recently, there was an article in the Wall Street Journal—this month. It said:

Cap and trade, in other words, is a scheme to redistribute income and wealth—but in a very curious way. It takes from the working class and gives to the affluent; takes from Miami, Ohio, and gives to Miami, FL; and

takes from an industrial America that is already struggling and gives to rich Silicon Valley and Wall Street "green tech" investors who know how to leverage the political class.

Warren Buffet said:

That tax is probably going to be pretty regressive. If you put a cost of issuing—putting carbon into the atmosphere—in the utility business, it's going to be borne by customers. And it's a tax hike like anything else.

Ben Stein had an op-ed piece in the Wall Street Journal in which he said:

Why add another element of uncertainty to energy production, especially if the goal of suppressing carbon-based fuel burning can be accomplished by another means? Energy companies have enough problems as it is—including reduced supplies, political risks, and wildly changing prices of raw materials.

Jim Cramer of CNBC said this:

Obama's budget is pushing an aggressive cap and trade program that could raise the price of energy for millions of people.

Detroit would really suffer. The Detroit News said this:

President Barack Obama's proposed cap and trade system on greenhouse gas emissions is a giant economic dagger aimed at the nation's heartland—particularly Michigan. It is a multibillion dollar tax hike on everything that Michigan does, including making things, driving cars and burning coal.

So we have this awareness that wasn't there until this appeared in the President's budget. I have to say this. Back in the very beginning of this discussion, I was somewhat of a believer that manmade gas, anthropogenic gases, CO₂, caused global warming, until we found out what the cost is going to be, and until we looked at the science.

In terms of the costs and how it is going to impact the various States such as Ohio, Pennsylvania, Indiana, and Michigan, these States will be impacted harder than most others.

All of these reports reflect the numbers released in the President's proposed budget which estimated that a cap-and-trade program would generate \$646 billion in Federal revenues through 2019. Keep in mind, that is a nice way of saying increase taxes by \$646 billion. However, we now know that figure is way low.

Nearly 10 years ago—and this was my first discovery—we came this close to ratifying the Kyoto Treaty, which would have mandated all these things they are talking about doing now. That was about 10 years ago. The Wharton Econometric Forecasting Associates did an analysis and said: What could it cost if we were to sign Kyoto and live by its provisions? They found it would cost 2.4 million U.S. jobs and reduce GDP by 3.2 percent or about \$300 billion a year in taxes.

Well, nearly 10 years later, we have come full circle. According to MIT, an analysis of similar legislation as the President's budget proposal suggests much higher revenues. We have gone

through the Kyoto thing and then we had the Lieberman-McCain bill and then the Lieberman-Warner bill. Each time we do this, more people come in and do analyses, and they come to the same conclusion.

Then I looked at one of the more recent ones, the Sanders-Boxer bill, and that bill mandates even less aggressive emissions reduction targets, and that is 80 percent. Now they are talking about 83 percent. It would have cost approximately \$366 billion a year. So you have a consistent range from \$300 billion to \$366 billion. That is what everyone says it is actually going to cost. It is around \$350 billion if you round it off.

As bad as all this spending is—it is out of control—still, this is worse because this is something that is every year. To put it into perspective for my colleagues, I point to this chart that shows the largest tax increases in history—we remember these—in the last 50 years. I remember this one, the Clinton-Gore tax increase of 1993. I remember talking about this on the Senate floor—the inheritance tax, the marginal tax rates, the income tax, and the capital gains tax. It was a \$32 billion tax increase.

By contrast, look at what we have—a \$300 billion increase or 10 times greater than the largest tax increase in the last 50 years. You are going to hear that some of these revenues will fund tax relief to be returned to the people.

For the purposes of this budget proposal, the administration plans to spend \$15 billion a year to fund clean energy technologies and allocate \$63 billion to \$68 billion per year for the making work pay tax credit campaign promise to give back to people who don't pay taxes. We have learned firsthand that, of course, this stuff wasn't true. We learned that in the consideration of the Warner-Lieberman bill, when they made the statement that they were going to give back a lot of this revenue to poor people—it turned out the same thing will be true in the case of this budget—that for each \$1 a person gets back, they are paying \$8.40. That is how the math works out.

You can try to make people believe they are going to be on the receiving end of this, but when it is over, the cost is \$6.7 trillion, and the refund—which wasn't guaranteed; it was legislative intent—was \$802 billion. I think we will have plenty of time to talk about this and bring this to the American people.

In his budget, the President wants to recycle \$525 billion through the making work pay tax credit that goes to many people who don't pay income taxes. The math is not good, as we noted. It doesn't work. My colleagues may argue that at least this money will be going to a good purpose, for the cause of fighting global warming, having America lead the way. I think many find it

very difficult this would happen. I add that, at times, you have to be logical on these things.

Referring to this chart, these are the figures actually used in terms of how it would have an effect if we passed one of these programs. This was based on the Lieberman-Warner bill. If we had passed it in terms of the emissions of CO₂ worldwide, you can see it doesn't have an effect. Let's assume that—which is not true but assume—there is global warming, which is not happening, as we are in a cooling period now; global warming is a result of CO₂ coming into the atmosphere, and that we want to somehow reduce the emissions of CO₂.

The problem we have with this is, if we do it unilaterally, then we in the United States are going to be paying these huge taxes.

The ACTING PRESIDENT pro tempore. The Senator has 1 minute remaining.

Mr. INHOFE. I thank the Chair. While we are paying these huge taxes, you have to keep in mind that China is not doing that, Mexico isn't doing it, and India isn't doing it. They are laughing at us. I wish there was time to finish. We document what China and Mexico are saying. They are going to be the beneficiary. If we were to limit CO₂ in our country, our jobs would have to go elsewhere. There would not be adequate energy.

In conclusion, if you look at how fast this is in terms of what happened so far, for those of us—I am not saying anything disparaging about the President; I like the guy—all of these things that are in yellow are expenditures that are unprecedented in the history of this country. Far worse than that would be if we were to pass a cap-and-trade bailout. It would cost some \$6.7 trillion, as opposed to the lower figures. It is something we cannot afford. It is all pain and no climate gain.

Let me briefly go back in history. It is my understanding that the other person who was going to use time is delayed, so we have more time. I mentioned a minute ago that when Republicans were in the majority, I was the chairman of the committee called Environment and Public Works. This committee has jurisdiction over most of the energy issues we deal with.

At that time—way back during the Kyoto consideration, about 10 years ago—most people didn't believe CO₂ or anthropogenic gases were causing global warming. We were in a warming period at that time. I have an interesting speech where I take magazines, such as *Time*, where back in the middle 1970s they were talking about another ice age coming, and we were all going to die. I wish I had it with me now.

About 2 years ago, the same *Time* magazine had this polar bear standing on the last piece of ice floating around on an icecap, saying that we were all going to die; global warming is coming.

A couple things, I believe, are the motivation for this. One is publications. Probably their two largest issues were those two. They made people walking by the news stands and seeing that "we are going to die" think: I better see how much time we have left. It started with the U.N. IPCC, Intergovernmental Panel on Climate Change, that came out with this idea that somehow greenhouse gases are causing global warming.

When you think about it—and this was in concert with the NAS—they had reports they started giving out, summaries for policyholders. They were not based on science. They talked about how the science is all settled. It was after we realized from the Wharton School how much money this is going to cost taxpayers. After that, we were in a position where we could start analyzing it, and then the scientists started coming out of the woodwork. They were no longer intimidated.

One of the problems we had was that the scientists who were dependent upon various sources of income, either from the Government or from various organizations, such as the Heinz Foundation and Pew Foundation—so long as they said they went along with this scheme that CO₂ is causing global warming, they were getting grants. This started changing, and they started telling the truth. We now have accumulated—later today or tomorrow, I will give a talk showing how the science now has grown, where over 700 scientists who were on the other side of this issue are now on the truth side of this issue.

So the science needs to be talked about even right now during the debate. It is probably more significant that we talk about the economics and what it is going to cost people.

I can remember when Claude Allegre, who is probably the most respected scientist in France, a Socialist, was a person who was very strongly on the Al Gore side of this issue and has recently come over and said, in reevaluating, in looking at this issue and in looking at what has happened to the climate, the science is not there.

David Bellamy, a similar scientist in Great Britain, was on the other side of this issue. He has now come over.

Nir Shaviv from Israel, a top scientist who was always on the other side of this issue until about 3 years ago—I don't have the quotes here—came out and said: We are wrong on this issue, the science is not there.

By the way, we have a lot of documentation, and I invite my colleagues to go to my Web site, inhouse.senate.gov. We document what has happened in terms of the science.

This has been a 10-year journey. I sometimes think of Winston Churchill, who said:

The truth is incontrovertible. Malice may attack it, ignorance may deride it, but in the end, there it is.

It has taken 10 years for the truth to come out so the American people realize, with all of the scary stuff going on, with Hollywood and the elitists pouring money into campaigns—and I am talking about moveon.org, George Soros, Michael Moore, and all the millions of dollars that went into campaigns. They have influenced a lot of Members of the House and Senate. But the truth is coming out now.

As this issue moves forward, I invite all of us to look at all that has happened. It is hard for people to understand this sometimes until they get to my stage in life. I have 20 kids and grandkids. None of this stuff is going to affect me, but it is going to affect future generations. I look at that and think: How can we allow all this to take place and then pass a tax increase that will do absolutely nothing?

I repeat, those who are believers who have bought into this thing and have seen the science fiction movie "An Inconvenient Truth"—even if we do that, what good would it do for us to do it unilaterally in the United States, take the jobs and put them in countries that have no additional requirements? It would have a net increase of CO₂. That is being logical even for those who are believers that this is a problem.

Yesterday, I pointed out something I thought should be pointed out; that is, the first bailout was the \$700 billion bailout. As much as I hate to say it, 74 Senators voted for that bailout. What is bad about that is this gave one person, an unelected bureaucrat, the power over \$700 billion to do with as he wished. It is interesting because that was Hank Paulson, the Secretary of Treasury. Now we find the new Secretary of Treasury was in on that deal at the same time. So they put this together. A lot of this stuff was authorized by voting to give someone \$700 billion to do with as he wished. Now we are paying for that, and the costs are very great.

I believe, when we look at what is going on right now, there are some scary things over and above what I have been talking about. I had occasion to make several trips to Gitmo, Guantanamo Bay. That is an asset we have had in this country since 1903. In fact, it is one of the few good deals around. We are still paying the same rent now that we paid back then. It is \$4,000 a year, and we get this great big resource. It is a place to put the detainees and to go through the tribunals in a courtroom that is over there.

One of the scary things I am looking at now is a statement by President Obama that he wants to do away with the tribunals and he wants to close Gitmo or Guantanamo Bay. Here is the problem we have with that. Right now, we have 245 detainees—some call them terrorists—who are incarcerated there. Of the 245, 170 of them have no place to go. Their countries will not take them

back. They cannot be repatriated anywhere. Of the 170, 110 are really like the Shaikh Mohammed-type individuals—really bad terrorists. If the President goes through with his statement that he is going to close Guantanamo Bay, there is no place else to put them, no place in the world.

This number is going to increase as we escalate in Afghanistan. It is going to be going up. Some might say: There are prisons in Afghanistan. Yes, there are two, but they will only take detainees who are Afghans. So if they are from Djibouti, Yemen, or Saudi Arabia, then they have to go someplace else. The only place we can put them right now is Guantanamo Bay.

The argument some make is there has been torture going on. That has been completely refuted. In fact, every publication, every television station, every newspaper that has gone and inspected the premises at Guantanamo Bay has come back with a report that it is better than anything in our prison system in the United States.

One of the suggestions was that we take these people and send them around to some 17 areas within the United States. One of those areas suggested is in my State of Oklahoma, which is Fort Sill. I went down to Fort Sill the other day to look at the place, trying to picture if we had a bunch of terrorist detainees there.

By the way, this will serve throughout the country as 17 magnets to bring in terrorist activity. Most people agree that would be the case.

If we were to distribute these people around, they would have to be coming into our court system since we could not use tribunals, and the rules of evidence are different in a court system. It could be that some of these people would actually be turned loose.

It is very serious. It is something we need to keep. Every publication, every newspaper or television station that has gone to Guantanamo Bay has come back and said all these things just are not true, we need to keep Gitmo, and it has changed a lot of minds. I am hoping that is one area where we will be able to demonstrate clearly that it is a resource we must have and the world needs very much. We will be working to that cause.

Another issue that is not talked about very much in the budget is that almost everything is increased. We look at the size of the budget. We look at the deficits. The deficit for the year we are in right now could approach \$2 trillion. It is just unimaginable. People criticized George W. Bush during his tenure, but if you take all the deficits for those 8 years, add them up, and divide by eight, it averaged \$245 billion a year. Now we are talking about eight times that in 1 year. These amounts are horrible.

The other aspect of the budget I don't like is everything is going up, an

increase in spending, except military. We have a serious problem right now that we are facing in the military; that is, during the decade of the nineties, we downgraded our military by about 40 percent. I might add that some countries that could be potential adversaries, such as China, increased tenfold during that time. We reduced. There was this euphoric attitude that the Cold War is over, we don't need a military anymore. So in the nineties, they brought down the military in terms of our force strength, in terms of our modernization program.

There were a few heroes back at that time who helped us out. One was a GEN John Jumper, before he became the Chief of the Air Force. He made a statement in 1998. He said: Now we are in a position where our best strike fighters, our best strike equipment, the F-15 and F-16, are not as good in many ways as what the Russians are making right now in the SU series. At that time, it was SU-30s, now SU-35s. We went ahead. That helped us get into the F-22 and the Joint Strike Fighter so we would again regain our superiority.

When I talk with people and tell them that when our kids go out in potential conflicts, they would be fighting people who have better equipment than we do, it is un-American, it is not believable. Right now, the best artillery piece we have is called a Paladin. It is World War II technology. You have to get out and swab the breech after every shot. Yet there are five countries, including South Africa, that make a better one than we have.

Because we lifted that awareness, we were able to step into an area of what we call Future Combat Systems, FCS, to modernize our ground equipment and other equipment they will use. There are 16 elements of the Future Combat Systems. The first is NLOS-C, non-line-of-site cannon. This would replace the Paladin, so we will have something that is state of the art. But we are not there and will not be there for several more years.

We went through the decade of the nineties downgrading our military, and then, of course, when 9/11 came, all of a sudden we were in a war. I have to be sympathetic with former President George W. Bush because he inherited a military that had been taken down, and then all of a sudden he is confronted with one or two wars or fronts he had to fight. So it has been very difficult.

It is interesting to me that many of the liberal Members of the Senate during the years we were trying to enhance our military spending are the ones who objected to that and then complained about the overworking of our Guard and Reserve. They actually are responsible for that. Yes, we are now trying to do something about it. But in this budget, we increase spend-

ing everywhere except the military. That is an area where we are going to have to be doing something.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

MR. INHOFE. I encourage us to look at the overall budget, not just the tax increases but also how it affects other programs, such as our military.

I thank the Chair and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

MS. STABENOW. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE BUDGET

MS. STABENOW. Mr. President, I left a wonderful meeting with a group of organizations—many of our national faith leaders—from around the country and those who have been deeply involved in the issues around the Federal budget and expenditures and what our priorities should be as a country. There was a new optimism in the room about the direction of the country because for the first time in a long time—certainly since 2001—we have actually been talking about how does a budget reflect what is right for the majority of the American people; how do we address what is happening for children and families; middle-class workers who have lost their jobs and are trying just to put food on the table; people who have been struggling and not doing well even before the recession; the poor who find themselves hit over and over again and need to know there is a ladder out of poverty and into the middle class.

It was wonderful to see the commitment in that room and to see the fact that people around the country are coming together to focus on how we strengthen our country in very real ways. Not what has happened in the last 8 years—where it has been all about tax policies to help the privileged few, spending to help the privileged few—but how do we have a country where everybody has a chance to achieve the American dream for themselves and their families.

We talked about the fact that the budget we will be taking up next week, the week after, and every year is a moral document. It is about who we are as Americans: What do we believe in? What do we care about? I am very proud President Obama has given us a moral document that reflects the values and the priorities of the American people; the fact that he has focused on education, health care, getting us off our dependence on foreign oil so we can bring down the costs of energy and cre-

ate jobs through the new green economy, and that we are turning the corner as we look at a tax policy to focus on the middle class and to focus on families who are working hard every day or trying to find a job. So these were all positive things.

But I also thought in that meeting this morning—when we were talking about the budget as a moral document—how there has been created in this country a culture of greed. Greed has been rewarded for too long at the expense of the majority of Americans—certainly at the expense of the people in my great State of Michigan. Nowhere is that more epitomized than looking at recent outrages, whether it be Bernie Madoff and what happened with all the people who were victimized and who lost their savings and all the people who have been impacted—wiped out—by a Ponzi scheme and the greed of one individual or a few individuals or turning closer to home and what we have been talking about for the last couple days, which is the outrageous bonuses—\$165 million in bonuses—to a group of people at AIG who actually created the situation we are in today—not only for this country but which has created a ripple effect that has caused a global credit crisis. We look at the morality of that—the morality of \$165 million in bonuses.

I am also outraged at the fact that we have put so much money into this company. Taxpayers now own 80 percent of it. Yet we have not seen the oversight, the accountability one would expect, whether it is the bonuses or anything else for that matter. Now, we all know President Obama inherited an incredible mess and is working with all of us to dig our way out, but we have to have accountability with AIG and every other entity that has stepped up to ask for or received taxpayer dollars. Bonuses? They are absolutely an outrage, especially for people who didn't deserve a bonus for their performance. In fact, many left, and should leave, because of what has been done. They should be fired, if they haven't already left—the people who got us where we are today.

I am amazed when I look at the fact that we are providing such a different standard between those on Wall Street, who got us into this mess—AIG and others receiving taxpayer money—and what I see happening with my own auto industry in Michigan, employing directly or indirectly 3 million people. Where is the equivalent of the auto task force? I can tell you that every single line in every single budget, every single management plan, every part of the auto companies that has received a small fraction of what AIG has received has been gone through and is continuing to receive great scrutiny. I support that. They certainly are willing to do that. But where is the scrutiny on AIG? Where is the scrutiny on

the other companies that have taken huge amounts of money from taxpayers?

I find it incredible when they say they can't renegotiate contracts. Somebody should tell that to the United Auto Workers, who are renegotiating contracts right now, who have opened their contracts over and over again, with workers taking more and more cuts, paying more and more in health care. Yet we hear from this company and these executives with AIG that they have contractual agreements and they can't reopen contracts? I don't think there is anybody in my State who believes that is not possible, given what our families have gone through over and over again, with people who thought they had jobs, thought they had contracts but suddenly do not.

Why is it the people who got us into this mess—with their complicated leveraging, the tools they put together that created this house of cards that has fallen and affected not only everyone in America but around the world—can't be asked to step up and reopen contracts? I don't understand that at all.

We are going to do everything we can in order to get that money back for the American taxpayers. We have seen bills introduced, and I am proud to be cosponsoring one of those bills through the Finance Committee. Our leader, Senator REID, has asked us to move as quickly as possible, and I know the Speaker of the House has as well, as has the President of the United States, and we are going to do everything we can to be able to recoup those dollars.

When we talk about what is moral in this country, whether it is the budget, whether it is bonuses of millions of dollars for people who have hurt so many, caused so much damage, created such a crisis around the world or whether it is looking at what is happening to families every day, this is a moral issue. This is a question of right and wrong. It is a question of our priorities. The budget the President has proposed focuses us back on what is important for this country, and it is critical we get that budget passed. We have middle-class families across the country right now, and really all families, who never thought they would have to worry about trying to decide whether to buy groceries or to buy medicine; worrying about what happens tomorrow—will there be food tomorrow. People are going to food banks who never thought they would have to go to a food bank. People who used to donate to the food bank are now going to the food bank, and others who have been relying on the food banks for a long time find it is getting tougher and tougher and tougher.

More than 11 percent—in fact, close to 12 percent—of the people in my State do not have jobs right now. They

are unemployed. That is only the official number. That doesn't count those who have been long-term unemployed, unable to find work and are no longer counted. It also doesn't count the number of people who are working one, two, and three part-time jobs trying to hold it together. That is a moral issue.

The reason we tackled this recovery plan and so quickly brought it forward—to create jobs that we create in America, jobs in a green economy, focusing on job training and education and health care for people who have not been able to find a job so they will be able to keep health care going for their families—is because we understand what this is all about in terms of our values and priorities. Millions of families are in danger of losing their homes or have already lost their homes which is why we are focused on doing everything we can to help families, neighborhoods, and communities address the housing crisis. We know that education is the key to the future for all of us, for our children and our grandchildren. Keeping education a priority and investing in the future, in education and access to college, is a critical part of our budget because it is a critical part of the American dream.

Yes, I am outraged about AIG giving away millions in bonuses—absolutely. I am outraged about other injustices going on, about the focus over the last 8 years on those who are doing well and policies that made sure they were doing even better, oftentimes at the expense of middle-class Americans, at the expense of the majority of Americans in this country. I am outraged that billions of dollars are going to companies that do not have accountability attached to them. I know the people in Michigan are as well. But I also believe it is critical that we not only get the money back from these bonuses and provide the accountability but we redirect back to the priorities of the American people. That is what this budget is all about.

We need jobs. We need jobs in this country because, if people have money in their pockets and they can pay their bills and keep that mortgage and invest in their families' education, this country is going to turn around.

The budget the President has proposed, the budget the people with whom I met this morning are so encouraged about, is, in fact, a moral document. It changes the way this country has been operating—from a culture of greed, where somehow bonuses for AIG made sense to somebody somewhere in AIG, to a situation where we are focused again on what is important for the majority of the American people, what will allow us to be strong as a country: putting people back to work; making sure we have access to health care, which is not only the moral thing to do but brings down costs; education and investing in a new

energy economy that is not dependent on anybody else but American ingenuity. That is what is in this budget, and it is a budget that reflects the priorities and the values of the American people. We need to come together in a bipartisan way to pass this as quickly as possible.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. BENNET). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

EXECUTIVE SESSION

NOMINATION OF RONALD KIRK TO BE UNITED STATES TRADE REPRESENTATIVE

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to executive session to consider the following nomination, which the clerk will report.

The legislative clerk read the nomination of Ronald Kirk, of Texas, to be U.S. Trade Representative.

The PRESIDING OFFICER. Under the previous order, there will be 90 minutes of debate on the nomination, with the majority controlling 30 minutes and the Republicans controlling 60 minutes.

The Senator from Arizona is recognized.

Mr. MCCAIN. Mr. President, as you noted, we will consider the nomination of Mr. Ron Kirk as the next U.S. Trade Representative.

With some reluctance, I will vote to confirm Mr. Kirk's nomination. I think it is pretty obvious Mr. Kirk has been less than forthcoming on a number of trade issues that affect this country, and some of the positions he has articulated are very dangerous for this Nation's future. I have come to this floor on numerous occasions and argued against the provisions that have been signed into law in omnibus bills recently, one of them "Buy American," the other, of course, the latest being the barring of Mexican trucks into the United States of America.

The signal that sends to the world is that the United States is on a path of protectionism. That shows at least a majority of Members of this body have ignored the lessons of history. That lesson, obviously, we learned in the Great Depression, when isolationism

and protectionism turned our economy from a deep recession to the worst depression of modern times. That is what protectionism and isolationism does.

So we now have a predictable result of killing the program which would allow, in keeping with the North American Free Trade Agreement, a solemn treaty signed by then-President Clinton, that Mexican trucks would be allowed into the United States.

Before I go much further, though, I wished to comment on the issue that is consuming the American people and the Congress today; that is, the AIG bonuses paid to executives. The simple lesson is, if we had not bailed out AIG, we would not be worried about the bonuses. I spoke out against the bailout of AIG at the time when it was first proposed when AIG was in trouble.

I, along with every other American, share anger and obvious displeasure that these bonuses were given to executives who obviously did not deserve them. But we should not have bailed out AIG. We should have let them fail and reorganize.

I would also like to point out that another area of the bailout that Americans should be equally disturbed about is the \$20 billion that went to foreign banks. American taxpayers are paying now \$20 billion to bail out foreign banks. Have we not enough trouble here at home and enough areas of the country that need Government assistance than to send \$20 billion to foreign banks?

There is an obvious need for increased transparency, increased oversight, and far more careful stewardship of American tax dollars. The numbers we are talking about are, indeed, staggering. I would point out, again, we are committing generational theft by these kinds of expenditures of American taxpayers' dollars and mortgaging our children and grandchildren's future.

The direction of our trade policy has hardly been more important in recent years, given the enormous economic challenges we are facing today, with unemployment rising, consumer confidence dropping, and our growth rate stagnating, at best.

American exports. American exports have been one of the few bright spots in a terrible economic situation. Until last quarter, the export sector of our economy grew at a faster rate than other sectors during the past several years. In the face of this fact, and mindful of history lessons, Congress and the administration should be working to break down remaining barriers to trade.

However, we are doing the opposite. Since the beginning of this year, Congress and the administration have taken several steps designed to choke off access to the U.S. market which invites retaliation from our foreign trading partners.

American business and workers will suffer as the result of these ill-considered moves.

Last month, as I mentioned, Congress adopted and the President signed into law—again, one of the consequences of these omnibus bills that are thousands of pages, that nobody knows what is included, they are designed to be a “stimulus” or “spending bill,” and we stuff policy provisions in them, which people may not know about for weeks or even months.

We find out that these are egregious in the case of “Buy American” and in the case of the American trucks. Both of them send a signal to the world that America is going down the path of protectionism.

The results, as far as Mexico is concerned, are unfortunate, very unfortunate, but predictable. The reaction of our friends and allies throughout the world to the “Buy American” provisions is predictable. They are angry and they are upset. I cannot say I blame them.

Now, the “Buy American” provision required funds appropriated in that bill—this is a policy change, remember, adopted in a “stimulus package,” that we purchase only American-made steel, iron, and manufactured goods.

As we debated this provision, many of our closest partners expressed great concerns about the implications of this course of action. The Canadian Ambassador to the United States wrote:

If Buy America becomes part of the stimulus legislation, the United States will lose the moral authority to pressure others not to introduce protectionist policies. A rush of protectionist actions could create a downward spiral like the world experienced in the 1930's.

When then-Candidate Obama said he would “unilaterally renegotiate” the North American Free Trade Agreement, the Canadian response was: Yes, and if you do that, then we will sell our oil to China. Then, later, Candidate Obama changed his position to saying: Well, that wasn't exactly what he meant. Then, President Obama said: Now we are in favor of free trade. But yet President Obama did not veto either one of these bills, which sends a signal to the world that the United States has embarked on a protectionist path. He should have vetoed those bills, especially the one on Mexican trucks.

A European Commission spokesman noted:

We are particularly concerned about the signal that these measures could send to the world at a time when all countries are facing difficulty. Where America leads, many others tend to follow.

Others lent their own voices to those cautioning against a terribly ill-timed protectionist act.

While some Senators may have taken comfort in last-minute language added to require that implementation of the “Buy American” provisions be consistent with our international obligations, I worry very much about the effect this and other steps will have on the global trading system. For decades

the United States has led global efforts toward free and open trade and investment. We abandon this leadership at our peril.

The “Buy American” provision was not the only step in the protectionist direction. There have been other protectionist measures, and we are already seeing the fallout from such unwise decisions. Mr. KIRK agreed during his confirmation hearing:

[I]f the United States raises barriers in our own market, other countries are more likely to raise barriers against our products.

We have that evidence already. On Monday, the Mexican Government announced it will increase tariffs on 90 American agricultural and manufactured goods in direct retaliation for our recent decision to ban Mexican trucks from traveling beyond commercial zones. Although the Mexican Government is yet to specify the 90 different goods, it has announced that its decision would affect \$2.4 billion worth of exports from 40 States. The Mexican Ambassador had an article in the Wall Street Journal this morning.

I ask unanimous consent that it be printed in the RECORD, along with an editorial from this morning from the Arizona Republic.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Mar. 18, 2009]

CONGRESS DOESN'T RESPECT NAFTA

Nobody can argue that Mexico hasn't worked tirelessly for more than a decade to avoid a dispute with the United States over Mexican long-haul trucks traveling through this country. But free and fair trade hit another red light this past week.

Back in 1995, the U.S. unilaterally blocked the implementation of the North American Free Trade Agreement's cross-border trucking provisions, just as they were about to enter into force. In response, and after three years of constant engagement, Mexico had no alternative but to request the establishment of an arbitration panel as allowed under NAFTA. A five-member panel, chaired by a Briton and including two U.S. citizens, ruled unanimously in February 2001 that Washington had violated the trucking provisions contained in NAFTA, authorizing Mexico to adopt retaliatory measures. Yet once again, Mexico exercised restraint and sought a resolution of this issue through further dialogue.

Unfortunately, Mexico's forbearance only seemed to make matters worse. In 2002, Congress introduced 22 additional safety requirements that Mexican trucks would have to meet, a measure that was clearly discriminatory as these requirements were not applied to U.S. and Canadian carriers operating in the U.S. Mexico worked assiduously with the U.S. administration to find a solution to this problem.

Finally, in 2007 an agreement was reached that included the implementation of a demonstration program in which up to 100 carriers from each nation would be allowed to participate. This program was designed precisely to address the concerns voiced by those opposed to cross-border trucking. The demonstration program, launched in September 2007, was an unmitigated success.

During the 18 months that the program was in operation, 26 carriers from Mexico (with 103 trucks) and 10 from the U.S. (with 61 trucks) crossed the border over 45,000 times without any significant incident or accident. Moreover, according to reports of both the Department of Transportation's inspector general and an independent evaluation panel, Mexico's carriers participating in the program have a safety record far better than that of all other carriers operating in the U.S.

The demonstration program also underscored the benefits of free and fair cross-border trade, given the lower costs that would result from ending the requirement that short-haul trucks be used to transfer cargo at the border from the long-haul trucks of one country to those of the other. Thus, for example, one participating carrier saved over \$600,000 a year by cutting trip times and fuel costs, while another saved an estimated \$188,000 in transfer fees in the nine months that it participated in the demonstration program.

These savings benefit consumers and enhance North American competitiveness. Moreover, a streamlined system would also cut pollution, since fewer and newer Mexican long-haul trucks would replace smaller and older trucks that now huff and puff their way to the border. Unfortunately, notwithstanding these benefits to businesses and workers, and to the safety of our roads and the health of our environment, a small but vocal group has consistently blocked progress on this issue. It has now finally managed to stop the demonstration program by defunding it through the 2009 omnibus spending bill.

In confronting this situation, the government of Mexico—after over a decade of dialogue and engagement in which it has asked for nothing more than U.S. compliance with its international commitments and with the rules of the game that provide for a level playing field—has had no alternative but to respond by raising tariffs on 90 U.S. products that account for approximately \$2.4 billion in trade.

Today, opponents within Congress continue to allege concerns related to the safety of America's roads—yet they cancelled the very program designed to address such concerns, and which had been producing positive results. After all, the cross-border trucking program that was defunded had been demonstrating not only compliance by Mexico's long-haul trucks with U.S. regulations, but a superb and unmatched record of safety. It is precisely because of our firm belief in the importance of cross-border services that the government of Mexico will continue, as a sign of good-faith and notwithstanding the countermeasures announced early this week, to allow U.S. carriers to provide trucking services into Mexico under the now-defunct demonstration program guidelines and criteria.

Mexico is the U.S.'s second-largest buyer of exports. It remains a steadfast supporter of free and fair trade, and will continue to work actively and responsibly during the coming weeks and months with Congress and the administration to find a solution that will allow safe Mexican trucks onto U.S. roads under Nafta rules.

[From the Arizona Republic, Mar. 18, 2009]

U.S. IN THE WRONG BY BLOCKING MEXICAN TRUCKS

America is picking a food fight with Mexico over trade. Congress set it off by canceling a pilot program that allowed Mexican

trucks to operate on U.S. highways—a blatant violation of the North American Free Trade Agreement.

Mexico responded Monday by announcing that it will jack up tariffs on 90 U.S. agricultural and manufactured products. About \$2.4 billion worth of exports from 40 states will be affected.

Under NAFTA, we agreed to give Mexican trucks access beginning in 1995, increasing efficiency and lowering costs for consumers.

But U.S. trucking interests and unions have been trying to block the move for years with scare stories about safety. Actually, thousands of Mexican trucks, which were grandfathered in, have operated safely here for years. The pilot program set high standards for vehicles and drivers. The real issue isn't safety but competition and profits.

President Barack Obama, who was cool to NAFTA during the campaign, must step up to ensure the United States finally follows its treaty obligations. The White House says he is working on a new version of the pilot program that responds to congressional concerns. It needs to happen quickly.

Sen. John McCain, R-Ariz., is sounding a timely warning that this dispute could lead to more protectionist measures.

Let the trucks roll.

Mr. MCCAIN. The Mexican Ambassador says, in part of his article:

The U.S. Congress, which has now killed a modest and highly successful U.S.-Mexico trucking demonstration program, has sadly left my government no choice but to impose countermeasures after years of restraint and goodwill.

Then and now, this was never about the safety of American roads or drivers; it was and has been about protectionism, pure and simple.

He is right. It is also a testimony to the influence of the Teamsters Union. Elections have consequences.

He goes on to say:

It is worth noting that this takes place shortly after Mexico announced it would unilaterally reduce its industrial tariffs from an average of 10.4% in 2008 to 4.3% by 2013, and that it has underscored its commitment, along with its other G-20 partners, to push back on protectionist pressures.

What has been particularly frustrating in this long and uphill battle has been the fact that the Congress continues to move the goalposts.

Importantly, he concludes:

Mexico is the U.S.'s second largest buyer of exports. It remains a steadfast supporter of free and fair trade, and will continue to work actively and responsibly during the coming weeks and months with Congress and the administration to find a solution that will allow safe Mexican trucks onto U.S. roads under Nafta rules.

Again, NAFTA was signed by President Clinton 14 years ago. Part of that agreement was that Mexican trucks would be allowed into the United States. Study after study has concluded that Mexican trucks operate as safely as U.S. trucks do.

Today, on goods America buys coming from Mexico, the truck, after crossing the border, if it is Mexican, has to stop. The goods are offloaded onto another truck, moved to another truck that is American-owned and loaded on-board that truck. Meanwhile, there are

CO₂ emissions and the cost and expenses of the delay are passed on to the American consumer.

I repeat, Mexico is the third largest trading partner of the United States, behind Canada and China, and the United States ranks first among Mexico's trading partners. United States trade with Mexico totaled \$368 billion in 2008. We have close and growing ties between our two Governments. Right now there is an existential threat to our southern neighbor from drug cartels. The violence on the border is at unprecedented levels. Acts of cruelty and murder are taking place beyond belief. People are being beheaded. There is the assassination of police chiefs and others. The corruption is very high. Why should we care? One reason we should care is because of violence spilling over from the Mexican border into ours.

The other reason is, there is between, according to estimates, \$10 and \$13 billion worth of revenue in receipts from the sale of drugs in the United States. It is the United States that is creating the market that is creating the drug cartels and violence on the border that has ensued. The Mexican Government is trying—maybe for the first time in as serious a way as they are now—to bring under control these cartels. The corruption reaches to the highest level. The violence is incredibly high. We need to do what we can to help the Mexican Government bring these cartels under control and try to eradicate them because they do pose an existential threat. We cannot afford to have a government that is full of corruption and controlled by drug cartels on our southern border, not to mention the impact it has on illegal immigration.

What did we do? We took steps in violation of our obligations under the North America Free Trade Agreement that will have precisely the opposite effect and have prompted retaliation that will only serve to harm American workers, consumers, and our Nation's relationship with Mexico.

During these difficult economic times for many American businesses, the ability to sell products on the world market is essential to our economic recovery. The Financial Times wrote in an editorial published yesterday:

The retaliatory duties are a legitimate response to a U.S. violation of a trade deal . . . but this does not bode well for bilateral relations just under two months into the Obama administration.

It goes on:

We hope cooler heads prevail and prevent any deterioration of the bilateral relationship. Both nations have too much at stake—and trade as well as security issues.

I could not agree more.

The Arizona Republic published an editorial that reads:

With the economy in tatters, it's no time to mince words: The United States is in the

wrong. Under NAFTA, we agreed to give Mexican trucks access beginning in 1995, increasing efficiency and lowering costs for consumers.

The editorial continues:

Around the world, countries are considering trade barriers that could have disastrous consequences for the world economy. The United States must put the brakes on trade restrictions, not fuel them.

I am aware there is a sizable block of public opinion that believes we should close our borders to everybody and everything, that somehow Mexican trucks are unacceptable, that legal immigration is something we ought to do away with. I understand all those arguments. But I also urge those who say that trade with Mexico is not important to understand the facts: They are our third largest trading partner; we have a trade surplus; it is important to have our relationship good as we help them battle the drug cartels; and, most importantly, protectionism and high tariffs led to the Great Depression.

Congress passed NAFTA in 1993 and President Clinton signed it into law in 1994, which mandated the opening of our southern border to Mexican trucking operations to allow the free flow of goods and services between the two countries. Last year, language was slipped into a fiscal year 2008 spending bill that sought to strip funding for a pilot program with Mexico that would allow a limited number of Mexican trucks to enter the United States. Now the administration says it will try to create "a new trucking project that will meet the legitimate concerns" of Congress. I don't understand how the administration can create a new trucking project to comply with NAFTA, when Congress explicitly barred any money from being spent toward such activities. The President should not seek to create a new project to circumvent the terms of the legislative language. Rather, he should have vetoed it in the first place.

The administration's eliminating the Mexican cross-border trucking program will harm millions of American consumers who could benefit from lower prices on many goods manufactured in Mexico and then distributed in the United States.

According to the U.S. Department of Transportation, refusing entry into our country of Mexican trucks carrying Mexican-made goods adds \$400 million to the price of Mexican imports which is, of course, passed on to the American consumer. Mr. Kirk has made some statements broadly supportive of international trade, but he has also made comments suggesting protectionism might not be so bad after all. During his confirmation hearing, Mr. Kirk stated:

Not all Americans are winning from [trade] and our trading partners are not always playing by the rules.

He suggested the administration may abandon the free-trade agreement we

have concluded with South Korea, one projected to increase the United States GDP by \$10 to \$12 billion. He said the pact "simply isn't fair." He emphasized he does not have "deal fever" when it comes to trade agreements. Again, it is up in the air as to what the fate of the Colombia Free Trade Agreement would be, sending a clear signal that we would be punishing the Colombian Government for their assistance in trying to combat drug cartels.

Our trading partners, including Canada and Mexico, don't seem interested in strengthening agreements that have served them and us well for years. Rather, they would like to see the United States fulfill its own trade obligations and look for further ways to open markets to the free flow of commerce. The free flow of commerce has been a founding principle of U.S. economic policy for many decades and a key factor in our rise to prosperity and greatness. It is for this reason I hope Mr. Kirk and his colleagues in the administration will reconsider their stance and help build, not damage, the consensus behind free trade. After all, we have seen a terribly destructive pattern unfold before.

In 1930, as the United States and the world were entering what would be known in history as the Great Depression, two men, Mr. Smoot and Mr. Hawley, led the effort to enact protectionist legislation in the face of economic crisis. Their bill, the Smoot-Hawley Tariff Act, raised duties on thousands of imported goods in a futile attempt to keep jobs at home. In the face of this legislation, 1,028 economists issued a statement to President Herbert Hoover, wherein they wrote:

America is now facing the problem of unemployment.

The proponents of higher tariffs would claim that an increase in rates will give work to the idle. This is not true. We cannot increase employment by restricting trade.

Mr. Smoot, Mr. Hawley, and their colleagues paid no attention to this wise admonishment, and the Congress went ahead with protectionist legislation. In doing so, they sparked an international trade war as countries around the world retaliated, raising their own duties and restricting trade, and they helped turn a severe recession into the greatest depression in modern history.

I do not intend to oppose the President's nominee for U.S. Trade Representative. I remain very concerned about the direction of our trade policies at a time of economic peril. I urge my colleagues and the administration to heed the lessons of economics and heed the lessons of history.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Mr. President, I ask unanimous consent that the vote on confirmation of the nomination of Ron

Kirk occur at 2 p.m. today, with the remaining provisions of the previous order governing the consideration of this nomination in effect; that upon resuming legislative session, the Senate then proceed to vote in relation to the following amendments in the order listed; further, with respect to H.R. 146 and the provisions of the order governing vote sequences remaining in effect: Coburn amendment No. 680, Coburn amendment No. 679, Coburn amendment No. 675.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Senator from Wisconsin.

Mr. FEINGOLD. Mr. President, I ask unanimous consent that I be allowed to speak for up to 8 minutes as in morning business and that the time not count against debate time on the Kirk nomination.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

ENDING STEALTH BONUSES

Mr. FEINGOLD. Mr. President, I come to the floor to discuss taxpayer-funded bonuses. These bonuses are paid every year, often without any public discussion or a recorded vote by those with the authority to approve or stop them. The people giving themselves these bonuses have made sure they get them regardless of their performance.

I am referring to the annual bonuses given to Members of Congress.

There is some good news to report on this issue today. Thanks to the leadership of majority leader HARRY REID, we took an important step yesterday. Senator REID moved legislation through the Senate that will end these annual stealth bonuses. I have introduced legislation similar to Senator REID's bill for the past six Congresses, and I am delighted, because of Senator REID's leadership, this proposal has finally passed the Senate.

Congress has the power to raise its own pay. While some corporate executives apparently have this power as well, it is something most of our constituents cannot do. Because this is such a singular power, I think Congress ought to exercise it openly and subject to regular procedures, including debate, amendment, and, of course, a vote on the record.

But current law allows Congress to avoid that public debate and vote. All that is necessary for Congress to get a pay raise is that they do nothing, that nothing be done to stop it. The annual bonus takes effect unless Congress acts.

As I noted in a statement yesterday, that stealth bonus mechanism began with a change Congress enacted in the Ethics Reform Act of 1989. In section 704 of that act, Members of Congress voted to make themselves entitled—entitled—to an annual raise equal to half a percentage point less than the employment cost index, which is one measure of inflation.

On occasion, Congress has actually voted to deny itself a bonus, and the traditional vehicle for the pay raise vote is the Treasury appropriations bill. But that vehicle is not always made available to those who want a public debate and vote on the matter. As I have noted in the past, getting a vote on the annual congressional pay raise is a haphazard affair, at best, and it should not be that way. The burden should not be on those who seek a public debate and a recorded vote on the Member pay raise. On the contrary, Congress should have to act if it decides to award itself a hike in pay. This process of congressional bonuses without accountability must end.

I joined with the junior Senator from Louisiana in offering an amendment to the Omnibus appropriations bill recently. That amendment received strong support—support which was all the more remarkable because many of the amendment's potential supporters felt constrained to oppose it in order to keep the underlying legislation free of amendments. Now, thanks to our majority leader, we have a real chance to end this system in fact.

This issue is not a new question. It was something our Founders considered from the beginning of our Nation. In August of 1789, as part of the package of 12 amendments advocated by James Madison that included what has become our Bill of Rights, the House of Representatives passed an amendment to the Constitution providing that Congress could not raise its pay without an intervening election. On September 9, 1789, the Senate passed that amendment. In late September of 1789, Congress submitted the amendments to the States.

Although the amendment on pay raises languished for two centuries, in the 1980s, a campaign began to ratify it. While I was a member of the Wisconsin State Senate, I was pleased to help add Wisconsin to the States ratifying the amendment. Then its approval by the Michigan legislature on May 7, 1992, gave it the needed approval by three-fourths of the States.

So the 27th amendment to the Constitution now states:

No law, varying the compensation for the services of the senators and representatives, shall take effect, until an election of representatives shall have intervened.

I honor that limitation. Throughout my 6-year term, I accept only the rate of pay Senators receive on the date on which I was sworn in as a Senator. I return to the Treasury any cost-of-living adjustments or bonuses during my term. I do not take a raise until my bosses, the people of Wisconsin, give me one at the ballot box. That is the spirit of the 27th amendment, and, at the very least, the stealth pay raises permitted under the current system certainly violate that spirit.

This practice must end. I am so delighted to express my thanks to Major-

ity Leader REID. Because of him, we have a real chance of ending it.

Today I am sending a letter to Speaker PELOSI asking that the other body take up and pass the Reid legislation to end the automatic congressional bonuses. Doing so would assure the American people that we are not only serious about going after the abusive bonuses paid to the executives of firms bailed out with taxpayer dollars, but we are also serious about ending a system that was devised to provide Members of Congress with bonuses without any accountability.

Mr. President, I yield back whatever time I have remaining.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I might ask, what is the pending business?

The PRESIDING OFFICER. The Kirk nomination is before the Senate.

Mr. BAUCUS. I thank the Chair.

I would like to speak on the Kirk nomination.

Mr. President, Ralph Waldo Emerson said:

[The most advanced nations are always those who navigate the most.]

Today, the Senate considers the nomination of Mayor Ron Kirk to be U.S. Trade Representative. As we consider the nomination, America is navigating a shifting economic landscape. And so are our trading partners.

As financial systems weaken, protectionist sentiments strengthen. As markets crumble, import barriers rise. And as jobs disappear, trade violations emerge.

Ron Kirk has been asked to navigate U.S. trade policy through these difficult waters. To ensure that America keeps moving forward, he must navigate the right course.

Many feel our trade policy has veered off course. They argue the Government has not safeguarded our workers. They argue the Government has not enforced our trade agreements. They argue the Government has not dismantled barriers to our exports.

I believe Mayor Kirk will chart the right course. He understands he must steady the tilting ship of public opinion. He will do so by rebuilding America's faith in the benefits of international trade. He will remain constantly on the lookout for America's workers. He will shine a spotlight on trade violations. He will vigilantly enforce our international agreements. He will speed our economic recovery by opening markets for American exports.

Let us chart the right course on international trade. Let us rebuild

America's faith in our trade policy. Let us confirm Ron Kirk to be the U.S. Trade Representative.

Mr. President, I yield the floor.

Mr. GRASSLEY. Mr. President, the nomination before the Senate is critically important in this time of economic upheaval.

We need a U.S. Trade Representative to assert our rights, defend our interests, and negotiate new market opportunities for our exporters.

Trade can and should play an important role in our economic recovery. President Obama recently acknowledged this in his trade policy agenda.

If Mayor Kirk is confirmed today, I look forward to working with him to advance a progrowth trade agenda for the benefit of U.S. consumers and producers.

We have a lot of work to do, some of which is left over from the last Congress. By that I am referring to our three pending trade agreements with Colombia, Panama, and South Korea.

We also need to find a way to reinvestigate the Doha Development Round negotiations in the World Trade Organization.

I appreciate Mayor Kirk's engagement and enthusiasm to assume the responsibilities of the U.S. Trade Representative.

Based on his responses to my questions during the vetting process in the Finance Committee, there appear to be some policy areas in which our views converge.

There are some other areas in which I continue to have concerns, particularly where his responses provided insufficient detail to determine whether we can have a convergence of views.

But that said, if Mayor Kirk is confirmed, I believe that we will be able to work together on a positive trade agenda.

During the committee vetting process, several issues arose with respect to the nominee's tax returns.

I am grateful for Mayor Kirk's cooperation with me, Chairman BAUCUS, and the Finance Committee staff.

In the true spirit of transparency and cooperation, he responded to all questions about his taxes directly and honestly.

He also agreed in communications with the staff to release information about his tax issues, and that information was put into the record of the committee proceedings.

I believe that all nominees should be held to the same standard when it comes to compliance with the tax laws.

Mayor Kirk was required to amend his returns and pay additional tax as a result of the vetting process.

Each of the issues for which he amended his returns was considered by him and his preparer at the time the returns were prepared. However, upon further review of some of the calculations, he agreed that some of them

needed to be changed. Those issues are now resolved.

In closing, Mayor Kirk is a strong nominee for the position of U.S. Trade Representative.

He brings enthusiasm and energy to the table, as well as first-hand experience and understanding of the benefits of liberalized trade.

I urge my colleagues to support his nomination.

Mrs. HUTCHISON. Mr. President, I rise today to speak about Ron Kirk, the nominee for whom we will vote in the next few minutes for U.S. Trade Representative. I wish to speak in strong support of Ron Kirk to serve as U.S. Trade Representative. I would have been here sooner, but as ranking member of the Committee on Commerce, I was holding a hearing with the chairman, JAY ROCKEFELLER, on Governor Locke to be Secretary of Commerce, and that was my responsibility that I certainly had to meet.

I will say that Governor Locke did a very good job before our Commerce Committee. We just, within the last hour, concluded that hearing. But I wanted to make sure that I am able to speak about Ron Kirk because, certainly, I know him. I have known him for many years. We both live in Dallas, and he and I enjoy a great relationship. I was in the Senate when Ron Kirk was the mayor of Dallas, and he did a wonderful job as mayor of our city. I worked with him as a Senator. I know he can get things done. He is very bright, very affable, really funny. He is the kind of person you want to sit next to in a very dull speech because he can make you laugh no matter how bad the summit or the speech or whatever the business of the day. He is a very rare, wonderful person.

During his time in office, Mayor Kirk expanded Dallas's reach to the world through a range of trade missions, trying to show that Dallas was open for business, and he traveled on trade missions to assure that would happen. While he was mayor he sponsored a competition every year for small businesses to highlight those competing in foreign markets and invited the winner to go on his trade mission trips. I think it is important as a former small business owner myself that we show how you can export to foreign countries, no matter how small your business is, if you just know how to pursue it. Mayor Kirk tried to ensure that small businesses in Dallas, as well as our big businesses, were able to have a place at the table when he was on trade missions, showing what could be done with trade.

Before becoming mayor of Dallas, Ron Kirk was secretary of state of Texas. He was an appointee of Gov. Ann Richards. He attended Austin College, graduating with a degree in political science and sociology in 1976 and then went to the University of Texas

Law School, which is also my alma mater. Upon receiving his J.D. in 1979, he practiced law until 1981 when he went to work in the office of then Texas Senator Lloyd Bentsen who was my immediate predecessor in this Senate seat.

On a personal note, Ron is married to Matrice Ellis Kirk. She, in her own right, is a professional woman, a leader in Dallas, another very bright, affable person who has made her own impression in Dallas as well. They have two daughters, Elizabeth Alexandria and Catherine Victoria.

I know that Mayor Kirk's leadership and experience will make him a strong ambassador for U.S. trade policy. Last week in his testimony before the Senate Finance Committee, Mayor Kirk pledged that as U.S. Trade Representative, "I will work to increase opportunities for American entrepreneurs in the global marketplace."

These economic opportunities are critical to America's prosperity. In 2007, exports accounted for 40 percent of our economic growth.

The next U.S. Trade Representative will face a series of challenges, including revitalizing the stalled WTO talks and managing the Doha Round, which is preoccupied with topics such as export subsidies, tariffs, copyright issues, and keeping markets open to U.S. goods. Equally important, the next U.S. Trade Representative will face the worst economic downturn in decades in America and in the world.

As we face economic hardships, trade presents a tremendous opportunity to sustain and create jobs, expand economies, and stimulate growth. We must resist the temptation to close our borders and engage in protectionism, which always ends up harming our economy.

History is not kind to those who raise trade barriers during a recession. In 1930, President Hoover made the mistake of signing the Smoot-Hawley tariff, which dramatically increased the cost of imports and turned a serious recession into the Great Depression. We can't allow that to happen again. My heavens, if we know anything, it is that we should learn from history. The past is prologue.

I believe trade policy can play a leading role in getting the U.S. economy and the global economy back on track.

Currently, the United States has free-trade agreements in effect with 14 countries: Canada, Mexico, Israel, Jordan, Chile, Singapore, Australia, Morocco, the Dominican Republic, El Salvador, Guatemala, Honduras, Nicaragua, and Bahrain. However, we still have free-trade agreements with Colombia, Panama, and South Korea that await congressional approval.

The next U.S. Trade Representative must work with Congress to implement those trade agreements and ensure that American exports enter the global

market on a level playing field. I am pleased that in his testimony before the Senate Finance Committee, Mayor Kirk committed to work with Congress to develop "benchmarks" that will allow these accords to move forward.

The Colombian Free Trade Agreement in particular will be tremendously beneficial to the United States, both economically and diplomatically. This accord would remove tariffs on the \$8.6 billion of U.S. agricultural exports to Colombia every year.

While America's economic growth is a primary objective of free-trade agreements, they also serve the broader purpose of bolstering our foreign policy.

At a time when Venezuelan dictator Hugo Chavez is trying to undermine U.S. security interests in Latin America, we must seek trade partnerships with allies such as Colombia.

As the Washington Post said in an editorial: "A vote for the Colombia deal would show Latin America that a staunch U.S. ally will be rewarded for improving its human rights record and resisting the anti-American populism of Venezuela's Hugo Chavez."

By helping Colombia and other countries thrive under the free market, we will help them become less vulnerable to Chavez's petrodollars.

I am hopeful that Mayor Kirk will take the necessary steps to ensure that the Colombian Free Trade Agreement is approved.

Let me say that I think probably the first issue the U.S. Trade Representative will have to focus on and solve is with Mexico. This week Mexico threw up tariffs on 90 products that are imported to Mexico from the United States. Most of these are agricultural products. It will hurt our agriculture businesses if we have a trade war with Mexico; if we have tariffs that increase the price of American goods into Mexico. We all know this must be solved.

I will say that the person who understands this best is Ron Kirk. Ron Kirk, obviously, lives in Texas. He knows how important free trade is with Mexico. Mexico is Texas's largest trading partner. We export to Mexico, and he has been there. So he understands that this is a high priority for all of our States exporting into Mexico and that we must solve the trucking issue so that Mexico understands that there will be parity across the border and that Mexican trucks, like American trucks, will have the same safety standards and that they will have an ability to be inspected. He can solve this if we will confirm him today and let him start on this very important problem.

Throughout his career, Mayor Kirk has shown the character and leadership skills to bring people together on behalf of a good cause. For that reason, I am very confident he will make a great U.S. Trade Representative. He will seek exports of American goods all

over the world. He will seek free and fair trade. That is very important—we don't want other countries to throw up barriers to our entry into their country—and he will do the right thing. I know he is a good negotiator. I know he will be a good representative of the United States in this very important position.

I urge my colleagues to support his nomination. I am pleased we are voting on him soon so that he can hit the ground running on the Doha Round and the many issues that are facing our country in this time of economic stress—when the last thing we should be doing is throwing up barriers to trade and exports from our country into other countries, where good trade makes good neighbors and partners.

Mr. FEINGOLD. Mr. President, I support the nomination of Ron Kirk to be our trade representative, despite my concerns with his position on trade policy. The tax matters that came to light during Mr. Kirk's vetting are not disqualifying, and because I am inclined to defer to any President on the choice of his closest advisers, I decided to support this nomination.

Having said that, I very much hope the President and his new trade representative will carefully review our current trade policies, and the impact they have had on the lives of millions of Americans. The trade policies handed over to this administration are as fundamentally flawed and damaging to our economy as the fiscal disaster and financial market crisis they inherited.

The trade policies of the last two decades, under both Republican and Democratic administrations, and supported by both Republican and Democratic controlled Congresses, have undermined environmental protections, food safety and public health protections, subverted our democratic institutions, and helped ship millions of family-supporting decent paying jobs overseas. They have greatly disadvantaged thousands of small businesses in my home State of Wisconsin, exposed consumers to health risks, and decimated communities. They have accelerated the very worst aspects of globalization, and have not done nearly enough to advance its potential benefits.

Mr. President, I wish Mr. Kirk all the best in his new position, and hope he and the President will take a fresh look at our trade policy. As I noted earlier, the mess they have inherited is as big a problem as any presented to the new administration, and it deserves our full attention.

Mr. CORNYN. Mr. President, I rise today to congratulate Mayor Ron Kirk on his nomination to serve as President Obama's U.S. trade representative. I am proud to support the confirmation of my fellow Texan.

Following World War II, the United States recognized a need to engage foreign nations and harmonize global eco-

nomie trade. President Kennedy recognized the value in placing a single chief U.S. trade negotiator in charge of these responsibilities. Later, President Ford elevated this important position to Cabinet rank. Since then, Congress has worked with many administrations to strengthen the ability of the U.S. trade representative to enforce existing trade agreements and open new markets for American workers, farmers, and consumers.

Mayor Kirk would lead the office of U.S. trade representative during the most challenging global financial crisis in history. The World Bank predicts that the global economy will shrink this year for the first time in more than six decades. People in many nations are suffering, and calls for new trade barriers grow louder. However, the U.S. trade representative must speak clearly and calmly against protectionism. He must show how open markets can renew global prosperity and lift millions in the developing world out of poverty.

I believe President Obama chose the right man for this job. As mayor of Dallas, Ron Kirk saw how open markets create new opportunities for our people. His trade missions to other nations encouraged new export growth. He engaged and recruited foreign investors thereby attracting new jobs into the city. And he recognized that the North American Free Trade Agreement would bring additional export-related jobs to the region. While many roundly criticized that accord, Mayor Kirk put it to work for the residents of Dallas. His leadership in the late 1990s helped reenergize the local economy. By 2007, the Dallas-Fort Worth area was exporting more than \$22 billion of goods and services to foreign markets.

Mayor Kirk's confirmation will fill an important void in President Obama's Cabinet. Mayor Kirk has demonstrated that he will warn against protectionism. This voice is needed in the Cabinet.

Congress recently voted to suspend the cross-border transportation pilot program occurring at the southern border of my State of Texas. This short-sighted cancellation was met immediately with news that the government of Mexico will retaliate by levying new tariffs on U.S. made products.

This unfortunate situation was avoidable had my colleagues heeded warnings of the retaliation that this policy change would incur upon our economy. These tariffs amount to a \$2.4 billion tax increase on American made products, and one economist estimates a loss of approximately 40,000 jobs.

At a time when Congress should be working to expand markets for our goods and create jobs in the United States, Congress is instead provoking the ire of the customers who buy American products and services. Our

workers and our consumers deserve a trade ambassador that will ensure economic policy is rooted in the best interest of the economy rather than political payback.

The President has three economic remedies available immediately. The pending trade agreements with Colombia, Panama, and Korea will create jobs in the United States. Consumers in these countries have a voracious appetite for American goods and services. My State of Texas is the top exporter to both Colombia and Panama and the second leading exporter to Korea. These destinations represented a \$9.5 billion market for Texas-made goods and services in 2008.

The hard work is over; these agreements have been negotiated and signed. I urge the administration to work with Congress and pass these beneficial accords.

Mayor Kirk is not the first choice of those who fail to recognize the benefits of free trade, but he's the first choice of the President—and a good choice for American exporters and consumers. The continuing global financial crisis demands a strong leader at USTR—and Mayor Kirk will fill this role well.

Mr. LEVIN. Mr. President, I will vote today to confirm Ronald Kirk to be U.S. Trade Representative. Although I have had serious concerns about our trade policies in the past, I am hopeful this administration will deal differently with trade.

I am reassured by some of the things that Mr. Kirk said at his confirmation hearing. For instance, Mr. Kirk said he will put an emphasis on workers and the environment, something that his predecessors failed to do. He also has acknowledged that the pending U.S.-South Korea trade deal negotiated by the Bush administration "... just simply isn't fair." This acknowledgement is important because the U.S.-South Korea trade agreement as currently written is harmful to the U.S. auto industry and its workers and should not be pursued in its present form.

When it comes to automotive trade between the United States and Korea, the numbers speak for themselves. While Americans buy more than 770,000 Korean vehicles each year, fewer than 6,300 American autos are sold in Korea. Despite two bilateral memoranda of understanding in 1995 and 1998, Korea continues to use ever-changing standards to restrict auto imports. There is nothing in the pending agreement that guarantees Korea will open its market to U.S. automobiles even though it commits the U.S. to further opening its already open market to Korean vehicles. We should open our auto market further only after U.S. autos have gained measurable access to the Korean market but that is not how the agreement is currently written.

At his confirmation hearing Mr. Kirk agreed the U.S.-South Korea free trade

agreement wasn't fair and said, "if we don't get that right we'll be prepared to step away from that." He also said, "I do not come to this job with 'deal fever.' We will not do trade deals just for the sake of doing deals."

I am pleased to hear these remarks because frankly some of the trade agreements the U.S. has entered into have not been in the best interests of the United States. The North American Free Trade Agreement, NAFTA, is a good example. NAFTA contained a number of unfair provisions that are discriminatory to Michigan workers and companies. For example, it restricted U.S.-made auto parts from entering Mexico for a decade and American used car exports for 25 years. Furthermore, the U.S. maintained small but stable trade deficits with Canada and Mexico in the 1980s and early 1990s. After NAFTA took effect in 1994, the U.S. developed large and rapidly growing deficits with Canada and Mexico. Since jobs are created by exports but displaced by imports, job losses occurred. The Economic Policy Institute found that total U.S. job displacement from NAFTA over 12 years was 1 million jobs.

Our trade policy should focus on opening markets in nations such as China, Japan, the European Union, and South Korea, where the most egregious trade barriers block the sale of U.S. goods and services and where we have the potential to export a larger quantity of goods and services. Mr. Kirk has promised to pry open foreign markets and enforce existing trade rules. I support his confirmation in the hope that he will.

I have not been satisfied with America's trade policy over the past 30 years. I believe in free trade, but I believe that with free trade we must have fair trade. The U.S. market is the most open in the world, but our policy has failed to insist that foreign markets be equally open to American products. We sorely need a new and just approach to trade.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAUCUS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CASEY). Without objection, it is so ordered.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged equally against both sides.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mrs. FEINSTEIN. I ask unanimous consent that the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. FEINSTEIN. Thank you, Mr. President. I understand that we are on the Kirk nomination; however, I ask unanimous consent to speak on the lands bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

COBURN AMENDMENTS

Mrs. FEINSTEIN. Mr. President, the Senate will have before it a series of amendments to the lands bill made by Senator COBURN. I rise to oppose specifically two of these amendments, amendment No. 683 and amendment No. 675, and I do so on behalf of myself and my friend and colleague from California, Senator BOXER.

These amendments would essentially throw out a legal settlement agreement concerning the restoration of the San Joaquin River. The settlement agreement ends 18 years of costly litigation. It is the product of 4 years of negotiation by the Bush administration, the State of California, dozens of water agencies, the Friant water users—it affects Friant, and Friant is a Division of the Central Valley Project and 15,000 farmers draw their water from this Division; it is big, it is important, it is critical—and by environmental and fishing groups.

This was a suit brought by the Natural Resources Defense Council against the Federal Government saying that what was happening at Friant Dam was not sufficient in the release of water to protect the salmon.

I wish to have printed in the RECORD at the end of my remarks a letter by the Governor of the State of California, Arnold Schwarzenegger, supporting the settlement agreement, and a letter from the U.S. Department of Justice supporting the settlement agreement. I also commend to my colleagues a Congressional Research Service Memorandum entitled "Institutional and Economic Context of the San Joaquin River Restoration Settlement," spelling out the institutional and economic context of this settlement agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mrs. FEINSTEIN. Thank you very much.

So we have broad and strong support for the settlement agreement. Now, the question is, Why do we have it? The reason we have it is because it is my understanding that the Government has lost the case, and the result is that with or without the settlement, a Federal court will require restoration of the San Joaquin River. According to all of the parties, the court could—and we believe would—order a huge release of water from Friant Dam, negatively impacting the 15,000 farms in the Friant Division of the Central Valley Project.

In contrast, the settlement agreement allows orderly restoration of the

river, with minimized impacts to irrigated agricultural and municipal water users. It provides negotiated flood control and other protections for private landowners. It represents a sensible and hard-fought consensus solution. I know, because these parties came to me and asked me if I would sit down with all of the parties and try to put together this settlement agreement, and we did, in fact, do this. It is virtually supported by all of these elements.

Also, the settlement would be far less costly to the taxpayers than returning to court and having the end result of having a Federal judge manage the river. That is what the alternative is. Here is why: The settlement provides almost \$400 million in non-Federal funds, so what would have had to have been funded by the Federal taxpayers will be lowered. Effectively, the costs are lowered to Federal taxpayers. The affected water districts have agreed to help fund the settlement with approximately \$200 million. The State of California will provide another \$200 million. If the Coburn amendment is successful and this is dropped from the bill, the Federal Government will have to pay an additional \$400 million and face the fact that the judge could well order a huge release of water, not staggered to any particular time, in no orderly manner, which could have tremendous adverse impacts on the farming community.

The settlement also minimizes economic costs to the region by providing water supply certainty for users, but without the settlement water users in Friant could face more severe water losses and potentially millions of dollars of lost income and lost jobs. As I say, this is 15,000 separate farming entities, so that is unacceptable.

Critics have argued that this provision is wasteful spending and that it would cost millions of dollars for every fish restored. But the facts prove them wrong. To get the number the critics use, they assume that only 500 fish will ever be restored; that is, salmon, instead of the 30,000 salmon that will eventually return to the river each year as a self-sustaining fishery. They ignore all the other benefits of the settlement.

According to the Congressional Research Service analysis I have referenced, it is "misleading" to disregard the "full array of likely project costs and benefits," including "the values that Californians and U.S. citizens place on improvements in environmental quality and restored runs of salmon."

The bottom line: The settlement offers the best possible solution to a longstanding water fight in my State. I do not believe there is anything wasteful about it. Remember, this suit has gone on for 18 years. I have talked with every one of the parties. They have all

come together asking for a settlement agreement, including the Federal Government, the State of California, and actually the environmental group that sued, the NRDC, because they believe that if left to the judge, the action might be very adverse in terms of large amounts of water, rather than being staggered and done in a more sensible way, would be detrimental to the Friant farmers as well as, quite possibly, to the fish.

The other problematic amendment offered by Senator COBURN is amendment No. 675 which would remove the Government's eminent domain authority for the public lands omnibus bill, including the San Joaquin River settlement title of the lands bill.

Now, to be candid, none of us like the use of eminent domain. In the 9 years I was mayor, I refused to use eminent domain in San Francisco and, in fact, never did. But Senator COBURN's amendment ignores the basic reality that the use of eminent domain is sometimes necessary to carry out western water projects that are vital for an entire region because the water comes from one place, the State is vast, and it has to be moved to other places, and the public benefit of moving that water is enormous in the seventh largest economy on Earth.

These water projects need to have the use of eminent domain as a last resort for building water projects and flood channels on a willing seller-willing buyer basis. Otherwise, the Government clearly is not going to be able to build water conduits, water projects, and flood control elements where they are most needed. That may be different in small States, but in huge States such as California, where the water comes primarily either from the very north of the State, the Sierra Nevada mountain range, or the Colorado River—where we are being weaned off of the Colorado River, and have an agreement to dramatically cut our take of water from the Colorado River—we have to have the conveyances to move the water around the State.

Private landowners also receive the benefit of upgraded flood protections and bypasses around key diversion points, so that fish are not diverted along with irrigation supplies. This is a very sensitive, very problematic area. It has taken a lot of work to know how to do this. The Federal Government could not build these flood and bypass measures to benefit third party landowners without the ability to acquire land through eminent domain. That is just a fact.

There is a great need for water projects in my State. If we don't move, I believe California will end up a desert State. We are faced with high wildfire potential, with warming climates, and reduced water. We are in the third year of a drought.

Mr. President, you might be interested in knowing that for the big Central Valley of California, which makes California the No. 1 agricultural producer in America, most of that valley's water allocation from the Central Valley Project for this year is zero, which means fallowing, which means cutting out trees and crops. So we are in a very sensitive situation.

I urge the Senate to vote no on these Coburn amendments. I think it is very easy to come in and second-guess a situation and not know anything about 18 years of litigation and the fact that the Government is going to lose the case and having to try to work out a settlement, which gets the best for all of the parties concerned. I believe we have done it, and it has taken hours and hours of negotiation.

This has been approved by this body once. To remove the bill and the eminent domain authority from the lands bill would be tragic. Again, the Federal Government would have to pick up the costs the State of California is willing to pay under this settlement—\$200 million—and the cost these water contractors are willing to provide—\$200 million—and do the whole job itself, which is going to cost an additional \$400 million.

These amendments are in no way, shape, or form, cost effective, and they will hamstring California's effort to solve what is an egregious problem, and that is an increasingly drying State, which is in drought almost on a perpetual basis and is trying to solve its problems.

On behalf of Senator BOXER and I, I urge a "no" vote on both of these amendments.

Mr. President, I ask unanimous consent that my time not count against the time allocated for the Kirk nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. FEINSTEIN. I thank the Chair.

EXHIBIT 1

STATE CAPITOL,

Sacramento, CA, May 5, 2008.

HON. DIANNE FEINSTEIN,

U.S. Senate, Hart Senate Office Building, Washington, DC.

DEAR SENATOR FEINSTEIN: As Congress again considers legislation needed to implement the Settlement Agreement reached to restore the San Joaquin River, I write to reiterate my support of your leadership in this matter and to urge Congress to act now to take advantage of this historic opportunity. Restoring the San Joaquin River will provide vital benefits to the environment, to the people of the San Joaquin Valley, and to all Californians. I remain confident that this settlement can be implemented to provide these important benefits while minimizing impacts to the Friant water users and preserving the regional economy.

The state of California has already committed substantial funding to support the settlement effort. In November 2006, California voters approved Proposition 84, the Water Quality, Safety and Supply, Flood Control, Natural Resource Protection Bond,

which earmarks \$100 million to support San Joaquin River restoration. Other bond funds are available to provide flood management improvements and to support regional water supply reliability projects. Moreover, I have directed my Administration to pursue all available opportunities to contribute to the dual restoration and water management goals of the Settlement Agreement.

Thank you again for your leadership to secure the passage of the necessary legislation to advance the restoration of the San Joaquin River. Please know that my Administration remains committed to this important effort and we look forward to continuing our work with the federal government on this significant restoration program.

Sincerely,

ARNOLD SCHWARZENEGGER,

Governor.

DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AFFAIRS,
Washington, DC, November 7, 2007.

Hon. NICK J. RAHALL II,

Chairman, Committee on Natural Resources, House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: The Department of Justice (DOJ) strongly supports H.R. 4074, the San Joaquin River Restoration Settlement Act (originally introduced by Congressman Radanovich as H.R. 24). This bill provides necessary authorization and funding to carry out the terms of the San Joaquin River Settlement. The purpose of the settlement is to fully restore the San Joaquin River and to mitigate the impact of water losses on water districts in the Friant Division of the Central Valley Project who have long-term contractual rights and obligations with the Bureau of Reclamation. This settlement not only resolves litigation over the operation of the Bureau of Reclamation's Friant Dam east of Fresno, California, it provides a framework for the restoration of the San Joaquin River and its fishery in a way that protects the sustainability of farming in the Friant Division.

On October 23, 2006, the United States District Court for the Eastern District of California approved this settlement, ending eighteen years of litigation, *Natural Resources Defense Council, et al. v. Kirk Rodgers, et al.* The Administration previously announced its support for legislation implementing this settlement in testimony before your Committee on March 1, 2007, by Jason Peltier, Principal Deputy Assistant Secretary for Water and Science for the U.S. Department of the Interior. The State of California has pledged its support for the Settlement in the amount of \$200 million.

Enactment of H.R. 4074 is essential to the implementation of this historic, court-approved settlement. Without this legislation, the Secretary of the Interior lacks sufficient authority to implement the actions in the settlement. Implementation of the San Joaquin River Settlement will avoid the high cost and uncertainty that will result from a return to litigation if the settlement is not implemented.

Thank you for the consideration of our views. Please do not hesitate to contact this office if we can be of further assistance in this matter. The Office of Management and Budget has advised that there is no objection to the submission of this letter from the standpoint of the Administration's program.

Sincerely,

BRIAN A. BENCZKOWSKI,

Principal Deputy Assistant,

Attorney General.

Mrs. FEINSTEIN. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time during the quorum call be charged equally.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BARRASSO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BARRASSO. I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE BUDGET

Mr. BARRASSO. Mr. President, today I wish to talk about this administration's proposed budget. I believe the President's proposed budget fails the American people. It fails small businesses, and it fails our economic future.

To me, this budget spends too much on bailouts and on wasteful Government programs. It raises the cost of energy, and it costs American jobs.

The spending in this budget is so massive that independent estimates say they are going to need another quarter million people—250,000 more Federal Washington bureaucratic workers—just to spend all the money.

Middle-class families and small businesses all across this country are taking notice. These are the people who are making the financial sacrifices every day to pay for these huge Government expenses. Yet Washington continues to spend trillions in taxpayers' dollars on bailouts and big Government programs.

This budget spends too much, it taxes too much, and it borrows too much.

This budget contains the largest tax increase in the history of our country. We need to help American industry promote growth and create jobs. I will tell you that raising taxes makes matters worse, especially in an economic downturn.

The President's plan takes money from small businesses and families in my home State of Wyoming. The President's budget will devastate the small businesses of America. The budget even limits itemized deductions for people who give money to charities. This effectively raises our Nation's top tax rate to 42 percent.

Our Treasury Secretary Geithner says the proposed changes in the tax rates would apply to only 2 or 3 percent of small business owners. But the reality is, those tax increases are going to hit hardest those small businesses which create the most jobs in our Nation.

Small businesses created a majority of new jobs in America over the last 10

years. Small businesses are responsible for 70 percent of the job creation in this Nation.

These jobs are being created by businesses similar to those that are now threatened by the administration's proposed tax increases. When we consider that the administration talks about a goal of job creation, why is this administration proposing a budget with costly tax hikes on those very engines that create the jobs in this Nation?

They say: We are going to delay the tax increases until 2010. That doesn't make those tax increases hurt any less. Small business owners plan ahead. They plan well in advance. They will not hire someone today if they know they are going to be forced to lay that person off in less than 2 years.

I want to talk a little bit about electric bills.

Electric bills and the cost of everything manufactured in America is going to skyrocket under this proposed budget. Under the Obama budget, gasoline prices are likely to go up as much as 145 percent.

The President from Duke Energy says the plan could increase energy prices for American households by as much as 40 percent.

People need to know under this plan, anything that emits carbon is going to be more expensive. This means the plastics we use, the cars we drive, the homes we heat—they are all going to be more expensive. Every time you flip the light switch, you are going to be paying much more.

The very building blocks of our Nation will be dramatically taxed. American families will experience a dramatic shift down the economic ladder.

Folks who are struggling to get by in my home State of Wyoming and all across America will fall through the cracks in this budget. It is wrong. It is time this administration leveled with the American people about the hidden details in this budget plan.

The President is proposing we spend scarce resources transferring income rather than promoting growth.

According to the President's climate proposal, taxes on carbon are projected to total over \$78 billion in 2012 and at least \$646 billion over the next 10 years. Of that money, he proposes to spend \$1 out of every \$5—only \$1 of every \$5—on clean energy technologies. The other \$4 of every \$5 are going to go to bigger Government programs.

According to the President's budget document, his climate change proposal is more expensive than the \$646 billion he has suggested. He is hiding the true cost to the economy of his cap-and-trade scheme.

The President is also abandoning what I call 24-hour power. Under his cap-and-trade scheme, that is power that runs the factories and American homes 24 hours a day, 7 days a week. It

is the power we need when renewable energy is not there—when the Sun is not shining or the wind is not blowing. We need all the energy. We need the coal. We need the nuclear. We need the natural gas. We need the hydropower. All are proven and affordable energy solutions. Those are the kinds of things that will help keep electric bills low.

If you eliminate these, you are automatically taxing all Americans with high energy bills—that is what you are doing—and that means making the cost of running a business more expensive. That means heating homes all across America will be much more expensive.

They have done some estimates, and they have estimated that the President's new energy tax will cost every household in America an additional \$250—not each year but \$250 each month.

Frankly, that is a tax increase that most American people cannot afford, and, frankly, I don't understand why the President is asking them to pay it.

In reality, the President's cap-and-trade scheme is another bailout, a trillion-dollar climate bailout.

This budget spends too much, it taxes too much, and it borrows too much.

This budget costs too much in dollars, and it costs too much in jobs. This budget hurts small businesses, and it hurts American families alike.

This budget provides for the largest tax increase in history to fund a trillion-dollar climate bailout. It is unfortunate that we are aiming and targeting small businesses because they are the very foundation of job creation in this country. It is unfortunate that this is the starting point of the debate of how to get our economy moving again.

The American people expect better. The American people demand better. The American people deserve better.

Mr. President, I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DORGAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DORGAN. Mr. President, how much time remains on the Democratic side on the nomination for USTR?

The PRESIDING OFFICER. There remains 16 minutes.

Mr. DORGAN. Mr. President, I intend to speak for 10 of the 16 minutes. I will reserve the 6 minutes for others.

Mr. President, we are dealing with the nomination of Mr. Kirk to be trade ambassador, the head of the trade office in our Government. I intend to support his nomination, but I wanted to come to the floor to take the opportunity to say that ambassador after

ambassador after ambassador has left that trade office with large and growing trade deficits that I think weaken and undermine our country. And I want to make certain Mr. Kirk and others know what I think is the urgency to address these significant trade deficits.

We are a country that is consuming 3 percent more than we produce. No country can do that for a very long period of time. We are buying more from abroad than we are selling abroad—\$2 billion every single day. We import \$2 billion every day more than we export.

We are facing a very severe financial crisis in this country now. At least one of the causes of that crisis, which is never discussed by anybody, is an unbelievable trade deficit.

Our merchandise trade deficit last year was \$800 billion. You can take a look at what has happened in recent years. These red lines represent the deep hole of trade deficits. That is money we owe to other countries because we are buying more from them than we are selling to them.

Now, I am for trade, and plenty of it, but I insist it be fair, and I also believe there are mutual responsibilities of trading partners. The trade deficit, for example—in the \$800 billion merchandise trade deficit we have—with China is \$256 billion. Think of that: \$256 billion in a year. And we have very serious trade problems with China with respect to the issue of counterfeiting and piracy.

Part of what we are producing in this country these days is intellectual property—computer programming and software, various types of music and movies, and all kinds of inventions. Our intellectual property is being pirated and counterfeited on street corners all across China. And it is not as if China doesn't know how to deal with that. When China held the Olympics, they knew how to deal with their logo. There was an Olympic logo for the Chinese Olympics which belonged to the Government of China. All of a sudden, that had value, and they decided to protect that. People started showing up on street corners in China selling mugs and banners with the Chinese Olympic logo, and they shut them down just like that. They stopped it just like that because that belonged to the Government of China. Well, what about all the intellectual property that is pirated and counterfeited and reverse-engineered in China that is sold on their street corners in violation of everything, which helps result in this \$256 billion trade deficit with China? That is something our U.S. trade ambassador has to confront.

Let me give an example—and this is just one; I could give a dozen—of part of our problem. We have a trade deficit with South Korea. Ninety-eight percent of the cars on the streets of South Korea are made in South Korea because that is what they want. They do

not want foreign cars in South Korea. Our country signed two separate trade deals with Korea in the 1990s, which supposedly meant that Korea would open up their auto market. Those agreements are apparently not worth the paper they were written on. So Korea sent us 770,000 vehicles last year—770,000 Korean-made vehicles. Those are Korean jobs—vehicles made in Korea, sold in the United States. Yet we are able to sell 6,000 American vehicles in Korea. Now, think of that: 770,000 cars coming our way, and we get to sell 6,000 there. Why? Because the Korean Government doesn't want American cars on their roads. They want one-way trade, which I think results in unfairness to our country, lack of jobs in our country, and a growing trade deficit in our country that undermines our economy.

The same is true with respect to China. For example, we negotiated a bilateral trade agreement with China. Only much later did we learn the ingredients of that agreement. China is now creating a significant automobile export industry, and we will begin seeing Chinese cars on American streets in the not too distant future. They are gearing up for a very robust automobile export industry. Here is what our country agreed with in a bilateral agreement with China. We agreed that any American cars sold in China after a phase-in could have a 25-percent tariff imposed by the Chinese. Any Chinese cars sold in America would have a 2½-percent tariff. Think of the absurdity of that. A country with which we have a \$200 billion trade deficit—last year, \$260 billion—and we said: It is okay for you to impose a tariff that is 10 times higher on U.S.-made automobiles sold in your country than we will impose on your automobiles sold in our country. That is the kind of ignorance, in my judgment, and unfair trade provisions that result in our having an \$800 billion merchandise trade deficit.

Now, Warren Buffett has said—and Warren Buffett is a bright guy, and I like him, I have known him for a long while—this is unsustainable. You can't run these kinds of trade deficits year after year. It is unsustainable. Why? Because when we buy \$800 billion more from other countries than we sell to them, it means they end up with our money or a debt, and that debt will be repaid with a lower standard of living in our country.

My point is that the financial crisis in this country is caused by a lot of things, at least one of which is an unbelievable growing trade deficit that has gone on and festered for a long while, and no administration has done much about it. Oh, the last administration, I think the last time they took action was against Europe, and they announced with big fanfare that they were going to impose tariffs on Roque-

fort cheese, truffles, and goose liver. That will scare the devil out of some country—Roquefort cheese, truffles, and goose liver. We not only negotiate bad trade agreements, but then we fail to enforce them. And when we do enforce them, we don't enforce them with any vigor.

Mr. President, I know there has been discussion in the last couple of days about trade with Mexico. Mexico had a \$66 billion surplus—or we a deficit with them—last year. We have had a nearly ½ trillion dollar trade deficit with Mexico in the last 10 years alone, and Mexico is accusing us of unfair trade? I am sorry. We have a ½ trillion dollar deficit with Mexico in trade relationship in 10 years, and they believe we are unfair?

The recent action by Mexico against the United States is due to the fact that a large bipartisan majority of both Chambers of Congress objected to a Mexican long-haul trucking pilot program that the Bush Administration wanted to establish. The inspector general of the Transportation Department had said that in Mexico there is no central repository of drivers' records, no central repository of accident reports, and no central repository of vehicle inspections. We don't have an equivalent system. Well, there is nothing in a trade agreement that requires us to diminish safety on our roads. When we have equivalent systems or when we have conditions in both countries that are equivalent, you will hear no complaint from me about any pilot program of this type, but that is not the case today.

Just as an aside, at a hearing I held last year, we were told that one of the rules for the cross-border trucking program was that the drivers who were coming in with the big trucks were going to be required to be fluent in English. One way they would determine whether they were fluent in English is they would hold up a highway sign, such as a stop sign, to the driver and ask him: What is this sign? And if the driver replied, "Alto," which means "stop" in Spanish, they would declare that driver fluent in English. Look, this made no sense at all. Let's make sure we protect the safety on America's roads. I have no problem with cross-border trucking as soon as we have equivalent standards. That is not now the case.

But my larger point with Mexico, as with other countries, is that we have a large and growing trade deficit—\$66 billion last year with Mexico; ½ trillion dollars in 10 years. This country can't continue that. We have to have fair trade with other countries and fair trade agreements. And when we do, it seems to me we should be aggressive in trying to sell worldwide. We are good at this. We can prevail. We don't have to have an \$800 billion deficit that threatens our country's economy. No

one talks about it much, but the fact is, this enormous deficit undermines the strength of the American economy. It sucks jobs out of our country and moves them overseas in search of cheap labor. We can do better than that.

I intend to support Ron Kirk. I think he will be a good choice. However, I hope this trade ambassador understands that while our country stands for trade and our country stands for open markets, we ought to, for a change, also stand for fair trade agreements and we ought to stand for balance in trade and get rid of an \$800 billion-a-year deficit in which we end up owing other countries a substantial amount of our future. It makes no sense to me.

So I am for trade, and plenty of it, but let's try to get it right for a change, to strengthen this country and put this country on the right track.

Mr. President, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. COBURN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. Mr. President, I ask unanimous consent to yield back all time on the Kirk nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. Mr. President, I ask unanimous consent that H.R. 146 be the pending business.

LEGISLATIVE SESSION

REVOLUTIONARY WAR AND WAR OF 1812 BATTLEFIELD PROTECTION ACT

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of H.R. 146, which the clerk will report by title.

The legislative clerk read as follows:

A bill (H.R. 146) to establish a battlefield acquisition grant program for the acquisition and protection of nationally significant battlefields and associated sites of the Revolutionary War and the War of 1812, and for other purposes.

The Senate resumed consideration of the bill.

Pending:

Bingaman amendment No. 684, in the nature of a substitute;

Coburn amendment No. 680 to amendment No. 684, to ensure that the general public has full access to our national parks and to promote the health and safety of all visitors and employees of the National Park Service;

Coburn amendment No. 679 to amendment No. 684, to provide for the future energy needs of the United States and eliminate restrictions on the development of renewable energy;

and Coburn amendment No. 675 to amendment No. 684, to prohibit the use of eminent domain and to ensure that no American has their property forcibly taken from them by authorities granted under this Act.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. Mr. President, first of all, I ask unanimous consent to have printed in the RECORD the statement of the Secretary of the Interior, Ken Salazar, given yesterday before the Senate Committee on Energy and Natural Resources. I think Members will find significant support for my amendment on alternative energy in his statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

STATEMENT OF KEN SALAZAR, SECRETARY OF THE INTERIOR, BEFORE THE SENATE COMMITTEE ON ENERGY AND NATURAL RESOURCES ON ENERGY DEVELOPMENT ON THE PUBLIC LANDS AND OUTER CONTINENTAL SHELF

Thank you, Chairman Bingaman, Senator Murkowski, and Members of the Committee, for giving me the opportunity to come before you today to discuss energy development on public lands and the Outer Continental Shelf (OCS) under the Department of the Interior's jurisdiction. This is my first hearing before you since my confirmation as Secretary of the Interior and it is an honor to be here.

President Obama has pledged to work with you to develop a new energy strategy for the country. His New Energy for America plan will create a clean energy-based economy that promotes investment and innovation here at home, generating millions of new jobs. It will ensure energy security by reducing our dependence on foreign oil, increasing efficiency, and making responsible use of our domestic resources. Finally, it will reduce greenhouse gas emissions.

During his visit to the Department for our 160th anniversary celebration two weeks ago, the President spoke about the Department's major role in helping to create this new, secure, reliable and clean energy future. The vast landholdings and management jurisdiction of the Department's bureaus, encompassing 20 percent of the land mass of the United States and 1.7 billion acres of the Outer Continental Shelf, are key to realizing this vision through the responsible development of these resources.

These lands have some of the highest renewable energy potential in the nation. The Bureau of Land Management has identified a total of approximately 20.6 million acres of public land with wind energy potential in the 11 western states and approximately 29.5 million acres with solar energy potential in the six southwestern states. There are also over 140 million acres of public land in western states and Alaska with geothermal resource potential.

There is also significant wind and wave potential in our offshore waters. The National Renewable Energy Lab has identified more than 1,000 gigawatts of wind potential off the Atlantic coast, and more than 900 gigawatts of wind potential off the Pacific Coast.

Renewable energy companies are looking to partner with the government to develop this renewable energy potential. We should responsibly facilitate this development. Unfortunately, today, in BLM southwestern states, there is a backlog of over 200 solar energy applications. In addition, there are some 20 proposed wind development projects

on BLM lands in the west. These projects would create engineering and construction jobs.

To help focus the Department of the Interior on the importance of renewable energy development, last Wednesday, March 11, I issued my first Secretarial Order. The order makes facilitating the production, development, and delivery of renewable energy top priorities for the Department. Of course, this would be accomplished in ways that also protect our natural heritage, wildlife, and land and water resources.

The order also establishes an energy and climate change task force within the Department, drawing from the leadership of each of the bureaus. The task force will be responsible for, among other things, quantifying the potential contributions of renewable energy resources on our public lands and the OCS and identifying and prioritizing specific "zones" on our public lands where the Department can facilitate a rapid and responsible move to significantly increased production of renewable energy from solar, wind, geothermal, incremental or small hydroelectric power on existing structures, and biomass sources. The task force will prioritize the permitting and appropriate environmental review of transmission rights-of-way applications that are necessary to deliver renewable energy generation to consumers, and will work to resolve obstacles to renewable energy permitting, siting, development, and production without compromising environmental values.

Accomplishing these goals may require new policies or practices or the revision of existing policies or practices, including possible revision of the Programmatic Environmental Impact Statements (PEISs) for wind and geothermal energy development and the West-Wide Corridors PEIS that BLM has completed, as well as their Records of Decision. The Department of Interior will work with relevant agencies to explore these options.

We will also, as I have said before, finalize the regulations for offshore renewable development authorized by section 388 of the Energy Policy Act of 2005, which gave the Secretary of the Interior authority to provide access to the OCS for alternative energy and alternate use projects. This rulemaking was proposed but never finalized by the previous Administration.

For these renewable energy zones to succeed, we will need to work closely with other agencies, states, Tribes and interested communities to determine what electric transmission infrastructure and transmission corridors are needed and appropriate to deliver these renewable resources to major population centers. We must, in effect, create a national electrical superhighway system to move these resources from the places they are generated to where they are consumed. We will assign a high priority to completing the permitting and appropriate environmental review of transmission rights-of-way applications that are necessary to accomplish this task.

Developing these renewable resources requires a balanced and mindful approach that addresses the impacts of development on wildlife, water resources and other interests under the Department's management jurisdiction. I recognize this responsibility, and it is not a charge I take lightly.

At the same time, we must recognize that we will likely be dependent on conventional sources—oil, gas, and coal—for a significant portion of our energy for many years to come. Therefore it is important that the Department continue to responsibly develop these energy resources on public lands.

In the past 7 weeks, the Department has held seven major oil and gas lease sales onshore, netting more than \$33 million for taxpayers. And tomorrow I will be in New Orleans for a lease sale covering approximately 34.6 million offshore acres in the Central Gulf of Mexico. This sale includes 4.2 million acres in the 181 South Area, opened as a result of the Gulf of Mexico Energy Security Act. Continuing to develop these assets, through an orderly process and based on sound science, adds important resources to our domestic energy production.

Based on this approach, I announced last week that I would be hosting four regional public meetings next month in order to gather a broad range of viewpoints from all parties interested in energy development on the OCS. In addition, I directed the Minerals Management Service and the U.S. Geological Survey to assemble a report on our offshore oil and gas resources and the potential for renewable energy resources, including wind, wave, and tidal energy. The results of that report will be presented and discussed with the public.

The meetings will be held in Atlantic City, New Jersey, New Orleans, Louisiana, Anchorage, Alaska, and San Francisco, California, during the first two weeks in April.

These meetings are an integral part of our strategy for developing a new, comprehensive, and environmentally appropriate energy development plan for the OCS. I have also extended the comment period on the previous Administration's proposed 5-year Plan for development by 180 days. We will use the information gathered at these regional meetings to help us develop the new 5-year plan on energy development on the OCS.

Similarly, again based on sound science, policy and public input, we will move forward with a second round of research, development, and demonstration leases for oil shale in Colorado and Utah. While we need to move aggressively with these technologies, these leases will help answer the critical questions about oil shale, including about the viability of emerging technologies on a commercial scale, how much water and power would be required, and what impact commercial development would have on land, water, wildlife, communities and on addressing global climate change.

We are also proceeding with development onshore, where appropriate, on our public lands. As I noted above, the responsible development of our oil, gas and coal resources help us reduce our dependence on foreign oil, but this development must be done in a thoughtful and balanced way, and in a way that allows us to protect our signature landscapes, natural resources, wildlife, and cultural resources.

We also need to ensure that this development results in a fair return to the public that owns these federal minerals. That's why the President's 2010 Budget includes several proposals to improve this return by closing loopholes, charging appropriate fees, and reforming how royalties are set. Of course, I'll be happy to discuss these in more detail after the Administration's full budget request is released in the coming weeks.

Implementation of the President's energy plan will ultimately focus the nation on development of a new green economy and move us toward energy independence, and I and my team are working hard to put that plan into place.

Mr. Chairman, I know you and the Committee, along with the Majority Leader and others in Congress, are working hard on

these issues. I believe we are being presented today with an historic opportunity to enhance our economy, our environment, and our national security. Too much is at stake for us to miss this opportunity.

Thank you, Mr. Chairman and Members of the Committee. I am happy to answer any questions that you may have.

Mr. COBURN. Mr. President, we are putting the cart before the horse, because one of the things the Secretary spoke about yesterday is that we have to figure out how to transfer all this renewable energy from Federal lands. What this bill and what a previous amendment that I have offered and that is now pending would do is to say this bill is going to offset that. We are not going to know where we need to send it or how we need to send it. With this bill, we are going to deny the options to the Secretary of the Interior in terms of transmission lines with geothermal, with solar, and with wind.

Mr. President, I also ask unanimous consent to have printed in the RECORD the opening statement of the chairman of the Energy and Natural Resources Committee, Senator BINGAMAN, because I am very pleased with his statements on oil and gas and renewables, and it again would support the amendment I have offered that we should not preclude renewables from this bill.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ENERGY PRODUCTION ON FEDERAL LANDS

I want to welcome my colleagues, our witnesses and especially Secretary Salazar to today's hearing on the important topic of energy development on public lands and the Outer Continental Shelf. Our Nation has abundant energy resources, a good portion of which are found on our onshore public lands and the Outer Continental Shelf. These resources are owned by all of the people of the United States, and their management is entrusted to the Federal Government.

That's why we're particularly pleased that our new Secretary of the Interior is here today to tell us about his vision for the development of our energy resources on public lands, both onshore and offshore. Secretary Salazar has important decisions to make—decisions that may prove essential to our Nation's energy security and economic well-being—but also decisions that will impact the landscape and our environment for generations to come.

I look forward to hearing more about the Administration's plans in this regard. I hope that Secretary Salazar can share with us his vision for how we can determine the best places for energy development on the OCS, and how we can move forward to get more energy production—both oil and gas and renewables—in a safe and environmentally sound manner from the Outer Continental Shelf.

I know that the Secretary is also interested in our onshore oil and gas leasing program. We recognize the contribution of that program to our energy supply. I hope that under his leadership, the BLM can resolve any resource conflicts up front, so that this important program can run smoothly and efficiently. To this end, it is also important that the inspection and enforcement program at the BLM be well-funded.

Finally, this Administration is clearly committed to renewable energy. I know Secretary Salazar is. The Department of the Interior and the Forest Service have a key role in the siting of generation and transmission facilities for wind and solar energy. I know that Secretary Salazar has already undertaken initiatives to bring about more renewable energy production on Federal lands.—Jeff Bingaman, Chairman, Committee on Energy and Natural Resources.

AMENDMENT NO. 682 TO AMENDMENT NO. 684

(Purpose: To protect scientists and visitors to federal lands from unfair penalties for collecting insignificant rocks)

Mr. COBURN. Mr. President, I ask unanimous consent that the pending amendment be set aside and amendment No. 682 be brought up and considered.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 682 to amendment No. 684.

Mr. COBURN. Mr. President, I ask unanimous consent that the amendment be considered as read.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in today's RECORD under "Text of Amendments.")

Mr. COBURN. Mr. President, this is a very simple amendment. We do have a problem with thieves stealing significant fossil remains from public lands, but the way the bill is written currently is that we are going to hit a fly with a sledgehammer. What we are going to do is put Scout leaders and troops, graduate students, and the regular public in line for tremendously harsh penalties if they inadvertently or inconsequentially pick up a small rock that might have a fossil.

All this amendment does is it tells the Secretary that "they shall allow," without penalty, the insignificant capture of these small items—not to resell, not for going on the black market, but actually for educational purposes—by Scout troops, graduate students, college classes, and the like.

What we know from the history is that there have been significant difficulties in terms of the lack of law enforcement on public lands. This goes back to one of our other amendments we talked about earlier, which is not only is there a backlog in the repair and care of our public lands, but we don't have the money to enforce and protect the very assets which we think are paleontological assets, which we know are valuable both for history and science. We haven't had the forces capable of even enforcing what is already illegal. It is already illegal to steal those items from public land.

So what this amendment does is just change the wording from "may" to "shall"; that the Secretary "shall allow casual collecting" that will not harm any of our public lands and will

not put the truly innocent—simply inquiring minds—at risk of the harsh penalties of this segment of the bill. It is as simple as that. All it does is lighten up on the inadvertent and the non-inappropriate looking for small fossils and small rocks that may not even contain fossils. We have already had testimony that the majority of the people who have been arrested under the illegal statute have not been those who have been in the black market. It has been Scout leaders and graduate students and college professors who have actually been out there.

So I think it is a commonsense amendment, and I hope my colleagues will consider it and adopt it so that we don't overshoot on what is intended to be a solution to a very serious problem.

I would also like to spend a moment in rebutting some of the words of the Senator from California. I have not yet offered, but intend to offer, one amendment that will in fact strike some earmarks from this bill. The San Joaquin River has, no question, been engaged in a lawsuit. But if you go back to 1924 and see what the Federal Government said about the salmon run over this area, it was already in decline. As a matter of fact, it was in a decline to a level very close to what we have seen today.

What we have had is a lawsuit that has reached a settlement that now we are to pay \$1 billion with the specific goal not of 100,000 salmon, not of 30,000 salmon, but the goal in the settlement is 500 salmon. The likelihood of achieving that, for \$1 billion, first of all, is unlikely. The ultimate outside costs are going to be tremendous. What are the costs? Through this lawsuit, we are going to put at jeopardy, put at risk, \$20 billion worth of economic activity in one of the most fertile areas of California.

The Congressman who represents 85 percent of that district and his constituents are adamantly opposed to this settlement because they know what it is going to do in terms of the water resource for that agricultural community. Not everyone supports this settlement, as the Senator from California said, certainly not the Congressman representing the district.

The other claim Senator FEINSTEIN made is it would be less costly than the alternative litigation. If you use the two analyses done in the late 1990s regarding the economic impacts of water supply reductions, estimates paint the total costs of this settlement to the community at over \$10 billion; \$10 billion is the economic loss to be associated with this settlement.

At a time of economic difficulty, the last thing we need to be doing is cutting out another \$10 billion of economic productivity.

AMENDMENT NO. 677 TO AMENDMENT NO. 684

I ask the pending amendment be set aside and amendment No. 677 be called up.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will report.

The legislative clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 677 to amendment No. 684.

The amendment reads as follows:

(Purpose: To require Federal agencies to determine on an annual basis the quantity of land that is owned by each Federal agency and the cost to taxpayers of the ownership of the land)

At the appropriate place, insert the following:

SEC. ____ . ANNUAL REPORT RELATING TO LAND OWNED BY FEDERAL GOVERNMENT.

(a) ANNUAL REPORT.—

(1) IN GENERAL.—Subject to paragraph (2), not later than May 15, 2009, and annually thereafter, the Director of the Office of Management and Budget (referred to in this section as the “Director”) shall ensure that a report that contains the information described in subsection (b) is posted on a publicly available website.

(2) EXTENSION RELATING TO CERTAIN SEGMENT OF REPORT.—With respect to the date on which the first annual report is required to be posted under paragraph (1), if the Director determines that an additional period of time is required to gather the information required under subsection (b)(3)(B), the Director may—

(A) as of the date described in paragraph (1), post each segment of information required under paragraphs (1), (2), and (3)(A) of subsection (b); and

(B) as of May 15, 2010, post the segment of information required under subsection (b)(3)(B).

(b) REQUIRED INFORMATION.—Except as provided in subsection (c), an annual report described in subsection (a) shall contain, for the period covered by the report—

(1) a description of the total quantity of—

(A) land located within the jurisdiction of the United States, to be expressed in acres;

(B) the land described in subparagraph (A) that is owned by the Federal Government, to be expressed—

(i) in acres; and

(ii) as a percentage of the quantity described in subparagraph (A); and

(C) the land described in subparagraph (B) that is located in each State, to be expressed, with respect to each State—

(i) in acres; and

(ii) as a percentage of the quantity described in subparagraph (B);

(2) a description of the total annual cost to the Federal Government for maintaining all parcels of administrative land and all administrative buildings or structures under the jurisdiction of each Federal agency; and

(3) a list and detailed summary of—

(A) with respect to each Federal agency—

(i) the number of unused or vacant assets;

(ii) the replacement value for each unused or vacant asset;

(iii) the total operating costs for each unused or vacant asset; and

(iv) the length of time that each type of asset described in clause (i) has been unused or vacant, organized in categories comprised of periods of—

(I) not more than 1 year;

(II) not less than 1, but not more than 2, years; and

(III) not less than 2 years; and

(B) the estimated costs to the Federal Government of the maintenance backlog of each Federal agency, to be—

(i) organized in categories comprised of buildings and structures; and

(ii) expressed as an aggregate cost.

(c) EXCLUSIONS.—Notwithstanding subsection (b), the Director shall exclude from an annual report required under subsection (a) any information that the Director determines would threaten national security.

(d) USE OF EXISTING ANNUAL REPORTS.—An annual report required under subsection (a) may be comprised of any annual report relating to the management of Federal real property that is published by a Federal agency.

Mr. COBURN. Mr. President, this is a simple amendment, too. It is a good housekeeping amendment. What this amendment does is requires the Federal Government every year to detail to the people of this country the amount of the property that the Federal Government owns and the cost of that land ownership to taxpayers. Do you realize right now we have 21,000 buildings that are owned by the Federal Government sitting empty? We have 40 million square feet of excess space that is not being used, just by the Department of Energy alone.

The Federal Government currently does not disclose these assets. As a matter of fact, they do not even know what they are. What this amendment would do is ask the Federal Government, through the OMB, to create an inventory of Federal assets as far as land and buildings are concerned. We do not know what it costs us to maintain it. We don't know if it is economical for us to continue to maintain it as a Federal Government property or whether we ought to put it up for sale or we ought to cede it to the States, to an Indian tribe or some other Government agency where it can be utilized. We just don't have the knowledge. Without this kind of knowledge there is no way that Congress can manage Federal properties and Federal lands.

What this would specifically require is the Office of Management and Budget to issue a report detailing the following: the total amount of land in the United States that is owned by the Federal Government; the percentage of all U.S. property controlled by the Federal Government, that is controlled—maybe not owned but controlled; the total cost of operating and maintaining Federal real property, including land, buildings and structures; a list of all Federal property that is either unused or vacant—that is something we should know which we do not know—and the estimated cost of the maintenance backlog on Federal land, buildings, and properties by agency.

This will give taxpayers greater transparency. It allows the taxpayers to know what kind of poor stewards we are with Federal property and land. It will also give us a focus to direct the maintenance backlog that we have today, to create a priority for it. We can see it in light of all the maintenance problems by agency.

It also will help us when we are considering a bill like this one. Nobody

knows the total impact of this bill—this bill, 170 bills. Nobody has done a study to say what the total impact is going to be. We don't know what the total impact is going to be on energy transmission. What we do know is it is going to hinder it greatly. What it does is it gives us a management tool.

According to the Congressional Research Service, the total amount of Federal land is unknown. In fact, different sources show significantly different estimates. This is their direct quote:

The estimate of \$650 million assumes the four Federal land management agencies have reasonably accurate data on lands under their jurisdiction, and the Department of Defense.

I would note that this amendment specifically excludes any properties that should not be known publicly, that are of national security or defense nature.

It is interesting, the Government tracks property we own, but the taxpayers cannot track the property the Government owns. Let me repeat that. Government at all levels tracks the property we own, but the taxpayers are not allowed to track the property the Government owns through them—ridiculous. The Government should have to disclose exactly the same information, when it is not a national security issue, that we have to disclose on our own property.

What we do know is that the Federal Government controls more than one-fourth of the Nation's total land, and that continues to grow. It is going to grow by almost 3 million acres in this bill. Between 1997 and 2004, the latest years for which reliable information was available, Federal land ownership increased from 563 million to 654.7 million acres. In 7 years it grew 100 million acres. That is 100 million acres on which nobody is collecting any property tax. It is 100 million acres we are not taking care of. It is 100 million acres that have facilities and structures and backlogs on maintenance issues on it that are costing us dearly every year. As the Federal Government takes more land, the costs of maintaining the property increases and the maintenance backlogs continue to grow.

It also does something else. In this 100 million acres of growth in the 7 years up to 2004, that is 100 million acres that is not available to the American public to utilize in a productive way, in a way that could build capacity, could build wealth, could build jobs. None of that happens. The only jobs that come with Federal Government programs or Federal Government property is Federal jobs that are not necessarily productive of new assets, new wealth, and new job creation beyond it.

The other thing we know is, as this 100 million acres has been added over

the previous 7 years, that the maintenance backlog of what we do own has fallen further and further behind. We know, according to the GAO, the maintenance backlog just at the Forest Service—not the national parks—we know that is somewhere between \$12 billion and \$19 billion. But the Forest Service has tripled.

The other problem I mentioned earlier, of the 21,000 buildings we have now that we are not utilizing, we could reduce the debt by \$18 billion just in the maintenance costs to those buildings. Think about that. We have 21,000 buildings sitting. We are not doing anything with them except maintaining them, and we are spending \$18 billion that we do not have taking care of buildings whereas we could get \$18 billion for those buildings if we would dispose of them. But we have been blocked in this body from proposing real property reform.

The first step, then, is to know what we have, and this is just a guess of what we have. I mentioned earlier that the Department of Energy—I said 40—it is 20 million square feet of excess capacity. That is three times the size of the Pentagon. So three times the size of the Pentagon, you could put five U.S. Capitols inside the Pentagon in terms of square footage.

The other benefit from this is transparency will help us every time in every way. Knowing what we need to know about Federal property, knowing what we need to know about maintenance backlogs, is key to us fixing the problem. We cannot manage Federal property unless we know what we are managing, unless we have the details and the data. My hope is this amendment will be accepted and that the American people can actually know what they own, much like the Government knows what they own.

I have one other amendment to offer, but I will defer that to a later point in time, and at this time I yield the floor.

The PRESIDING OFFICER (Mrs. MCCASKILL). The Senator from New Mexico is recognized.

Mr. BINGAMAN. Madam President, I believe at 2 o'clock we are proceeding to vote on a nomination and then also on three of the six amendments that are being proposed by the Senator from Oklahoma to this omnibus lands bill. I just want to speak briefly about the three amendments that we are expected to vote on in the sequence of votes beginning at 2 o'clock.

AMENDMENT NO. 680

As I understand it, the first of those is an amendment, SA 680, prohibiting construction in the national parks. This amendment prohibits the National Park Service from beginning any new construction until the Secretary determines that "all existing sites, structures, trails, and transportation infrastructure of the National Park Service are—fully operational;

fully accessible to the public; and propose no health or safety risk to the general public or employees of the National Park Service."

The amendment excludes from the new construction ban, first, "the replacement of existing structures in cases in which rehabilitation costs exceed new construction costs"; or, second, the second area that is excluded from the construction ban would be "any new construction that the Secretary determines to be necessary for public safety."

The amendment, as I read it, would eliminate the ability of Congress to determine what funds should be appropriated to each park. In all likelihood, the Secretary would never be able to make the certification called for in the amendment since there would always be some backlog. So this amendment would ensure that we would not proceed with new construction in our national parks.

The amendment also appears to prohibit the expenditure of already appropriated funds, if the construction has not yet begun, which would negate funds recently appropriated as part of the American Recovery and Reinvestment Act and also funds contained in the Omnibus Appropriations Act that was approved by this Congress.

For those reasons, I urge my colleagues to oppose that amendment.

AMENDMENT NO. 679

The second amendment I wanted to talk about is Coburn amendment No. 679. That amendment states:

Notwithstanding any other provision of this Act, nothing in this Act shall restrict the development of renewable energy on public land, including geothermal, solar and wind energy and related transmission infrastructure.

Madam President, the proponent of the amendment argues we should not designate the wilderness or national park or other conservation in the areas set out in this bill because they will restrict our sources of energy. I disagree with that.

For example, the bill, as it stands before us, designates 15 new wilderness areas. None of those areas have significant energy development potential. Three of the wilderness areas are within national parks where energy development is already not allowed. So the wilderness designation would not change that in any way.

The remaining wilderness areas are on land administered by the Bureau of Land Management or the Forest Service, and those agencies have provided information to our committee, the Energy Committee, that the new wilderness areas have low or no potential for energy development within the areas designated.

In addition to the wilderness areas, the amendment would undermine the designation of several other areas that are created to protect naturally significant features. For example, the bill

designates a new national monument and a new national conservation area in my home State of New Mexico, one of which will protect a series of fossilized prehistoric trackways and the other which protects a large cave system. Neither site is appropriate for energy development. Neither designation would reduce the contribution made by New Mexico as a major energy provider.

We are currently working on an energy bill in our Energy and Natural Resources Committee that will encourage the development of renewable energy. However, the areas designated in this bill will not reduce our Nation's ability to develop these resources.

AMENDMENT NO. 675

The third amendment I wished to briefly describe or discuss is the amendment No. 675 offered by the Senator from Oklahoma. This amendment states that no land or interest in land shall be acquired under this act by eminent domain.

First, it is important to understand that there are no provisions in this act that grant the Federal Government eminent domain authority. That authority already exists. It has existed since the founding of the country.

The use of eminent domain authority, however, is limited and controlled by the fifth amendment and by certain Federal statutes. These provisions require just compensation when eminent domain is actually used.

Secondly, there are no major land acquisitions in the bill. The amendment could impact the water projects that are authorized by the bill, particularly the Indian water rights settlement and rural water projects that are authorized in titles IX and X of the regulation.

Eminent domain, while sparingly used, has at times been a crucial tool for the Bureau of Reclamation in its attempts to complete important water projects. Examples that come to mind are the Central Arizona Project. My colleagues from Arizona are very familiar with the benefits that has brought to the State of Arizona.

The Central Utah Project, again, my colleagues from Utah undoubtedly know the value of that project. In such cases, without this tool, it likely would have been impossible to complete the reservoirs and drinking water pipelines and irrigation canals that are so crucial to the communities that are served by those projects.

The amendment that is being offered is problematic for several reasons. Let me recount those: First, it would impede the construction or increase the cost of several of the water projects provided for in this bill. This could result in the failure to complete projects or to implement one or more of the Indian water rights settlements that are being resolved.

The Navajo settlement, which includes a rural water project critical to

the Navajo people, is one of particular importance to me. It needs to be fully implemented without delay, and elimination of this authority would impede that. The language of the amendment is not limited to Federal agencies. Accordingly, it would be interpreted to restrict eminent domain by State-based entities if Federal money is involved as part of a condemnation.

The Eastern New Mexico Project is an example of a project where the local water authority will be responsible for securing rights of way for the project. It does not intend to condemn any property rights, but it will have that power, if needed, to deliver much needed water to the communities in rural New Mexico that will be served by the project. The Coburn amendment could interfere with the authority of that local entity to complete that project.

Finally, the Bureau of Reclamation indicates it has at times used so-called friendly condemnation to acquire State and local lands when the relevant government entities do not have the authority to sell such land. This has been a valuable tool to the Bureau of Reclamation and could be prohibited by the Coburn amendment.

In sum, for well over 100 years, the Bureau of Reclamation, as one agency, has balanced public needs with private property rights to help address critical water needs throughout the West. I expect that Reclamation's approach will not change as a result of anything in this bill. The Coburn amendment is unnecessary, would likely complicate the work done by numerous communities to address the water issues that affect their future.

I urge my colleagues to oppose that amendment as well.

I yield the floor. I see my colleague from Oklahoma is here and would like to continue with his other amendments.

The PRESIDING OFFICER. The Senator from Oklahoma is recognized.

Mr. COBURN. While I thank the chairman, the Senator from New Mexico, for his words and his comments, I would note that true eminent domain was not truly exercised in this country until the authority was given in 1960, not at the start of our founding. As a matter of fact, we believed in property rights in our founding. It is only since 1960 have we decided the Government knows better than a private landowner.

I ask unanimous consent to have printed in the RECORD the present ongoing debate on eminent domain between the Friars and the National Park Service on the Appalachian Trail, just to show you how controversial the taking of land of private homeowners, landowners is, when we, in our ultimate wisdom, say we know better than the people who own private land in this country.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FRIARS AND NATIONAL PARK SERVICE FACE OFF ON APPALACHIAN TRAIL

EMINENT DOMAIN PROCEEDINGS HALTED

(By Margaret O'Sullivan)

The Franciscan Friars and Sisters of the Atonement at Graymoor met with officials from the National Park Service: Judy Brumback, Chief of the Acquisitions Division and Pamela Underhill, Park Manager of the Appalachian Trail; US Senator Charles E. Schumer and Congresswoman Sue Kelly on August 7. The topic was the disputed 20-acre parcel the National Park Service wants as "a buffer area" for the Appalachian Trail. As reported in this paper on July 19, 2000 the Park Service obtained an easement on 58 acres of Friar land just north of the contested section in 1984 when the Friars sold the development rights of that parcel to the Park Service. The following year the agreement was violated when a pumphouse for a sewage treatment plant was built by the Franciscan Friars on the land.

After a private meeting on a hot and humid August 7, between the Friars and the Park Service, moderated by Senator Schumer and Congresswoman Kelly, Senator Schumer said that letters had been going back and forth to the Park Service since May this year and finally the situation had come to a head. He stated that "good news" is on the way: The lawsuit is on hold, the parties have come back to the table for talks and they have a basic agreement in that their goals are not really in conflict.

A further meeting is scheduled for August 23, 2000 when discussions will take place in order to resolve the dispute. Senator Schumer further stated that it is great to have the Friary here—it is probably the best part of the Appalachian Trail, if one was caught in a storm or in need. The Friars welcome anyone who might need assistance, a shower or a meal while hiking the trail. As Senator Schumer indicated, there are many solutions short of legal action. He said he has "a nose" for when disputes will escalate or get resolved and it is positive for the community to bring both sides together. The situation should be resolved amiably; there are no gains by continued fighting.

Congresswoman Kelly said that recently the National Park Service had turned down a request from her office to arrange a meeting between the Friars and the Park Service to resolve the matter. Instead the National Park Service initiated eminent domain proceedings through the Justice Department. She hadn't thought another meeting would rake place this soon but stated that "it appears that the Park service is finally coming to its senses." "Their decision to pursue this case using such heavy-handed tactics is wrong. The Justice Department should play no role in this matter. The Friars contribute to our community every day. Their work has touched the lives of countless individuals and the Hudson Valley community as a whole. I don't want to see their work hindered in any way." She said it was a good sign that the Justice Department had withdrawn any legal action and emphasized that the dispute is not about development but about the use of land.

Rev. Arthur M. Johnson, Minister General of Graymoor, (Fr. Art) thanked both Senator Schumer and Congresswoman Kelly for "pressuring" the two factions to get together face to face. He felt that the Friary and the National Park Service actually had a common goal, and that is people. Hiking the Appalachian Trail gives people a natural experience while the Friary wants to continue their ministry to help those in need.

Many hikers, over 400 a year in fact, have experienced the Franciscan hospitality while hiking the Trail, a service recognized by hikers and the Park Service alike. He felt it was a "win-win" situation for all.

Pamela Underhill, Park Manager of the Appalachian National Scenic Trail, agreeing in principle with Fr. Art, stated that it was rewarding to meet and felt that the lines of communication had vastly improved. She too touched on the common goal theme, which offered both a "Godly and natural retreat." She reiterated the need for a "buffer zone" along the trail, which is the heart of the matter. Although Ms. Underhill and Fr. Art had both hiked the Trail, they had never hiked together—August 7th was the first time.

They hit the trail along with other Friars, Senator Schumer, Congresswoman Kelly and members of the press. All agreed that it was very beneficial to actually see the site in question, and the position of the pump house in proximity to the Appalachian Trail. Putting their "worst fears" on the table, Pamela Underhill stated that she is concerned about the Trail and development of any land in close proximity to the Appalachian Trail. Fr. Art's concerns were about the future of their ministry. He did not want to see any plans they may have for the future undermined which could curtail their ability to sustain the needed infrastructure to minister to the thousands of men and women who come to Graymoor each year.

Both sides are optimistic about the upcoming meeting on August 23rd.

Mr. COBURN. I would also note the testimony yesterday given by the Secretary of the Interior on his idea that we have to figure out where the transmission lines are going to run.

This bill goes against exactly his testimony before your committee yesterday. Because what he said was, we need to plan ahead where the transmission lines are going to go. We need to know that before we block off anything else. That was the implication of his testimony.

For these renewable energy sites to succeed, we need to work closely with other agencies, States, tribes, and interested communities to determine what electric transmission infrastructure and corridors are needed and appropriate to deliver the renewable resources to major population centers. Our own Secretary of the Interior, our former colleague, says we have the cart before the horse.

What we heard in opposition to the first amendment, No. 680, is a continued slight to the American people in terms of taking care of the properties we have. Now, the GAO says, and the IG of the Department of the Interior, it is somewhere between \$12 and \$19 billion in backlog.

What we hear is nobody wants to put a priority in taking care of what we have. What we want to do is build more new and let what we have crumble. The last thing we should be doing is building something new until we take care of what we have. Go to any of our national parks and talk to the people who are in charge of the maintenance and they will tell you: Congress never gives

us the money to take care of it. And it is growing at \$1 billion a year in terms of backlog.

I understand the chairman's reluctance to accept these amendments. I respect him greatly. But we are going to continue on doing what we have been doing, which is a shame looking at our national parks.

I have not even talked seriously about the backlog at the Forest Service. So if we want to deny the amendment to not start new construction unless the Secretary certifies it is something for safety or that it would, in fact, help us build something that would cost more to fix than to repair, then we are going to keep on allowing this backlog to grow. That is exactly what this bill does. This amendment is not trying to stop or play any games, it is saying, let's catch up with the real need we have in our parks now. Let's catch up with the needs on the National Mall. Let's catch up with the \$200 million backlog at the Statue of Liberty. No, we are not going to do that. We are going to authorize all these new programs. Then we are going to fund the new programs because we look better doing it than taking care of the very valuable assets we have.

I disagree with my colleague from New Mexico on the importance and the intention of that amendment. The amendment is to cause us to focus on priorities which this body has not. One of the reasons we have not is because we do not have my other amendment saying we need a list of what we have, where we have it, what the problems are, and what the backlogs are.

With that I yield the floor.

The PRESIDING OFFICER (Mr. BROWN.) The Senator from Iowa is recognized.

Mr. GRASSLEY. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

2010 BUDGET

Mr. GRASSLEY. Mr. President, yesterday I had an opportunity to address my colleagues on my concerns with the budget sent to us by President Obama, a bloated budget crawling with tax increases. Today, I would like to be more specific in that discussion.

Almost 3 weeks ago, President Obama sent his first budget up to Capitol Hill. The deficit and debt proposed in that budget are eye-popping. President Obama is correct when he says he inherited a record budget deficit of \$1.2 trillion. Let me repeat that because this Senator and the Senator from Idaho are willing to be very transparent on what the numbers are. You do not argue with them.

I can say we agree with what President Obama said, that he inherited a record budget deficit of \$1.2 trillion. This is a chart that shows the pattern of Federal deficits over the past few

years. We go out to the year 2019 because the Congressional Budget Office always looks ahead in their projections. You can see what those deficits are—obviously, very high where we are right now because of the recession we are in and things of that nature.

But from the talk around here, especially the talk from the Congressional Democratic leadership, you would think they got majority power just this January, 2 months ago. You would think there was no role of the Democratic Party in creating deficits that President Obama inherited. Now we even have some in the administration who are joining this chorus. A very smart guy, a guy we all ought to respect for his understanding of economics, former Treasury Secretary Summers, now Director of the National Economic Council, said Sunday on a news show that a Republican President—and emphasis upon Republican Congress—had left President Obama with this inherited deficit.

Well, I am sure Senator MCCONNELL would have liked to have been majority leader, but he would be glad to correct Dr. Summers and let him know he was not majority leader but was minority leader during the years of 2007 and 2008.

Likewise, Congressman BOEHNER, though he would like to be Speaker, was not Speaker. He would be glad to point out he was leader of the minority, the Republicans, within the minority in the House and not Speaker during 2007 and 2008.

So the correction comes from the fact that Congressional Democrats and the last Republican administration agreed on the fiscal policy in the last Congress. The Congress, namely the Democratic leadership, together with former President George W. Bush and that administration, wrote the stimulus bill, wrote the housing bills, and had a great deal to do with financial bailouts.

The congressional Democratic leadership wrote the budgets and the spending bills of 2007 and 2008. So we need to set the facts straight. President Obama did, as I said twice—I will say again—inherited the deficit and debt. But—and a very important "but"—the inheritance had bipartisan origins, the Democratic Congress, on the one hand, and a Republican President on the other hand.

Now, what is more, the budget the President sent up would make this extraordinary level of debt an ordinary level of debt.

We have to think about the budget coming up because this is budget month. These issues are going to be driven home to the people. We have an extraordinary level of debt in this budget. It soon may look like an ordinary level of debt, and it will be. What is now an extraordinary burden on our children and grandchildren would become an ordinary burden.

I have a chart that shows this inherited debt. The inherited debt meaning what was inherited by this administration on the day they were sworn into office, January 20 of this year, is here. This black line is the percentage of gross national product. This is real dollars. So you see by 2019 how it grows and how it still is very big debt. But this inherited debt is not a pretty picture. But the picture gets uglier because in the last year of the budget, meaning the budget the President sent up here, debt held by the public would be two-thirds, 67 percent, of our gross national product. In other words, what was inherited has the national debt coming down to about 42 percent of gross national product, but what is happening from this point on with the budget we have, this black line will come up here at 67 percent. That is the legacy of this budget.

That number assumes also the return of a healthy economy, which we all hope happens. I suppose most Presidents would assume a healthy economy, but it is not a certainty. That means President Obama's budget assumes that a prosperous United States will carry the debt to more than two-thirds of the gross national product as we look out 10 years ahead, and the Congressional Budget Office does that on an automatic basis. That number, if the economy is healthy, will be 67 percent, right here, that black line. If the budget is not as healthy as what they project then, of course, that black line will be higher than 67 percent.

In terms of proposed tax policy, the President's budget does contain some common ground. If President Obama wants to pursue tax relief, he will find no better ally than we Republicans. If President Obama wants to embrace fiscal responsibility and reduce the deficit by cutting wasteful spending, Republicans on Capitol Hill will have his back. From our perspective, good fiscal policy keeps the tax burden low on American families, workers and small businesses and keeps wasteful spending in check. For the hard-working American taxpayers, there is some good news in this budget. President Obama's budget proposes to make permanent about 80 percent of the bipartisan tax relief plans set to expire in less than 2 years. For 8 long years, Republicans have tried to make this bipartisan tax relief permanent. Now the Democratic leadership seems to have seen some of that light. They now agree with us Republicans that families should be able to count on marriage penalty relief, on a double child tax credit. Democratic leaders now seem to agree with decisions that were in the bipartisan tax bill of 2003, agree with us Republicans that low-income seniors who rely on capital gains and dividend income will be able to rely on low rates of taxation as they draw on their savings.

Democratic leaders now agree with Republicans that middle-income fami-

lies will be able to count on relief from the alternative minimum tax. They were never supposed to be taxed in the first place, but it is not indexed. So they would agree that we protect middle-class taxpayers from the AMT which was not indexed. President Obama will find many Republican allies in his efforts to make these tax relief policies permanent.

I wish the budget I am referring to, the budget that came to the Hill a couple weeks ago, was as taxpayer friendly, but it is not. There is a lot of bad news for American taxpayers. If you put gas in a car, heat or cool your home, use electricity to cook a meal, turn on the lights, power a computer, there is a new energy tax for you in the budget from the President. This tax would exceed a trillion dollars. I better say "could" exceed because the figure in the budget is less than that, but most everybody around here thinks it is going to be over a trillion dollars.

This budget also raises taxes on those making more than \$250,000. That sounds like a lot of money to most Americans. If we were only talking about the idle rich, maybe the news wouldn't be so bad. But we are not talking about coupon clippers on Park Avenue. We are not talking about the high-paid, corporate jet-flying, well-paid hedge fund managers in Chicago, San Francisco or other high-income, liberal meccas. Many of the Americans targeted for this hefty tax hike are successful small business owners. Unlike the financial engineers of the flush, liberal meccas of New York, Chicago, and San Francisco, a lot of these small businesses add value beyond just shuffling paper. There is bipartisan agreement that small business and all these businesses are the main drivers of our dynamic economy. Small businesses create 74 percent of all new private sector jobs, according to latest statistics. On Monday, my President, President Obama, used a similar figure of 70 percent. Whether it is 70 or 74 percent, it means the vast majority of small businesses create most of the new jobs in America. They are the employment machine. Both sides agree we ought to not hurt key job producers that small businesses are.

President Obama also mentioned his zero capital gains proposal for small business startups. It might surprise you, but we Republicans agree with President Obama on that issue. We are still trying to figure out why Democratic leadership doesn't agree with the President on that small business-friendly proposal, because we tried to get a better proposal in the stimulus bill. If we also agree that small business is the key to creating new jobs, why does the Democratic leadership and the President's budget propose a new tax increase directed at these small businesses of America that are most likely to create new jobs? Wait a

minute, please. Many on the left side of the political spectrum say only 2 or 3 percent of the small businesses are affected by this tax increase. That figure was developed by a think tank, and it is based on a microsimulation model. Treasury studies show the figure to be considerably higher. But to focus solely on the filer percentage is to miss the forest for the trees. It is to assume that all small businesses have the same level of activity, that they employ the same workers, that they buy the same number of machines, that they make the same number of sales. Common sense has to prevail, and common sense will tell you that can't be the case.

In fact, it is not the case. The data on small business activity tells a different story. I come to that conclusion this way. According to a recent Gallup survey, over half the small business owners employing over 20 workers would pay higher taxes under the President's budget. This chart depicts the number of small businesses hit by this tax increase. We point to different levels of employment of small business being affected by this. We get to a point out here where we have 950,000 businesses, one-sixth of small businesses, with 1 to 499 employees are hit by it. Do we want to destroy that employment machine? I don't think so. But this tax proposal will do that.

I have another chart that shows that roughly half the firms that employ two-thirds of small business workers, those with 20 or more workers, are hit by the tax rate hikes in the President's budget. I will not go through all of them, but we can see here, 50 percent of the employers with employees of somewhere between 20 and 499 are hit by that big, fat tax increase.

According to Treasury Department data, not mine, these small businesses account for nearly 70 percent of small business income. So there is a big tax hit on small businesses that employ 20 or more workers. It is a marginal tax rate increase of 20 percent. Everybody, Democrat or Republican, ought to think about how these dynamic small businesses, responsible for two-thirds of small businesses, will react. That 20 percent in new taxes has to come from somewhere.

We Republicans will also scrutinize the budget for other major new taxes. We have discussed the new cutbacks on itemized deductions. I am referring to home mortgage interest, charities and State and local taxes. We Republicans will question a broad-based energy tax that actually cuts jobs and could, according to the Massachusetts Institute of Technology, cost consumers and businesses trillions.

In these troubled economic times, we ought to err on the side of keeping taxes and spending low and reduce the deficit. Keeping taxes and spending low, along with reversing the growth in Federal debt, will push the economy

back to growth. It is the only way we will provide more opportunities for all Americans.

Getting our private sector going, making small business strong is the basis for getting out of this recession and continuing to grow. I hope throughout this process of the budget debate, we will remember a firm fact that ought to be common sense, but I am not sure in this town it is seen as common sense: Government does not create wealth. Government consumes wealth.

I hope my colleagues will listen to my friend from Idaho as he gives his version of the budget. He is an outstanding member of our Finance Committee, and I appreciate his work.

I yield the floor.

The PRESIDING OFFICER (Mrs. HAGAN). The senior Senator from Idaho is recognized.

Mr. CRAPO. Madam President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRAPO. Thank you very much, Madam President.

I appreciate the opportunity to come to the floor this morning and join with my colleague, Senator GRASSLEY from Iowa, who is the ranking member of the Finance Committee. It is truly a pleasure to serve with him on that committee. He is one of those who, day in and day out, year in and year out, fights for fiscal responsibility at the Federal level. I appreciate his support and share in the comments he has made already today.

I wish to start my remarks by talking about a meeting I had this morning in my office with a couple of mayors from two Idaho cities and a number of young students whom they brought with them from their respective cities to come to Washington, DC. These two mayors have established a mayor's council of students in their cities and work with these students on public issues and help these young people find an effective way to be active and involved.

As they came to visit with me today, they brought up two issues. The first issue they brought up was the alarming rate of high school dropouts and the need for us to pay attention to our educational system. They talked with me about a number of interesting ideas we should pursue as we try to regain America's lead in excellence in education. I am going to have more to say about that on the floor and in other contexts on another day.

But I thought it was very interesting; the second issue they brought up with me was directly relevant to the remarks I planned to make on the floor today; that is, they brought me a set of petitions—I am holding them in my hand right now—with the signatures of about 400 students in Idaho, whom I

think properly reflect many, many, more than they, who have asked that we pay attention to our national debt and our inability—our inability in Congress—to achieve fiscal responsibility.

These young people said what I and many others have been saying, only they said it best; that is, that our inability to control our fiscal house here in Washington, DC, is jeopardizing their future and it is jeopardizing their children's future and their children's future.

Now, we often say that on the floor, but I had the opportunity today to meet with these young people who looked me in the eye and asked me to do everything I can to help protect them from what they see happening as a result of a runaway Congress and a runaway spending plan in this Congress that will specifically fall on their shoulders to bear.

Well, they talked with me about things such as who owns our national debt. They pointed out, as most Americans are starting to realize, that foreign nations own most of our national debt, which raises additional threats to our security.

Today, China and Japan are the primary holders of our national debt. As I think many Americans have noted recently, the Chinese are starting to wonder whether this investment in U.S. debt instruments is a viable investment because of the spending policies of our Nation.

Well, I am here to talk about the budget that this Senate and this Congress are now beginning to consider. In addition to sitting on the Finance Committee, I sit on the Budget Committee. In the next few weeks, the Budget Committee is going to begin its deliberations on the budget the President has submitted to us.

Every year, the President submits to Congress a budget. I do not think in any year I have served in Congress has the Congress actually adopted the exact budget the President has proposed. But the President's budget proposal acts as a guide from which the Congress then crafts its own budget.

I believe this year Congress must be very careful in following the proposals or using as a model or a guide the budget which we have been given.

As shown on this chart, the budget that has been proposed to us will increase taxes by approximately \$1.4 trillion. This number is hard to get at because we do not have the details yet. The reason I say that is because many—including myself—believe that is a very low number in terms of the actual amount of the tax increases. I will explain that in a moment.

It increases discretionary spending by \$725 billion. These are 10-year numbers. As my colleague from Iowa said, the budgets project out over a 10-year cycle, and it increases mandatory spending by \$1.2 trillion.

If you look at the spending side of this for a minute—for those who do not pay attention to our discussion of different pieces of the budget here in Washington, mandatory spending generally is spending that previous Congresses and previous Presidents have already debated, passed into law, and signed into law and is ongoing. I call it spending that is on autopilot because this spending will happen regardless of whether Congress ever votes or meets again. It is law, and regardless of the status of the economy, regardless of the demographics of our Nation and what is happening in the world in which we are living today, the law requires this spending occur. It is what often we call entitlement spending—"entitlement" because the law has created an entitlement, and if a person qualifies in a certain way, they are entitled to receive payment under the law.

Now, the vast majority of this entitlement spending, as most people know, is Medicare, Medicaid, and Social Security. There are other entitlement laws, mandatory spending laws, in the United States, but the vast majority—the vastly largest percentage—are Medicare, Medicaid, and Social Security. Also added into this category of mandatory spending is interest on the national debt because that also must be paid.

So you can think of the mandatory spending or autopilot spending as basically this column here, as shown on the chart, that represents about two-thirds—roughly, about two-thirds—of all the spending in each year's average budget.

The discretionary spending is everything else. That is what we actually vote on in Congress every year in our appropriations process. As I have said, it is roughly about a third of our budget. That spending can also be divided roughly in half. Approximately half of it is national defense and security spending; and approximately half of it is everything other than defense. So you often hear us talk about non-defense discretionary spending. That is what we are talking about: the things Congress actually votes on every year.

Together, our discretionary spending and our mandatory spending are the spending side of our budget. As you can see on this chart, we are proposing in both categories dramatic increases over the next 10 years. The fiscal restraint is not there. At a time when Americans are tightening their belts, this budget grows the size of Government by 9 percent—9-percent growth for nondefense programs in just the year 2010 alone. If you go back to the 2009 budget we adopted and finalized in our appropriations process in this Congress and add the growth there into it as well, you will see a 20-percent growth—a 20-percent growth—in our nondefense spending in this country since the year 2008.

The fiscal restraint is lacking in this budget proposal. In fact, there is only one category of this budget in which there is any actual reduction in spending, and that is in the defense side of the ledger. There are actual proposed reductions in defense spending in the President's budget. But only in that category.

If we look at the tax side for a moment, you can see there is \$1.4 trillion of new taxes. As I said a minute ago, that number is kind of hard to quantify. Why is that hard to quantify?

Well, the President has said his tax policies would reduce taxes for 95 percent of American taxpayers. That statement can only be accurate if you only look at one kind of tax; namely, income taxes. I believe it is correct that in the income tax category, there will not be an increase for the vast majority of Americans, and, in fact, for most Americans we might actually see a reduction.

But if you look at all the other proposals for tax increases and tax adjustments in the President's budget, you see there is going to be a huge increase in tax payments by Americans in every category of income in this country.

Those taxes include things such as a brandnew—and this is the part that makes it difficult to give a final number—a brandnew tax on energy. It is part of what some have called the cap-and-trade proposal the President has made on carbon fuels. Others have called it a cap-and-tax approach.

The point, however, is, under this new energy proposal, somewhere between \$600 billion and \$2 trillion of new cost will be put on carbon-emitting energy sources, and Americans will pay those increased costs, primarily in their utility bills. The President himself has said this proposal would cause electricity rates to skyrocket. We do not know exactly to what level, but everyone who uses electricity, everyone who pumps gas at the gas station, everyone who uses natural gas can expect to see—and we do not know the details yet, which is why we cannot give the details on the numbers, but they can expect to see significantly increased costs for them in their household budgets.

Now, some would say that is not a tax. That is just a fee or it is just an increase in the price of your electricity as a result of some national policies. But however you say it, the fact is, there is a projected revenue to the Federal Treasury to come from people who will pay more on their electricity bills and pay more on their gasoline and other fuel bills that will be somewhere in the neighborhood of \$1.4 trillion. Many of us think it is going to be closer to \$2 trillion.

The list goes on.

It is proposed the capital gains and dividends tax rates go up. Some argue that only hurts wealthy people. In fact,

the argument made on this floor so often is: Any tax increase is justified as being a tax increase on only the wealthy. Well, if you look at dividends and capital gains and look at the kinds of people in this country who own stock, either in their own individual account or through a pension fund, it reaches far deeper than just the wealthy. The people who are impacted day in and day out by having to pay tax on dividends and capital gains are far more people than simply those who are the so-called wealthy.

The list goes on.

The bottom line is, the budget will raise taxes by about \$1.4 trillion and raise spending—both in discretionary and mandatory levels—a greater amount.

Now let me look at this last category shown on the chart. It is called mandatory savings. The number there is zero. Now, why do we have that column? In order to change—remember the law I told you about earlier: The entitlement programs are already the law. If we are going to change and gain savings in this category of mandatory spending, we have to literally vote to change the law. It takes 60 votes in the Senate to do that because we always face a filibuster when we try to find savings in this category of entitlement spending.

But in the budget proposal the Budget Committee will put forward, the Budget Committee is allowed to propose that there be savings here. And then, if the Budget Committee can get that proposal adopted in the budget, our respective committees of jurisdiction in the areas where the entitlements lie are required by the budget to find those savings and make law-change proposals to Congress so we can achieve some savings.

The reason I have this column on the chart is because in the budget that has been proposed, there are no savings proposed. There is not even a request that \$1 of savings be found in the entire entitlement system. That is wrong also.

Now, let's go to the next chart.

This is a chart that shows the deficits we expect to face—not the national debt but the deficits, the yearly deficits we expect to face. That means the amount of money we will spend beyond our projected revenue.

The blue line, as shown on the chart, is what we call the BEA baseline. What that means is that is current law. If we do not change any law and do not do anything in Congress and do not put any more increased spending into place, what would our deficits look like? We can see there is a big spike here, in about 2009 and 2010, and then it drops off dramatically. Under current law, it tails down rather dramatically over the next 10 years.

Now, one of the reasons it goes down so dramatically over the next 10 years is that we have a number of tax cuts

that were passed in the 2001 and 2003 timeframe that are going to expire, which means if we do nothing, taxes are going to go up dramatically, and we are going to see the deficit drop dramatically because everybody is going to be paying a lot more taxes. If we allow those tax cuts to stay in place—and I believe we are starting to get some consensus that we do that—then this line for what current law would be with those tax cuts staying in place would be somewhere between the red line and the blue line.

The point I wish to make, though, is the red line is the proposed budget we are now dealing with. As my colleagues can see, the spending in excess of revenue is dramatically higher than current law under the proposed budget.

There is another point that needs to be made, and I think this point shows it as well as anything. The President has said his goal is to reduce the deficit by half in the next 4 to 5 years, but as my colleagues can see by the chart, that will happen anyway under current law.

Now, why will that happen anyway under current law? That will happen anyway under current law because this spike we are looking at is the result of the phenomenal spending spree that Congress has been on since last fall. Actually, even going into the spring of last year, you may recall that Congress, to stimulate the economy, passed a \$158 billion bill, I think it was, for rebate checks, to send rebate checks out to Americans so they could stimulate the economy. Well, we have seen that those checks didn't actually stimulate the economy, but it did add \$158 billion to our spending.

Then we had the \$700 billion TARP bill, \$350 billion under President Bush and \$350 billion under President Obama. We had the \$800 billion stimulus package, much of which we will be spending out in this timeframe. We have had the auto bailout, and actually part of it—most of it, so far—has come from the TARP dollars. But we are seeing a spending spree by Congress which is driving these deficits up dramatically over the next 2 years.

But assuming—and this is an important assumption—assuming Congress does not continue this pattern of bailouts and Congress does not continue this pattern of \$800 billion stimulus spending bills, then we should see this spending rate of Congress drop back down. So assuming Congress doesn't continue this rampant spending spree it is on, the deficit will return itself to half without any real effort and, in fact, without any real cuts in spending.

The last thing this chart shows that is very notable is, in the outyears—again, current law starts seeing us get our deficit under control, but the proposed budget starts us growing this deficit and leaves it at a permanent level around \$600 billion. We are dealing with a proposed budget that leaves

America with a proposed ongoing and growing deficit for the indefinite future of about \$600 billion. That is not good enough. We need to be following a line on our deficit that brings us toward balance, and we can't do that. We can't achieve that.

One last point: We had Secretary Geithner before our Budget Committee last week to talk about this budget. In his comments, Secretary Geithner acknowledged that the tax increases that are being proposed—the ones I had on the previous chart—are going to actually harm our economy in our effort to build back right now. He acknowledged the point that this is the wrong time to be increasing taxes and that taxes at this time would have a chilling effect on our ability to restimulate our economic activity. But he defended these tax increase proposals by saying that they are not projected to take place until the year 2011, at which point the economy is supposed to be back in good shape. Therefore, we can let the economy get healthy again, and then we can hit it with some tax increases and then it will be OK.

Well, first of all, I don't believe it is necessarily going to be OK to hit the economy as it is starting to stabilize again in 2011, even if it is starting to stabilize at that point. But there is no consensus that we will be out of this difficulty by that time. So I asked Secretary Geithner: If the economy is not strong by 2011, will you still push for these tax cuts—increases—or are these tax increases contingent on a strong economy? In other words, if we don't have the strength you are projecting we will have, will you still propose the tax increases? He ducked the question.

I think the reason he ducked the question is because the answer was, yes; the taxes are going to go up regardless of what happens with the economy, and we are just hoping and projecting that we are not going to have any problem there because we think the economy is going to be fine in 2011.

Well, I certainly hope the economy is fine in 2011, and I don't think that will be a good time to hit it with a huge tax burden again anyway, but it is clearly wrong to put into place a path toward tax increases when we don't know whether the economy is going to remain strong.

Let's put up the last chart. The last chart just shows the debt we are growing. The chart before was deficits. The debt is the accumulation of all of our deficits over time. You will see right in here and around the 2009 timeframe, we were at around \$6 trillion—actually, it was growing up into the \$7 trillion and \$8 trillion level, and Congress is starting a spending spike that is starting to drive up our national debt. It is hard to get a handle on our national debt right now, but it is between \$10 trillion and \$11 trillion. It is projected that our na-

tional debt—excuse me, the debt held by the public, and there are different pieces of the debt—but the debt held by the public—that is the debt we talk about when we talk about China and Japan and other nations buying our bonds and pension plans and so forth. The debt held by the public under this proposed budget will double in 5 years and triple in 10 years. That is remarkable and it is scary that we could have a budget that proposes a wall of debt like this and does not put into place any kind of spending restraint proposals but adds increased taxes, which will make it harder for our economy to keep up with this spending level, and proposes no effort to address the entitlement growth that is probably the biggest driver of spending in the Federal budget.

I guess I should clarify that—the biggest driver except when Congress gets engaged in stimulus packages and bailouts, at which point Congress becomes the biggest driver. But assuming we can stop the tendency in Congress to spend as rapidly as we have been doing over the last 6 months, then we must turn our attention to the entitlement programs and begin to find a way to find savings in them.

So I will conclude with this: Many have said on this floor that this budget spends too much, taxes too much, and results in too much debt. It couldn't be said more succinctly or better. This budget jeopardizes the economic strength of our Nation. It taxes far too much, it spends far too much, and it leaves us with a legacy of debt that our children and our grandchildren will face to their detriment.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Texas is recognized.

Mrs. HUTCHISON. Madam President, I have been listening to Senator CRAPO's remarks, and I think he has made some excellent points. The Senator is pointing out the long-term consequences of this incredible spending proposal that has been put before us on top of two incredible spending proposals that we have passed in the last month in this Congress. So I do hope the people of America start looking at the long-term effects of this spending increase at a time when our economy is seriously in jeopardy. I hope we can stop it at the budget and start showing the American people that we know everyone is concerned about their jobs, their retirement. We need to act accordingly in Congress; and that is, to spend taxpayer dollars wisely and not continue to borrow as we have been just in the last 2 months. It is going to be a spiral that I don't know how we overcome. So we have to start overcoming it right now, and that is with the budget proposal that has been put before us.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

COBURN AMENDMENTS

Mr. CHAMBLISS. Madam President, I rise to speak in support of the three amendments filed by Senator COBURN that we are going to be voting on shortly to the omnibus lands package.

With this country in the dire economic straits we are in, with the housing market crumbling, and with all of the major issues we have on our plate, I am not sure I understand why we are here dealing with a lands package today but, more importantly, why we are dealing with this lands package.

This omnibus lands package is truly antistimulus because it will erect new barriers to energy exploration and squander billions of taxpayer dollars on low-priority, parochial programs and frivolous earmarks.

The bill is another direct challenge from Congress to President Obama's pledge to clean up the earmark process. Last week, the President pledged to eliminate earmarks that didn't serve a legitimate purpose. He also said that each earmark must be scrutinized at public hearings. None of the individual earmarks in this bill were subject to public hearings, nor would many Americans describe earmarks such as a \$3.5 million birthday bash for St. Augustine, FL, a legitimate public purpose.

The omnibus lands bill should be subject to a full and open amendment process. For months, the leader on the other side has argued that the bill is "noncontroversial" and should pass by a voice vote, with no amendments and no recorded rollcall votes. Yet, last week, 144 Members of the House of Representatives voted against the bill because it does need major revision. More than 100 organizations, ranging from the U.S. Chamber of Commerce to the National Wildlife Refuge Association, have expressed their opposition to this package.

The bill blocks the development of both renewable and oil and gas energy resources—one of the critical issues we are still facing in this country even with the price of a barrel of oil down and the price of a cubic foot of natural gas down. But they are not going to stay down. One bill in the package locks up at least 8.8 trillion cubic feet of natural gas and more than 300 million barrels of oil in a single field, which is equal to nearly twice as much natural gas as all Americans use in a year. All of that will be off limits at a time when we are seeking to take advantage of our natural resources in this country. The bill includes 92 National Wild and Scenic Rivers designations, covering over 1,100 miles that will prohibit any pipeline or transmission crossing. In 19 cases, the bill permanently withdraws Federal lands from future mineral and geothermal leasing.

Since the Senate last considered the lands bill, Secretary Salazar has withdrawn major energy leases in both

Utah and Wyoming that were the subject of a coordinated lawsuit brought by extreme anti-energy groups.

The three amendments we are going to be voting on do three basic things to try to improve this package. First, amendment No. 679 strikes provisions that restrict the development of renewable energy on public lands, including but not limited to geothermal, wind, solar, biomass, and related transmission infrastructure. Amendment No. 680 bars new construction until all current sites are certified by the Secretary as fully operational, ensuring full access by the public and posing no health or safety threat. The National Park Service is currently facing a \$10 billion maintenance backlog. Yet we are going to be adding to their inventory. The third amendment prohibits the use of eminent domain for any provision authorized in the bill.

These are basic, commonsense amendments that ought to be supported by everybody here. If we are going to have this lands package debated and voted on—and, again, I am not clear as to exactly why we are dealing with this in the middle of our other crises—certainly we ought to make commonsense amendments applicable to basic provisions in this huge package that is going to be the most major acquisition of lands by the Federal Government, which is already the largest landowner in our country over the last two decades.

With that, I urge adoption of the Coburn amendments on which we are getting ready to vote.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BINGAMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CARDIN). Without objection, it is so ordered.

EXECUTIVE SESSION

NOMINATION OF RON KIRK TO BE UNITED STATES TRADE REPRESENTATIVE—Continued

Mr. CARDIN. Under the previous order, the question is, Will the Senate advise and consent to the nomination of Ronald Kirk, of Texas, to be the United States Trade Representative?

Mr. BINGAMAN. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The clerk will call the roll.

The bill clerk called the roll.

Mr. REID. I announce that the Senator from Illinois (Mr. DURBIN) and the

Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 92, nays 5, as follows:

[Rollcall Vote No. 100 Ex.]

YEAS—92

| Durbin | Kennedy |
|--------|---------|

The nomination was confirmed.

The PRESIDING OFFICER. Under the previous order, the motion to reconsider is considered made and laid upon the table.

The President will be immediately notified of the Senate's action.

Mr. DURBIN. Mr. President, on vote No. 100, I was unavoidably detained. Had I been present for the vote, I would have voted to confirm the nomination of Ronald Kirk to be U.S. trade representative.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will resume legislative session.

REVOLUTIONARY WAR AND WAR OF 1812 BATTLEFIELD PROTECTION ACT—Continued

AMENDMENT NO. 680

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate equally divided prior to a vote in relation to amendment No. 680 offered by the Senator from Oklahoma, Mr. COBURN.

Who yields time?

Mr. COBURN. Mr. President, the amendment we are going to be voting

on next is amendment No. 680. If my colleagues have not read the GAO report on the Department of Interior released this month, they should as they consider this.

The national parks have—according to the national parks—a \$9 billion backlog. According to the GAO, it is somewhere between \$13 billion and \$19 billion. This amendment is not intended to do anything except cause us to order a priority that we will take care of what we have now before we spend new money on new parks and new areas under the Department of the Interior. It is simple. It is straightforward. There is nothing underhanded about it.

The fact is, we cannot continue adding things when we are not taking care of the Statute of Liberty, the National Mall, and many of our national parks that are falling down and are a threat to health and safety of the visitors and the employees who work there.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from New Mexico is recognized.

Mr. BINGAMAN. Mr. President, I will take the first minute, and my colleague from Alaska will take the second minute.

This amendment would prohibit the National Park Service from beginning any new construction in national parks until the Secretary of the Interior can certify that the backlog of maintenance in all structures, trails, sites and transportation infrastructure has all been accomplished. I would argue he or she will never be able to certify that; therefore, we could not have new construction in our national parks. This would apply to funds we have already appropriated, including those in this American Recovery and Reinvestment Act that we voted on a couple of weeks ago.

I urge my colleagues to oppose the amendment, and at the appropriate time I will move to table the amendment.

I yield the remainder of the time to the Senator from Alaska.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Ms. MURKOWSKI. In addition to what the chairman of the Energy Committee has stated, we may be in a situation where you have a newly acquired national park or national historic facility and this amendment would prevent the Director of the Park Service from even putting in new facilities until the maintenance backlog is completed in older existing park units. It could also force the agency to expend funds on facilities they no longer need, such as trails or buildings that the agency would like to remove.

I think this is a well-intended amendment, but I believe it misses the mark

by placing restrictions that could hamstring the National Park Service's effort to provide high-quality recreational opportunities, and I urge opposition.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. Mr. President, this does not limit the ability of the National Park Service to consider something they do not want to repair. In fact, there is an exact exemption in this amendment for that.

We are going to do the same thing. We are not going to take care of what we have and we are going to spend money on new things and we are going to put the employees and the people of this country at risk. Let's take care of what we have. Let's agree to this amendment.

I yield the remainder of my time and ask for the yeas and nays.

Mr. BINGAMAN. Mr. President, I move to table the amendment and ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The question is on agreeing to the motion. The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 79, nays 19, as follows:

[Rollcall Vote No. 101 Leg.]

NOT VOTING—1

Kennedy

The motion was agreed to.

Mr. BINGAMAN. Mr. President, I move to reconsider the vote, and I move to table that motion.

The motion to table was agreed to.

AMENDMENT NO. 679

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate, equally divided, on amendment No. 679 offered by the Senator from Oklahoma, Mr. COBURN.

Mr. COBURN. Mr. President, this is another amendment, the whole purpose of which is to think forward not think short term. What we are going to do in this collage of 170 bills is restrict, significantly restrict, the availability of geothermal, solar, wind, and biomass energy.

We are doing that because we are going to limit the places where we can get that. Ninety percent of the geothermal capability in this country lies on Federal lands. What we are doing in this bill is not thinking about what we are going to do on transmission lines, not thinking how we are going to bring solar, wind, and geothermal, as well as biomass, to the population centers of this country.

Yesterday, the Secretary of the Interior outlined, in his testimony before the committee, the importance of getting transmission lines and grids right in anticipation of having this access for renewable energy that is clean and without a significant carbon footprint.

All this amendment does is say we are not going to allow it to prohibit our utilization of geothermal, our utilization of solar, and our utilization of wind by what we are doing in the bill.

So everything else stays the same, but we are not going to handicap ourselves and handcuff ourselves by eliminating the ability to gather these energy sources off these lands.

I reserve the remainder of my time.

Mr. BINGAMAN. Mr. President, I oppose this amendment as well. This would open the wilderness areas, the parks, and the wild and scenic rivers that are designated in the bill to potential development of new energy projects, renewable energy projects, as well as the associated facilities that go with those such as transmission lines, generating stations, access roads.

There are 2 million acres of new wilderness area here. We do not want wind farms in those wilderness areas. There are over 1,000 miles of wild and scenic rivers. We do not want hydroelectric powerplants on those wild and scenic rivers. I think this would be a major mistake for us to make an exception and say that renewable energy sources should go in regardless of the designation in the bill.

I yield the balance of my time to the Senator from Alaska.

Ms. MURKOWSKI. Mr. President, I make a point that is worth mentioning that Senators may have forgotten. The 1964 Wilderness Act includes a provision that allows the President may de-

clare an emergency and allow "water resources, reservoirs, water construction work, power plants, transmission lines and other facilities needed in the public interest, including road construction and maintenance essential to develop and use thereof."

So, therefore, other than a handful of declared wilderness areas in Colorado and Nevada, this protection is included in the law establishing every wilderness, including those in this bill. Therefore, I do not think there is a reason we need the amendment of the Senator from Oklahoma.

Mr. COBURN. Mr. President, what we are doing in this country is we are shutting off oil and gas energy that we are going to need for the next 20 years. Now we are going to handicap the renewable, clean energy that is in the bill.

I disagree that the President has the ability only under an extreme national emergency. Well, we have an emergency right now and nobody is doing that. What we ought to do is make sure we do not limit further energy potential for this country. We are going to see petroleum prices rise. We are going to see energy costs double in the future.

This will eliminate some of that.

I yield back the time.

Mr. BINGAMAN. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

The PRESIDING OFFICER (Mr. MERKLEY). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 65, nays 33, as follows:

[Rollcall Vote No. 102 Leg.]

NOT VOTING—1

Kennedy

The motion was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote.

Mr. BINGAMAN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Republican leader.

SENATOR LUGAR CASTS VOTE NO. 12,000

Mr. MCCONNELL. Mr. President, the majority leader and I would like to make a few brief comments before this last vote in the tranche of votes we are having at the moment.

It is customary in the Senate to acknowledge one's colleagues on the occasion of a major legislative milestone, and so today we honor the senior Senator from Indiana on the occasion of his 12,000th vote. In our Nation's history, only 12 individuals have cast more votes in this body than Senator LUGAR, and this is well worth noting.

But it is a special pleasure to recognize someone who has always been so reluctant to speak about himself. Few Americans have more to brag about than Senator RICHARD LUGAR. Yet I know of no one who is less likely to do so. So it is an honor for me to take a moment to brag about my colleague, my neighbor, and my friend.

As a measure of Senator LUGAR's reputation for bipartisanship, historians will note that when our current President launched his Presidential campaign at the Illinois statehouse 2 years ago, he mentioned just one politician by name: RICHARD LUGAR. No one in the Senate commands more bipartisan respect.

As a measure of Senator LUGAR's reputation as a foreign policy expert, ask any television news producer for the first Senator they would think to look to to discuss an important international story. They would, of course, tell you: RICHARD LUGAR.

As a measure of Senator LUGAR's effectiveness as a lawmaker, just take a look at the results from his last election. During a year in which Democrats made significant gains in both the House and the Senate, Senator LUGAR won 87 percent of the vote—a victory so convincing that the State chairman of the Democratic Party in Indiana made the following statement: "Let's be honest," he said, "Richard Lugar is beloved not only by Republicans, but by Independents and Democrats."

Never has anyone provided his or her political opponent with a better script for a campaign ad than that—particularly since the comment had the added virtue of being absolutely true.

As a measure of my own personal esteem for Senator LUGAR, I would note that I have 12 framed photographs in my office in the Capitol marking various points in my own career, dating back to my days as a college Republican. One of those photographs is a picture of a young Senator LUGAR helping me in my first Senate campaign. Whenever I see it, I am reminded of what a public servant should be.

Senator LUGAR's life has been one of high achievement: high school valedictorian, a straight-A college student, Eagle Scout, Rhodes Scholar, big-city mayor at the age of 35, U.S. Senator. He has been a counselor to Presidents and one of the most widely respected voices on foreign relations within the Senate for decades. Before he finishes out his current term, he will have served almost twice as long as any Indiana Senator before him—a milestone he has approached with characteristic humility.

In a long Senate career, perhaps none of Senator LUGAR's achievements has been more far reaching as the Nunn-Lugar Cooperation Threat Reduction Program, which has led to the dismantling of thousands of nuclear warheads and contributed immeasurably to the promotion of peace. For this achievement in particular, he has been considered for a Nobel Peace Prize.

But ask Senator LUGAR and he will probably tell you his greatest achievement was his marriage to Charlene. Senator LUGAR was recently asked about the demands of his work. Here is what he had to say:

I've been especially fortunate that my wife, Charlene, has shared my enthusiasm. It would not have been remotely possible if that had not been the case.

Senator LUGAR and Char have been married for more than 50 years. They are proud of their four sons and their 13 grandchildren, and they can be proud of the teamwork that has produced a brilliant career, carried out in the best traditions of the Senate and of our country.

Senator LUGAR, you are a treasure to the Senate and a model for anyone who wishes to pursue a career in public service.

It is an honor and a privilege for me to recognize my esteemed colleague on this latest of so many accomplishments in a truly distinguished Senate career.

(Applause, Senators rising.)

Mr. BYRD. Hear, hear.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Mr. President, I hesitate to jump in front of my friend from Indiana, but I feel I want to say, as I should, a few things about Senator LUGAR.

He is not only the most senior Republican currently serving in the Senate, he also will have served twice as long as any other Senator in the history of the State of Indiana, as mentioned by my colleague, Senator MCCONNELL.

Born in Indianapolis, he spent much of his boyhood focusing on things—as he is able to do—such as on becoming an Eagle Scout, and he did become an Eagle Scout.

He graduated first in his class—not just at Shortridge High School but also at Denison University. This is where he met Charlene, his wife.

RICHARD LUGAR is clearly one of the most intellectually sound Members of the Senate. After college, he earned a Rhodes Scholarship to study at Oxford University, where he received honors in various programs. He received honors degrees in politics, philosophy, and economics and was a member of Phi Beta Kappa. He has also earned honorary degrees from 41 universities and colleges—41.

When RICHARD LUGAR returned from Oxford, he and Charlene were married. But just a few months later, Richard began his 3 years of volunteer service in the U.S. Navy, where he was ultimately assigned as intelligence briefer for ADM Arleigh Burke, the Chief of Naval Operations.

Back home in Indiana, after the Navy, RICHARD went into business with his brother, running a food machinery manufacturing company, before winning a seat on the school board, and then serving two terms as mayor of Indianapolis.

In the Senate, RICHARD LUGAR has been a national leader on the environment, foreign policy, and let's not forget agriculture.

He worked closely with then-Senator Obama on the Foreign Affairs Committee on the complex challenge of loose nukes.

He currently serves as ranking Republican and former chairman of the Foreign Relations Committee and as a member and former chairman of the Agriculture Committee.

Charlene and RICHARD have four sons: Mark, Robert, John, and David, and 14 grandchildren.

So, Senator LUGAR, congratulations in casting your 12,000th vote as a U.S. Senator. This milestone is the latest in a career filled with remarkable accomplishments.

(Applause, Senators rising.)

Mr. BYRD. Hear, hear.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I thank my very dear friends, MITCH MCCONNELL and HARRY REID, for overly generous comments, which give me great encouragement and inspiration.

I appreciate so much the Senate taking time for a moment in my life I will always cherish. I thank you for recognizing the importance of my sweetheart, Charlene, and our children and

our grandchildren. They are the precious inspiration for me, as it is for each one of us who serves in this way and who enjoys and loves the Senate as I do.

I thank all of you so very much.

(Applause, Senators rising.)

The PRESIDING OFFICER. The majority leader is recognized.

Mr. REID. Mr. President, this will be the last vote in the series of votes of amendments offered by Senator COBURN. There are three other amendments Senator COBURN has laid down, two of which we will have to vote on. On one I think there is agreement on this side it should be accepted, and Senator COBURN has acknowledged we would not need a vote on that. We are going to have those two votes. We are working on the appropriate time.

Senator COBURN has one more amendment on which he needs to speak. He has already spoken on the others I have mentioned.

I tell all Senators, we will likely do these votes when we first come in in the morning rather than this afternoon. There are a number of hearings and other things going on this afternoon. I think that would be to everyone's advantage.

We are also working on a number of nominations we are trying to complete. We hope we can get those done tomorrow. I do not see any reason to do the votes tonight. We will do them in the morning, at a very early time in the morning.

AMENDMENT NO. 675

The PRESIDING OFFICER. Under the previous order, there will now be 4 minutes of debate equally divided on amendment No. 675, offered by the Senator from Oklahoma, Mr. COBURN.

The Senator from Oklahoma.

Mr. COBURN. Mr. President, I yield a minute to the minority whip.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. KYL. Mr. President, I would ask for my colleagues' attention for just a moment.

This is a very good amendment. The staff has informed me all the land acquisition under this bill has been accomplished through the cooperation of all parties—willing sellers, willing buyers—and there is no need for condemnation of any property, no need for eminent domain.

Believing that to be true, my colleague has simply said, therefore, there will be no eminent domain used to purchase land under this bill; in other words, no acquisitions contrary to the wishes of the landowner.

Believing the staff is correct, and, therefore, that it is not necessary, it seems to me it establishes a good principle to say that where there is no need for it, we should not authorize eminent domain to acquire land against a landowner's wishes.

Therefore, I urge my colleagues to vote in support of this amendment.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, first, it is important to understand there are no provisions in the bill granting the Federal Government eminent domain authority. That authority already exists. It has existed for many years. The Supreme Court first recognized it in 1876 and acknowledged that the Government had that authority.

What I believe is important is that there are water projects in this bill which are very important—the San Joaquin project in California, various water projects throughout the West—and it is important the Bureau of Reclamation have authority, if it needs to use it, to proceed with eminent domain proceedings.

My colleague from Arizona, I am sure, takes great pride in the Central Arizona project. It is very doubtful that project could have been accomplished had not the Federal Government had eminent domain authority. That is true of these water projects in this legislation as well.

So we should not be writing provisions in here that take that tool away from our Federal land managers and particularly the Bureau of Reclamation, and that is exactly what the effect of this amendment would be.

So I urge my colleagues to oppose the amendment.

The PRESIDING OFFICER. The Senator from Oklahoma.

Mr. COBURN. Mr. President, there is eminent domain, and then there is the threat of eminent domain. The threat of eminent domain is as powerful as eminent domain in itself because we cause people who have pure and sincere and guaranteed rights to their property to give up their property.

The fact is, this bill relates to all sorts of statutes that utilize eminent domain. If, in fact, we do not intend to utilize eminent domain, why won't we say it? We will not say it because we want to use the power of having that to intimidate property owners in this country and landowners.

This is about protecting one of the most important principles of our country: the right to have and hold property. This is an issue under which we either accept the rights of individuals to hold property or we say the Government knows better. Even though we are saying we are not going to use it, we are going to use it to intimidate landowners.

I would appreciate your vote.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. BINGAMAN. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. DURBIN. I announce that the Senator from Massachusetts (Mr. KENNEDY) is necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 63, nays 35, as follows:

[Rollcall Vote No. 103 Leg.]

NOT VOTING—1

Kennedy

The motion was agreed to.

Mr. DURBIN. Mr. President, I move to reconsider the vote, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DURBIN. Mr. President, I ask unanimous consent that after the Republican leader, Senator MCCONNELL, has an opportunity to be recognized and speak, that Senator CORKER be recognized at that point and that I then follow him with another unanimous consent recognition, and after that moment, Senator MCCASKILL be recognized to speak for 5 minutes, Senator MIKULSKI for 5 minutes, and Senator BURRIS for 5 minutes.

I wish to amend that UC request to include 10 minutes following Senator BURRIS for Senator SESSIONS and 10 minutes for Senator GRASSLEY.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The PRESIDING OFFICER. The Republican leader is recognized.

DEPOSITOR PROTECTION ACT OF 2009

Mr. MCCONNELL. Mr. President, I know how important it is to our banking system, and especially our community banks, that the Senate pass S. 541, the Depositor Protection Act of 2009.

This is a bipartisan bill, led by Senators DODD and CRAPO, that we increase the borrowing authority of the Federal Deposit Insurance Corporation, thereby freeing up capital for banks to lend to small businesses and people who need it.

The Depositor Protection Act is co-sponsored by Senators across the political spectrum, including Senators SCHUMER, BROWN, AKAKA, BOND, GREGG, and CORKER, who is here on the floor with us. The fact that it has such diverse support underscores how important it is to our financial system. This is a bill we should pass without delay. Doing so would help our financial institutions, and thus our economy, during this economic downturn.

The bipartisan Dodd-Crapo bill should not be held hostage by efforts to attach much more controversial legislation on top of it. Specifically, I understand some of our Democratic colleagues want the Dodd-Crapo bill to pull to passage a controversial measure called cram-down, which would allow bankruptcy judges to basically rewrite mortgage contracts.

Politically and economically, cram-down is the opposite of the Dodd-Crapo bill because it has bipartisan opposition; it has bipartisan opposition because it would worsen our economic situation. For example, last year, 11 Senate Democrats, along with every single Republican in the Senate, voted against cram-down because its passage would worsen housing markets by raising interest rates for everyone in order to benefit a very few. This, in turn, would make it more difficult for everyone, especially those of modest means, to own a home. This is the wrong prescription at the wrong time for an ailing housing market. These concerns, of course, have not gone away. This year, some Senate Democrats have publicly reiterated their opposition to cram-down. There are no such concerns with the bipartisan Dodd-Crapo Depositor Protection Act of 2009. We could pass it right now, Mr. President, on a bipartisan basis and help our financial situation.

I hope our friends on the other side of the aisle will let us pass this important bill. They should not hold it up so they can chase something that is fraught with problems and, according to a Senate Democrat, isn't going anywhere anytime soon.

I thank in particular one of the most knowledgeable Members of the Senate, who is thoroughly conversant with these issues and has recommended this approach, and that is my friend and colleague from Tennessee, Senator CORKER, whom I see is on the floor.

The PRESIDING OFFICER. The Senator from Tennessee is recognized.

UNANIMOUS CONSENT REQUEST—S. 541

Mr. CORKER. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and

Urban Affairs be discharged from further consideration of S. 541, a Dodd-Crapo bill, which would increase the borrowing authority of the FDIC, the Senate proceed to its immediate consideration, the bill be read the third time and passed, and the motion to reconsider be laid upon the table.

The PRESIDING OFFICER. Is there objection?

Mr. DURBIN. Mr. President, reserving the right to object.

The PRESIDING OFFICER. The Senator from Illinois is recognized.

Mr. DURBIN. Mr. President, I am going to object to this unanimous consent request. The reason is that the provision that has been referred to by Senator MCCONNELL, the Republican leader, relative to the Bankruptcy Code is one that is in negotiation at this very moment.

When this measure was called before the Senate last year, there were some who ominously predicted we could be losing some 2 million homes to foreclosure in America. The most recent estimate of Goldman Sachs is that 13 million homes will be lost to mortgage foreclosure in the next 5 years.

The efforts underway to revise the bankruptcy law to provide for authority in that court in specialized circumstances is one to prevent and preclude these foreclosures from occurring. That is actively under consideration. It is included in the House bill that I will subsequently ask to be approved by unanimous consent, and it is one supported by the chairman of the Banking Committee, Senator DODD, as well as many others.

I would hate to see us lose an opportunity to deal with this looming foreclosure crisis by agreeing to this unanimous consent request. I object.

The PRESIDING OFFICER. Objection is heard.

The Senator from Tennessee is recognized.

Mr. CORKER. I will yield to the Senator from Illinois.

UNANIMOUS CONSENT AGREEMENT—S. 541 AND H.R. 1106

Mr. DURBIN. Mr. President, I ask unanimous consent that the Banking Committee be discharged from further consideration of S. 541, the Depositor Protection Act, and that the Senate proceed to its immediate consideration; that an amendment at the desk, which contains the provisions of the House-passed bill, H.R. 1106, be agreed to; the bill, as amended, be read the third time and passed; and the motions to reconsider be laid upon the table, with no intervening action or debate.

The PRESIDING OFFICER. Is there objection?

The Senator from Tennessee is recognized.

Mr. CORKER. I object to this, Mr. President. As was stated, we have a bipartisan solution that many banks across the country are clamoring for—

the banking system is clamoring for. This bill I tried to call up would pass overwhelmingly in this body.

The Senator from Illinois—and I appreciate his persistence—has continued to pursue this cram-down bill, which meets with tremendous opposition in this body.

I just hate that what we are doing is in essence extorting community banks and extorting credit unions all across this country to provisions that everyone knows are very problematic.

I object, and I hope the Senator from Illinois will allow us, at some point soon, to take up this issue that is very important to credit unions, to community banks, to institutions across this country. As a result, it is very important to the men and women all across this country who are concerned about their jobs, concerned about credit. This is something we can do together to change the atmosphere of the banking community and change our country in the process. But it appears we are not going to have that opportunity today. I hope the Senator from Illinois will give us that opportunity in the near future.

The PRESIDING OFFICER. Objection is heard.

The Senator from Missouri is recognized.

Mrs. MCCASKILL. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

GREED

Mrs. MCCASKILL. Mr. President, as we look around at the problems we are facing in this country now when it comes to our economy, all of us are trying to figure out what caused this mess, what is the root cause of this incredible meltdown in the financial sector of our economy, in our housing sector. It comes back to one simple concept: greed. It is just about a bunch of really greedy people, brought to you by the current executive pay structure we have on Wall Street and in some parts of corporate America. It is the largest part of the problem.

These potential payouts under this corporate structure of pay we have right now are so large that executives at financial institutions, including institutions such as Fannie Mae and Freddie Mac that were supposed to have a public purpose, had incentives to create rules that would reward them no matter what happens. Why did all these exotic derivatives and swaps start happening? Pay. Pay. And greed. Performance, not so much. It didn't matter whether you failed, you got paid anyway. That is the culture that caused the problem. Failure and you walk with huge money.

These AIG bonuses are just one symptom of this very serious illness that is gripping our economy and harming our competitiveness. The Merrill Lynch bonuses, which I stood on

the floor and railed about a few short weeks ago, were exhibit B. Those guys failed, and they made sure they got the money and walked with it before Bank of America took over. They moved up their bonuses. Retention? Not so much. It doesn't have much to do with that. These AIG bonuses—52 of the people had already walked out the door when they got the money. We weren't paying them to stay; they had already left.

Our competitive disadvantage in this regard is real. Two of the most productive competitors to our country, Germany and Japan—their trade surplus per capita is the highest. Do you know what their average corporate pay is? It is 10 or 11 times the average worker's. What is it in the United States of America? It is 400 times the average worker's.

We need to get back to our American values of hard work equals success, equals financial reward—not failure and you get paid anyway. It is most insulting on the American taxpayer's dime when it comes to Merrill Lynch and AIG.

There is a great column in the New York Times today by David Leonhardt. I recommend it to my colleagues. In that column, he makes the following statement, and I paraphrase: Stop the deference to this culture. Stop the deference to Wall Street. Treasury, can you hear me? Stop the deference to the culture of Wall Street. Be bold, stand up to them.

That deference has now created a cold anger of populism that is going to make it very politically difficult for us to do anything else to free up our credit markets that are so essential for our economy to survive.

America's economy has a hangover from the drunken greed of high pay and bonuses for failure. Sober up. Sober up, folks, because the American people are paying too high a price.

I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Ms. MIKULSKI. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

AIG BONUSES

Ms. MIKULSKI. Mr. President, AIG is in the news. If you want to know what I think AIG stands for, it is "Ain't I Greedy." If there were ever a company that stands for "ain't I greedy," it is certainly AIG.

In the midst of one of the greatest economic turmoils to hit our country, we have a corporation that received \$170 billion in taxpayer money to keep them afloat, and now they want to pay themselves \$165 million in bonuses. Ain't I greedy?

You better believe they are greedy. The very people who helped bring the financial services and structure of the world economy to the brink of disaster

now want to give themselves bonuses. That is like saying to the crew on the Titanic, after they hit the iceberg: We are going to give you a bonus for navigation.

What is this? I want people to know that I am mad as hell and, like the taxpayers, I don't want to take it anymore. We need to do something about this.

Right now, we see that over at that corporation, and others that are doing these self-enrichment bonuses, they are the very people who brought us near financial bankruptcy, and they are now demonstrating moral bankruptcy. They nearly bankrupted their companies, but they come with bankrupt values and a bankrupt approach to trying to help America out of this situation. If we want bankruptcy modification, let's throw those bums out. Let's make them wear a scarlet B. I am ready to put them in a stockade in Rockefeller Center so all the people who are losing their homes, losing their jobs, losing their health care can come and take a look at them.

You think I am frustrated? I am nowhere near frustrated compared to what my constituents are facing. They are very worried about their future. Senior citizens who saved all their lives and fought in great wars to protect America now have no one to protect their life savings as Wall Street sinks. People who played by the rules and are raising their families and trying to run a small business cannot have access to credit because these guys were busy being celebrity CEOs, celebrity chefs with celebrity wives, and now they want a celebrity bonus. You better believe they are celebrities. Everybody knows who they are.

Also, what so infuriates the people of Maryland and, I believe, this country and we in Congress is there is no remorse about what they did. In a 12-step program, when you have been an addict—and they certainly were addicted to greed and they certainly were compulsive about failure—usually you say: I am sorry, I did wrong. I promise never to do it anymore, and I want to make amends by making it right.

Not these guys. They want more money to do the same. What is it they say to us? My way or the highway. We need to pay bonuses to get people to stay. Why would we want them to stay? They got us into this mess. They show no remorse, and I don't see a lot of competency in getting us out of it.

We need to use the power of our ownership. We own 80 percent of AIG. You know what I think an 80-percent owner ought to do? Goodbye to the people who either do not know how to work to get us out of this mess or are unwilling to help us get out of this mess unless they get a bonus.

Second, I think for those who took these bonuses, we are saying: Don't take the money or, if you have, give it back.

I signed a letter with other colleagues to Mr. Liddy, the CEO, saying: Don't give them the bonuses, and if they got any, to give it back. But if they will not do it, I am saying loudly and clearly that I will support the initiative to tax them at 90 percent of the money they got.

My belief is: You can take it, but we are not going to let you keep it. You can take it, but we are not going to let you keep it. We are going to tax you at 90 percent. If we are 80 percent owners, then we are going to exercise our influence.

I believe we need to show not only the taxpayers that we are serious about being stewards of their money, but we have to show corporate America they have to get serious about working with the Obama administration and us to get this economy back on track. Then we need to change not only the culture but help change the direction of our economy.

I wish to see change in this country. That is what the voters voted for. Let's start right now, today, by ending this culture of corruption, greed, and self-enrichment.

I yield the floor.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. BURRIS. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

AIG BONUSES

Mr. BURRIS. Mr. President, I rise to express my outrage that at a time of economic crisis in our Nation and around the world, at a time when so many Americans are losing jobs, defaulting on homes, and falling behind in their own payments, they are paying into a system doling out multimillion-dollar bonuses to employees at AIG.

Many of the same employees receiving these lavish payouts are the same ones who brought their company to the edge of collapse and the economy into the depths of recession.

We cannot let their actions be rewarded—excessively rewarded—with the multimillion-dollar bonuses paid by the taxpayers.

Time and again, we have gone back to our constituents and asked them to sacrifice to make ends meet. Now we demand the corporate executives do the same.

As American families struggle to balance their own checkbooks at kitchen tables all across America, the employees of AIG walk out of their offices with \$165 million in bonuses so far and are on track to take home an estimated \$450 million by the end of this year—free money that they did not earn and certainly do not deserve.

It is now time for those executives who, through their reckless greed and irresponsible actions, have jeopardized our economic security to share the burden in rebuilding this economy. If this

company and others like it fail to recognize the outrage and the frivolous nature of these taxpayer-funded bonuses, Congress will intervene and act on their behalf.

Yesterday, I joined my Democratic colleagues in sending a letter to the CEO of AIG, Edward Liddy. We asked that Mr. Liddy take a reasonable look at these excessive bonuses and requested that he act to renegotiate them.

We also warned that if he chooses not to act immediately, we will take action to recoup the American taxpayers' money through punitive legislation.

Chairman BAUCUS has signaled he is poised to move forward with legislation that he and Senators GRASSLEY, WYDEN, and SNOWE are drafting to allow the Government to recoup this money for taxpayers by subjecting the bonuses to severe tax penalties.

At the same time we are correcting the payouts of the past, we have been working with the current administration to put in place new standards of accountability for the future.

As part of the American Recovery and Reinvestment Act we passed last month, we asked the Treasury Department to establish new guidelines regarding executive pay and luxuries. Just last week, we reiterated the urgency in a second letter to the Treasury Department asking that they swiftly complete this project and announce these new standards.

In addition to these steps, let us resolve to work in partnership with the Obama administration and the Senate Banking Committee to take up a strong Wall Street accountability bill as soon as possible.

Our responsibilities lie with the citizens we represent. If we are successful in taming the greed of Wall Street, we will have gone a long way to safeguarding the economic interests of those we represent and those for whom we work—the people of the United States of America.

I yield the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BURRIS). Without objection, it is so ordered.

HEALTH CARE REFORM

Mr. GRASSLEY. Mr. President, I think our colleagues know that the issue of health care reform is hopefully on a fast track in the sense of getting something done this year. This is a very big project to get underway. Senator BAUCUS and I have laid out an ambitious schedule for enacting a bipartisan health reform bill, and I think there are a lot of facets of it that we

have to expect people who are not on the committees—Senator KENNEDY's committee on the one hand and Senator BAUCUS's committee on the other hand—will have to take into consideration. I am asking, through a series of speeches I will give this spring, for people who perhaps don't think about the issue of health care reform because they do not serve on the committees to think of various things.

Today, I wish to address an issue we often read about in newspaper accounts—and the most recent one comes from a Wall Street Journal article I had a chance to read—that comes up as a reminder when people think about health care reform that we ought to take into consideration. I often refer to Canada, I suppose because a lot of Americans are familiar with the health care system in Canada, and we have a lot of our constituents who ask us why we don't put in place what they have in Canada. We refer to that system as single payer. We often run into people who say: Well, don't do what they are doing in Canada. I think a lot of our colleagues here would support single payer. So obviously, when these things are discussed in America at the grass roots level, I think we ought to be constantly reminded of this here as we debate health care reform, and a lot of our colleagues need to be thinking about this a long time before legislation comes to the floor.

We have a lot of work ahead of us if we want to see meaningful legislation that will accomplish our three main goals of health care reform: lower cost, expanded coverage, and better quality.

Let me say that again: Lower cost, expanded coverage, and better quality.

As we roll up our sleeves, it is helpful to look to our neighbor to the north, Canada, for some lessons about what works and what does not work. Some of the proposals that are being discussed—the public plan option, rationing of care, and a Federal health board—will make our current market-based health care system that we have in the United States more similar to the Canadian health care system. Some like that. Some do not like it. My purpose is to be raising questions that our colleagues ought to be considering.

The Canadian health care system might seem like a good idea to some of my colleagues, but this should make anyone who values access to care and the doctor-patient relationship very nervous. Canadian patients often wait months or even years for necessary care. It has become so bad that some patients are suing the Government in Canada to gain access to care. One Ontario man suffering from headaches and seizures was told he would have to wait 4½ months for an MRI. Instead of standing in line, he did what a lot of Canadians do. He traveled across the border to Buffalo for an MRI. It was there he discovered he had a malignant

brain tumor. When he returned to Canada, he was told again it would be months before he could have surgery, so once again he traveled to Buffalo, for surgery. Another Canadian man waited in pain for a year before he could see a doctor about his arthritic hip. Once he finally saw the right specialist he was told that he would need a state-of-the-art procedure to resurface his hip, but sadly the Canadian Government told the 57-year-old gentleman he was “too old” to get the procedure. He was also prohibited from paying for the surgery with his own money. Similar to so many other Canadian patients, he is taking his case to court.

These court cases gained traction in 2005, when the Canadian supreme court ruled that patients suffer physically and psychologically while waiting for treatment in Canada's Government-run system. The court also concluded that the Government's controls over basic health care services impose a risk of irreparable harm and even death.

As some people propose that the Government take a more active role in our Nation's health care system, I hope we can agree that access to a waiting list is not access to health care. We all agree we need to fix our health care system but, as we try to fix it, let's not make it worse. Let's learn from our neighbors to the north. Let's not force patients in America into a one-size-fits-all Government-run system.

COMPARATIVE EFFECTIVENESS RESEARCH

I would like to speak on another matter, about an important provision tucked away in the \$1 trillion spending bill that passed last month. During the debate, Members spent a lot of time talking about big-ticket health care provisions—Medicaid, COBRA, Health IT. But one issue that did not receive enough attention was a term that a lot of our colleagues are not familiar with, but every colleague needs to become familiar with—this phrase “comparative effectiveness research.” I still haven't figured out how spending money on comparative effectiveness research is actually stimulative, but this is one of those things that probably should not have been in the stimulus bill—but it was there and is now law.

I am even willing to guess that a lot of Members do not even know what comparative effectiveness research actually is, but in the so-called stimulus bill, we increased our investment in this research from about \$30 million to \$1 billion. That is over a 3,000-percent increase for something a lot of Members don't know about and can't even define—and I am not sure I want anybody to ask me right now to define it in the purest sense. This makes me a little nervous.

Mr. President, \$1 billion is a lot of money, but maybe it is money that even people in comparative research might not even know what they are spending the money for.

Some policy experts have expressed concerns that this drastic increase in funding will help establish the United States version of England's National Institute for Health and Clinical Excellence, also referred to as—I don't know whether the English pronounce it "nice" or "niece," I am going to say NICE.

So you are not misled, many patient groups consider NICE to be anything but nice. NICE was created by the British Government in 1999 to decide what treatments, prescription drugs, and medical devices the British Government is going to pay for. In other words, you are having bureaucrats and/or politicians interfere in decisions that in America we normally leave to the doctor and the patient. Put another way, NICE was created for the Government to ration care and ultimately save money.

If the Congress of the United States was passing something to ration care, I will bet a good number of people in this country would get up in arms. For example, a news story printed in August entitled "UK's"—meaning United Kingdom's—"NICE says 'No' to four new cancer drugs." It detailed how the NICE panel concluded that the four drugs would extend people's lives, but somehow you cannot use them because they are not cost-effective.

So, under England's single-payer Government system, patients were prohibited from getting those drugs, regardless of what the patient or their doctor might have thought. It was not until there was public outrage about that decision that made newspaper headlines around the world that NICE then reversed its decision about at least one of those drugs. The three other drugs are still considered too costly to give to patients.

Another article in the New York Times on December 8, 2008, was entitled "British Balance Benefit vs. Cost of Latest Drugs." This article told the story of Bruce Hardy, a British citizen who was diagnosed with kidney cancer. Mr. Hardy was unable to get a particular drug that would have extended his life because NICE determined the drug was not "cost-effective." That is because NICE has decided the British Government can only afford to pay about \$22,000 for every 6 months of life.

Get this. The Government of England is putting a value on life of about \$22,000 for every 6 months of life. This may be acceptable in a government-run single-payer health care system, but here in the United States only two people should be involved in deciding what treatment, drug or device to use, and those two people would be, on the one hand, the doctor; on the other hand, the patient.

We do not need the Federal Government standing between patients and their doctors. We do not need bureaucrats in Washington denying patients

with terminal cancer access to the newest and most promising experimental drugs. We do not need the drug companies to have undue influence over our system either.

I think my work overseeing, as congressional responsibility dictates, the Food and Drug Administration, gives me some authority to speak in this area, that drug companies should not have undue influence. I have been a leading advocate for increasing oversight of drugs and device manufacturers. In fact, I have introduced legislation to make manufacturers report payments to patients so we can make sure we do not have conflicts of interest getting in the way of high-quality care. I have also supported drug importation and legislation to prohibit brand-name manufacturers from gaming the system to prevent lower cost generic drugs from getting to the market. So I am not down here today to defend the drug companies or device industry. They can do that on their own, and I think they do it very well. But I think it is legitimate to be concerned about patients. I don't want some faceless, unelected Government panel keeping patients in Iowa or anywhere from getting the lifesaving treatment they need.

At this time, I ask unanimous consent to have printed in the RECORD a letter I received from 60 patient groups, from the breast cancer advocates to muscular dystrophy, to name two, expressing concerns about using comparative effectiveness to ration care.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

JANUARY 26, 2009.

Hon. DANIEL INOUE, *Chairman*,
Hon. THAD COCHRAN, *Ranking Member*,
Committee on Appropriations, The Capitol,
Washington, DC.

Hon. TOM HARKIN, *Chairman*,
Hon. ARLEN SPECTER, *Ranking Member*,
Committee on Appropriations, Subcommittee on
Labor, Health and Human Services, Education, and Related Agencies, Washington,
DC.

DEAR CHAIRMAN INOUE, RANKING MEMBER COCHRAN, CHAIRMAN HARKIN AND RANKING MEMBER SPECTER: We are writing to urge you to ensure that any comparative effectiveness research (CER) included in the economic stimulus package establish a legislative framework that is strong and patient-centered. The goal of CER should be to arm individual patients and their doctors with the best available information to help assess the relative clinical outcomes of various treatment strategies and alternatives, recognizing that this will vary with circumstances. When used appropriately, comparative clinical effectiveness information can serve as a valuable tool that can contribute to improving health care delivery and outcomes by informing clinical decision making. By focusing on quality of patient care, such research also can help us achieve better health care value. However, we are very concerned that the House legislation and accompanying report language could have unintended and negative effects for pa-

tients, providers and medical innovators, leading to restrictions on patients' access to treatments and physicians' and other providers' ability to deliver care that best meets the needs of the individual patient. Rather, we believe any provisions related to comparative effectiveness should:

Focus CER on comparative clinical benefit, rather than cost-effectiveness. Any legislation should state that funding will be used only to support clinical comparative effectiveness research, and define clinical comparative effectiveness as research evaluating and comparing the clinical effectiveness of two or more medical treatments, services, items and care processes and management. Additionally, CER should not encourage a generalized, "one-size fits all" approach. Rather, it is necessary to design studies and communicate results in ways that reflect variation in individual patient needs, that help patients and doctors make informed choices, and account for differences among patients including co-morbidities, sex, race and ethnicity. Recognizing these differences is important to allowing patients optimal treatment today and to encouraging the development of innovative targeted therapies which will advance personalized medicine.

Be conducted through an open and transparent process that allows for patients, providers and other stakeholders to participate equally in governance and input, starting from the research planning stage. There are many challenges in successfully conducting and communicating high-quality, patient-centered CER. Therefore, comparative effectiveness programs should include transparent decision-making procedures and broad stakeholder representation to enhance the credibility and usefulness of such studies.

Ensure that research supports providers in delivering the best possible care to their patients. To maintain a focus on patient and provider needs, the research entity should not engage in making policy recommendations or coverage decisions. Patients may respond differently to the same intervention and the needs of the individual must be taken into consideration. Imposing rigid, federally-proscribed practice guidelines, which fail to recognize such variations, among patients can lead to poor patient outcomes and increased health care costs.

Comparative effectiveness information that reflects interactions among all of the various components of the health care system has the greatest potential to empower clinicians and patients to make more appropriate decisions. In addition to comparing scientific treatment interventions, research should also focus on how innovations in care delivery models, such as disease management programs, may produce better health outcomes.

We look forward to working with you to create a system that improves information about clinical outcomes, ensures that patients continue to have access to life-saving treatments and the tools necessary to advance a better quality of life for all Americans. Thank you for your consideration.

Sincerely,

Mr. GRASSLEY. I agree we need to lower the overall cost of our health care system. We need to improve quality. It is true we spend more money, about twice as much more than other developed nations in the world, and still rank poorly in many health care indicators. But having the Government ration care is not the answer. In fact, the Congressional Budget Office concluded that comparative effectiveness research would only save 1/10th of 1 percent of the total health care spending.

Let me remind you when I started out I was saying I want my colleagues to become familiar with comparative effectiveness research because this is something we are going to be dealing with in the legislation later on this year, and we just put \$1 billion into this project as opposed to \$30 million previously.

If Congress is going to spend this \$1 billion on this research, let's not bill it as some magic bullet to control health care spending because the Congressional Budget Office—and I hope you know they are God around here, they are God around here because if they say something costs something, it costs something. If you want to overrule them, it takes 60 votes to overrule. So what they say counts. If we are going to spend that \$1 billion, we have

to make sure it is improving quality and informing patients and providers. If Congress is going to spend \$1 billion on this, let's not establish the United States version of the United Kingdom's government-run National Institutes of Health and Clinical Excellence that I have been referring to by the acronym NICE. Let's not set up a system for Washington dictating to your doctor what treatment to prescribe. If we are going to do this, we have to do it right. Comparative effectiveness research should be about comparing clinical treatments and then letting your doctor decide the best way to treat it.

I am not up here saying there should not be any comparative effectiveness research. I am here to say it should not be a subterfuge for some bureaucrat or politician deciding who is going to live and who is going to die. It is information for doctors and patients. It should be done in the most open and transparent process possible.

Finally, the research should be used to get information to doctors and patients about the best treatment.

It should not be used for Washington to make policy or to decide what treatments the government will or will not cover. I hope we can agree the Federal Government should not be in the business of determining the value of a person's life, as I indicated to you this outfit in the United Kingdom decides that your life is worth \$22,000 per 6 months.

Clinical comparative effectiveness can be a valuable tool in creating a more efficient health care system, but let's make sure we use this tool wisely. I yield the floor.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. SESSIONS. Mr. President, I ask unanimous consent to speak as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

AIG BONUSES

Mr. SESSIONS. Mr. President, I first would like to say a thing or two about the bonuses that have been paid to the AIG employees, those persons who are in the specific division whose actions led to the demise of what was once considered a great insurance company.

No doubt about it, that was a very serious error, and now as a result of agreements made, apparently sometime ago, they are going to receive bonuses. Everybody has been upset about it. So have I.

I said Monday on this floor the only thing I felt like giving them for free would be a free lunch and a free bed somewhere in a penitentiary. I know the Presiding Officer is a former prosecutor and has sent some people to the penitentiary. I hope they are not guilty of criminal activities, but that is how I feel about it.

But the reason we are in this is because of an unwise act. That act was—

beginning with Secretary Paulson, President Bush's Secretary of the Treasury, continued now under Secretary Geithner, President Obama's Secretary of the Treasury—taking over AIG.

We own 80 percent of AIG's stock. Secretary Paulson picked Mr. Liddy, who had a good record in the past and was off somewhere with his grandchildren, and asked him to come back and try to take over this company and start pumping billions of dollars into it. It now has totaled \$170 billion.

It is unbelievable how much that is, \$170 billion. I would repeat, that is, compared to the Alabama budget, including schools and teachers' pay, \$7 billion a year. We gave one private company, competing with a lot of other private insurance companies in America today that did not get themselves in trouble—we are bailing them out. So we should not have done that.

Now, when Mr. Paulson came before this body and asked for this power to get \$700 billion to spend as he wished, I objected. As just a Senator, I was flabbergasted that he would ask for such unlimited power. Not one time did he hint that he was going to buy stock in an insurance company. It was to buy the toxic assets from banks. Do you remember that?

So Secretary Paulson, within a few days, a week I believe, had gotten his authority. But it did not say: Mr. Secretary, you get to buy toxic assets in banks—which I did not think was very good anyway and voted against it—it gave him power to do virtually anything. That is another reason I voted against the legislation.

By the way, under oath in a House committee, Secretary Paulson said he had no intention of buying stock. Somebody asked him: What about buying stock in these banks?

He said, no, he did not want to buy stock; that we were just going to buy these toxic assets.

A week later he was buying stock in an insurance company and stock in banks. And to this day, we have not yet bought any of these toxic assets, these bad mortgages that are really the problem that have destabilized our financial situation and have not dealt with yet. That is why there is still instability out there.

OK. So here we are now; we own this corporation. So I asked the question about the bonuses at AIG. Apparently, they got a contract. By the way, when we passed legislation here, it was with a Democratic majority. Somewhere in conference they put in language in the legislation that basically said bonuses would be honored if they were entered into before a certain date. These bonus contracts were entered into before that date.

So now we have all of these protestations and all this angst and all this outrage about bonuses, and we have to

do something about it. I am outraged, too, really but have a little perspective. The amount of the bonuses are one-thousandth, less than one-thousandth of the amount of money we put in this corporation that is at great risk today. And that is a galling issue for all of us, to have this division, the bad division in the whole fine insurance company, taking this company down, and they get the bonuses. It is outrageous. It really is. But the truth is, it appears there is some contractual right for them to have it.

So I would ask, what about the folks in these companies who are paid too much? Maybe we ought to have debate on the Senate floor about how much every employee of AIG should be paid or how their bathrooms should be configured or whether they should even have a private bathroom or how many businesses they ought to have or what kind of cars they should drive, whether they should have jet airplanes, whether they ought to be on Manhattan or some cheaper place in Brooklyn.

I mean, what we are going to enter into is these have become political decisions because politicians own the company. This is a warning for us. We have to be careful about buying stock in corporations. I am telling you, it is not a good policy. I do not believe it was justified in this circumstance. I think history is demonstrating that.

I am worried about it. We need to get out of AIG. How are we going to do it? I think the way you do it, and the way it should have been done from the beginning, is the company should have gone into chapter 11 under the Bankruptcy Code. You would have had a Federal bankruptcy judge bring all of them in, raise their hands under oath, testify to the financial condition, how this all happened, what parts of the company are good, valuable, prosperous, what parts are sick and in danger.

Then we could have figured out as a government how we could help with the sick and toxic parts, get rid of the others and let all of that go, and we would not have been running this company.

So now we are going to tax them. I am not sure how this has been written, but we are somehow going to identify the several hundred people who got bonuses, and we are going to tax them. We might as well put their names in the RECORD. I do not know; it is probably unconstitutional. It really is. It is a real constitutional question, certainly a policy question, that the Congress is going to abrogate a contract whether we like it or not. But a bankruptcy judge can. A bankruptcy judge has constitutional power to abrogate a contract. I am certain a bankruptcy judge would have invalidated the contract for bonuses for the people in this division. They do not have the money.

The only reason they are afloat today is because we bailed them out.

They would not have jobs if we had not bailed them out. This whole thing would have been done differently. So I am worried about what we are doing.

THE BUDGET

Mr. President, I am also worried about the budget. The President has submitted a budget. It has come over to us now. It is in a bound book, slick cover. It sets out his agenda for the future. It is an important document, and it sets out his priorities and his direction he wants the country to go.

I am a member of the Budget Committee, and we will be marking that up and offering amendments to it next week. But the American people need to know that the financial condition of our country will be altered to a historic degree if this budget is passed. I am not just saying that. I am saying, read the budget. That is what it says.

I will share some thoughts about it. I think there is a growing bipartisan consensus, and certainly at least a concern on both sides of the aisle, that the budget deficits and spending levels are unsustainable; that is, continuing these levels of spending will destabilize this country, weaken the value of our dollar, perhaps kick off inflation, and in many other ways erode confidence in the United States as a government of integrity and financial wisdom and management that can be relied on.

So while American families are out there right now saving a good bit more than they have in years past, watching their pennies, while American cities and towns who have been in my office this week and are telling me they are seeing a 6 or 7 or so percent reduction in sales tax revenues and revenues for their towns, they are managing well, and they are getting by. They are postponing some things they would like to have done this year until they get a little more money in, and they are not going out of business. They heard there was some free money in the stimulus package. They wanted as much of it as they can get. Fair enough. But, you know, they are getting by.

Our Government is increasing spending to a degree to which we have never seen before. This budget calls for \$3.6 billion in spending, which is, in effect, a 20-percent growth in nondefense programs. I am talking about the discretionary programs under our control that we deal with from 2008 levels to 2010 levels, 20 percent.

At that rate, of course, that is 10 percent a year, and with a 7-percent growth rate per year your money will double in 10 years. This is the track we are on. It is a huge baseline budget increase to pay for this expansion of Government.

The budget imposes or presumes \$1.4 trillion in new taxes. That includes a national energy tax similar to the one the MIT experts predict would cost working families \$3,100 per year. That is almost \$300 a month for the average

family for this tax. So despite these taxes, the budget will require even more borrowing. We will go even further in debt despite the tax increase.

We would double the debt held by the public in 5 years. I mean, the total American debt we have today would double in 5 years and triple in 10 years. Our budget is a 10-year budget. It projects what this administration believes should happen over the next 10 years. That is what they project will happen.

Under this plan, starting in 2012, the United States will pay \$1 billion a day in interest to our creditors, the largest of which are China and Japan outside of our country. That is \$1 billion a day in interest on this surging debt we have.

So, in summary, I believe it is fair and honest to say this budget spends too much, it taxes too much, and it borrows too much. The administration has promised the budget would be free of accounting tricks and gimmicks, but they have not met that standard either. On the one hand, we have been told repeatedly by the administration that we face the gravest economic crisis since the Great Depression.

On the other hand, his budget assumes that unemployment will not rise beyond today's level and economic growth will not substantially fall. I cannot accept and I do not buy the rhetoric of imminent economic disaster. I have not believed that is likely. I still don't believe it is likely. I know we are in a difficult time, but few, if any, economists would agree with the budget's prediction and assumption that unemployment will stay at today's rate of 8.1 percent or that the gross domestic product this year will only decrease by 1.2 percent. The administration's rosy economic picture permits them to assume, therefore, greater revenue. If you assume you have a higher growth rate, a lower unemployment rate, more people are making money, more people are working and getting paid, less people are on unemployment compensation, you assume you have billions more dollars to spend on whatever you would like to spend it on.

An independent blue chip group that predicts unemployment and predicts GDP is predicting GDP will decline more than twice 1.2 percent, and they are also predicting the unemployment rate will hit 8.9. I believe our Congressional Budget Office is predicting unemployment will cap out at 9.1 percent. I have seen some figures of 9.4 percent. I am hopeful we will come in under 10 percent. I believe we will.

To build on good feelings here, I will note that under President Reagan, when Mr. Volcker was Secretary of the Treasury, they realized they had to confront and break the back of surging inflation. Unemployment hit 10.9 in the early 1980s. It kicked off, though, a

sound economy, and for 20 years we have had steady growth after collapsing the unacceptable inflation rate.

The best estimates I am seeing do not predict economic disaster, but they certainly don't predict the kind of minimum economic slowdown these numbers are assuming. When those numbers prove to be off the mark, the result will be deficits higher than the administration is predicting in their own budget. That is what I am saying. If you look at the budget over the next 10 years, that is what really worries me.

In 2004, President Bush, after 9/11 and after the recession that occurred there, his deficit hit \$412 billion. That was the biggest deficit we had since World War II. He was roundly criticized for that. I wasn't very happy with it either. I liked President Bush, but I thought that was too big a deficit. It dropped until 2007, when it hit \$161 billion.

Last year, President Bush sent out the \$300 checks and the \$150 billion in deficit spending on top of our other deficit to try to stimulate the economy. It didn't work. He sent out that money. Everybody got the little check. Whatever they did with it, it didn't do much good. The debt jumped to \$455 billion. So last year, September 30, the deficit was \$455 billion, the largest we have ever had, perhaps including World War II. This year, there is uniform agreement.

The Congressional Budget Office is scoring that at September 30, our deficit—the amount of money we spent, less the amount of money we have taken in in taxes—will be \$1.8 trillion, one thousand eight hundred billion, four times the highest deficit we ever had last year. That is a serious matter, not a little bitty matter. The budget the President sent us projects that next year—and he does this over 10 years—it will be \$1.1 trillion. It begins to drop down to that and hits \$533 billion in the fourth year. That is the year he said he cuts the budget deficit in half.

The reason the deficit was particularly high this year is the money we spent for the financial bailout of Wall Street that they bought AIG with and other bank stock. The Congressional Budget Office said we are going to lose about \$250 billion in that deal. We will get some of it back. They scored in this year's budget \$250 billion for that. We have bought Freddie and Fannie, taken over and guaranteed all those loans at those two huge financing institutions, which were quasi-private, basically private, we have taken those over now, and CBO has scored about another \$250 billion. They are putting all of that in this year. And then we passed, a few weeks ago, \$800 billion—pure stimulus spending to send out over the country. You heard it was for roads and bridges. Only 3 or 4 percent went for roads and bridges. The rest of it went for all kinds of nice ideas, not very stimula-

tive in the minds of experts. So you add that over the next 2 years of spending, split that out. That is how we get such a high year this year.

One reason we are at a trillion dollars next year is because they are scoring some of that \$800 billion in next year's deficit. At any rate, it drops down, OK? So the fourth year, we are hitting \$533 billion. That is still the highest deficit in the history of our Republic. Then it starts going up. And the budget President Obama gives us projects that in the 10th year, the deficit will be over \$700 billion.

That is why we need the American people to be engaged. Members of Congress are going to have to study the numbers. They are going to have to study the immensity of the requirements of this budget. We are going to have to reject it. We cannot pass such an automatic guaranteed surge in debt. It would triple our total national public debt in 10 years.

This is the beginning. The budget will begin to be marked up next week in committee. It is going to take more than just the committee members to decide what we do. I believe the American people and the Members of this Congress are going to have to get our heads together and figure out some ways to do like our cities and counties. Instead of having baseline spending increase at 7, 8, 10 percent a year, we might go for a year or two where we don't increase at all. Just a little bit of that would have a dramatic impact on the deficit. It is the increases that are killing us. They are projecting increased revenues in the years to come, but they are projecting substantially greater increases in spending.

That is not who we are as a people. We are a people of limited government. We are people of low taxes. We are people of individual responsibility. That is a fundamental American ethic, individual responsibility. The Europeans are more into this Socialist mentality, but we were faced with the spectacle over the weekend of our own Secretary of the Treasury going to Europe meeting with Europeans and upbraiding them because they aren't borrowing enough or spending enough, in his mind, going far enough into debt to stimulate the economy as much as he would like to see it done. They are being more conservative and responsible than we are. It is a matter of real concern.

These are important issues. I hope the debate will continue and all of us will look at the long-term interests of this great Nation and take the steps today that will protect our future.

I yield the floor.

THE PRESIDING OFFICER (Mr. SCHUMER). The Senator from Georgia.

Mr. ISAKSON. Mr. President, I ask unanimous consent to speak in morning business.

THE PRESIDING OFFICER. Without objection, it is so ordered.

FINANCIAL MARKETS COMMISSION

Mr. ISAKSON. Mr. President, we were all reminded yesterday, when news of the AIG bonus payouts hit, of the frustration all of us have and all the American people have with the financial difficulties the Nation has had but also what appear to be at best irresponsible acts taking place by many of the financial institutions that, in fact, received Federal TARP money.

I rise to repeat a call that Senator CONRAD and I made 6 weeks ago on the floor of the Senate. We created a piece of legislation known as the Financial Markets Commission, a commission patterned after the 9/11 Commission, a commission of seven appointed members—two by the President, one by the Speaker of the House, one by majority leader of the Senate and one by the minority leader, one by the minority leader of the House, and then one by the chairman of the Federal Reserve—seven members given 360 days a year, empowered with a \$3 million budget and subpoena power to investigate every aspect of the financial collapse in the United States, whether it is insurance, investment bankers, mortgage bankers, individual managers such as Mr. Madoff in New York or anybody else, and to come back to the American people and to the President a year from now and tell us, to the best of their ability, in a forensic way, what happened. If, in the course of their investigation, they find inappropriate activities, there is the requirement that they refer those to the Attorney General of the United States of America.

It is important that we do this for four reasons. I will go about them briefly.

No. 1, it should be an independent panel that is fully funded and has subpoena power so there is no impediment to gathering facts, finding out the information necessary, and making that report.

No. 2, it should be created by the Congress, but the membership should be appointees who are experienced and knowledgeable in finance, banking, investment banking, and in law, not politicians but professionals who know, just as we had on the 9/11 Commission 2 years ago.

No. 3, there is no question that mistakes were made, but there is no question that some people took advantage of the system. The public expects, I expect, and we should demand that where we find wrongdoing, it is eliminated, pointed out, the individuals who did wrong are held accountable, and we restore some level of confidence in the oversight of our financial system.

No. 4, I think it is time that all of us recognize there is plenty of fault to go around. You could blame a hedge fund. You can blame a Madoff. You could blame an AIG. We have to look in the mirror as well. The second vote I ever cast in the Congress was the vote that

repealed Glass-Steagall, put in the Gramm-Leach-Bliley bill. I thought it was good legislation. So did 99 percent of the House and Senate. In retrospect, by allowing the vertical integration of the financial system from insurance and mortgage banking to investment banking and regular banking, we blurred some of the lines that for so many years had protected the integrity of the financial system in America. As a result of that, situations happened, like AIG and Citibank, where vertical integration beyond the original mission of the financial services of the company attracted more money but it also attracted more greed. And it had no transparency.

I think it is critical, at a time and place where we recognize we have had some significant problems, where the American people know it is going to take us time to recover, for us to have a forensic audit of the financial systems of the United States, the regulatory authorities, the legislative bodies, and any individuals who were part of it so that we can learn from the mistakes that have been made, we can put in the transparency that is necessary to prevent it happening in the future, and we can restore the confidence of the American people in the American financial system.

I urge colleagues to look at the Financial Markets Commission, join Senator CONRAD and myself as cosponsors. Let's begin finding the answers that all of us seek and that the American public demands.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HARKIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AIG

Mr. HARKIN. Mr. President, I am sure my office is not the only one that has been flooded with calls, e-mails, and letters expressing anger—righteous anger—as to what happened at AIG. In fact, the person in charge of my mail told me our e-mails on this issue is running higher than anything that has happened in recent history.

Well, I am not just angry and disgusted at AIG, I am, frankly, kind of dumbfounded by how this has all happened. How in the world could AIG decide to pay retention bonuses worth millions of dollars to the very individuals whose reckless practices caused this meltdown on the global financial system? This truly sets a new gold standard for arrogance and being clueless.

Now, to add insult to injury, the CEO of AIG, Edward Liddy, told the House Financial Services Committee this

morning that these bonuses were “distasteful” but “necessary” because of contractual obligations. Mr. Liddy said he asked the bonus recipients to return half of the money. But he rebuffed the demand of 44 Senators, including me, that he renegotiate those contracts and recoup all of the bonus payments.

Now, for the AIG unit specifically responsible for much of the financial difficulties we are in to receive \$170 billion in taxpayers' money, and then to give these extraordinary bonuses to people who should have been fired a long time ago, is shameful and inexcusable—inexcusable—since the Federal Reserve and the Treasury knew about these bonus payments before they went out but did not act aggressively to stop them.

There is a broader context to the public's anger at AIG's misconduct. Bear in mind we are in the longest, deepest, most destructive economic downturn since the Great Depression. We are now losing jobs at a rate of about 650,000 a month. Millions of Americans are losing their jobs, their retirement savings, their pensions, their health insurance, and, yes, their homes.

But Americans look at Wall Street and Washington, and they see business as usual. They see alumni of Goldman Sachs and Citigroup arranging tens of billions in bailouts for their former Wall Street colleagues. They see corporate executives flying to Washington in expensive corporate jets to ask for taxpayer bailout money.

At a time when their incomes are stagnant, they see a rapidly rising concentration of wealth in the hands of a few, with the average CEO now making 430 times as much as the average worker. They see these hedge fund hotshots making tens of millions of dollars manipulating markets, while they get paid the minimum wage for doing some of the most difficult, draining work imaginable.

They see corporate executives getting gold-plated pensions worth tens of millions of dollars, while, in some cases, the very same corporation is slashing pensions for their rank-and-file employees.

Hard-working, ordinary Americans see these harsh realities and—with good reason—they get the idea there is one set of rules for the little people and a very different set of rules for the privileged and the well-connected and the wealthy. Call it the Leona Helmsley rule.

For instance, look at the double standard for key people at AIG. The Federal Government required union workers at GM and Chrysler—some making as little as \$14 an hour—to renegotiate their contracts and accept lower compensation as a condition for their employers getting taxpayer bailout money. But the compensation contracts at AIG are held up as somehow

sacrosanct and untouchable. Well, this is complete nonsense. Why shouldn't multimillionaire employees at AIG be treated the same as line workers at GM or Chrysler? Why shouldn't they have been required in the first instance to renegotiate their compensation contracts, as well, before we gave AIG all that money? To me, it is a matter of basic fairness and equity.

So the anger of the American people at AIG must be seen in this broader context. Hard-working Americans are sick and tired of playing by the rules and falling further and further behind, while the privileged and the well-connected break the rules and get richer and richer.

That is why the misconduct at AIG—these lavish bonus payouts to people who deserve to be fired—must not be tolerated. It is time for a measure of fairness and common sense.

Mr. President, 73 AIG employees were paid bonuses of \$1 million or more, and 7 in excess of \$4 million. Now we find that a number of these people who got these bonuses already left the company. We were told before the reason for the bonuses was to retain people. Well, we see a lot of these people have already left. So now the reason is because of a contractual—a contractual—obligation.

Well, even if an AIG executive had a contractual claim to a multi million bonus, one would think that contract has been abrogated. It has been a few years since I have been in law school, but I do remember a few things from contracts. Contracts can be abrogated.

For example, Mr. President, if you and I have a contract, and one party does not perform, the contract is abrogated. Contracts also can be abrogated by bankruptcy. We know that. If we have a contract, and one party goes bankrupt, the contract can be abrogated.

Well, let's look at it from those two standpoints.

Nonperformance: Well, it is funny. We have been told about these contracts, but has anyone ever seen one? I am talking about the contracts AIG had with the people who were getting the bonuses. They say they had a contractual obligation. I would like to see one of those contracts. What did it say?

Well, to listen to Mr. Liddy, evidently all the contract said is, if you are alive at a certain date you get a bonus. Now, I say to the Presiding Officer, you know as well as I do, bonus contracts are not made that way. Bonus agreements are made on the basis of performance. Surely, AIG did not make a contract with one of their employees that said: No matter what you do, no matter how much money you lose for this company, no matter the circumstances, we are going to give you a bonus. No one believes that.

So, herewith, I call upon Mr. Liddy to show us the contracts. Let us see

them. Let us see the contract that AIG had with all those people who got bonuses. I would like to see what it says. I would like to see if it just says: If you are alive on a certain date, you get the bonus no matter what you do.

I do not think it said that. I think those contracts said: If you do certain things, you get a bonus; or if you are here, we will give you a bonus to retain you; or you have to do certain performances. I would like to see those contracts.

Then I hear people in our own Government, in this administration, talking about the sanctity of contracts. Well, maybe they ought to go to law school—a couple of them—and find out that contracts can be abrogated. They can also be abrogated if they are unconscionable.

Public policy: This goes way back into British common law. But, again, that is a sort of maybe yes, maybe no. But courts have held contracts to be abrogated if it is in the public good or if it is unconscionable, for example, that these contracts were made. I would say in this case it would be unconscionable for someone who has been in charge of bringing this company down and lost more money than any corporate enterprise in history to receive a bonus payment, especially since it comes from the taxpayers.

Now, it might not be unconscionable if it came from stockholders, shareholders, other equity partners. But when it comes from the taxpayer, I would suggest it is unconscionable in this circumstance. So I do not know who these people are, talking about the sanctity of these contracts, but, obviously, on any one of those three items, surely those contracts cannot be held to be valid.

Now, the only reason these contracts are worth anything at all is because we stepped in and gave them all this money. If we allowed AIG to go bankrupt, these executives would probably not have gotten one cent of bonus. They would not have gotten one cent. So it really is unconscionable they would then take taxpayer money and give these bonuses out.

But, again, I repeat, we need to see these contracts so we can make a judgment as to whether Mr. Liddy is telling the truth. I have gone beyond accepting his word. I want to see the contracts.

Now, again, since AIG seems to have the responsiveness of a mule, it is time to hit them in the head with a 2 by 4. Congress has to step in. And I know the Presiding Officer, the distinguished Senator from New York, Mr. SCHUMER, has worked on a bill that I support that would reach out and get this money back to our taxpayers. I want to compliment my good friend from New York, the Presiding Officer, right now for doing that because basically that is the way we have to get the money back.

Ideally, I would tax at close to all income above \$400,000 not only at AIG but at all other companies that have taken TARP money, bonus or otherwise. State, local and foreign income taxes plus payroll taxes and the federal tax should add up to 100 percent on whatever is over \$400,000.

Now, I know Mr. Liddy asked for them to give back half of the money. To me, that is not acceptable. If somebody got \$4 million, and they are going to give \$2 million back, I am sorry, that is not acceptable. Go tell that to the line workers at GM and Chrysler who was asked to gave up some of their \$14 per hour or gave up some of their pension rights and things like that to get the bailout money.

Well, at any rate, I think there are 44 Senators on a letter, if I am not mistaken, now, I say to my friend from New York that says take those bonuses back or we stand ready to recoup those bonus payments, perhaps with an income tax of 91 percent.

I also say there was an amendment that was added to the stimulus bill, the American Recovery and Reinvestment Act, that limited executive pay at bailed out companies to \$400,000 annually and voided any contracts providing compensation above that level. The Senator from Missouri was the lead sponsor on that. I was a cosponsor on that amendment. It was accepted on the stimulus bill here in the Senate, and then it went to conference. Then it got dropped. Why did it get dropped? When did it get dropped? Who advocated dropping that in conference? I would like to know the answer to that question.

Now, again, you might say \$400,000 annually? Well, that was put in there because that is the salary of the President of the United States. We said nobody working for are TARP receiving company should make over that. You could get \$400,000, but nobody over that. But that was put in the stimulus bill, and then it got dropped mysteriously in conference. I ask, why?

Well, again, I say to the Presiding Officer, I think your work on this issue and I hope we act on the concepts we are urging soon; I do not know when, but the sooner the better—that the tax be as close to 100 percent as we can get. But, obviously, we have to minus the State and other income and payroll taxes that might be owed on that sum. That has to be taken out. I understand that. And, ideally, if some lower paid person, a secretary or someone like that, got—you do not want to bother them either. But you want to get at these people who were meddling and moving these credit default swaps and other financial instruments around and ratcheting them up and giving phony valuations to them. These are the people who should not be getting any of the bonus money whatsoever.

I would also like to see the Treasury become a much more aggressive watch-

dog and defender of the taxpayers' interests. When Wall Street lawyers say that outrageous compensation contracts must be honored—even under dramatically changed circumstances and even when we know the contracts can be abrogated by certain circumstances such as nonperformance and things such as that—we need Treasury lawyers who will say no, who will push back hard, be creative and tough-minded, doing everything possible to protect the taxpayers' interests.

Likewise, when the lawyers say AIG—which we must say now is the Federal Government because we own 80 percent of it. So when you are talking about AIG, you are talking about the Federal Government and taxpayers. So when Wall Street lawyers and the Treasury lawyers say taxpayers must pay 100 percent of payouts to counterparties on derivatives contracts, we need a Treasury that will do all that they can to say no and who will see to it that those counterparts, including Deutsche Bank and other big banks in Europe, have to take a haircut too. They have to share some of the pain. Again, after all, if we had let AIG go bankrupt, Deutsche Bank would have gotten nothing or very little. Yet to permit them to be made completely whole by the taxpayers of this country is not right.

We need to make it clear to AIG—and, again, we are focused on AIG, but we have to say this to all recipients of taxpayer bailout money that business as usual will not be tolerated. Incompetence, recklessness will not be rewarded. It is an insult and an affront to the American people that will not be allowed to stand. Not just at AIG but everyone else who is getting this so-called TARP money. It is time to be fair, and it is time to let the taxpayers of this country know we are going to stick up for them. We are not going to let this business as usual continue.

Again, I thank the Presiding Officer, for the time but also for his leadership on this issue, in making sure we go after these people and get this money back. I just hope we do it soon. The sooner we do it, the better off we are all going to be.

I yield the floor and note the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEVIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOLLOW AUTOWORKERS' EXAMPLE

Mr. LEVIN. Mr. President, much has already been made of the recent action by AIG to distribute \$165 million in bonuses for some of the very employees who contributed to the company's near

collapse, the loss to our Treasury of tens of billions of dollars, and the severe damage to our economy. I joined with 43 colleagues yesterday in signing a letter, which our Presiding Officer was instrumental in writing, to the chief executive officer of AIG to express our outrage that this kind of money could go out the door, when the only reason the company survives today is the \$170 billion in U.S. taxpayer dollars that has been pumped into AIG over the past 6 months.

I recognize that my disgust with this situation is far from unique. I wish to briefly discuss the appalling double standard revealed by the treatment of hundreds of thousands of honest autoworkers who are victims of the current financial crisis, compared to the treatment of a few hundred overpaid financial executives whose poor judgment and greed helped cause AIG's and our Nation's financial crisis.

Right now, in large part because of the mortgage fraud, sleazy lending practices, outrageous financial engineering, and inadequate regulatory oversight that caused the financial crisis, we are in a deep recession. The recession means people aren't buying cars, and many who want to buy a car cannot get a loan because credit is so tight. No one foresaw those circumstances back in 2007, when the UAW last negotiated a labor contract for this country's autoworkers. That 4-year contract was supposed to last through 2011. When the bottom fell out of the economy, the future of the big three auto companies was called into question. The auto industry came to the Federal Government for help, and we offered assistance in the form of bridge loans, with the understanding that all the stakeholders would have to sacrifice to make this a fair deal for taxpayers.

The autoworkers' response was not: We signed a 4-year contract and we are not changing a word.

They could have taken that position, but they didn't. Instead, the workers renegotiated their contract. They agreed to significant reductions in their pay and benefits. They are doing what they can to help their company survive and help get our Nation out of this economic ditch.

Contrast those autoworkers with the AIG executives. When the economy began tanking, AIG's stock nosedived, its assets plummeted in value, and the company lost its AAA credit rating. Due to hundreds of billions of dollars in commitments that AIG had issued, called credit default swaps, but which they failed to support with reserves, AIG's executives came hat in hand to the Government. The Government responded with billions of dollars in aid, not to protect AIG but to safeguard the U.S. economy from the threat posed by an AIG collapse.

AIG's executives, including the financial products division that helped bring

AIG down, were saved from bankruptcy. To recovery from AIG's financial fiasco and repay the Government loans, it should have been clear that everybody at AIG would have to make sacrifices to sustain the company and rebuild the U.S. economy. Unlike the autoworkers, however, AIG's executives didn't step to the plate. The 400 or so AIG employees at the Financial Products division signed employment contracts in the spring of 2008 that promised millions of dollars in bonuses and retention payments. When AIG attempted to renegotiate those employment contracts, the Financial Products executives refused. They demanded their millions, and AIG complied at the same time the company is borrowing tens of billions of dollars from American taxpayers.

This week, according to the information of the New York attorney general, Andrew Cuomo, 73 AIG executives received so-called retention bonuses of \$1 million or more. That is 73 millionaires out of the AIG fiasco that is taking billions of taxpayer dollars to fix. Eleven of those millionaires took the money and ran—they don't even work at AIG anymore.

Wall Street has been out of control for years now, with high-risk financial concoctions and with excessive compensation that is too often unrelated to performance or shareholder value. But the contrast between assembly line workers in the auto industry giving up their bonuses and benefits to keep the big three in business, while executives who drove AIG over a cliff thumb their noses at the very taxpayers bailing them out, is simply too much to go unnoticed.

The greed and chutzpah shown by these executives is reprehensible—unacceptable to me, unacceptable to my constituents and unacceptable to this body and to every American who believes, as I do, that our Nation perseveres through hard times by working toward our common interests and making shared sacrifice. American taxpayers are pouring billions into AIG, even as millions of Americans have lost their jobs. Many more have made sacrifices similar to the autoworkers to help their employers and their families survive.

AIG employees need to be clear: Without the U.S. Government, there would be no AIG, and they would have no job and no salary, let alone a bonus—let alone a \$1 million bonus. In these exceedingly difficult times, AIG executives should follow the example set by the American autoworkers and renegotiate their employment contracts and accept compensation that doesn't shock and offend the American taxpayers who are keeping their company and this economy afloat.

I yield the floor and suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. COBURN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COBURN. Mr. President, H.R. 146 is the pending business; is that correct?

The PRESIDING OFFICER. That is correct.

AMENDMENT NO. 683

Mr. COBURN. Mr. President, I call up amendment No. 683.

The PRESIDING OFFICER. Without objection, the pending amendment is set aside.

The clerk will report.

The bill clerk read as follows:

The Senator from Oklahoma [Mr. COBURN] proposes an amendment numbered 683.

(Purpose: To prohibit funding for congressional earmarks for wasteful and parochial pork projects)

At the appropriate place, insert the following:

SEC. ____ . PROHIBITION ON FUNDING FOR CONGRESSIONAL EARMARKS FOR WASTEFUL AND PAROCHIAL PORK PROJECTS.

Sections 7203, 7404, 13006, 10001 through 10011, and 12003(a)(3) shall have no effect and none of the funds authorized by this Act may be spent on a special resource study of Estate Grange and other sites and resources associated with Alexander Hamilton's life on St. Croix in the United States Virgin Islands, a celebration of the 450th anniversary of St. Augustine, Florida, and its Commemoration Commission, the National Tropical Botanical Garden and the operation and maintenance of gardens in Hawaii and Florida, and a water project in California to restore salmon populations in the San Joaquin River or the creation of a new ocean exploration program to conduct scientific voyages to locate, define and document shipwrecks and submerged sites.

Mr. COBURN. Mr. President, this is the last of the amendments I will offer on this bill. These are specifically five particular directed authorizations and spending that really do not fit—maybe with the exception of one—that do not pass the smell test and do not pass the commonsense test. I have no delusions about how the Congress will handle this. We have demonstrated our inability to choke off our own parochial interests. These are five areas that, I believe, if the American people really knew what they were about, would reject out of hand.

This bill is going to cost the American taxpayers \$11 billion. If we adopt this amendment, we will reduce that by 10 percent.

In this bill is \$3.5 million for a birthday celebration for the oldest city in America, St. Augustine in Florida. That is going to occur 6 years from now. Think about that. We are in one of the most difficult financial times we have experienced. Families are being hit severely with unemployment, declining values of their savings, declining values of their No. 1 asset, their

home, and we are going to authorize \$3.5 million to study how to best have a birthday party in a town in America. It may be a great thing to celebrate this early city in our country, but it is not a great thing to steal \$3.5 million from the next two generations to pay for it. Noting, and I have said this on the floor, that we will have a \$2.2 trillion deficit this year, any example of less than the tightest fiscal ship ought to be made fun of, it ought to be brought forward, it ought to be made public so people can see it.

There is not a whole lot of difference between this and somebody inserting something in a bill to say the people who got the \$176 million worth of bonuses will be able to keep them. That is what happened in the conference. That is why the AIG problem is there, because some Member of Congress made it happen that way. We should be just as outraged when we see these kinds of projects earmarked in an authorization bill that do not pass the smell test either.

There is \$5 million for botanical gardens in Hawaii and Florida. We don't have to spend that money. That is an option. This is directed authorization to make sure when it comes to appropriations we know where it is going to go. It is going to go to somebody's benefit—some Congressman's benefit or some Senator's benefit.

So in this bill is a birthday celebration, \$5 million for botanical gardens in Hawaii and Florida, a controversial issue, to say the least, in terms of spending over \$1 billion on a settlement claim on a river. Prior to a dam being placed there, they already had a marked decline of the salmon run in it. That is what the historical records show. But we have a lawsuit and a Federal judge who says we are going to do this. By the way, we are going to put at risk \$11 billion worth of commerce in some of the most productive areas of California. The metric on spending the \$1 billion that has been agreed to is when you have 500 salmon. That comes out to over \$2 million a salmon. I have not figured that up by ounce, but it is pretty expensive salmon. It is not to say we should not do good things and right things to maintain fisheries and to maintain natural salmon runs. The fact is, this happened a long time ago, and it was diminished before there was ever an imprint in terms of damming in the waterway.

There is also \$250,000 to study Alexander Tyler's boyhood home in St. Croix, Virgin Islands, with the idea of making it a national landmark. First, it is not a priority—it cannot be a priority for us. It cannot be a priority that we would spend money right now at this time when we are facing these significant difficulties financially, when, in fact, we are going to borrow \$7,000 per person across the whole Nation more than we spend this year—

\$7,000. That works out to almost \$30,000 a family that we are going to borrow against our kids and our grandkids. And then we have the gall to say it is OK to spend money on this.

The final aspect is a study and an authorization to allow an unspecified amount for a new national ocean exploration program and undersea research program within the National Oceanic and Atmospheric Administration that is tasked to conduct scientific voyages to locate, define, and document historic shipwrecks. There is \$320 million authorized to be spent over the next 7 years on that. It may be something we want to do when we have our ship aright and our ship is not sinking, but to authorize and spend that money now on a new program to look for sunken ships does not pass the commonsense test this body ought to be about.

We already have the following that documents shipwrecks, old ones as well as new ones: the U.S. Coast Guard, the Library of Congress, 12 private museums, 8 libraries, 8 historical societies. And those are just a few. There are other Government sources, including the National Archives and Records Administration, Internal Revenue Service, Office of Distribution Services, the Defense Mapping Agency, the Smithsonian Institution, the Naval Historical Center, and the Federal Building, Great Lakes Courthouse papers. There are 12 separate museums and 8 other libraries and historical societies. There are 22 publications out this year on shipwrecks. Oh, there are nine U.S. Government shipwreck publications, and there are eight other additional sets of records in custody of the National Archives.

The other thing that this bill does is it throws five earmarks right at President Obama and says: We don't care what you said, we are going to do it anyway. It goes against his pledge. It goes against our pledge. It goes against the idea of change you can believe in. It diminishes hope when we have items such as this in this bill. It is discouraging to the people who are out there struggling that we would put such things in this bill. I understand they are authorizations and they may not happen. I agree that you ought to authorize earmarks before we do them. But I can tell you, I don't think these pass any resemblance to anything that has common sense.

I will talk about this again in the morning. Tomorrow, I also plan, before the final vote on this bill, to list specifically over 30 wilderness areas that the wilderness study said should not be transferred into wilderness as we do in this bill. Hear me clearly: 30 new wilderness areas which the study said should not be included in the wilderness area that we have included in wilderness in this new bill. Why spend the money on a study if you are not going to pay attention to it? Why did we waste all that money?

I will go through a limited but thorough critique of the bill again tomorrow.

I know the ranking member would like to speak and to praise a species of stamina and courage that I would only hope we would reflect in the Senate.

I yield the floor.

The PRESIDING OFFICER (Ms. CANTWELL). The Senator from Alaska.

TRIBUTE TO LANCE MACKEY

Ms. MURKOWSKI. Madam President, my colleague from Oklahoma has given me a fine lead-in this evening to rise and tell an amazing story of an Alaskan dog musher named Lance Mackey and the story of his dog teams that carried him to yet another record-breaking victory today in the toughest race on Earth, and that is the Iditarod.

The story of Lance Mackey is not only amazing because of his skill and his determination in the sport of dog mushing, but Lance Mackey has also overcome some very incredible personal challenges. He had a victory over cancer that preceded his victories in the sport of dog mushing.

Lance is a lifelong Alaskan. He married his high school sweetheart. He has four children.

He was diagnosed with throat cancer after finishing in 36th place in the 2001 Iditarod sled dog race. After that race—the man doesn't give up—he had extensive surgery and radiation treatment.

He attempted to complete the Iditarod the following year, in 2002, after this surgery, but he had to scratch. He had to drop out of that race, taking time off from dog mushing to recover from his cancer and the surgery. He is now considered cancer free. He went on to win the Yukon Quest, one of the two major sled dog races in Alaska. He did this in 2005 and 2006. Then Lance Mackey went on to do what no one had done before and what most people consider absolutely impossible. In 2007 and 2008, he won both the Yukon Quest and the Iditarod, two incredibly grueling races, with only a week and a half in between each race to rest before he moved to the next event. For the first time in the history of the races, Lance had won both races, and he did so 2 years in a row. And today, Lance Mackey won the Iditarod yet again.

For those of you who may be unfamiliar with either the Iditarod or the Yukon Quest, these races are the world's two longest sled dog races. Both races span over 1,000 miles of really tough mountains, rugged mountains, frozen tundra, dense forests. These are true tests of dedication and determination. Not only does the rugged terrain pose immense obstacles, but they have the weather that factors in. It is starting to turn a little bit like spring around here, but back home it is still winter, and these mushers face temperatures which frequently drop to 30

or 40 degrees below zero. And then they have the wind that kicks up, winds gusting up to about 100 miles per hour. So you can imagine what the wind chill factor is as you are racing those dogs in the weather and the elements.

The annual Yukon Quest sled dog race is a 1,000-mile international trek. It goes from Fairbanks, AK, over to Whitehorse in Canada. Lance Mackey and his team of canine athletes have won this race 4 years in a row.

The race Lance won for the third consecutive year today is the 1,100-mile Iditarod sled dog race. This race starts in Willow, AK, and ends up in Nome, AK. The race commemorates the 1925 diphtheria serum relay. They ran dog teams in a relay to pass along a vaccine for diphtheria. They needed to get it from Anchorage, where it had come in by ship, to Nome. At that point in time, we didn't have the ability for air transport to get into Nome. So how do you move it and how do you move it quickly? Well, we resorted to a series of dog teams to move that serum north and to save the lives of those who were infected.

Today, the Iditarod is no longer run as a relay, but it is a race of individual dog sled teams. This 1,100-mile race takes the mushers into some incredibly beautiful areas. The journey they travel through—the Alaskan wilderness—is exceptionally beautiful. But as I mentioned, you not only have tough terrain but you have brutal weather. This year has been particularly tough, with the snow and the wind. It has caused delays, it has caused real setbacks with the mushers and the teams as they have been trying to go through high snowpack. There have been some accidents, there have been some sleds that have been lost, and it has been very difficult. We had some near hurricane-force winds that forced dog musher Lou Packer and his dogs to be airlifted to safety, and he and his team had to quit the race. He described what I would call life-threatening weather conditions by saying:

We were climbing over this mountain and we got hit by this wind that hit us like a hammer. The temperature dropped—started plummeting—and I lost the trail. And the wind started to build and build, and then the wind got bad, so I climbed in my sled and it was pretty much a survival situation at this point. I threw all the gear out of my sled and climbed in and zipped it up; it was probably 30, 35 below, I have no idea.

These are the types of individuals who train all year long with their dogs to prepare for this incredible race. So it is not just the musher whose success we celebrate but it is these incredible four-legged athletes that are absolutely astounding.

Some of the other mushers out on the trail are pretty extraordinary folks, such as John Baker, out of Nome, Sebastian Schnuelle and Aaron Burmeister. They were describing other conditions along the trail.

Schnuelle described it as brutal, but he said:

At times the wind was blowing so hard out of Shaktoolik that his dog team moved sideways.

Well, when you have about 15 or 16 dogs pulling a loaded sled and a musher and you have winds that are blowing you sideways, you know you are in some weather. He commented further:

First we had snow and wind. Now we have wind and wind.

Well, earlier this afternoon, thousands gathered at the famous burlwood arch on Front Street in Nome, AK, to cheer on Lance Mackey as his dogs carried him to victory over his extremely talented and resilient competitors from all over the world. This is an international race, most absolutely. Lance and his team of canines completed the race a little less than 3 hours short of 10 days.

Imagine yourself standing on the back of sled runners going over mountain ranges, going through ice and snow, in temperatures of 30 below and the wind howling at you. And that is fun, ladies and gentlemen. This is man and dog against Mother Nature, and the best teams sure are winning.

Alaskan newspapers tell a story of Lance's fired-up dog team after taking his only 24-hour break during the race. He broke in a town called Takotna. After the layover was completed—you have to rest for 24 hours, mandatory, because sometimes your teams don't want to rest; they want to keep moving. Well, after this layover was completed, Lance's 16 dogs were barking and pulling at their tug lines like they were leaving the race's starting line. Lance said he had this amazing run, and he was going to put the bale of straw out for the dogs to rest. He had every intention of stopping, but then he sees that his dogs are yelping and barking to get going, so he takes off. He said:

They're telling me what to do. So I dumped the straw, and it's been heaven ever since.

What you have here, with this individual musher, Lance Mackey, who cares so deeply for the health and the condition of these four-legged athletes, is a guy who has shown a great mastery of working with and training these canine athletes for the sport of dog mushing. The Anchorage Daily News last year, when he won, stated:

A musher doesn't win four straight 1,000 mile Yukon Quests and two straight Iditarods by making dogs run. He wins by making dogs want to run.

Lance describes working with his dogs this way: He says:

The biggest challenge working with a large team of dogs is the individual personalities. Like a classroom full of kids, all with issues, wants, questions, some barking wildly to get my attention, and then there are some who just do what needs to be done and require only a nod or a smile. Every dog is different. Every need is different. That is what I love.

The reward is seeing them all come together as a team working for a common goal. It's just cool.

I had the opportunity last week—when I was up in the State for the ceremonial start of the Iditarod—to go around and talk with the mushers and see all their teams. I had a chance to see Larry, his lead dog. My favorite is Lippy. I just kind of like the name, but Lippy has great little eyebrows. My favorite picture is with Lippy, but these dogs all have personalities unto themselves. And when they do come together as a team to do these incredible athletic feats, we must acknowledge and respect them.

Lance Mackey continues to impress all of us with his remarkable achievements and record-setting performances. He is an inspiration to others who struggle with cancer. He named his dog kennel up north the Lance Mackey's Comeback Kennel. I think that is most appropriate.

So it is my honor today to stand before the Senate to congratulate Lance Mackey and his team of amazing dogs. Lance is a world-class dog musher and a true Alaskan hero, and I wish him and his team continued success and good health in the future.

With that, I yield the floor, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. REID. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. BEGICH). Without objection, it is so ordered.

Mr. REID. I ask unanimous consent that tomorrow morning, March 19, following a period of morning business, the Senate proceed to H.R. 146; that upon the bill being reported, there be 20 minutes of debate equally divided and controlled between Senators BINGAMAN and COBURN or their designees; that upon the use or yielding back of this time, the Senate proceed to vote in relation to the amendments as listed below and that the order with respect to time prior to votes and vote sequencing remain in effect: amendment No. 677, No. 682, No. 683; that upon disposition of all amendments, there be 30 minutes of debate with respect to the bill, equally divided and controlled between Senators BINGAMAN and COBURN or their designees; that upon the use or yielding back of that time, the Senate then proceed as provided for under the order of March 17, with all other provisions remaining in effect.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. REID. I ask unanimous consent that upon disposition of H.R. 146, the Senate proceed to a period of morning business with Senators allowed to

speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MORNING BUSINESS

Mr. REID. I ask unanimous consent that we now proceed to a period of morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

EARMARKS DEBATE

Mr. REID. Mr. President, for several months now we have been discussing earmarks or congressionally directed spending. This body has heard many false charges about earmarks. We have heard that earmarks amount to wasteful spending. We have heard that taxpayers should not support these projects. We have even heard that earmarks don't actually benefit our States.

Fortunately, my constituents understand that the rhetoric on earmarks doesn't match the facts.

Nevadans know that these projects are brought to me by their mayors, council members, and city managers. Nevadans know that, as their Senator, I understand their needs better than a faceless bureaucrat in Washington. And most importantly, Nevadans know how valuable earmarks are in a small State like ours to expand medical services, build infrastructure, and provide other services.

I ask unanimous consent to have printed in the RECORD the following editorial from Las Vegas Review-Journal columnist John L. Smith. Mr. Smith accurately points out the hypocrisy surrounding the earmarking debate and provides examples of many beneficial earmarks for Nevada.

There being no objection, the material was ordered to be printed in the Record, as follows:

[From Las Vegas Review-Journal, Mar. 18, 2009]

JOHN L. SMITH: LET'S DO RIGHT-WING THING AND SEND THAT PORK BACK TO WASHINGTON

Here's your chance, Nevada.

This is your golden opportunity to unfurl old "Battle Born" and wave it proudly in the Libertarian breezes.

Come on, all you die-hard conservatives and daffy Obama critics who these days find yourselves chattering endlessly about the evils of pork barrel politics, "earmarks" and government waste in general. Take time out from calling into your favorite radio talk show and register your complaint.

This is the time to demand that your local and state officials return the \$100 million secured by Senate Majority Leader and Silver State Pork Farmer Supreme Harry Reid in the recent \$410 billion federal spending bill. (Meanwhile, Nevada's "hard-core conservative" John Ensign voted against the bill after putting his fingerprints on \$54 million in earmarks. And he didn't even blush.)

Many conservatives have assailed the latest federal shopping spree for being riddled

with "earmarks" at a time Congress had supposedly sworn off pork. You can't turn on a television or open a newspaper without running into the criticism.

So here's your chance, Nevada. Demand that your community's portion of the money be returned.

If wicked old Clark County wants to keep its share of the loot, that doesn't preclude the state's rural counties from taking a righteous stand and marking the metaphorical envelopes containing those federal hand-out checks "Return to Sender." Even if it isn't effective, just think how much publicity your town will generate by tossing that federal handout back into Uncle Sam's face.

Of course, criticizing government waste is easy. Rejecting it when it's your turn at the trough is more difficult. A quick perusal of the particulars of Nevada's \$100 million proves this out.

There's \$807,500 for the Nevada Fair Housing Foreclosure Effort, and another \$507,000 for the Access to Healthcare Network for uninsured Nevadans.

Remember the hepatitis C scandal? There's \$523,000 earmarked for the Southern Nevada Health District to fight that battle.

There's nearly \$1 million to assist the University of Nevada Health Sciences System nursing program and \$856,000 each for the Clark County and Washoe County school districts for dropout prevention.

There's more than \$800,000 for University of Nevada, Reno agriculture-related programs, and another \$269,000 to help Carson City battle erosion that followed the 2004 Waterfall Fire.

Come on, Carson. Just say no.

While Clark and Washoe counties receive by far the greatest percentage of federal funding for public safety improvements for everything from training facilities to DNA labs, the city of Fernley in Lyon County is due to get \$300,000 for law enforcement equipment.

While I've never thought much about the need for invasive weed control, there's \$235,000 for those who do at the Nevada Department of Agriculture. Presumably, they'll be controlling invasive weeds somewhere in the middle of Great Basin cattle country.

There's \$4.78 million for the Truckee Meadows Flood Control Project, another \$2.5 million for Truckee Canal Reconstruction. There's more than \$3 million for water treatment at Lake Tahoe and \$18 million for "rural Nevada water infrastructure and water quality projects."

There's money to study wildlife habitat in central Nevada lakes and to restore the Lahontan cutthroat trout population.

Inside town limits, there's \$608,000 to help Wells recover from its earthquake, \$150,000 to restore St. Augustine's Church in Austin, \$475,000 for the Virginia & Truckee Railroad, \$190,000 for the Amargosa Valley Community Center, \$300,000 for wastewater treatment in Goldfield, \$1.5 million for an interpretive center in Elko, \$285,000 for Truckee Meadows Community College low-income student recruitment, and \$24,000 to help poor schoolchildren in Lincoln County.

One of my serious favorites is \$381,000 for the Nevada Cancer Institute to fund the Hope Coach "mammovan," which will provide cancer screening for women in the state's many rural outposts.

This is a great project, but then I like pork spending.

Don't misunderstand: There's plenty to criticize about earmarks and federal spending. Nevada's list of big government projects made me scratch my head several times.

And there are compelling philosophical arguments to be made against wide-open government checkbooks and big deficits. Frankly, I'll be happy to have that discussion—as soon as lowly, care-worn Nevada finishes getting its share. Until then, I'll refrain from joining the Libertarian chorus.

That's the thing about pork.

It's easy to turn it down until the pig is roasted and the platter is passed to you.

STEM CELL RESEARCH

Mr. KYL. Mr. President, in a recent column for the Washington Post, "Obama's 'Science' Fiction," Charles Krauthammer exposes President Obama's efforts to destabilize the delicate balance between moral concerns over destroying embryonic stem cells and advancing medical research that can be universally accepted.

President Obama's recent decision to authorize expanded and seemingly unlimited Federal funding for stem cell research eviscerates the delicate balance forged by President Bush by forcing taxpayers to support embryonic creation and destruction. Mr. Krauthammer observed that some may "favor moving that moral line to additionally permit the use of spare fertility clinic embryos," but "President Obama replaced it with no line at all. He pointedly left open the creation of cloned and noncloned sperm-and-egg derived—human embryos solely for the purpose of dismemberment and use for parts." What is most concerning to me, and what Mr. Krauthammer succinctly exposes, is that President Obama's new embryonic stem cell policy is devoid of any ethical standards or guidelines. President Obama's decision makes the federal government the final arbiter in a moral argument that defies many Americans' core beliefs about the creation of life.

I ask unanimous consent that his column be printed in the RECORD and I urge my colleagues to consider his thoughtful views.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 13, 2009]

OBAMA'S 'SCIENCE' FICTION
(By Charles Krauthammer)

Last week, the White House invited me to a signing ceremony overturning the Bush (43) executive order on stem cell research. I assume this was because I have long argued in these columns and during my five years on the President's Council on Bioethics that, contrary to the Bush policy, federal funding should be extended to research on embryonic stem cell lines derived from discarded embryos in fertility clinics.

I declined to attend. Once you show your face at these things you become a tacit endorser of whatever they spring. My caution was vindicated.

President Bush had restricted federal funding for embryonic stem cell research to cells derived from embryos that had already been destroyed (as of his speech of Aug. 9, 2001). While I favor moving that moral line to additionally permit the use of spare fertility

clinic embryos, President Obama replaced it with no line at all. He pointedly left open the creation of cloned—and noncloned sperm-and-egg-derived—human embryos solely for the purpose of dismemberment and use for parts.

I am not religious. I do not believe that personhood is conferred upon conception. But I also do not believe that a human embryo is the moral equivalent of a hangnail and deserves no more respect than an appendix. Moreover, given the protean power of embryonic manipulation, the temptation it presents to science and the well-recorded human propensity for evil even in the pursuit of good, lines must be drawn. I suggested the bright line prohibiting the deliberate creation of human embryos solely for the instrumental purpose of research—a clear violation of the categorical imperative not to make a human life (even if only a potential human life) a means rather than an end.

On this, Obama has nothing to say. He leaves it entirely to the scientists. This is more than moral abdication. It is acquiescence to the mystique of “science” and its inherent moral benevolence. How anyone as sophisticated as Obama can believe this within living memory of Mengele and Tuskegee and the fake (and coercive) South Korean stem cell research is hard to fathom.

That part of the ceremony, watched from the safe distance of my office, made me uneasy. The other part—the ostentatious issuance of a memorandum on “restoring scientific integrity to government decision-making”—would have made me walk out.

Restoring? The implication, of course, is that while Obama is guided solely by science, Bush was driven by dogma, ideology and politics.

What an outrage. Bush’s nationally televised stem cell speech was the most morally serious address on medical ethics ever given by an American president. It was so scrupulous in presenting the best case for both his view and the contrary view that until the last few minutes, the listener had no idea where Bush would come out.

Obama’s address was morally unserious in the extreme. It was populated, as his didactic discourses always are, with a forest of straw men. Such as his admonition that we must resist the “false choice between sound science and moral values.” Yet, exactly 2 minutes and 12 seconds later he went on to declare that he would never open the door to the “use of cloning for human reproduction.”

Does he not think that a cloned human would be of extraordinary scientific interest? And yet he banned it.

Is he so obtuse as not to see that he had just made a choice of ethics over science? Yet, unlike Bush, who painstakingly explained the balance of ethical and scientific goods he was trying to achieve, Obama did not even pretend to make the case why some practices are morally permissible and others not.

This is not just intellectual laziness. It is the moral arrogance of a man who continuously dismisses his critics as ideological while he is guided exclusively by pragmatism (in economics, social policy, foreign policy) and science in medical ethics.

Science has everything to say about what is possible. Science has nothing to say about what is permissible. Obama’s pretense that he will “restore science to its rightful place” and make science, not ideology, dispositive in moral debates is yet more rhetorical sleight of hand—this time to abdicate decision-making and color his own ideological preferences as authentically “scientific.”

Dr. James Thomson, the pioneer of embryonic stem cells, said “if human embryonic stem cell research does not make you at least a little bit uncomfortable, you have not thought about it enough.” Obama clearly has not.

KENYA

Mr. FEINGOLD. Mr. President, two human rights defenders, Oscar Kamau Kingara and John Paul Oulu, were murdered in the streets of Nairobi, Kenya 2 weeks ago. I was deeply saddened to learn of these murders and join the call of U.S. Ambassador Ranneberger for an immediate, comprehensive and transparent investigation of this crime. At the same time, we cannot view these murders simply in isolation; these murders are part of a continuing pattern of extrajudicial killings with impunity in Kenya. The slain activists were outspoken on the participation of Kenya’s police in such killings and the continuing problem of corruption throughout Kenya’s security sector. If these and other underlying rule of law problems are not addressed, there is a very real potential for political instability and armed conflict to return to Kenya.

In December 2007, Kenya made international news headlines as violence erupted after its general elections. Over 1,000 people were killed, and the international community, under the leadership of Kofi Annan, rallied to broker a power-sharing agreement and stabilize the government. In the immediate term, this initiative stopped the violence from worsening and has since been hailed as an example of successful conflict resolution. But as too often happens, once the agreement was signed and the immediate threats receded, diplomatic engagement was scaled down. Now over a year later, while the power-sharing agreement remains intact, the fundamental problems that led to the violence in December 2007 remain unchanged. In some cases, they have even become worse.

Last October, the independent Commission of Inquiry on Post-Election Violence, known as the Waki Commission, issued its final report. The Commission called for the Kenyan government to establish a special tribunal to seek accountability for persons bearing the greatest responsibility for the violence after the elections. It also recommended immediate and comprehensive reform of Kenya’s police service. Philip Alston, the U.N. Special Rapporteur on extrajudicial killings, echoed that recommendation in his report, which was released last month. Alston found the police had been widely involved in the post-election violence and continue to carry out carefully planned extrajudicial killings. The Special Rapporteur also identified systematic shortcomings and the need for reform in the judiciary and Office of the Attorney General.

Despite these official reports, there has been very little action toward implementing these recommendations. The Kenyan government has not taken steps to establish the special tribunal. The police commissioner and attorney general, both heavily implicated in these problems, remain in their respective posts. Meanwhile, reported scandals involving maize and oil imports suggest that public corruption in Kenya remains pervasive and may be getting worse. This is generating increased public resentment that can easily be exploited by armed militias and turn violent. I am especially worried about these heightened hostilities given the tensions expected to surround Kenya’s census, which is scheduled for later this year and the potential for them to flow over into next year’s constitutional referendum, and ultimately the 2012 general elections.

There is a lot of talk these days about conflict prevention. I see no greater opportunity for conflict prevention in Africa right now than in Kenya. The international community needs to coordinate its efforts to ensure the Kenyan government addresses these fundamental problems of governance and rule of law. The United States has a key role to play in this regard, especially given our longstanding and historic partnership with Kenya. To that end, I was pleased that FBI Director Robert Mueller visited Kenya 2 weeks ago and delivered a very clear message: “Public corruption should be a priority for all investigation and prosecution agencies in the country.” We need to consistently reiterate that message and we need to back it up with concrete actions that both support reform and sanction individuals found guilty of kleptocracy.

In the months ahead, Kenya must get more attention from our senior government officials. I hope the Obama administration’s nominee for Assistant Secretary of State for African Affairs will be ready to give it that attention and develop an effective strategy for preventing conflict there. Allowing the status quo to persist will be far more costly in the long run. Kenya is an extremely important country for the stability of the Horn of Africa and East Africa; it is a country of great talent and entrepreneurship, rich history and diversity. With all those strengths, a promising and peaceful future is possible for Kenya and we must help its people to attain it.

IDAHOANS SPEAK OUT ON HIGH ENERGY PRICES

Mr. CRAPO. Mr. President, in mid-June, I asked Idahoans to share with me how high energy prices are affecting their lives, and they responded by the hundreds. The stories, numbering well over 1,200, are heartbreaking and touching. While energy prices have

dropped in recent weeks, the concerns expressed remain very relevant. To respect the efforts of those who took the opportunity to share their thoughts, I am submitting every e-mail sent to me through an address set up specifically for this purpose to the CONGRESSIONAL RECORD. This is not an issue that will be easily resolved, but it is one that deserves immediate and serious attention, and Idahoans deserve to be heard. Their stories not only detail their struggles to meet everyday expenses, but also have suggestions and recommendations as to what Congress can do now to tackle this problem and find solutions that last beyond today. I ask unanimous consent to have today's letters printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

Gas prices have not only affected our family for our vehicle but also in heating fuel. We live 15 miles from town and from our jobs, costing us an increase of \$400-500 a month. Our heating bills went from \$89 to \$389 a month. That has had great impact our family. I am sure that it has on many families. Our hope is that our legislators will find us the resources that available to lower the costs. The cost of living is above our wages for many people. Be it the wind and solar power something needs to done. Thank you for your time.

CINDY.

Thanks for the opportunity to comment. I am an architect and travel to construction sites. It is obvious. The cost goes up so I compromise with my clients; the price goes up a little to them and my already slim margin goes down. Everything is affected: transportation costs more so building materials cost more so we get less buildings and infrastructure for our money. My family gets to do less together.

The nonsense is everywhere. In Boise our Mayor wants to reinstitute a street car system. Why not create better bus schedules so people will ride and save billions? The "environmentalists" do not want us to recover our own resources because they are looking at the processes of oil, timber and mining of 50 and 100 years ago, not giving credit to the enormous progress those industries have made in their processes.

We have become a nation that consumes exponentially more than it produces. If we do not repair that imbalance, it will consume us destructively! Get the supply side in balance. Use our own resources. Bring much manufacturing home. (The unions have already priced themselves out of the market. They may have to give a little.) Extract our own resources in the environmentally safe and sound ways that are now known. Then do not export our resources.

Lastly, as I have been saying for 20 years, explore and support development of all logical alternative energy sources.

Thanks for the opportunity to do my own pontificating!!

DAVID, Boise.

Because all of the food in our area is trucked in the price of groceries is naturally going to go up. I worry about the young people that do not have large incomes and have families to feed. Please be our voice of reason in this tough time our wages stay the

same and everything else rises. Please do not let the rich run this country! Thank you for listening.

SHEILA, Idaho Falls.

Build nuclear energy plants.

Open ANWR, Wyoming, Utah and etc. The Great Salt Lake is covering a bed of oil, a little sludgy, but oil just the same, found by the only "off shore" rig set up there in the late 70s or early 80s.

Fight for our right to open up our off shore oil possibilities.

Tax incentives for solar energy for hot water, heating homes.

NANCY.

Thank you, Mr. Crapo, for this opportunity. In addition to my suggested impacts/solutions submitted yesterday, in addition to the obvious need to drastically streamline the NRC licensing process for nuclear reactors, perhaps the single largest improvement to dropping the costs of virtually all commodities, including crude oil, take all necessary measures to regain the value of the U.S. dollar. Its record weakness is impacting all market sectors virtually all commodities purchased abroad.

PAUL.

I think you should be pushing with all of your might to ramp up drilling for oil anywhere within our country and offshore. For too long, we have tried the policy of powder puff energy programs, ethanol, and environmentalist-led no drilling mandates. We are now trying to adjust our lives to survive the "raging successes" this policy has delivered to the American people. My family, my friends, and I are all getting really mad about this whole situation. It is blatantly obvious that our current policies are total failures. If this cannot be seen by our elected representatives, then maybe we need some new people capable of rational thought.

New technology, new power sources and innovative ways to address our energy needs are embraced and supported by the majority of Americans. However, the same majority fully understands that it will take years, even decades, to transition into these systems. While we are enduring this transition, why punish ourselves with ever-escalating energy costs by squandering our own natural resources.

Last September, I made a wonderful trip to Eastern Europe (former Iron Curtain countries). While enjoying a coffee at an outside café in "Old Warsaw", an old Polish gentleman walked up and politely asked if he could sit down and talk to me. He knew we were speaking English but was unsure if we were Americans, Canadians, Australians, etc. When I said we were Americans and he was most welcome to sit down, he was delighted. Without hesitation, he started in on me by saying "do not you Americans realize that oil is a global commodity"? We all pay the world price per barrel. He continued by saying that we were sitting on a ton of oil resources that we "smugly" refuse to develop and thereby raise the price of oil for everybody. Maybe, he said, you guys can afford it but we cannot. "We Poles simply cannot understand why it is not obvious to you what the production of 2 or 3 million barrels of oil per day by you Americans from your own resources would do to prices and your own reputation around the world". What could I say? He was right. Before leaving, the old man looked me straight in the eye and said "remember, no country is so rich that it can afford to squander it is natural resources".

Drilling is a winner in many ways. By increasing supply we will temper, even lower prices for crude. We will decrease our dependence on hostile foreign suppliers whose production can be disrupted at any time by a few radical people. New, well-paying jobs for Americans will be developed. National security will be advanced by not depending on anyone for our energy needs. Last, but not least, we will always need petroleum. I do not care what energy source drives our cars in the future, they will roll on tires made from petroleum, their bearings and moving parts will be lubricated and cooled by petroleum based products. Our homes will be built with plumbing pipes made from petroleum. The plastics used in cars and untold millions of domestic uses are all petroleum based.

It is finally time we let the radical environmentalists know that we gave them their chance to lead us to the energy promised land and they have failed totally. The environmentalists have always been a noisy bunch while the rational thinkers have sat in the background. This is starting to change; the regular people are getting worked up and involved. Some meaningful new direction is now being demanded. The one thing we have not tried is drill and increase supply along with some new refining capability. We, at last, are getting tired of paying unbelievable prices and sending all the money offshore. We are getting tired of watching a bunch of pompous politicians hold stupid hearings and try to lay the whole problem at the feet of "Big Oil". Contrary to popular opinion, we are a little smarter than that. I do not think the politicians realize what absolute fools they are making of themselves. Are we supposed to take our business to "Little Oil"?

Bottom line, this issue is so big and important, something is going to happen, and you can count on it. Pie in the sky dreams will not make it, business as usual will not make it, and only straight forward policies that address our real energy needs in the shortest possible time will make it. It is popular among the liberal opposition to say that we cannot drill our way out of this problem. Our answer should be that we have tried all of your ideas and things have only gotten worse. It is people like you liberals who say we cannot drill and succeed, why should the average American believe your analysis when you have done nothing but fail in a huge way.

DENNY.

I have no answer to the problem other than I know doing nothing is not the answer. If 80% of Americans are in favor of offshore drilling, then why are we not doing it? I would like to see the government say to auto manufacturer who are building cars in America with only 100% American-made auto parts, build a car that can run with whatever fuel that does not need gas and we will do something to help you. I am 80 years old and not smart enough to know what that is or how to do it but if the incentive was there it would get done and make jobs for Americans.

HAROLD.

I send this letter and information speaking for myself as an individual and not the INL. I am a senior engineer at the Idaho National Laboratory with 19 years of experience working here doing heat transfer modeling. I received a Masters Degree in Mechanical Engineering from BYU in 1989. I just recently submitted a patent to the U.S. patent office through the INL concerning a method to create all of our liquid transportation fuels with

a new process we are researching. The process uses high temperature steam electrolysis (HTSE) to produce hydrogen, with electricity supplied by non-fossil power plants. Biomass is used as the carbon source and heat source for this cycle. When combining the biomass gasification products with the hydrogen produced from HTSE, liquid hydrocarbon fuels can be created with such processes as the Fischer-Tropsch process. With this process, we could make 13 million barrels of liquid hydrocarbon transportation fuel each day that would go along with 7 million barrels produced from U.S. oil supplies for the total of 20 million barrels per day that we currently use. This means that we would not need to import any oil from anyone. The success of this process includes a huge amount of fossil-free electricity. This can only be done with several hundred large nuclear electricity power plants. These plants do not need to be the NGNP or GEN-IV plants, but would be beneficial if they are. The biomass gasification would supply the heat source for the HTSE. We do not need an NGNP to supply the heat source for the HTSE. This process converts more than 90% of the carbon in the biomass to liquid fuels, while cellulosic ethanol converts only 30%.

I am absolutely convinced after many years of thinking about this that this will solve our nation's energy problems. In order to accomplish this feat, the following needs to occur:

(1) Increase the DOE funding for researching this promising cycle by:

(a) Analyze, Develop, and Build a small scale version of this production facility using Eastern Idaho biomass and create liquid hydrocarbon transportation fuels.

(b) Drastically increase the funding for High Temperature Steam Electrolysis performance, reliability, mass production, and cost.

(c) Send funding to solve the nuclear fuel cycle for recycling nuclear waste.

(2) With this huge increase in electrical power production capacity, drastically increase the fleet of U.S. vehicles using the plug-in hybrid methodology. These plug-in hybrids solve our social need to be able to use electricity for short trips to work each day, or liquid hydrocarbon fuels in a long trip across the country. These are absolutely the way to go as they are very fuel efficient and let us keep our wonderful life-style that we enjoy here in America.

(3) Absolutely under no circumstance invoke the "carbon tax". This will only send money from the rich nations to the poor nations. If I ever hear anyone use the phrase "carbon tax" again, it shows how uneducated they are on this topic. The only source of carbon to the earth's atmosphere is the combustion of fossil fuels. This is a one way street for the carbon from underground to the earth's atmosphere where it will stay for many hundreds if not thousands of years. This phrase needs to be renamed "fossil tax". You can only tax people that take the carbon out of the ground and sell it to be combusted and put in the atmosphere. All of the other carbon in the world like ethanol production needs to be left alone, because it only recycles carbon from the atmosphere back to the atmosphere again.

Thank you for your attention to this email. I would dearly love to go over all of this with you in person. Please let me know how we can meet together.

GRANT.

I thank you for the opportunity to share with you my views on climate change. My

husband and I recently made the decision for me to stay home with our 9-month-old daughter. Even though this has impacted our monthly income, we nevertheless feel the increased fuel prices are a good thing for our nation. It is about time we start paying the real price of oil. When I hear stories of friends selling their trucks for smaller cars, I grin ear-to-ear. For me, the high prices have caused me to limit my trips to town and purchase more goods online (especially from sites where the shipping is free). For my husband, he will begin commuting to work by bike two days/week. The concept of drilling for more domestic oil is a Band-aid approach to our need for more oil. We would not see the results for years and they would only be short-lived. Instead, states should be focused on building city infrastructure and public transportation systems to accommodate the new reality of high fuel prices. As a nation, we should provide incentives for alternative energy research. As a resident of Boise, I am more than willing to utilize the bus system. However, Valley Ride severely lacks what the Treasure Valley would need to make it an appealing option. I came from a city where I utilized two forms of public transportation a day (bus and light rail). It was a inconvenient in some ways but mostly wonderful considering I saved on gas money, read my book and felt great about doing 'my part' to help the environment. Besides helping residents, a new and innovative public transportation system appeals to those visiting our beautiful valley as well. Our infrastructure and public transportation system in the Treasure Valley lacks the innovation, efficiency and foresight to become a real option for those feeling the crunch of high gas prices. It is too bad that as a nation, state, and county we are so reactive to issues like this rather than leaders! Why not address the local changes that we can make right here and now that will only continue to benefit and serve us going forward?

ALLISON, Boise.

Thank you for giving me the opportunity to tell how the rising cost of gasoline is affecting my family. Just yesterday, I had to cancel reservations I had made back in March for a family vacation to the Oregon Coast in September. This "yurt" vacation was going to be the highlight of our year. In fact, we had been planning it since early in March. Already living on a tight budget, this simple vacation would have been an extravagance for us. But I was only able to budget up to \$4 a gallon for gas. Now that the price of gas has reached the \$4 mark and is expected to be much higher by September, we had no choice but to cancel. We will be taking a "staycation" instead.

My husband and I share one automobile and are already conservative with our driving. Most days, he drives from our house to the nearest bus stop (about 3 miles) to take a crowded bus to work in downtown Boise. On the one to two days a week that I need the car to drive to work, I have to get him to and from the bus. We have been doing this for over a year now. Our budget already required this of us when gas prices were under \$3 a gallon. We seem to have no other way to cut back. My husband has been trying to get a job near where we live which would enable him to ride his bicycle to work but, so far, he hasn't been able to. For us, driving less to save dollars at the pump means giving up some time we would usually spend visiting with family and friends, most of whom live 30 miles from us.

Perhaps the biggest way this has affected my family is that we have continued to be

unable to afford health insurance. Though my husband has had a couple of good raises over the past year and a half (and is insured through his employer), those raises were eaten up in rising fuel and grocery prices. So, I have been unable to budget in the nearly \$400 month it would cost to put myself and our two boys on health insurance.

Again, thank you for this opportunity!

SUSAN, Meridian.

I do not know if this will really help you, but anything is worth a try, especially for the whole of the United States.

My story begins about a year ago, when I discovered I was pregnant. My husband is blind! He receives SSI. Because of this, if I work fulltime and gross \$1,400 in a month, the United States government takes away his SSI. OK, no problem. If I claim our daughter and my husband, then not enough taxes will be taken out, and I will owe at the end of the year and struggle to pay what I will owe. If I do not claim our daughter and my husband, then to survive every month will be a challenge because my net income (take home) will be roughly half and then that leaves little to pay the bills (as if we have enough now). So I work parttime, and we still cannot pay all our bills.

Our electricity bill was over \$200 in one month, during this last winter. With our daughter being a newborn, we just did not want to risk the temperature lower than 65 degrees, which is where we kept our thermostat, just to try to keep the electric bill down. We did receive energy assistance; that helped. However we are still behind in our electric bill, and, to be perfectly honest with you, if I was to work fulltime, I could not afford the fuel in the car. My car is a 1989 GEO Tracker which gets up to 25-28 miles per gallon. So where does that leave my husband, our daughter and me? Broke and completely reliant on the government to survive, especially with the cost of food going up. Our \$900 stimulus check is not going to the economy; it is going to pay credit card debt, just as my income tax return did.

Well, hopefully this will help you in your fight on Capitol Hill.

CHRISSY, Sagle.

ADDITIONAL STATEMENTS

RECOGNIZING DUKE EYE CENTER

• Mr. BURR. Mr. President, today I recognize the Duke Eye Center in North Carolina for its determined efforts to promote awareness, treatment, and prevention of glaucoma. Glaucoma, an optic nerve disease, is the leading cause of incurable blindness in the United States. Worldwide, 70 million people suffer from the disease, 2.2 million of those in the United States. Because the disease does not usually show signs until the point that irreversible vision loss occurs, the development of early detection and prevention strategies is imperative.

We recently observed World Glaucoma Day, on March 12, 2009. In light of this important observance, I express my thanks for the researchers and staff at the Duke Eye Center, who are devoted to the task of uncovering the cause of glaucoma. Historically, most research and treatment has focused on

reducing elevated pressure within the eye. However, not everyone with glaucoma has elevated pressure, and not everyone with elevated pressure develops glaucoma. Researchers at the Duke Eye Center are working diligently to uncover other possible causes of the disease. Researchers and clinicians have excellent working relationships, collaborating on genomics, oxidative stress, and even links to Alzheimer's disease. They are performing cutting edge research, while at the same time delivering cutting edge patient care.

In 2008, Ophthalmology Times ranked the Duke Eye Center fourth best among U.S. ophthalmology programs. I applaud their hard work and achievements in the diagnosis, treatment, and prevention of glaucoma.●

HONORING BANCROFT CONTRACTING CORPORATION

● Ms. SNOWE. Mr. President, today I wish to recognize a Maine small enterprise that epitomizes the values and commitment necessary to excel not only as a business, but also as a leader in the community. Bancroft Contracting Corporation, located in the western Maine town of South Paris, is one of the leading general contractors in Maine, and does superb work in industrial and commercial markets throughout New England. I am extremely proud to report that the Small Business Administration has named Bancroft's president, Mark A. Bancroft, the 2009 Maine Small Business Person of the Year.

Bancroft Contracting is a second-generation, family-owned company that provides a wide range of construction and industrial maintenance services to an array of diverse markets. Founded in 1977 by Al Bancroft, the firm's customers include pulp and paper manufacturers, power-generating companies, State transportation departments, and cement and plastics manufacturers. Additionally, Bancroft Contracting supplies thousands of cubic yards of reinforced concrete every season for a variety of projects that include dams, bridges, and large commercial foundations. The company employs more than 130 construction professionals in the winter months and upwards of 200 in the summer. Bancroft's employees represent a wide spectrum of construction professions, from structural welders and pipe fitters, to riggers and ironworkers, and they all possess an extraordinary level of expertise in their specialized areas.

Bancroft Contracting prides itself on relationship-based customer service, and the company responds diligently to all customer requests in a prompt and efficient manner. In a similar vein, Bancroft takes care to contribute significantly to the well-being of the western Maine community. Organizations and institutions that have bene-

fited from Bancroft's generous contributions and services over the years include the University of Maine, the area school department, the Boy Scouts, various local sports teams, Kiwanis, and the Rotary Club.

As Bancroft's president for the past 7 years, Mark Bancroft has had a significant impact on the company's direction. He is a graduate of the construction management technology program in the School of Engineering Technology at the University of Maine. Notable, he started his tenure at Bancroft Contracting at the age of 14 and continued working for the company throughout high school and college. Mr. Bancroft learned the business at an early age and received critical training from many of the company's skilled craftsmen.

Mr. Bancroft's desire to roll up his sleeves and his ability to understand the business from the ground up has earned him the respect of both his employees and customers alike. Before becoming president in 2002, he worked in a variety of capacities throughout the years, serving as a project manager, human resources manager, operations manager, and vice president of operations. It is this intricate knowledge of the business, along with his distinguished leadership, that has resulted in Bancroft's tremendous 19 percent growth over the last 3 years, defying the downward trend of too many firms during these difficult economic times.

Additionally, Mr. Bancroft serves on several boards of trustees and directors, including, the Paris Utility District, University of Maine Construction Management Technology Industrial Advisory Council, Associated General Contractors of America Education Foundation Trust, and Self Insured Workers Compensation Group Trust. And just last week, Mr. Bancroft was elected chair of the Associated General Contractors of Maine.

On a personal note, in the winter of 2008, Mr. Bancroft donated the use of a crane and several employees to the town of Bethel to help the community construct Olympia SnowWoman. This architectural feat is now in the "Guinness Book of World Records" as the largest snowwoman at 122 feet and 1 inch tall—and what a record to hold! I am proud that Mr. Bancroft played such an integral part in a project that brought a great sense of community pride to Bethel and to Maine.

It is my distinct honor to congratulate Mark Bancroft, an immensely deserving individual, as the SBA's 2009 Small Business Person of the Year in Maine, and I extend my best wishes to everyone at Bancroft Contracting for their continued success.●

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to

the Senate by Mrs. Neiman, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGE FROM THE HOUSE

At 11:37 a.m., a message from the House of Representatives, delivered by Ms. Niland, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 628. An act to establish a pilot program in certain United States district courts to encourage enhancement of expertise in patent cases among district judges.

H.R. 955. An act to designate the facility of the United States Postal Service located at 10355 Northeast Valley Road in Rollingbay, Washington, as the "John 'Bud' Hawk Post Office".

H.R. 1323. An act to require the Archivist of the United States to promulgate regulations regarding the use of information control designations, and for other purposes.

H.R. 1429. An act to provide for an effective HIV/AIDS program in Federal prisons.

H.R. 1512. An act to amend the Internal Revenue Code of 1986 to extend the funding and expenditure authority of the Airport and Airway Trust Fund, to amend title 49, United States Code, to extend authorizations for the airport improvement program, and for other purposes.

MEASURES REFERRED

The following bills were read the first and the second times by unanimous consent, and referred as indicated:

H.R. 628. An act to establish a pilot program in certain United States district courts to encourage enhancement of expertise in patent cases among district judges; to the Committee on the Judiciary.

H.R. 955. An act to designate the facility of the United States Postal Service located at 10355 Northeast Valley Road in Rollingbay, Washington, as the "John 'Bud' Hawk Post Office"; to the Committee on Homeland Security and Governmental Affairs.

H.R. 1323. An act to require the Archivist of the United States to promulgate regulations regarding the use of information control designations, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

H.R. 1429. An act to provide for an effective HIV/AIDS program in Federal prisons; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. BINGAMAN, from the Committee on Energy and Natural Resources:

Special Report entitled "History, Jurisdiction, and a Summary of Activities of the Committee on Energy and Natural Resources During the 110th Congress" (Rept. No. 111-8).

By Mr. LEAHY, from the Committee on the Judiciary, without amendment:

S. 146. A bill to amend the Federal anti-trust laws to provide expanded coverage and to eliminate exemptions from such laws that are contrary to the public interest with respect to railroads (Rept. No. 111-9).

By Ms. MIKULSKI, from the Committee on Health, Education, Labor, and Pensions, with an amendment in the nature of a substitute:

S. 277. A bill to amend the National and Community Service Act of 1990 to expand and improve opportunities for service, and for other purposes.

EXECUTIVE REPORT OF COMMITTEE

The following executive report of a nomination was submitted:

By Mr. BINGAMAN for the Committee on Energy and Natural Resources.

*David J. Hayes, of Virginia, to be Deputy Secretary of the Interior.

*Nomination was reported with recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. KOHL:

S. 627. A bill to authorize the Secretary of Education to make grants to support early college high schools and other dual enrollment programs; to the Committee on Health, Education, Labor, and Pensions.

By Mr. CONRAD (for himself, Mr. BROWNBACK, Ms. COLLINS, Mr. JOHNSON, and Mrs. MURRAY):

S. 628. A bill to provide incentives to physicians to practice in rural and medically underserved communities; to the Committee on the Judiciary.

By Ms. COLLINS (for herself, Mr. VOINOVICH, and Mr. KOHL):

S. 629. A bill to facilitate the part-time reemployment of annuitants, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

By Mr. LEAHY (for himself, Mr. SPECTER, Mr. WHITEHOUSE, and Mr. SESSIONS):

S. 630. A bill to make technical amendments to laws containing time periods affecting judicial proceedings; to the Committee on the Judiciary.

By Mr. KOHL (for himself, Ms. COLLINS, Mr. COCHRAN, Mr. KERRY, Mr. WHITEHOUSE, Mr. BINGAMAN, Mr. LEVIN, Mr. CASEY, Mrs. LINCOLN, Ms. KLOBUCHAR, Ms. STABENOW, and Mr. BAYH):

S. 631. A bill to provide for nationwide expansion of the pilot program for national and State background checks on direct patient access employees of long-term care facilities or providers; to the Committee on Finance.

By Mr. BAUCUS (for himself, Mr. CRAPO, Mrs. LINCOLN, Ms. SNOWE, Mr. ROBERTS, Mr. ENZI, and Mr. ENSIGN):

S. 632. A bill to amend the Internal Revenue Code of 1986 to require that the payment of the manufacturers' excise tax on recreational equipment be paid quarterly; to the Committee on Finance.

By Mr. TESTER (for himself, Mr. BAUCUS, Mr. JOHNSON, Mr. BINGAMAN, and Mr. DORGAN):

S. 633. A bill to establish a program for tribal colleges and universities within the Department of Health and Human Services and to amend the Native American Programs Act of 1974 to authorize the provision of grants and cooperative agreements to tribal colleges and universities, and for other purposes; to the Committee on Indian Affairs.

By Mr. HARKIN:

S. 634. A bill to amend the Elementary and Secondary Education Act of 1965 to improve standards for physical education; to the Committee on Health, Education, Labor, and Pensions.

By Mrs. MURRAY:

S. 635. A bill to amend the Wild and Scenic Rivers Act to designate a segment of Illabot Creek in Skagit County, Washington, as a component of the National Wild and Scenic Rivers System; to the Committee on Energy and Natural Resources.

By Mr. THUNE (for himself, Mr. TESTER, and Mr. CHAMBLISS):

S. 636. A bill to amend the Clean Air Act to conform the definition of renewable biomass to the definition given the term in the Farm Security and Rural Investment Act of 2002; to the Committee on Environment and Public Works.

By Mr. BAUCUS (for himself and Mr. TESTER):

S. 637. A bill to authorize the construction of the Dry-Redwater Regional Water Authority System in the State of Montana and a portion of McKenzie County, North Dakota, and for other purposes; to the Committee on Energy and Natural Resources.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Ms. CANTWELL:

S. Res. 76. A resolution expressing the sense of the Senate that the United States and the People's Republic of China should work together to reduce or eliminate tariff and nontariff barriers to trade in clean energy and environmental goods and services; to the Committee on Finance.

By Ms. CANTWELL (for herself and Mr. VOINOVICH):

S. Res. 77. A resolution expressing the sense of the Senate that the United States and the People's Republic of China should negotiate a bilateral agreement on clean energy cooperation; to the Committee on Foreign Relations.

By Mr. CHAMBLISS (for himself and Ms. LANDRIEU):

S. Res. 78. A resolution designating March 22, 2009, as "National Rehabilitation Counselors Appreciation Day"; considered and agreed to.

ADDITIONAL COSPONSORS

S. 21

At the request of Mr. REID, the name of the Senator from Iowa (Mr. HARKIN) was added as a cosponsor of S. 21, a bill to reduce unintended pregnancy, re-

duce abortions, and improve access to women's health care.

S. 144

At the request of Mr. KERRY, the names of the Senator from Arkansas (Mr. PRYOR), the Senator from Alabama (Mr. SESSIONS), the Senator from Oklahoma (Mr. INHOFE) and the Senator from New Hampshire (Mr. GREGG) were added as cosponsors of S. 144, a bill to amend the Internal Revenue Code of 1986 to remove cell phones from listed property under section 280F.

S. 180

At the request of Mr. BENNET, his name was added as a cosponsor of S. 180, a bill to establish the Cache La Poudre River National Heritage Area, and for other purposes.

S. 183

At the request of Mr. BENNET, his name was added as a cosponsor of S. 183, a bill to establish the Dominguez-Escalante National Conservation Area and the Dominguez Canyon Wilderness Area.

S. 184

At the request of Mr. BENNET, his name was added as a cosponsor of S. 184, a bill to authorize the Secretary of the Interior to carry out the Jackson Gulch rehabilitation project in the State of Colorado.

S. 185

At the request of Mr. BENNET, his name was added as a cosponsor of S. 185, a bill to establish the Sangre de Cristo National Heritage Area in the State of Colorado, and for other purposes.

S. 186

At the request of Mr. BENNET, his name was added as a cosponsor of S. 186, a bill to establish the South Park National Heritage Area in the State of Colorado, and for other purposes.

S. 187

At the request of Mr. UDALL of Colorado, the name of the Senator from Colorado (Mr. BENNET) was added as a cosponsor of S. 187, a bill to provide for the construction of the Arkansas Valley Conduit in the State of Colorado.

S. 188

At the request of Mr. UDALL of Colorado, the name of the Senator from Colorado (Mr. BENNET) was added as a cosponsor of S. 188, a bill to provide for a study of options for protecting the open space characteristics of certain lands in and adjacent to the Arapaho and Roosevelt National Forests in Colorado, and for other purposes.

S. 189

At the request of Mr. UDALL of Colorado, the name of the Senator from Colorado (Mr. BENNET) was added as a cosponsor of S. 189, a bill to amend the National Trails System Act to clarify Federal authority relating to land acquisition from willing sellers for the majority of the trails in the System, and for other purposes.

S. 190

At the request of Mr. UDALL of Colorado, the name of the Senator from Colorado (Mr. BENNET) was added as a cosponsor of S. 190, a bill to designate as wilderness certain land within the Rocky Mountain National Park and to adjust the boundaries of the Indian Peaks Wilderness and the Arapaho National Recreation Area of the Arapaho National Forest in the State of Colorado.

S. 191

At the request of Mr. BENNET, his name was added as a cosponsor of S. 191, a bill to amend the Great Sand Dunes National Park and Preserve Act of 2000 to explain the purpose and provide for the administration of the Baca National Wildlife Refuge.

S. 243

At the request of Mr. CARDIN, the name of the Senator from Maine (Ms. COLLINS) was added as a cosponsor of S. 243, a bill to amend the Internal Revenue Code of 1986 to allow the Secretary of the Treasury to establish the standard mileage rate for use of a passenger automobile for purposes of the charitable contributions deduction and to exclude charitable mileage reimbursements for gross income.

S. 277

At the request of Mr. REED, his name was added as a cosponsor of S. 277, a bill to amend the National and Community Service Act of 1990 to expand and improve opportunities for service, and for other purposes.

At the request of Mr. CASEY, his name was added as a cosponsor of S. 277, *supra*.

At the request of Mr. BYRD, his name was added as a cosponsor of S. 277, *supra*.

S. 407

At the request of Mr. AKAKA, the name of the Senator from Arkansas (Mrs. LINCOLN) was added as a cosponsor of S. 407, a bill to increase, effective as of December 1, 2009, the rates of compensation for veterans with service-connected disabilities and the rates of dependency and indemnity compensation for the survivors of certain disabled veterans, and for other purposes.

S. 423

At the request of Mr. AKAKA, the name of the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 423, a bill to amend title 38, United States Code, to authorize advance appropriations for certain medical care accounts of the Department of Veterans Affairs by providing two-fiscal year budget authority, and for other purposes.

S. 462

At the request of Mrs. BOXER, the name of the Senator from Rhode Island (Mr. WHITEHOUSE) was added as a cosponsor of S. 462, a bill to amend the Lacey Act Amendments of 1981 to pro-

hibit the importation, exportation, transportation, and sale, receipt, acquisition, or purchase in interstate or foreign commerce, of any live animal of any prohibited wildlife species, and for other purposes.

S. 475

At the request of Mr. BURR, the names of the Senator from Maryland (Mr. CARDIN) and the Senator from West Virginia (Mr. BYRD) were added as cosponsors of S. 475, a bill to amend the Servicemembers Civil Relief Act to guarantee the equity of spouses of military personnel with regard to matters of residency, and for other purposes.

S. 484

At the request of Mrs. FEINSTEIN, the name of the Senator from Pennsylvania (Mr. CASEY) was added as a cosponsor of S. 484, a bill to amend title II of the Social Security Act to repeal the Government pension offset and windfall elimination provisions.

S. 491

At the request of Mr. WEBB, the name of the Senator from Indiana (Mr. BAYH) was added as a cosponsor of S. 491, a bill to amend the Internal Revenue Code of 1986 to allow Federal civilian and military retirees to pay health insurance premiums on a pretax basis and to allow a deduction for TRICARE supplemental premiums.

S. 506

At the request of Mr. LEVIN, the name of the Senator from Vermont (Mr. SANDERS) was added as a cosponsor of S. 506, a bill to restrict the use of offshore tax havens and abusive tax shelters to inappropriately avoid Federal taxation, and for other purposes.

S. 511

At the request of Mr. BROWNBACK, the name of the Senator from Kansas (Mr. ROBERTS) was added as a cosponsor of S. 511, a bill to amend part B of title XVIII of the Social Security Act to provide for an exemption of pharmacies and pharmacists from certain Medicare accreditation requirements in the same manner as such exemption applies to certain professionals.

S. 527

At the request of Mr. THUNE, the names of the Senator from Wyoming (Mr. BARRASSO) and the Senator from Iowa (Mr. GRASSLEY) were added as cosponsors of S. 527, a bill to amend the Clean Air act to prohibit the issuance of permits under title V of that Act for certain emissions from agricultural production.

S. 528

At the request of Mr. WHITEHOUSE, the names of the Senator from Massachusetts (Mr. KENNEDY) and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of S. 528, a bill to prevent voter caging.

S. 535

At the request of Mr. NELSON of Florida, the names of the Senator from

West Virginia (Mr. BYRD) and the Senator from Alaska (Mr. BEGICH) were added as cosponsors of S. 535, a bill to amend title 10, United States Code, to repeal requirement for reduction of survivor annuities under the Survivor Benefit Plan by veterans' dependency and indemnity compensation, and for other purposes.

S. 542

At the request of Mr. REID, the name of the Senator from Florida (Mr. NELSON) was added as a cosponsor of S. 542, a bill to repeal the provision of law that provides automatic pay adjustments for Members of Congress.

S. 546

At the request of Mr. REID, the name of the Senator from Louisiana (Mr. VITTER) was added as a cosponsor of S. 546, a bill to amend title 10, United States Code, to permit certain retired members of the uniformed services who have a service-connected disability to receive both disability compensation from the Department of Veterans Affairs for their disability and either retired pay by reason of their years of military service or Combat-Related Special Compensation.

S. 572

At the request of Mr. WEBB, the name of the Senator from North Carolina (Mr. BURR) was added as a cosponsor of S. 572, a bill to provide for the issuance of a "forever stamp" to honor the sacrifices of the brave men and women of the armed forces who have been awarded the Purple Heart.

S. 599

At the request of Ms. COLLINS, the name of the Senator from Oklahoma (Mr. INHOFE) was added as a cosponsor of S. 599, a bill to amend chapter 81 of title 5, United States Code, to create a presumption that a disability or death of a Federal employee in fire protection activities caused by any certain diseases is the result of the performance of such employee's duty.

S. 611

At the request of Mr. LAUTENBERG, the names of the Senator from California (Mrs. BOXER), the Senator from New York (Mrs. GILLIBRAND) and the Senator from Iowa (Mr. HARKIN) were added as cosponsors of S. 611, a bill to provide for the reduction of adolescent pregnancy, HIV rates, and other sexually transmitted diseases, and for other purposes.

S. 620

At the request of Mr. REID, the name of the Senator from Rhode Island (Mr. REED) was added as a cosponsor of S. 620, a bill to repeal the provision of law that provides automatic pay adjustments for Members of Congress.

S. RES. 49

At the request of Mr. LUGAR, the name of the Senator from Wisconsin (Mr. FEINGOLD) was added as a cosponsor of S. Res. 49, a resolution to express the sense of the Senate regarding the importance of public diplomacy.

STATEMENTS ON INTRODUCED
BILLS AND JOINT RESOLUTIONS

By Mr. KOHL:

S. 627. A bill to authorize the Secretary of Education to make grants to support early college high schools and other dual enrollment programs; to the Committee on Health, Education, Labor, and Pensions.

Mr. KOHL. Mr. President, today I am doing my part to end the growing crisis of high school dropouts. I am introducing the Fast Track to College Act, a bill to increase high school graduation rates and improve access to college through the expansion of dual enrollment programs and Early College High Schools. Such programs allow young people to earn up to two years of college credit, including an Associate's degree, while also earning their high school diploma.

As our country struggles with an economic recession, I believe we must continue to invest in our public schools. While we must carefully consider how taxpayer dollars are spent during these trying times, education is one of the wisest investments we can make, and it is an investment that must be made now, before our children fall farther behind.

Education provides an outstanding return on investment for taxpayers, and it builds the foundation for future economic growth. Young people who drop out of high school are at increased risk for unemployment and incarceration, and they are more likely to depend on public assistance for healthcare, housing, and other basic needs. Conversely, adults with a bachelor's degree will earn two-thirds more than a high school graduate over the course of their working lives, and they are much less likely to experience unemployment or rely on social programs.

Our Nation's future depends on how we respond to the growing crisis in our schools, especially the rising number of high school dropouts. This generation of Americans is the first in history to be less likely to graduate from high school than their parents, and the U.S. is the only industrialized Nation where that is the case. This is not a sustainable trend if we hope to remain powerful and prosperous. Recent reports have illustrated the enormous challenge: the national graduation rate is only 70 percent, and is significantly lower in many large urban school districts. For example, my home state of Wisconsin has a relatively high graduation rate of 86 percent, but that rate drops to only 46 percent in the urban schools in Milwaukee. Such an achievement gap cannot continue.

As we work to reauthorize the No Child Left Behind Act, we must find solutions to the growing dropout crisis and provide opportunities for young people to pursue higher education. More funding is not the only answer for

the problems in our schools—we must also reform our whole approach to education. We must ensure that young people are being equipped with the skills they need to compete in a 21st century economy. In particular, we can no longer view a high school diploma as a satisfactory goal for students. In today's world, students need at least two years of college or technical education in order to secure a well-paying job and provide for themselves and their families.

That is why I ask my colleagues to support this bill, which provides competitive grant funding for Early College High Schools and other dual enrollment programs that allow low-income students to earn college credit and a high school diploma at the same time. These programs put students on the fast track to college and increase the odds that they will not only graduate, but go on to continue their education and secure higher-paying jobs. The Gates Foundation has been funding evaluations of such programs for several years now, and they have shown incredible promise as a tool for increasing attendance, graduation, and college enrollment rates, particularly among low-income high school students. Students are motivated by a challenging curriculum and the tangible rewards of achievement, including free college credit and exposure to career opportunities. This free college credit is critically important, especially in this economy, as family savings dwindle and tuition costs continue to rise. Dual enrollment programs can provide just enough costs savings to make college affordable, especially for low and middle-income families who might think it is out of their reach.

Specifically, this bill authorizes \$140,000,000 for competitive 6-year grants to schools, with priority given to schools that serve low-income students. The funding will help defray the costs of implementing new programs, strengthening existing programs, and providing students and teachers with the resources they need to succeed in early college high schools and other dual enrollment programs. The bill also includes \$10 million for states to provide support for these programs, as well as an evaluation component so we can measure the program's effectiveness.

I am proud to sponsor this legislation because I believe this investment in our schools will help solve the dropout crisis and secure America's future by ensuring that all young people can compete in today's global economy. Further, I believe that all children, regardless of income or other factors, deserve equal opportunities to fulfill their potential, and it is both morally and fiscally responsible for this Congress to invest in high-quality educational programs that help them reach that potential.

While our country faces unprecedented challenges at this moment in history, I believe we also face incredible opportunities to shape our future. I look forward to working with my colleagues in the Congress to reinvest in a world-class education system that will move our country forward into the 21st century.

I urge my colleagues to support this important legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 627

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fast Track to College Act of 2009".

SEC. 2. PURPOSE.

The purpose of this Act is to increase high school graduation rates and the percentage of students who complete a recognized postsecondary credential by the age of 26, including among low-income students and students from other populations underrepresented in higher education.

SEC. 3. DEFINITIONS.

For purposes of this Act:

(1) **DUAL ENROLLMENT PROGRAM.**—The term "dual enrollment program" means an academic program through which a high school student is able simultaneously to earn credit toward a high school diploma and a postsecondary degree or certificate.

(2) **EARLY COLLEGE HIGH SCHOOL.**—The term "early college high school" means a high school that provides a course of study that enables a student to earn a high school diploma and either an associate's degree or one to two years of college credit toward a postsecondary degree or credential.

(3) **EDUCATIONAL SERVICE AGENCY.**—The term "educational service agency" has the meaning given such term in section 9101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

(4) **ELIGIBLE ENTITY.**—The term "eligible entity" means a local educational agency, which may be an educational service agency, in a collaborative partnership with an institution of higher education. Such partnership also may include other entities, such as a nonprofit organization with experience in youth development.

(5) **INSTITUTION OF HIGHER EDUCATION.**—The term "institution of higher education" has the meaning given such term in section 101 of the Higher Education Act of 1965.

(6) **LOCAL EDUCATIONAL AGENCY.**—The term "local educational agency" has the meaning given such term in section 9101 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7801).

(7) **SECRETARY.**—The term "Secretary" means the Secretary of Education.

(8) **LOW-INCOME STUDENT.**—The term "low-income student" means a student described in section 1113(a)(5) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6313(a)(5)).

SEC. 4. AUTHORIZATION OF APPROPRIATIONS; RESERVATIONS.

(a) **IN GENERAL.**—To carry out this Act, there are authorized to be appropriated \$150,000,000 for fiscal year 2010 and such sums

as may be necessary for each of fiscal years 2011 through 2015.

(b) **EARLY COLLEGE HIGH SCHOOLS.**—The Secretary shall reserve not less than 45 percent of the funds appropriated under subsection (a) to support early college high schools under section 5.

(c) **OTHER DUAL ENROLLMENT PROGRAMS.**—The Secretary shall reserve not less than 45 percent of such funds to support other dual enrollment programs under section 5.

(d) **STATE GRANTS.**—The Secretary shall reserve 10 percent of such funds, or \$10,000,000, whichever is less, for grants to States under section 9.

SEC. 5. AUTHORIZED PROGRAM.

(a) **IN GENERAL.**—The Secretary is authorized to award six-year grants to eligible entities seeking to establish a new, or support an existing, early college high school or other dual enrollment program.

(b) **GRANT AMOUNT.**—The Secretary shall ensure that grants are of sufficient size to enable grantees to carry out all required activities and otherwise meet the purposes of this Act, except that a grant under this section may not exceed \$2,000,000.

(c) MATCHING REQUIREMENT.—

(1) **IN GENERAL.**—An eligible entity shall contribute matching funds toward the costs of the early college high school or other dual enrollment program to be supported under this section, of which not less than half shall be from non-Federal sources, which funds shall represent not less than the following:

(A) 20 percent of the grant amount received in each of the first and second years of the grant.

(B) 30 percent in each of the third and fourth years.

(C) 40 percent in the fifth year.

(D) 50 percent in the sixth year.

(2) **DETERMINATION OF AMOUNT CONTRIBUTED.**—The Secretary shall allow an eligible entity to satisfy the requirement of this subsection through in-kind contributions.

(d) **SUPPLEMENT, NOT SUPPLANT.**—An eligible entity shall use a grant received under this section only to supplement funds that would, in the absence of such grant, be made available from non-Federal funds for support of the activities described in the eligible entity's application under section 7, and not to supplant such funds.

(e) **PRIORITY.**—In awarding grants under this section, the Secretary shall give priority to applicants—

(1) that propose to establish or support an early college high school or other dual enrollment program that will serve a student population of which 40 percent or more are students counted under section 1113(a)(5) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6313(a)(5)); and

(2) from States that provide assistance to early college high schools or other dual enrollment programs, such as assistance to defray the costs of higher education, such as tuition, fees, and textbooks.

(f) **GEOGRAPHIC DISTRIBUTION.**—The Secretary shall, to the maximum extent practicable, ensure that grantees are from a representative cross-section of urban, suburban, and rural areas.

SEC. 6. USES OF FUNDS.

(a) **MANDATORY ACTIVITIES.**—An eligible entity shall use grant funds received under section 5 to support the activities described in its application under section 7, including the following:

(1) **PLANNING YEAR.**—In the case of a new early college high school or other dual enrollment program, during the first year of the grant—

(A) hiring a principal and staff, as appropriate;

(B) designing the curriculum and sequence of courses in collaboration with, at a minimum, teachers from the local educational agency and faculty from the partner institution of higher education;

(C) informing parents and the community about the school or program and opportunities to become actively involved in the school or program;

(D) establishing a course articulation process for defining and approving courses for high school and college credit;

(E) outreach programs to ensure that middle and high school students and their families are aware of the school or program;

(F) liaison activities among partners in the eligible entity; and

(G) coordinating secondary and postsecondary support services, academic calendars, and transportation.

(2) **IMPLEMENTATION PERIOD.**—During the remainder of the grant period—

(A) academic and social support services, including counseling;

(B) liaison activities among partners in the eligible entity;

(C) data collection and use of such data for student and instructional improvement and program evaluation;

(D) outreach programs to ensure that middle and high school students and their families are aware of the early college high school or other dual enrollment program;

(E) professional development, including joint professional development for secondary school personnel and faculty from the institution of higher education; and

(F) school or program design and planning team activities, including curriculum development.

(b) **ALLOWABLE ACTIVITIES.**—An eligible entity may also use grant funds received under section 5 otherwise to support the activities described in its application under section 7, including—

(1) purchasing textbooks and equipment that support the curriculum of the early college high school or other dual enrollment program;

(2) developing learning opportunities for students that complement classroom experiences, such as internships, career-based capstone projects, and opportunities to participate in the activities provided under chapters 1 and 2 of subpart 2 of part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070a–11 et seq., 1070a–21 et seq.);

(3) transportation; and

(4) planning time for high school and college educators to collaborate.

SEC. 7. APPLICATION.

(a) **IN GENERAL.**—To receive a grant under section 5, an eligible entity shall submit to the Secretary an application at such time, in such manner, and including such information as the Secretary determines to be appropriate.

(b) **CONTENTS OF APPLICATION.**—At a minimum, the application described in subsection (a) shall include a description of—

(1) the budget of the early college high school or other dual enrollment program;

(2) each partner in the eligible entity and its experience with early college high schools or other dual enrollment programs, key personnel from each partner and such personnel's responsibilities for the school or program, and how the eligible entity will work with secondary and postsecondary teachers, other public and private entities, community-based organizations, businesses, labor organizations, and parents to ensure

that students will be prepared to succeed in postsecondary education and employment, which may include the development of an advisory board;

(3) how the eligible entity will target and recruit at-risk youth, including those at risk of dropping out of school, first generation college students, and students from populations described in section 1111(b)(2)(C)(v)(II) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311(b)(2)(C)(v)(II));

(4) a system of student supports, including small group activities, tutoring, literacy and numeracy skill development in all academic disciplines, parental and community outreach and engagement, extended learning time, and college readiness activities, such as early college academic seminars and counseling;

(5) in the case of an early college high school, how a graduation and career plan will be developed, consistent with State graduation requirements, for each student and reviewed each semester;

(6) how parents or guardians of students participating in the early college high school or other dual enrollment program will be informed of the students' academic performance and progress and, subject to paragraph (5), involved in the development of the students' career and graduation plans;

(7) coordination between the institution of higher education and the local educational agency, including regarding academic calendars, provision of student services, curriculum development, and professional development;

(8) how the eligible entity will ensure that teachers in the early college high school or other dual enrollment program receive appropriate professional development and other supports, including to enable the teachers to utilize effective parent and community engagement strategies, and help English-language learners, students with disabilities, and students from diverse cultural backgrounds to succeed;

(9) learning opportunities for students that complement classroom experiences, such as internships, career-based capstone projects, and opportunities to participate in the activities provided under chapters 1 and 2 of subpart 2 of part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070a–11 et seq., 1070a–21 et seq.);

(10) how policies, agreements, and the courses in the program will ensure that postsecondary credits earned will be transferable to, at a minimum, public institutions of higher education within the State, consistent with existing statewide articulation agreements;

(11) student assessments and other measurements of student achievement, including benchmarks for student achievement;

(12) outreach programs to provide elementary and secondary school students, especially those in middle grades, and their parents, teachers, school counselors, and principals information about and academic preparation for the early college high school or other dual enrollment program;

(13) how the local educational agency and institution of higher education will work together, as appropriate, to collect and use data for student and instructional improvement and program evaluation;

(14) how the eligible entity will help students meet eligibility criteria for postsecondary courses and ensure that students understand how their credits will transfer; and

(15) how the eligible entity will access and leverage additional resources necessary to

sustain the early college high school or other dual enrollment program after the grant expires, including by engaging businesses and non-profit organizations.

(c) **ASSURANCES.**—An eligible entity's application under subsection (a) shall include assurances that—

(1) in the case of an early college high school, the majority of courses offered, including of postsecondary courses, will be offered at facilities of the institution of higher education;

(2) students will not be required to pay tuition or fees for postsecondary courses offered as part of the early college high school or other dual enrollment program;

(3) postsecondary credits earned will be transcribed upon completion of the requisite coursework; and

(4) faculty teaching such postsecondary courses meet the normal standards for faculty established by the institution of higher education.

(d) **WAIVER.**—The Secretary may waive the requirement of subsection (c)(1) upon a showing that it is impractical to apply due to geographic considerations.

SEC. 8. PEER REVIEW.

(a) **PEER REVIEW OF APPLICATIONS.**—The Secretary shall establish peer review panels to review applications submitted pursuant to section 7 to advise the Secretary regarding such applications.

(b) **COMPOSITION OF PEER REVIEW PANELS.**—The Secretary shall ensure that each peer review panel is not comprised wholly of full-time officers or employees of the Federal Government and includes, at a minimum—

(1) experts in the establishment and administration of early college high schools or other dual enrollment programs from the secondary and postsecondary perspective;

(2) faculty at institutions of higher education and secondary school teachers with expertise in dual enrollment; and

(3) experts in the education of at-risk students.

SEC. 9. GRANTS TO STATES.

(a) **IN GENERAL.**—The Secretary is authorized to award five-year grants to State agencies responsible for secondary or postsecondary education for efforts to support or establish early college high schools or other dual enrollment programs.

(b) **GRANT AMOUNT.**—The Secretary shall ensure that grants are of sufficient size to enable grantees to carry out all required activities.

(c) **MATCHING REQUIREMENT.**—A State shall contribute matching funds from non-Federal sources toward the costs of carrying out activities under this section, which funds shall represent not less than 50 percent of the grant amount received in each year of the grant.

(d) **PRIORITY.**—In awarding grants under this section, the Secretary shall give priority to States that provide assistance to early college high schools or other dual enrollment programs, such as assistance to defray the costs of higher education, such as tuition, fees, and textbooks.

(e) **APPLICATION.**—To receive a grant under this section, a State agency shall submit to the Secretary an application at such time, in such manner, and including such information as the Secretary determines to be appropriate.

(f) **CONTENTS OF APPLICATION.**—At a minimum, the application described in subsection (e) shall include—

(1) how the State will carry out all of the required State activities described in subsection (g);

(2) how the State will identify and eliminate barriers to implementing effective early college high schools and other dual enrollment programs after the grant expires, including by engaging businesses and non-profit organizations;

(3) how the State will access and leverage additional resources necessary to sustain early college high schools or other dual enrollment programs; and

(4) such other information as the Secretary determines to be appropriate.

(g) **STATE ACTIVITIES.**—A State receiving a grant under this section shall use such funds for—

(1) creating outreach programs to ensure that middle and high school students, their families, and community members are aware of early college high schools and other dual enrollment programs in the State;

(2) planning and implementing a statewide strategy for expanding access to early college high schools and other dual enrollment programs for students who are underrepresented in higher education to raise statewide rates of high school graduation, college readiness, and completion of postsecondary degrees and credentials, with a focus on at-risk students, including identifying any obstacles to such a strategy under State law or policy;

(3) providing technical assistance to early college high schools and other dual enrollment programs, such as brokering relationships and agreements that forge a strong partnership between elementary and secondary and postsecondary partners;

(4) identifying policies that will improve the effectiveness and ensure the quality of early college high schools and other dual enrollment programs, such as access, funding, data and quality assurance, governance, accountability, and alignment policies;

(5) planning and delivering statewide training and peer learning opportunities for school leaders and teachers from early college high schools and other dual enrollment programs, which may include providing instructional coaches who offer on-site guidance;

(6) disseminating best practices in early college high schools and other dual enrollment programs from across the State and from other States; and

(7) facilitating Statewide data collection, research and evaluation, and reporting to policymakers and other stakeholders.

SEC. 10. REPORTING AND OVERSIGHT.

(a) **REPORTING BY GRANTEEES.**—

(1) **IN GENERAL.**—The Secretary shall establish uniform guidelines for all grantees concerning information such grantees annually shall report to the Secretary to demonstrate a grantee's progress toward achieving the goals of this Act.

(2) **CONTENTS OF REPORT.**—At a minimum, a report submitted under this subsection by an eligible entity receiving funds under section 5 for an early college high school or other dual enrollment program shall include the following information about the students participating in the school or program, for each category of students described in section 1111(h)(1)(C)(i) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311(h)(1)(C)(i)):

(A) The number of students.

(B) The percentage of students scoring advanced, proficient, basic, and below basic on the assessments described in section 1111(b)(3) of the Elementary and Secondary Education Act of 1965.

(C) The performance of students on other assessments or measurements of achievement.

(D) The number of secondary school credits earned.

(E) The number of postsecondary credits earned.

(F) Attendance rate, as appropriate.

(G) Graduation rate.

(H) Placement in postsecondary education or advanced training, in military service, and in employment.

(I) A description of the school or program's student, parent, and community outreach and engagement.

(b) **REPORTING BY SECRETARY.**—The Secretary annually shall—

(1) prepare a report that compiles and analyzes the information described in subsection (a) and identifies the best practices for achieving the goals of this Act; and

(2) submit the report to the Committee on Health, Education, Labor, and Pensions of the Senate and the Committee on Education and Labor of the House of Representatives.

(c) **MONITORING VISITS.**—The Secretary's designee shall visit each grantee at least once for the purpose of helping the grantee achieve the goals of this Act and to monitor the grantee's progress toward achieving such goals.

(d) **NATIONAL EVALUATION.**—Not later than 6 months after the date on which funds are appropriated to carry out this Act, the Secretary shall enter into a contract with an independent organization to perform an evaluation of the grants awarded under this Act. Such evaluation shall apply rigorous procedures to obtain valid and reliable data concerning participants' outcomes by social and academic characteristics and monitor the progress of students from high school to and through postsecondary education.

(e) **TECHNICAL ASSISTANCE.**—The Secretary shall provide technical assistance to eligible entities concerning best practices in early college high schools and other dual enrollment programs and shall disseminate such best practices among eligible entities and State and local educational agencies.

SEC. 11. RULES OF CONSTRUCTION.

(a) **EMPLOYEES.**—Nothing in this Act shall be construed to alter or otherwise affect the rights, remedies, and procedures afforded to the employees of local educational agencies (including schools) or institutions of higher education under Federal, State, or local laws (including applicable regulations or court orders) or under the terms of collective bargaining agreements, memoranda of understanding, or other agreements between such employees and their employers.

(b) **GRADUATION RATE.**—A student who graduates from an early college high school supported under this Act in the standard number of years for graduation described in the eligible entity's application shall be considered to have graduated on time for purposes of section 1111(b)(2)(C)(6) of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311(b)(2)(C)(6)).

By Mr. CONRAD (for himself, Mr. BROWNBACK, Ms. COLLINS, Mr. JOHNSON, and Mrs. MURRAY):

S. 628. A bill to provide incentives to physicians to practice in rural and medically underserved communities; to the Committee on the Judiciary.

Mr. CONRAD. Mr. President, today I am introducing the Conrad State 30 Improvement Act to extend and expand this program's success in bringing doctors to communities that would otherwise not have access to health care services. In the last Congress, a very

similar version of this bill had extremely widespread support in the medical community and a diverse group of cosponsors in the Senate.

The Conrad State 30 program, which I helped create in 1994, has brought thousands of physicians to underserved communities in all 50 States, across our great country. Under the program, foreign doctors already in the country for medical training are granted a waiver from a visa requirement to return to their home country for 2 years. In exchange for this waiver, the doctors must commit to providing health care to underserved populations in the United States for 3 years.

By 2020, some projections show that the United States may have 200,000 fewer doctors than it needs; that is a staggering statistic, and one that cannot be taken lightly. If this shortfall is allowed to materialize, rural areas, like my State of North Dakota, will undoubtedly be among the hardest hit.

Given the looming deficit of doctors and an increasingly competitive global marketplace, it is vital that we maintain the incentives for qualified foreign physicians to serve patients in this country. The immigration benefits historically provided by the Conrad 30 program, and enhanced in this bill, provide crucial incentives to foreign doctors. When they do come to our country, it is vital that we make sure that they end up in the places that need them most.

This bill makes the Conrad 30 program permanent, something that I believe is long overdue. It also invites a new group of foreign doctors to take part in the program, a change that could dramatically expand the pool of doctors practicing in rural and underserved areas. Further, the bill creates a mechanism by which the current cap of 30 doctors per State can significantly expand, while protecting the interests of those States that have had difficulty recruiting doctors under the program. Finally, the bill creates an important new incentive for doctors to participate in the program by granting them a green card cap exemption when they have completed their service.

I strongly believe the Conrad State 30 Improvement Act can be of great benefit to every state in the country and help combat the growing shortage of health care providers in the U.S.

By Ms. COLLINS (for herself, Mr. VOINOVICH, and Mr. KOHL):

S. 629. A bill to facilitate the part-time reemployment of annuitants, and for other purposes; to the Committee on Homeland Security and Governmental Affairs.

Ms. COLLINS. Mr. President, I rise to introduce a bill with my colleagues Senators VOINOVICH and KOHL that will strengthen the Federal Government's ability to serve the public at a time when Federal agencies face a wave of

retirement of highly experienced employees.

When we think about the coming demographic shock of millions of Baby Boomers reaching retirement age, we usually focus on the cash-flow implications for the Social Security and Medicare programs. But their aging will also have a profound effect on the Federal workforce.

On average, retirements from the Federal workforce have exceeded 50,000 a year for a decade. The numbers will certainly rise in the near future. The Office of Personnel Management calculates that 60 percent of the current Federal workforce, whose civilian component approaches three million people, will be eligible to retire during the coming 10 years.

Federal agencies, which already must hire more than a quarter-million new employees each year, will need to work hard to replace those retirees, as the private sector and state and local governments will be facing the same problem and competing for qualified replacements.

The Baby Boom retirement wave will have another impact. It will cause a sudden acceleration in the loss of accumulated skills and mentoring capabilities that experienced workers possess.

Research has repeatedly shown that, in general, older workers equal or outperform younger workers in organizational knowledge, ability to work independently, commitment, productivity, flexibility, and mentoring ability. Making good use of their talents is, therefore, not charity. It is common sense and sound management.

Federal agencies recognize the value of older workers, as witnessed by the fact that nearly 4,500 retirees have been allowed to return to full-time work on a waiver basis.

Agencies could make use of even more Federal annuitants for short-term projects or part-time work, but for a disincentive in current law.

Current law mandates that annuitants who return to work for the Federal Government must have their salary reduced by the amount of their annuity during the period of reemployment. The bill I introduce today with Senators VOINOVICH and KOHL would provide a limited but vital measure of relief to agencies who could benefit from the skills and knowledge of Federal retirees. It provides an opportunity for Federal agencies to reemploy retirees without requiring them to take pay cuts based on their annuity payment.

This simple but powerful reform will provide some much needed hiring flexibilities for agencies, especially given the expertise the Federal Government will need to effectively implement the American Recovery and Reinvestment Act of 2009.

The Homeland Security and Governmental Affairs Committee held a hear-

ing earlier this month where we discussed how oversight entities will meet their responsibilities to ensure that stimulus funds are spent effectively. Acting Comptroller General Gene Dodaro indicated that the reemployment of annuitants is an essential authority that the Government Accountability Office uses when circumstances arise that require rapid staffing increases. Using statutory authority possessed by GAO, the agency is able to attract and hire back their annuitants without offsetting their pay by the amount of their pension.

Most executive branch agencies do not enjoy similar flexibility as GAO. Instead, current law requires these agencies to offset an annuitant's salary, unless the agency can first obtain a waiver from OPM. This waiver will be granted if the agency demonstrates to OPM that only a particular annuitant is qualified to fill a particular need and the annuitant will only return if his or her salary is not offset. The waiver process is administratively cumbersome, and often prevents agencies from even considering a returning annuitant for an important position.

Whether at GAO or in our Government's Inspectors General offices, experienced, qualified former employees—with institutional knowledge—could play an important role in oversight of stimulus spending. This point was recently made by both Acting Comptroller General Dodaro and the Chair of the Council of Inspectors General on Integrity and Efficiency, CIGIE, Phyllis Fong, in testimony before the Homeland Security and Governmental Affairs Committee.

Inspectors General will have to quickly hire experienced auditors and investigators to ensure critical oversight of stimulus spending. This legislation will allow IG offices to bring back valuable and experienced employees to the Federal Government to ensure aggressive oversight, enhanced transparency, and accountability for taxpayer dollars.

Ensuring an experienced acquisition workforce is available to oversee stimulus spending is just as critical. The government spent \$532 billion on contracts last year—a 140 percent increase from 2001 to 2008. At the same time, the Federal Government entered the 21st century with 22 percent fewer federal civilian acquisition personnel than it had at the start of the 1990s. As early as 2012, 50 percent of this workforce will be eligible to retire. This means that as our contract spending continues to increase dramatically, our contracting workforce continues to shrink. This legislation will allow agencies to bring in experienced acquisition personnel at a time when they are desperately needed—whether to ensure that stimulus funds are spent wisely or to help administer over \$500 billion in government contract spending.

Several organizations have endorsed the reforms in our bill, including the National Active and Retired Federal Employees Association, the Partnership for Public Service, and the Government Managers Coalition.

I would also note two important points about the bill.

First, it will not materially affect the necessary flow of younger workers into Federal agencies. The bill contemplates reemployment for part-time or project work of not more than 520 hours in the first six months following the start of annuity payments, not more than 1,040 hours in any 12-month period, and not more than 3,120 hours total for the annuitant's lifetime. In terms of eight-hour days, those figures are equivalent to 65, 130, and 390 days, respectively.

These limits will give agencies flexibility in assigning retirees to limited-time or limited-scope projects, including mentoring and collaboration, without evading or undermining the waiver requirement for substantial or full-time employment of annuitants.

I would also note that this bill gives no cause for concern about financial impact. Reemployed annuitants would be performing work that the agencies needed to do in any case, but would not require any additional contributions to pension or savings plans. Meanwhile, their retiree health and life insurance benefits would be unaffected by their part-time work. Even without making any allowance for the positive effects of their organizational knowledge, commitment, productivity, and mentoring potential, their reemployment is likely to produce net savings.

This measure offers benefits for Federal agencies, for Federal retirees who would welcome the opportunity to perform part-time work, and for taxpayers, especially during these tough economic times. I urge my colleagues to support it.

By Mr. LEAHY (for himself, Mr. SPECTER, Mr. WHITEHOUSE, and Mr. SESSIONS):

S. 630. A bill to make technical amendments to laws containing time periods affecting judicial proceedings; to the Committee on the Judiciary.

Mr. LEAHY. Mr. President, today, we introduce the Statutory Time-Periods Technical Amendments Act of 2009. I thank Senator SPECTER, the Ranking Republican on the Judiciary Committee and Senators WHITEHOUSE and SESSIONS, the Chairman and Ranking Member of the Administrative Oversight and Courts Subcommittee for co-sponsoring.

This legislation incorporates recommendations from the Judicial Conference of the United States to alter deadlines in certain statutes affecting court proceedings to account for recent amendments to the Federal time-computation rules. This bipartisan bill

would provide judges and practitioners with commonsense deadlines that are less confusing and less complex than current deadlines, and also ensure that existing time periods are not shortened.

After much study and significant public comment, the Judicial Conference's Standing Committee on Rules of Practice and Procedure and the Advisory Committees on Appellate, Bankruptcy, Civil, and Criminal Rules arrived at proposed new rules intended to provide predictability and uniformity to the current process of calculating court deadlines. The proposed rules respond, in part, to findings from the Judicial Conference that the current time-computation process is confusing and can lead to missed deadlines and litigants' loss of important rights. Under the current time-calculation rules, weekends and holidays are not counted when calculating court deadlines of less than 30 days, but are counted for calculating court deadlines longer than 30 days. The proposed new rules simplify this process by counting holidays and weekends regardless of a court deadline's time period. According to the Judicial Conference, these proposed changes would respond to practitioners' complaints and criticism from judges.

This legislation would amend a number of Federal civil and criminal statutes affecting court proceedings and harmonize them with the proposed rules. First, this remedial bill would alter certain statutory court deadlines to counterbalance any shortening of the time period resulting from the "days are days" approach. For example, the bill changes 5 days to 7 days, and 10 days to 14 days, to prevent time periods from becoming shorter when a practitioner counts all days, including weekends. This change would, in effect, maintain the same time periods in the statutes. In addition, if a time period ends on a holiday or a weekend the time period would be extended to the next business day. The bill would also change some statutory deadlines that would otherwise be inconsistent with the amended rules deadlines and lead to confusion.

This bipartisan legislation is time-sensitive. Both the Department of Justice and Judicial Conference urge swift consideration of this proposal, to allow it to take effect on December 1, 2009, the same date as the amendments to the rules.

According to a letter the Department of Justice sent to the Judicial Conference last year: "Failure to adopt statutory changes that move in concert with the proposed rule changes will result in exactly the opposite effect of what is intended—changes to the rules alone will introduce greater confusion rather than desirable simplification." Although the Obama administration has not formally weighed

in on this legislation, I anticipate that the Justice Department will again support this proposal. In addition, this bill mirrors the proposal from the Judicial Conference which enjoyed broad support from numerous legal and bar organizations, including of the American College of Trial Lawyers, the Council of Appellate Lawyers, and the American Bar Association's Section of Litigation and Criminal Justice Section.

I hope we will consider this measure expeditiously and improve the effectiveness of our judicial system. Passing this bill will create a consistent and standard method for lawyers and judges to calculate court deadlines.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 630

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Statutory Time-Periods Technical Amendments Act of 2009".

SEC. 2. AMENDMENTS RELATED TO TITLE 11, UNITED STATES CODE.

Title 11, United States Code, is amended—

- (1) in section 109(h)(3)(A)(ii), by striking "5-day" and inserting "7-day";
- (2) in section 322(a), by striking "five days" and inserting "seven days";
- (3) in section 332(a), by striking "5 days" and inserting "7 days";
- (4) in section 342(e)(2), by striking "5 days" and inserting "7 days";
- (5) in section 521(e)(3)(B), by striking "5 days" and inserting "7 days";
- (6) in section 521(i)(2), by striking "5 days" and inserting "7 days";
- (7) in section 704(b)(1)(B), by striking "5 days" and inserting "7 days";
- (8) in section 749(b), by striking "five days" and inserting "seven days"; and
- (9) in section 764(b), by striking "five days" and inserting "seven days".

SEC. 3. AMENDMENTS RELATED TO TITLE 18, UNITED STATES CODE.

Title 18, United States Code, is amended—

- (1) in section 983(j)(3), by striking "10 days" and inserting "14 days";
- (2) in section 1514(a)(2)(C), by striking "10 days" each place it appears and inserting "14 days";
- (3) in section 1514(a)(2)(E), by inserting after "the Government" the following: "excluding intermediate weekends and holidays";
- (4) in section 1963(d)(2), by striking "ten days" and inserting "fourteen days";
- (5) in section 2252A(c), by striking "10 days" and inserting "14 days";
- (6) in section 2339B(f)(5)(B)(ii), by striking "10 days" and inserting "14 days";
- (7) in section 2339B(f)(5)(B)(iii)(I), by inserting after "trial" the following: "excluding intermediate weekends and holidays";
- (8) in section 2339B(f)(5)(B)(iii)(III), by inserting after "appeal" the following: "excluding intermediate weekends and holidays";
- (9) in section 3060(b)(1), by striking "tenth day" and inserting "fourteenth day";
- (10) in section 3432, by inserting after "commencement of trial" the following: "excluding intermediate weekends and holidays";

excluding intermediate weekends and holidays;"

(11) in section 3509(b)(1)(A), by striking "5 days" and inserting "7 days"; and

(12) in section 3771(d)(5)(B), by striking "10 days" and inserting "14 days".

SEC. 4. AMENDMENTS RELATED TO THE CLASSIFIED INFORMATION PROCEDURES ACT.

The Classified Information Procedures Act (18 U.S.C. App.) is amended—

(1) in section 7(b), by striking "ten days" and inserting "fourteen days";

(2) in section 7(b)(1), by inserting after "adjournment of the trial," the following: "excluding intermediate weekends and holidays,"; and

(3) in section 7(b)(3), by inserting after "argument on appeal," the following: "excluding intermediate weekends and holidays,".

SEC. 5. AMENDMENT RELATED TO THE CONTROLLED SUBSTANCES ACT.

Section 413(e)(2) of the Controlled Substances Act (21 U.S.C. 853(e)(2)) is amended by striking "ten days" and inserting "fourteen days".

SEC. 6. AMENDMENTS RELATED TO TITLE 28, UNITED STATES CODE.

Title 28, United States Code, is amended—

(1) in section 636(b)(1), by striking "ten days" and inserting "fourteen days";

(2) in section 1453(c)(1), by striking "not less than 7 days" and inserting "not more than 10 days"; and

(3) in section 2107(c), by striking "7 days" and inserting "14 days".

SEC. 7. EFFECTIVE DATE.

The amendments made by this Act shall take effect on December 1, 2009.

Mr. KOHL (for himself, Ms. COLLINS, Mr. COCHRAN, Mr. KERRY, Mr. WHITEHOUSE, Mr. BINGAMAN, Mr. LEVIN, Mr. CASEY, Mrs. LINCOLN, Ms. KLOBUCHAR, Ms. STABENOW, and Mr. BAYH):

S. 631. A bill to provide for nationwide expansion of the pilot program for national and State background checks on direct patient access employees of long-term care facilities or providers; to the Committee on Finance.

Mr. KOHL. Mr. President, I rise today to introduce the Patient Safety and Abuse Prevention Act along with my colleague, Senator COLLINS. This bill is the culmination of years of work and careful study, and would go a long way to ensuring the safety of vulnerable older Americans. We have hard evidence that this policy will work and will protect lives. It is vital that we consider getting this legislation moving soon, and I look forward to working with the Finance Committee, the elder justice community, and Congressman JOE SESTAK in the House to make that happen.

Thousands of individuals with a history of substantiated abuse or a criminal record are hired every year to work closely with exposed and defenseless seniors within our nation's nursing homes and other long-term care facilities. Because the current system of state-based background checks is haphazard, inconsistent, and full of gaping holes, predators can evade detection throughout the hiring process, securing

jobs that allow them to assault, abuse, and steal from defenseless elders.

We can and must take action to stop this type of abuse by building on the resounding success of a seven-state background check pilot program, enacted as part of the 2003 Medicare Modernization Act, which enabled seven states to make major improvements in their existing screening procedures of individuals applying for jobs in long-term care settings. The results of this 3-year pilot program were a resounding success: more than 7,200 individuals with a history of abuse or violence were kept out of the workforce in Alaska, Idaho, Illinois, Michigan, Nevada, New Mexico, and Wisconsin.

The states who participated in the pilot have all chosen to continue their programs, and are taking additional steps to build on the success of the technological infrastructure they created. The Patient Safety and Abuse Prevention Act will expand these outstanding results nationwide by making it possible for all states to make these commonsense improvements. The cost of enabling states to efficiently connect registries and databases, expand the range of workers who are screened, and add a national criminal history check is very modest. If states take these steps, we can reduce the terrible toll of elder abuse. If we do not, experts tell us abuse rates will continue to rise.

Our straightforward approach is strongly endorsed by State Attorneys General across the country, the Elder Justice Coalition, which speaks for over 500 member organizations, AARP, the American Health Care Association, NCCNHR, the American Association of Homes and Services for the Aging, and advocates in hundreds of communities who work every day to protect the well-being of elders and individuals with disabilities.

Last Congress, the Patient Safety and Abuse Prevention Act was passed unanimously out of the Finance Committee. We are so close to getting this policy passed. I ask my colleagues to join Senators COLLINS, KERRY, WHITEHOUSE, BINGAMAN, LEVIN, CASEY, LINCOLN, KLOBUCHAR, STABENOW, BAYH, and COCHRAN in supporting our efforts to reduce and prevent abuse of our elders and loved ones.

Mr. President, I ask unanimous consent that support material be printed in the RECORD.

There being no objection, the material was ordered to be placed in the RECORD, as follows:

[From the PARADE Intelligence Report, Mar. 1, 2009]

PROTECTING THE ELDERLY FROM ABUSE

(By Lyric Wallwork Winik)

In 2006, a 90-year-old New York grandmother was raped by a caregiver with a criminal record. The man worked in the nursing home where she lived. Similar incidents over the years have led many to won-

der how criminals end up working with vulnerable populations in the first place.

While most states require background checks for nursing-home employees, there is no national database that allows employers to check for crimes committed in other states.

Sen. Herb Kohl (D., Wis.) has introduced legislation that would require the creation of a national cross-referencing system. According to the Senate Special Committee on Aging, which Kohl leads, the Congressional Budget Office has estimated the cost at \$100 million over three years. A trial program in seven states found that 7000 applicants for eldercare positions had violent criminal records or a substantiated history of abuse. Says Kohl, "This policy is more than just a good idea in theory—we've implemented it in seven states and seen the results. Comprehensive background checks are routine for those who work with young children, and we should be protecting vulnerable seniors and disabled Americans in the same way."

By Mr. BAUCUS (for himself, Mr. CRAPO, Mrs. LINCOLN, Ms. SNOWE, Mr. ROBERTS, Mr. ENZI, and Mr. ENSIGN):

S. 632. A bill to amend the Internal Revenue Code of 1986 to require that the payment of the manufacturers' excise tax on recreational equipment be paid quarterly; to the Committee on Finance.

Mr. BAUCUS. Mr. President, I am pleased today to join with my friend Senator CRAPO to introduce an important piece of legislation that would help to strengthen the financial health of America's firearm and ammunition manufacturers, who in turn support wildlife conservation in America.

The firearm and ammunition industry pays a Federal excise tax of 11 percent on long guns and ammunition and 10 percent on handguns. The Tax and Trade Bureau in the Treasury Department collects this tax. The Bureau sends the proceeds to the U.S. Fish and Wildlife Service, where they are deposited into the Wildlife Restoration Trust Fund, also known the Pittman-Robertson Trust Fund.

The tax is a major source of conservation funding in America. Since 1991, the firearm and ammunition industry has contributed about \$3 billion to the Pittman-Robertson Fund and since the inception of the tax, has contributed over \$5.5 billion. In 2008, over \$321 million was collected.

Of all the industries that pay excise taxes on the sale of their products to support wildlife conservation efforts, firearms and ammunition manufacturers are the only ones that have to pay excise taxes every 2 weeks. Other industries, such as archery and fishing, pay their tax every 3 months.

This frequent payment obligation imposes a costly and inequitable burden on the firearms and ammunition industry. Manufacturers spend thousands of additional man-hours just to administer the paperwork associated with making the bi-weekly excise payments.

According to the National Shooting Sports Foundation, changing the deposit schedule from a bi-weekly to quarterly payment would save the industry an estimated \$21.6 million dollars a year. That is money that the industry could use for investment in researching and developing new products, purchasing new manufacturing plants and equipment, and communicating with the hunting and shooting sports community.

Let me take a moment to explain what this legislation does not do. It does not reduce the firearm and ammunition industry's excise tax rates. It simply adds fairness to the tax code.

It is important for my Colleagues to understand the history and nature of the firearm and ammunition excise tax. During the Great Depression, hunters and conservationists recognized that overharvesting of wildlife would destroy America's treasured wildlife and natural habitats. Sportsmen, state wildlife agencies, and the firearm and ammunition industries lobbied Congress to extend the existing 10 percent excise tax and impose a new 11 percent excise tax to create a new fund. The fund was called the Pittman-Robertson Trust Fund after Senator Key Pittman of Nevada and Representative A. Willis Robertson of Virginia. President Franklin D. Roosevelt signed the legislation into law in 1937.

The industry, hunters, and conservationists came together to create this structure. They recognized the importance of conservation. And they encouraged Congress to impose a tax on their guns and ammo. It is rare thing when taxpayers ask to be taxed. But preserving our country's wildlife habitat was and continues to be that important.

Today, more than \$700 million each year is generated and used exclusively to establish, restore, and protect wildlife habitats.

Now let me explain the effect that the bill we are introducing today would have on the Pittman-Robertson Trust Fund. As the Joint Committee on Taxation explained in its revenue estimate, the net budget effect to the fund is \$4 million. This is purely a result of the shift in the timing of collections, from bi-weekly to quarterly, over a 10-year budget window. Consumers of firearms and ammunition would still pay the exact same amount of tax.

The firearm and ammunition industry recognizes the ten-year \$4 million loss to the trust fund. The industry developed a comprehensive 5-year proposal to ease this effect. Under the proposal, the industry would contribute \$150,000 a year for the next 5 years, a total of \$750,000, to the fund.

These actions again show the partnership between hunters, conservation groups, and the firearm and ammunition industry to protect conservation programs and initiatives. That's why

this legislation is supported by the following groups: Archery Trade Association; Association of Fish and Wildlife Agencies; Boon and Young; Congressional Sportsmen's Foundation; Delta Waterfowl; Ducks Unlimited; National Rifle Association; National Shooting Sports Foundation, Inc.; National Wild Turkey Federation; North American Wetlands Conservation Council; Pheasants Forever; Rocky Mountain Elk Foundation; Safari Club International; Wildlife Management Institute; U.S. Fish and Wildlife Service; and U.S. Sportsmen's Alliance.

I urge my Colleagues to support this legislation. I am very glad that Senators LINCOLN, SNOWE, ROBERTS, ENSIGN and ENZI have also signed onto this legislation as original cosponsors. I hope that we can come together, just as the industry, hunters, and conservation groups have, to pass this legislation. It is a matter of tax fairness. Let us do our part to correct this inequity in the tax code. Let us do our part to support an American industry that in turn supports wildlife habitat restoration and conservation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 632

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Firearms Fairness and Affordability Act".

SEC. 2. TIME FOR PAYMENT OF MANUFACTURERS' EXCISE TAX ON RECREATIONAL EQUIPMENT.

(a) IN GENERAL.—Subsection (d) of section 6302 of the Internal Revenue Code of 1986 (relating to mode or time of collection) is amended to read as follows:

"(d) TIME FOR PAYMENT OF MANUFACTURERS' EXCISE TAX ON RECREATIONAL EQUIPMENT.—The taxes imposed by subchapter D of chapter 32 of this title (relating to taxes on recreational equipment) shall be due and payable on the date for filing the return for such taxes."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to articles sold by the manufacturer, producer, or importer after the date of the enactment of this Act.

By Mr. TESTER (for himself, Mr. BAUCUS, Mr. JOHNSON, Mr. BINGAMAN, and Mr. DORGAN):

S. 633. A bill to establish a program for tribal colleges and universities within the Department of Health and Human Services and to amend the Native American Programs Act of 1974 to authorize the provision of grants and cooperative agreements to tribal colleges and universities, and for other purposes; to the Committee on Indian Affairs.

Mr. TESTER. Mr. President, my colleagues and I rise today to introduce the Tribal Health Promotion and Trib-

al Colleges and Universities Advancement Act of 2009.

Indian Education is perhaps the most important issue facing Indian Country today because education represents hope. Higher education leads to better job opportunities. Better jobs lead to higher income. Higher income leads to greater access to health care, adequate housing and overall, a higher quality of life. Higher quality of life leads to strong communities. Happy, healthy and strong communities are more resistant to the destructive forces of poverty such as chemical abuse, violence and neglect. This bill will improve Indian Country by addressing three of the most pressing issues facing it today: healthcare, job creation and education.

No one disagrees that 85 percent unemployment in Indian Country is unacceptable. No one disagrees that it is unacceptable that the majority of America's at-risk youth live in Indian Country. However, merely reciting these statistics over and over will not make the situation any better. We need to work together to make Indian Country a better place to live, work and raise a family.

We introduced this vital legislation to help advance the remarkable work of tribal colleges and universities. Through grants awarded under this bill, tribal colleges and universities will have additional resources necessary to strengthen Indian communities by providing healthy living and disease prevention education, outreach and workforce development programs, research, and capacity building. Not only will it improve education, but it will also improve the delivery of culturally appropriate health care services. In addition to good education and increased access to health care, this bill will also help create good jobs for tribal members living on American Indian reservations.

Tribal Colleges and Universities are accredited by independent, regional accreditation agencies, and like all institutions of higher education, must undergo stringent performance reviews to retain their accreditation status. In addition to offering postsecondary education opportunities, tribal colleges serve reservation communities by providing critical services including: libraries, community centers, cultural, historical and language programs; tribal archives, career centers, economic development and business centers; health and wellness centers, public meeting places, child and elder care centers. Despite their many obligations, functions, and notable achievements, tribal colleges remain the most poorly funded institutions of higher education in this country.

The continued success and future of the Nation's tribal colleges and universities depends on their ability to provide higher education and community

outreach programs. For them to succeed however, they must have the financial resources to do so.

As a Montanan and member of the Senate Indian Affairs Committee, I am proud to introduce this legislation. I look forward to swift consideration and eventual passage.

By Mrs. MURRAY:

S. 635. A bill to amend the Wild and Scenic Rivers Act to designate a segment of Illabot Creek in Skagit County, Washington, as a component of the National Wild and Scenic Rivers System; to the Committee on Energy and Natural Resources.

Mrs. MURRAY. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be placed in the RECORD, as follows:

S. 635

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. DESIGNATION OF WILD AND SCENIC RIVER SEGMENTS.

Section 3(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1274(a)) is amended by adding at the end the following:

“() ILLABOT CREEK, WASHINGTON.—The 14.3 mile segment from the headwaters of Illabot Creek to 1,000 feet south of and at no point closer than 200 feet from the Rockport-Cascade Road, flowing through lands managed by the U.S. Forest Service, Washington State Department of Natural Resources, and Seattle City Light, to be administered by the Secretary of Agriculture as follows:

“(A) The 4.3 mile segment from the headwaters of Illabot Creek to the boundary of Glacier Peak Wilderness Area as a wild river.

“(B) The 10 mile segment from the boundary of Glacier Peak Wilderness to 1,000 feet south of Rockport-Cascade Road as a recreational river.”.

SUBMITTED RESOLUTIONS

SENATE RESOLUTION 76—EXPRESSING THE SENSE OF THE SENATE THAT THE UNITED STATES AND THE PEOPLE'S REPUBLIC OF CHINA SHOULD WORK TOGETHER TO REDUCE OR ELIMINATE TARIFF AND NONTARIFF BARRIERS TO TRADE IN CLEAN ENERGY AND ENVIRONMENTAL GOODS AND SERVICES

Ms. CANTWELL submitted the following resolution; which was referred to the Committee on Finance:

S. RES. 76

Whereas the United States and the People's Republic of China are among the world's largest economies, are the world's largest producers, consumers, and importers of energy, and are the world's largest sources of energy-related greenhouse gas emissions;

Whereas future growth in the United States, China, and other countries should follow a model for energy use that does not further jeopardize the planet's climate and that presents numerous opportunities for significant economic growth;

Whereas a global transformation to the use of clean energy will require the adoption of renewable energy technologies to reduce carbon emissions and to build energy-efficient infrastructures;

Whereas that global transformation will also require substantial amounts of clean energy and environmental goods and services to be traded among the United States, China, and other countries;

Whereas tariffs imposed by foreign countries on renewable energy goods such as solar water heaters can be as high as 35 percent, tariffs on solar cells can be as high as 23 percent, and tariffs on wind power generating sets and hydraulic turbines can be as high as 25 percent; and

Whereas it is in the best interests of all countries to reduce or eliminate tariff and nontariff barriers to trade in clean energy and environmental goods and services: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the United States and the People's Republic of China should—

(A) work together to reduce or eliminate tariff and nontariff barriers to trade in clean energy and environmental goods and services; and

(B) work through the Asia Pacific Economic Cooperation and the World Trade Organization to reach a multilateral agreement to reduce or eliminate such barriers; and

(2) reducing or eliminating tariff and nontariff barriers to trade in clean energy and environmental goods and services will allow the United States, China, and other countries to develop, promote, and deploy clean energy technologies to meet global environmental challenges.

SENATE RESOLUTION 77—EXPRESSING THE SENSE OF THE SENATE THAT THE UNITED STATES AND THE PEOPLE'S REPUBLIC OF CHINA SHOULD NEGOTIATE A BILATERAL AGREEMENT ON CLEAN ENERGY COOPERATION

Ms. CANTWELL (for herself and Mr. VOINOVICH) submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 77

Whereas the United States and the People's Republic of China are the world's largest producers, consumers, and importers of energy and account for 36 percent of global primary energy use and 41 percent of global carbon dioxide emissions;

Whereas, in 2007, China surpassed the United States to become the world's largest emitter of greenhouse gases and China is projected to increase emissions of greenhouse gases by 3.3 percent annually during the next 2 decades;

Whereas, by working together to tackle shared economic, environmental, and security challenges, the United States and China can more quickly and cost-effectively develop and implement cleaner, 21st-century energy systems;

Whereas efforts to develop and implement such systems will benefit from a foundation in sound science and policies that rely on and augment the vast technical capabilities and resources of both the United States and China; and

Whereas an action plan resulting from a bilateral agreement on clean energy coopera-

tion between the United States and China may serve as a catalyst for the economic growth of the United States, an expression of United States foreign policy with respect to mitigating climate change, and a means for accelerating the development of a global clean energy economy: Now, therefore, be it

Resolved, That it is the sense of the Senate that—

(1) the United States and the People's Republic of China should negotiate a bilateral agreement under which the United States and China agree to cooperate in the development and use of clean energy; and

(2) the negotiation of such an agreement would send a clear signal to the world community that the United States is ready to lead a robust effort to mitigate global climate change that involves all countries that are major emitters of greenhouse gases.

SENATE RESOLUTION 78—DESIGNATING MARCH 22, 2009, AS “NATIONAL REHABILITATION COUNSELORS APPRECIATION DAY”

Mr. CHAMBLISS (for himself and Ms. LANDRIEU) submitted the following resolution; which was considered and agreed to:

S. RES. 78

Whereas rehabilitation counselors conduct assessments, provide counseling, support families, and plan and implement rehabilitation programs for those in need of rehabilitation;

Whereas the purpose of professional organizations for rehabilitation counseling and education is to promote the improvement of rehabilitation services available to individuals with disabilities through quality education for counselors and rehabilitation research;

Whereas various professional organizations, including the National Rehabilitation Association, Rehabilitation Counselors and Educators Association, the National Council on Rehabilitation Education, the National Rehabilitation Counseling Association, the American Rehabilitation Counseling Association, the Commission on Rehabilitation Counselor Certification, the Council of State Administrators of Vocational Rehabilitation, and the Council on Rehabilitation Education, have vigorously advocated up-to-date education and training and the maintenance of professional standards in the field of rehabilitation counseling and education;

Whereas on March 22, 1983, Martha Walker of Kent State University, who was President of the National Council on Rehabilitation Education, testified before the Subcommittee on Select Education of the Committee on Education and Labor of the House of Representatives, and was instrumental in bringing the need for qualified rehabilitation counselors to the attention of Congress; and

Whereas the efforts of Martha Walker led to the enactment of laws that require rehabilitation counselors to have proper credentials, in order to provide a higher quality of service to those in need of rehabilitation: Now, therefore, be it

Resolved, That the Senate—

(1) designates March 22, 2009, as “National Rehabilitation Counselors Appreciation Day”; and

(2) commends—

(A) rehabilitation counselors, for their dedication and the hard work they provide to individuals in need of rehabilitation; and

(B) professional organizations, for the efforts they have made to assist those who require rehabilitation.

AMENDMENTS SUBMITTED AND PROPOSED

SA 685. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill H.R. 146, to establish a battlefield acquisition grant program for the acquisition and protection of nationally significant battlefields and associated sites of the Revolutionary War and the War of 1812, and for other purposes; which was ordered to lie on the table.

TEXT OF AMENDMENTS

SA 685. Mr. BROWNBACK submitted an amendment intended to be proposed by him to the bill H.R. 146, to establish a battlefield acquisition grant program for the acquisition and protection of nationally significant battlefields and associated sites of the Revolutionary War and the War of 1812, and for other purposes; which was ordered to lie on the table; as follows:

At the appropriate place, insert the following:

SEC. ____ . FLINT HILLS CONSERVATION EASEMENTS, KANSAS.

(a) IN GENERAL.—As soon as practicable after the date of enactment of this Act, the Secretary of the Interior, acting through the Director of the United States Fish and Wildlife Service, shall offer to enter into such conservation easements as the Secretary determines to be necessary to protect the Flint Hills tallgrass prairie in eastern Kansas.

(b) WILLING OWNERS.—The Secretary shall offer to enter into conservation easements under subsection (a) with any willing owner of land or an interest in land located in a biologically significant area of the Flint Hills tallgrass prairie in eastern Kansas, as determined by the Secretary.

(c) TREATMENT.—A conservation easement entered into under this section shall be—

- (1) a perpetual easement; and
- (2) recorded on the deed of the relevant land or interest in land.

NOTICES OF HEARINGS

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy of the Senate Committee on Energy and Natural Resources. The hearing will be held on Wednesday, March 25, 2009, at 9:30 a.m., in room SD-366 of the Dirksen Senate Office Building.

The purpose of the legislative hearing is to receive testimony on draft legislation to improve energy market transparency and regulation.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record may do so by sending it to the Committee on Energy

and Natural Resources, U.S. Senate, Washington, DC 20510-6150, or by e-mail to Rosemarie_Calabro@energy.senate.gov.

For further information, please contact Tara Billingsley at (202) 224-4756 or Rosemarie Calabro at (202) 224-5039.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BINGAMAN. Mr. President, I would like to announce for the information of the Senate and the public that a hearing has been scheduled before the Subcommittee on Energy of the Senate Committee on Energy and Natural Resources. The hearing will be held on Wednesday, March 25, 2009, at 2 p.m. in room SD-366 of the Dirksen Senate Office Building.

The purpose of the legislative hearing is to receive testimony on draft legislation to improve energy market transparency and regulation.

Because of the limited time available for the hearing, witnesses may testify by invitation only. However, those wishing to submit written testimony for the hearing record may do so by sending it to the Committee on Energy and Natural Resources, U.S. Senate, Washington, DC 20510-6150, or by e-mail to Rosemarie_Calabro@energy.senate.gov.

For further information, please contact Tara Billingsley at (202) 224-4756 or Rosemarie Calabro at (202) 224-5039.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Wednesday, March 18, 2009 at 10 a.m., in room 253 of the Russell Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, March 18, 2009 at 9:30 a.m., in room SD-366 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON HEALTH, EDUCATION, LABOR, AND PENSIONS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Health, Education, Labor, and Pensions be authorized to meet during the session of the Senate on Wednesday, March 18, 2009 at 10 a.m. in Dirksen 430.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON VETERANS' AFFAIRS

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Veterans' Affairs be authorized to meet during the session of the Senate on Wednesday, March 18, 2009. The Committee will meet in room 334 of the Cannon House Office Building beginning at 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Senate Committee on the Judiciary be authorized to meet during the session of the Senate, to conduct a hearing entitled "The Need to Strengthen Forensic Science in the United States: The National Academy of Science's Report on a Path Forward" on Wednesday, March 18, 2009, at 10 a.m., in room SD-226 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

AD HOC SUBCOMMITTEE ON DISASTER RECOVERY

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Ad Hoc Subcommittee on Disaster Recovery of the Committee on Homeland Security and Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, March 18, 2009, at 2:30 p.m. to conduct a hearing entitled "A New Way Home: Findings from the Disaster Recovery Subcommittee Special Report and Working with the New Administration on a Way Forward."

The PRESIDING OFFICER. Without objection, it is so ordered.

SECURITIES, INSURANCE, AND INVESTMENT SUBCOMMITTEE

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Committee on Banking, Housing, and Urban Affairs be authorized to meet during the session of the Senate on March 18, 2009, at 2:30 p.m. to conduct a Securities, Insurance and Investment Subcommittee hearing entitled "Lessons Learned in Risk Management Oversight at Federal Financial Regulators."

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON HEALTH CARE

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Subcommittee on Health Care of the Committee on Finance will meet on Wednesday, March 18, 2009, at 2:30 p.m., in room 215 of the Dirksen Senate Office Building.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON PERSONNEL

Mr. FEINGOLD. Mr. President, I ask unanimous consent that the Subcommittee on Personnel of the Committee on Armed Services be authorized to meet during the session of the Senate on Wednesday, March 18, 2009, at 2:45 p.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE SESSION

Mr. REID. Mr. President, as if in executive session, I ask unanimous consent that on Thursday, March 19, at 2 p.m., the Senate proceed to executive session to consider Calendar No. 22, the nomination of Elena Kagan to be Solicitor General of the United States; that there be 6 hours of debate with respect to the nomination, with the time equally divided and controlled between Senators LEAHY and SPECTOR or their designees; that upon the use or yielding back of time, the Senate proceed to vote on confirmation of the nomination; that upon confirmation, the motion to reconsider be laid upon the table, no further motions be in order, the President be immediately notified of the Senate's action, and the Senate resume legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL AVIATION ADMINISTRATION EXTENSION ACT OF 2009

Mr. REID. I ask unanimous consent that the Senate proceed to the consideration of H.R. 1512.

The PRESIDING OFFICER. The clerk will report the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 1512) to amend the Internal Revenue Code of 1986 to extend the funding and expenditure authority of the Airport and Airway Trust Fund, to amend title 49, United States Code, to extend authorizations for the airport improvement program, and for other purposes.

There being no objection, the Senate proceeded to consider the bill.

Mr. REID. I ask unanimous consent the bill be read three times and passed; the motion to reconsider be laid upon the table, with no intervening action or debate, and any statements related to the measure be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 1512) was ordered to be read a third time, was read the third time, and passed.

NATIONAL REHABILITATION COUNSELORS APPRECIATION DAY

Mr. REID. Mr. President, I ask unanimous consent that the Senate now proceed to the consideration of S. Res. 78.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 78) designating March 22, 2009, as "National Rehabilitation Counselors Appreciation Day."

There being no objection, the Senate proceeded to consider the resolution.

Mr. REID. Mr. President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 78) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 78

Whereas rehabilitation counselors conduct assessments, provide counseling, support families, and plan and implement rehabilitation programs for those in need of rehabilitation;

Whereas the purpose of professional organizations for rehabilitation counseling and education is to promote the improvement of rehabilitation services available to individuals with disabilities through quality education for counselors and rehabilitation research;

Whereas various professional organizations, including the National Rehabilitation Association, Rehabilitation Counselors and Educators Association, the National Council on Rehabilitation Education, the National Rehabilitation Counseling Association, the American Rehabilitation Counseling Association, the Commission on Rehabilitation Counselor Certification, the Council of State Administrators of Vocational Rehabilitation, and the Council on Rehabilitation Education, have vigorously advocated up-to-date education and training and the maintenance of professional standards in the field of rehabilitation counseling and education;

Whereas on March 22, 1983, Martha Walker of Kent State University, who was President of the National Council on Rehabilitation Education, testified before the Subcommittee on Select Education of the Committee on Education and Labor of the House of Representatives, and was instrumental in bringing the need for qualified rehabilitation counselors to the attention of Congress; and

Whereas the efforts of Martha Walker led to the enactment of laws that require rehabilitation counselors to have proper credentials, in order to provide a higher quality of service to those in need of rehabilitation: Now, therefore, be it

Resolved, That the Senate—

(1) designates March 22, 2009, as "National Rehabilitation Counselors Appreciation Day"; and

(2) commends—

(A) rehabilitation counselors, for their dedication and the hard work they provide to individuals in need of rehabilitation; and

(B) professional organizations, for the efforts they have made to assist those who require rehabilitation.

ORDERS FOR THURSDAY, MARCH 19, 2009

Mr. REID. Mr. President, I ask unanimous consent that when the Senate completes its business today, it adjourn until 9:30 a.m. tomorrow, Thursday, March 19; that following the prayer and pledge, the Journal of proceedings be approved to date, the morning hour be deemed expired, the

time for the two leaders be reserved for their use later in the day, and the Senate proceed to a period of morning business for up to 1 hour, with Senators permitted to speak for up to 10 minutes each, with the time equally divided and controlled between the two leaders, with the majority controlling the first half and the Republicans controlling the second half; further, that following morning business, the Senate resume consideration of H.R. 146, under the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. REID. Mr. President, under the previous order, at approximately 11 a.m., there will be up to three votes in relation to the remaining Coburn amendments, with a vote on passage of the bill shortly thereafter. This evening we were able to reach an agreement to consider the nomination of the Solicitor General to be of the United States, Elena Kagan. Senators should expect a vote on confirmation tomorrow afternoon or evening, depending on how much debate time is used.

ADJOURNMENT UNTIL 9:30 A.M. TOMORROW

Mr. REID. Mr. President, if there is no further business to come before the Senate, I ask unanimous consent that it stand adjourned under the previous order.

There being no objection, the Senate, at 7:07 p.m., adjourned until Thursday, March 19, 2009, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate:

DEPARTMENT OF AGRICULTURE

JAMES W. MILLER, OF VIRGINIA, TO BE UNDER SECRETARY OF AGRICULTURE FOR FARM AND FOREIGN AGRICULTURAL SERVICES, VICE MARK EVERETT KEENUM, RESIGNED.

RONALD H. WEICH, OF THE DISTRICT OF COLUMBIA, TO BE AN ASSISTANT ATTORNEY GENERAL, VICE WILLIAM EMIL MOSCHELLA.

CONFIRMATION

EXECUTIVE OFFICE OF THE PRESIDENT

Executive nomination confirmed by
the Senate, Wednesday, March 18, 2009:

RONALD KIRK, OF TEXAS, TO BE UNITED STATES
TRADE REPRESENTATIVE, WITH THE RANK OF AMBAS-
SADOR EXTRAORDINARY AND PLENIPOTENTIARY.

THE ABOVE NOMINATION WAS APPROVED SUBJECT TO
THE NOMINEE'S COMMITMENT TO RESPOND TO RE-
QUESTS TO APPEAR AND TESTIFY BEFORE ANY DULY
CONSTITUTED COMMITTEE OF THE SENATE.

HOUSE OF REPRESENTATIVES—Wednesday, March 18, 2009

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. BUTTERFIELD).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
March 18, 2009.

I hereby appoint the Honorable G.K. BUTTERFIELD to act as Speaker pro tempore on this day.

NANCY PELOSI,
Speaker of the House of Representatives.

PRAYER

The Reverend George E. Battle, Bishop, North Eastern Episcopal District, African Methodist Episcopal Zion Church, Charlotte, North Carolina, offered the following prayer:

God, we thank You for this wonderful day and this historic occasion. Thank You for our wonderful Nation and all those who represent us in the Congress of the United States of America.

You continually give us the opportunity to start anew so we celebrate this magnificent collection of leaders who will help pilot this Nation. Please give our Congress the wisdom to do what is right and not be driven by what is expedient. Give them the discretion to not be threatened by wise counsel or constructive criticism.

In the face of this magnificent occasion, God, continue to not only endow and bolster our Representatives, but give us the understanding to know that we play a crucial part in whether or not our leadership will be successful.

Bless the brave men and women of our armed services and their families. God bless America, her leaders and her people. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Georgia (Mr. JOHNSON) come forward and lead the House in the Pledge of Allegiance.

Mr. JOHNSON of Georgia led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

MESSAGE FROM THE SENATE

A message from the Senate by Ms. Curtis, one of its clerks, announced that the Senate has passed without amendment a bill and a concurrent resolution of the House of the following titles:

H.R. 1541. An act to provide for an additional temporary extension of programs under the Small Business Act and the Small Business Investment Act of 1958, and for other purposes.

H. Con. Res. 39. Concurrent resolution authorizing the use of the Capitol Grounds for the District of Columbia Special Olympics Law Enforcement Torch Run.

The message also announced that the Senate has passed bills and agreed to joint resolutions of the following titles in which the concurrence of the House is requested:

S. 303. An act to reauthorize and improve the Federal Financial Assistance Management Improvement Act of 1999.

S. 620. An act to repeal the provision of law that provides automatic pay adjustments for Members of Congress.

S.J. Res. 8. Joint Resolution providing for the appointment of David M. Rubenstein as a citizen regent of the Board of Regents of the Smithsonian Institution.

S.J. Res. 9. Joint Resolution providing for the appointment of France A. Cordova as a citizen regent of the Board of Regents of the Smithsonian Institution.

WELCOMING BISHOP GEORGE E. BATTLE

The SPEAKER pro tempore. Without objection, the gentleman from North Carolina (Mr. WATT) is recognized for 1 minute.

There was no objection.

Mr. WATT. Mr. Speaker, I am privileged today to welcome and say words of welcome on behalf of the House to the wonderful bishop and minister who delivered our prayer for us this morning, whom I am privileged to have as a constituent in my congressional district.

He is not only a leader in the African Methodist Episcopal Zion Church but has been a leader in our community of Charlotte, North Carolina, and in our State for a number of years. He has served on our school board, he has been a corporate leader serving on boards of distinction, and he is an outstanding family man as well as, of course, a religious leader of our community.

We are delighted to welcome Bishop Battle today, and wish him well. His wife is just recovering from surgery, and we wish her well also on behalf of the House.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain up to 15 further requests for 1-minute speeches on each side of the aisle.

MORNING IN AMERICA BRINGS NEW COURSE OF ACTION

(Mr. JOHNSON of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JOHNSON of Georgia. Good morning, everybody; good morning, America. How are you? I am showing my age a little bit.

Ladies and gentlemen, it is always great to be an American, and it is always a great time in America because we have hope and vision for the future, and I am happy to report to you that Congress and the Obama administration have departed on a new course of action—no more voodoo economics, no more trickle-down economics. These are failed policies, and it is time for something new.

Whenever something new is on the table, there are always those who, instead of appreciating being Americans, they complain and don't add anything positive to the discussion.

But despite the obstacles that we confront, we will continue down this road. And, indeed, America will continue to experience morning in America.

AIG, BONUSES, AND THE FRENCH

(Mr. POE of Texas asked and was given permission to address the House for 1 minute.)

Mr. POE of Texas. Mr. Speaker, AIG took bailout money and then gave millions to executives in bonuses. Now Congress is bent out of shape about it, and rightfully so. But the truth is in the last stimulus bill that Congress quickly passed with little or no debate was an attached amendment to allow AIG to do exactly what they did—give out high-dollar bonuses.

Congress is responsible for this irresponsible spending and must deal with the consequences. To make matters worse, AIG gave bailout money to foreign banks, like in France. The French

are the same people who vilify the United States, blame the world's problems on us, and have a disdain for everything American.

Mr. Speaker, I think the U.S. has bailed out France enough. We helped save France in World War I, saved them again in World War II, and took over in Vietnam after they failed there—but with little or no gratitude from the French.

And AIG also gave billions to German and English banks. We can't afford to give away taxpayer money and reward failure while making working Americans pay for all of this nonsense. "No" to more bailouts, foreign or domestic.

And that's just the way it is.

BRAIN AWARENESS WEEK

(Mr. SESTAK asked and was given permission to address the House for 1 minute.)

Mr. SESTAK. Mr. Speaker, I rise to say a few words about Brain Awareness Week. This is the week that the Society of Neuroscience members spread throughout America to speak about the exciting wonders of the mind. But in addition, like up in my district at Franklin Institute, they will speak about not only neuroscience, but how do we take care of those patients who suffer damage.

I speak about this because as a veteran, as the Pentagon announced early this month, 360,000 of those 1.8 million members of our society who went to Iraq or Afghanistan have returned with a brain injury. The vast majority of them have healed and will heal, except for about 90,000 who will have lasting damage. That's why this week is so important. While we have a tendency to take care of these patients, there is much more to be done in the treatment of their damage with the discovery of neurostem cells and the possibility of stem transplants to repair the damage.

Again, I commend the Society of Neuroscience, particularly in this area of our returning veterans to help them improve their quality of life.

BUDGET TAXES TOO MUCH

(Mr. FLEMING asked and was given permission to address the House for 1 minute.)

Mr. FLEMING. Mr. Speaker, this is budget time again, and this budget proposed by the administration has some very major flaws in it. It creates a greater tax burden on the American people, among other things. The budget calls for a \$637 billion tax increase for the majority of small businesses that pay taxes as individuals.

The cap-and-tax program, not the cap-and-trade but cap-and-tax program, will increase taxes conservatively by \$646 billion on energy to every household in America. These

households can expect to pay more than \$3,000 a year extra on their utility bills. This is money taken directly out of the pockets of working families struggling to pay bills each month.

This budget also caps the value of itemized deductions for those with higher incomes and really middle-class incomes, reducing charitable giving by \$9 billion a year which will devastate charities.

Finally, this budget reinstates the death tax which has been found to lower overall employment by \$1.5 million.

This budget spends too much, wastes too much, and taxes too much.

NOT SO FAST ON THE AIG BONUSES

(Mr. BLUMENAUER asked and was given permission to address the House for 1 minute.)

Mr. BLUMENAUER. Mr. Speaker, not quite so fast on the AIG bonuses. The weasels who drove that company into the ground may not even be entitled to the bonuses in their contract based on their performance. And a failed company rescued from bankruptcy by the United States Government may not be obligated to pay them anyway.

Thankfully, there is also the power of the tax code. Let's return to the Eisenhower tax rates of 90 percent for people who receive bonuses from companies that we already own 50 percent or more of with taxpayer money.

For years the tax code around here has been tortured to reward people who need tax cuts absolutely the least. Hopefully we can use it this time to impose a little tax justice.

WHERE DOES ALL OF THE MONEY COME FROM?

(Mrs. BLACKBURN asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. BLACKBURN. Mr. Speaker, one of my constituents recently said to me, "I'm tired of the government spending money I have not made yet for programs I don't want." And my constituents are right on this.

On top of the trillions that have already been spent, the President's budget is proposing doubling Federal spending by the year 2019. My constituents are saying, "How are we going to pay for this?"

Well, as we have heard this morning, there is the tax-and-cap scheme which is \$646 billion and is going to cost every American family an additional \$3,128 per year out of their household budget.

There is also the small-business taxes, \$637 billion of new small-business taxes. It is going to wipe out any kind of tax reduction that would have gone to the 95 percent of working Americans.

So the question becomes: Where does all of this money come from? Well, we know that the Democrat leadership is going to borrow too much, they are going to tax too much, and they are going to spend too much of the taxpayers' money.

HEALTH CARE REFORM

(Mr. ALTMIRE asked and was given permission to address the House for 1 minute.)

Mr. ALTMIRE. Mr. Speaker, with passage of the long-overdue SCHIP bill, Congress and the President expanded health care coverage to 4 million American children who were previously uncovered. This single step did more to improve our health care system in one day than we had seen in 8 years. But there is still more to be done.

Every individual, every family, and every business in America struggles every day with health care costs. Their inability to afford coverage and the increased cost for goods and services as a result of health care costs for their business, this issue affects everybody in every way.

But for the first time, the President and Congress plan to consider health care reform as part of the budget process so we can accurately account for the true costs of doing health care reform and of not doing health care reform, which would be the price of inaction.

Health care cost increases are on an unsustainable course, and we can no longer hide behind budget gimmicks and just pass along the tough fiscal decisions for future Congresses. The time has come to act.

□ 1015

PRESIDENT'S BUDGET TAKES US IN THE WRONG DIRECTION

(Mr. PITTS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PITTS. Mr. Speaker, the \$3.6 trillion budget released by President Obama spends too much, taxes too much, borrows too much, and wastes too much.

Today, middle-class families and small businesses are making sacrifices when it comes to their own budget, yet Washington continues to spend trillions of taxpayer dollars on bailouts and other government programs. The spending in this budget is so massive that independent estimates suggest roughly 250,000 new Federal bureaucrats may be needed just to spend it all.

Rather than government cutting back, showing restraint, operating more efficiently on basic government responsibilities, the President proposes to create massive new programs, vastly

expanding the scope and reach of the Federal Government. The energy taxes alone will cost every household over 3,000 additional dollars per year.

This budget will cost American jobs at a time when we can't afford it. The majority of those hit by the new tax increases are small businesses, the engines of job creation in our economy. This budget takes us in the wrong direction.

CONGRATULATING MAHONING VALLEY

(Mr. WILSON of Ohio asked and was given permission to address the House for 1 minute.)

Mr. WILSON of Ohio. Mr. Speaker, I come to the floor today to congratulate the Mahoning Valley on a much-deserved honor. It recently ranked seventh in the Nation among mid-sized metropolitan areas for business attraction and expansion, according to Site Selection magazine. This is the first time the Valley has been chosen since the survey began 30 years ago.

Amidst all the bad economic news, this announcement was a bright spot that demonstrates all the hard work our businesses, workforce, and elected officials have put into making our community a great place to live and work and expand. The Mahoning Valley is ripe for economic development, and I am so pleased to see it receive such positive recognition. The magazine recognizes the local metropolitan area, which includes Mahoning, Trumbull, and Columbiana Counties in Ohio.

Congratulations, Mahoning Valley. I am so proud to represent you, and look forward to continuing to help foster economic development in Ohio's Sixth District.

MEDIA'S IMMIGRATION BIAS PREVENTS AMERICANS FROM GETTING FACTS

(Mr. SMITH of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Texas. Mr. Speaker, many of us remember the tragic case of Chandra Levy, a former Washington, D.C. intern who disappeared suddenly 8 years ago.

The man charged recently with murdering Ms. Levy entered the United States illegally, but you might not have known that by following the news. CBS, CNN, and the AP, among many other media outlets, failed to mention even once that the suspect entered the country illegally. Instead, the media used terms like "incarcerated felon" and "jailed attacker" to refer to the suspect in news reports. They neglected to point out that the suspect would not have been able to commit the alleged murder if he had not entered the country illegally in the first place.

This is an example of how the media's liberal bias on immigration issues prevents Americans from getting the facts. Whether it's immigration or any other issue, the media should report the facts, not slant the news.

BUSH BUDGET LEGACY—DEEP DEFICITS AND ECONOMIC DECLINE

(Ms. WATSON asked and was given permission to address the House for 1 minute.)

Ms. WATSON. Mr. Speaker, in January, 2001, President Bush inherited a fiscal situation stronger than any in half a century. When President Clinton left office, the Federal budget was on track to retire all debt for the first time since 1835 and add \$3 trillion in net national savings. But Republican trickle-down economic policies changed all that—squandering the entire budget surplus and instead creating deficits in the trillions.

Republicans let budget rules lapse. They increased spending, they cut revenue, and enacted expensive tax cuts for those who needed them the least. On President Bush's watch, the debt held by the public grew from \$3.4 to \$6.3 trillion. The gross Federal debt doubled, and foreign-held debt more than tripled.

Mr. Speaker, the healthy fiscal forecast the Bush administration inherited 8 years ago has now been replaced by record budget deficits as far as the eye can see and an economy in a tailspin. This is the unfortunate situation that President Bush left President Obama. It stands in stark contrast to what President Bush inherited in 2001 and demonstrates the harmful effects of Republican economic policies.

REJECT THE FLAWED CAP-AND-TAX PROGRAM

(Mr. SULLIVAN asked and was given permission to address the House for 1 minute.)

Mr. SULLIVAN. Mr. Speaker, while our Nation is suffering a severe economic recession, the Democrat majority is working behind closed doors to enact the largest carbon regulatory scheme in our Nation's history in the form of a cap-and-tax system. In fact, President Obama's budget includes a \$646 billion cap-and-trade energy tax that will be paid by every American who drives a car, turns on a light switch, or buys a product made in the United States. And that's every single American, regardless of income. No matter how you slice it, this issue is a huge tax. Government revenues are, of course, taxes on the American people.

This cap-and-tax scheme would cost the average American household in every State up to \$3,000 a year, and that's a very conservative estimate. This is really not a good way to stimulate our economy in economic bad times like we are in.

I urge my colleagues on the other side of the aisle to reject the flawed cap-and-tax program in the President's budget. The Democrat majority is borrowing too much money, taxing too much, and spending too much. When is it enough?

AMERICA WILL RECOVER AND EMERGE STRONGER THAN EVER BEFORE

(Ms. CASTOR of Florida asked and was given permission to address the House for 1 minute.)

Ms. CASTOR of Florida. According to a poll released this week, more Americans believe that the country is on the right track than before the election, and they believe that President Obama is handling his new job very well.

What I hear from folks back home in Florida is they have faith that the recovery plan is going to help them. Indeed, the moneys are being delivered to local communities to create jobs. In Tampa, we're going to construct an important link for economic development out of our port, moneys for our public schools, and students will arrive this month.

Energy efficiency. We are going to weatherize homes throughout the Tampa Bay area and the State of Florida.

On Monday, we announced a computer initiative to computerize medical records throughout the Tampa Bay region. Health care for Floridians will be provided because we are not going to let our neighbors fall through the crack during this economic downturn.

The budget priorities President Obama has sent us are right—health care reform, education, and investments in energy. We will recover, and America will emerge stronger than ever before.

PMA SCANDAL

(Mr. FLAKE asked and was given permission to address the House for 1 minute.)

Mr. FLAKE. Mr. Speaker, later today or tomorrow, the House will be voting again on a privileged resolution to look into the matter of the PMA scandal. There is an outside investigation by the Department of Justice into PMA, a powerhouse lobbying firm that will close its doors at the end of the month because of suspect contributions to Members of Congress, Members of Congress who secured no-bid contracts on behalf of that firm.

Mr. Speaker, several years ago we had the Jack Abramoff scandal. The leadership at that time was slow to recognize that scandal, and it kept spreading until it got worse and did damage to the reputation of this body. Let's not make that same mistake today. This scandal promises to be far larger if we let it go. So let's have the

investigation go on by the Ethics Committee. We have an obligation to uphold the dignity and decorum of this body and we are not exercising it yet.

I urge a vote not to table the resolution, and let the Ethics Committee investigate this scandal.

NATIONAL SAFE PLACE WEEK

(Mr. YARMUTH asked and was given permission to address the House for 1 minute.)

Mr. YARMUTH. Mr. Speaker, I rise in recognition of National Safe Place Week, the organization and the critical services it provides to young people in need.

Of the more than 1 million youth who experience homelessness annually, some are born without homes, but most run away to escape abuse; and with no hope in sight, one-third attempt suicide. Thankfully, National Safe Place recognizes that in each of these young people is hope for the future, a chance to succeed, and an opportunity to become productive members of our communities.

In the 26 years since National Safe Place began in my hometown of Louisville, Kentucky, it has served nearly a quarter million disconnected youth nationwide, 100,000 in Kentucky alone. In 40 States and 1,400 communities across the Nation, Safe Place has provided the services and support to help a child's potential become a reality. No wonder Safe Place is the largest recipient of funding through the Reconnecting Homeless Youth Act, which we just reauthorized with legislation I authored with my colleague, JUDY BIGGERT.

Time after time, adolescents devoid of hope have traveled a path that seems sure to dead end, only to find themselves in front of one of 1,600 stores, restaurants, and businesses bearing the Safe Place logo. Inside, they find a new path that begins with the support every child needs and ends with a chance that every child deserves.

I urge my colleagues to join me in celebrating National Safe Place Week.

IT IS TIME TO TAKE BACK TAXPAYER MONEY FROM AIG

(Mrs. DAHLKEMPER asked and was given permission to address the House for 1 minute.)

Mrs. DAHLKEMPER. Mr. Speaker, I rise today on behalf of the hardworking families of my district and the State of Pennsylvania who, like me, are shocked and outraged by recent actions taken by the insurance company, AIG.

Mr. Speaker, the current economic downturn has been especially difficult for my constituents. Traveling across my district, I have heard the same story from far too many middle-class families about how they are bearing the brunt of our faltering economy.

Paychecks can't stretch far enough anymore to make payments on the mortgage, buy groceries, and pay the utility bills. In fact, many of my constituents who have worked hard and played by the rules have had to take a pay cut simply to keep their jobs.

My constituents work hard and meet their responsibilities every day, and they don't have the benefit of government bailouts or multimillion-dollar bonuses. However, they have seen their hard-earned tax dollars go to bail out companies like AIG, whose own greed and recklessness are responsible for the economic downturn in the first place.

Mr. Speaker, it is hard to understand why AIG executives think they have earned bonuses in the first place; but, more importantly, how dare AIG use tens of millions of taxpayer dollars to reward themselves for bad behavior. How can they justify this outrage to taxpayers who are keeping their company afloat?

I say enough is enough. And that is why I am supporting legislation that will safeguard the taxpayers' money and hold AIG executives accountable once and for all.

CHANGING THE HEALTH CARE SYSTEM

(Ms. JACKSON-LEE of Texas asked and was given permission to address the House for 1 minute.)

Ms. JACKSON-LEE of Texas. Mr. Speaker, I am so grateful for a President that believes in the American people. I thank him for his budget, thank him for his outrage regarding outrageous AIG employees receiving bonuses, thank him for recognizing the 47 million plus that are growing who need health care reform, and thank this leadership that is beginning to open the discussion on American health care reform that is so very important.

I happen to believe a single-payer system is a health care payment system, not a health care delivery system. Health care providers will be in a fee-for-service practice and will not be employees of the government. Therefore, it is not socialized medicine. Single-payer health care is not socialized medicine any more than the public funding of education is socialized education or the public funding of the defense industry is socialized defense.

What we simply want is the ability for that single payer to negotiate prescription drug prices, hospital prices, nursing home prices. We simply want the ability to give the American people the insurance on health care that they and their children need.

Interestingly enough, polls show that 60 to 75 percent of Americans believe in this type of system. But the most important aspect is, we have a leader—and the leadership in this Congress—that says Americans count. Let us change the health care system today, not pay AIG employees bonuses.

AMERICANS DESERVE BETTER SOLUTIONS

(Mr. TIBERI asked and was given permission to address the House for 1 minute.)

Mr. TIBERI. Ladies and gentlemen, in the coming weeks, we are going to debate the budget for the United States of America for the next 10 years, for next year and beyond. This budget clearly taxes too much, spends too much, and borrows too much from the American people. In fact, not only does it do that, but for someone like my mom and dad who are on fixed incomes, seniors, this will cause their taxes to go up every time they fill the tank of their 14-year-old car, turn on the lights of their 35-year-old house, or turn up the thermostat to heat or turn it down to cool their home.

This is a huge tax on American consumers, particularly from my State in Ohio, with this cap-and-tax issue that is within this budget, a debate that we're going to have in this House this month and next month.

Americans deserve better. They deserve better solutions. Republicans in the minority here are willing to be part of those better solutions. I hope that the Speaker and the leadership of the House will be partners with us for those better solutions.

□ 1030

RESEARCH AND DEVELOPMENT TAX CREDITS

(Mr. BOCCIERI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BOCCIERI. Mr. Speaker, the American people are demanding leadership, and we will be judged in this House by two measures, by action or inaction, and whether what we do in this House is going to put our economy and our people back on track.

And let me tell you, while some of my colleagues stand with their arms extended and say "no," we stand here today and say "yes," that America can and will recover from this great economic downturn.

I found a Member on the other side of the aisle who would stand with me to make permanent research and development tax credits that will invest in energy programs that will benefit Ohio and put our Nation on the road to recovery. I talk about a tax credit that will help companies like the EBO Group in my district that's studying plug-in hybrids and batteries that can make our cars more efficient, or the Rolls Royce Corporation in my district with the research and development tax credit that will give them the wherewithal to invest in fuel cell technology so we can move away from our dependence on foreign oil.

My friends, we will be judged as leaders or blockers. Are we going to say

"yes" or are we going to say "no"? Are we going to act or are we not? This is the time we need to invest in America, in her greatest time of need.

TAX CUTS

(Mr. PALLONE asked and was given permission to address the House for 1 minute.)

Mr. PALLONE. Mr. Speaker, the President's budget cuts taxes for 95 percent of America's workers and their families. It cuts spending, nondefense discretionary, over 10 years to its lowest level as a percentage of the economy in nearly half a century. The President's budget also cuts the deficit in half over 4 years. It grows nothing but jobs. And creating American jobs means making quality health care affordable. It means powering our economy with clean American energy. And it means modernizing our education system.

Mr. Speaker, we have had 8 years of slow growth and actually a loss of jobs under President Bush, under the previous administration. The failure to reform and invest produced those 8 years of slow growth and loss of jobs. We need to turn that around, and that's what President Obama's budget will do.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. HOLDEN). Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 6 of rule XX.

Record votes on postponed questions will be taken later.

FEDERAL AVIATION ADMINISTRATION EXTENSION ACT OF 2009

Mr. LEWIS of Georgia. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1512) to amend the Internal Revenue Code of 1986 to extend the funding and expenditure authority of the Airport and Airway Trust Fund, to amend title 49, United States Code, to extend authorizations for the airport improvement program, and for other purposes.

The Clerk read the title of the bill.

The text of the bill is as follows:

H.R. 1512

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Federal Aviation Administration Extension Act of 2009".

SEC. 2. EXTENSION OF TAXES FUNDING AIRPORT AND AIRWAY TRUST FUND.

(a) FUEL TAXES.—Subparagraph (B) of section 4081(d)(2) of the Internal Revenue Code

of 1986 is amended by striking "March 31, 2009" and inserting "September 30, 2009".

(b) TICKET TAXES.—

(1) PERSONS.—Clause (ii) of section 4261(j)(1)(A) of the Internal Revenue Code of 1986 is amended by striking "March 31, 2009" and inserting "September 30, 2009".

(2) PROPERTY.—Clause (ii) of section 4271(d)(1)(A) of such Code is amended by striking "March 31, 2009" and inserting "September 30, 2009".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on April 1, 2009.

SEC. 3. EXTENSION OF AIRPORT AND AIRWAY TRUST FUND EXPENDITURE AUTHORITY.

(a) IN GENERAL.—Paragraph (1) of section 9502(d) of the Internal Revenue Code of 1986 is amended—

(1) by striking "April 1, 2009" and inserting "October 1, 2009", and

(2) by inserting "or the Federal Aviation Administration Extension Act of 2009" before the semicolon at the end of subparagraph (A).

(b) CONFORMING AMENDMENT.—Paragraph (2) of section 9502(e) of such Code is amended by striking "April 1, 2009" and inserting "October 1, 2009".

(c) EFFECTIVE DATE.—The amendments made by this section shall take effect on April 1, 2009.

SEC. 4. EXTENSION OF AIRPORT IMPROVEMENT PROGRAM.

(a) AUTHORIZATION OF APPROPRIATIONS.—Section 48103(6) of title 49, United States Code, is amended by striking "\$1,950,000,000 for the 6-month period beginning on October 1, 2008," and inserting "\$3,900,000,000 for fiscal year 2009."

(b) PROJECT GRANT AUTHORITY.—Section 47104(c) of such title is amended by striking "March 31, 2009," and inserting "September 30, 2009."

SEC. 5. EXTENSION OF EXPIRING AUTHORITIES.

(a) Section 40117(1)(7) of title 49, United States Code, is amended by striking "April 1, 2009," and inserting "October 1, 2009."

(b) Section 44302(f)(1) of such title is amended—

(1) by striking "March 31, 2009," and inserting "September 30, 2009,"; and

(2) by striking "May 31, 2009," and inserting "December 31, 2009."

(c) Section 44303(b) of such title is amended by striking "May 31, 2009," and inserting "December 31, 2009."

(d) Section 47107(s)(3) of such title is amended by striking "April 1, 2009," and inserting "October 1, 2009."

(e) Section 47115(j) of such title is amended by striking "2008, and for the portion of fiscal year 2009 ending before April 1, 2009," and inserting "2009."

(f) Section 47141(f) of such title is amended by striking "March 31, 2009," and inserting "September 30, 2009."

(g) Section 49108 of such title is amended by striking "March 31, 2009," and inserting "September 30, 2009."

(h) Section 161 of the Vision 100—Century of Aviation Reauthorization Act (49 U.S.C. 47109 note) is amended by striking "made in" and all that follows through "under chapter 471" and inserting "made in fiscal year 2009 under chapter 471".

(i) Section 186(d) of such Act (117 Stat. 2518) is amended by striking "2008, and for the portion of fiscal year 2009 ending before April 1, 2009," and inserting "2009."

(j) The amendments made by this section shall take effect on April 1, 2009.

SEC. 6. FEDERAL AVIATION ADMINISTRATION OPERATIONS.

Section 106(k)(1)(E) of title 49, United States Code, is amended by striking

"\$4,516,364,500 for the 6-month period beginning on October 1, 2008," and inserting "\$9,042,467,000 for fiscal year 2009."

SEC. 7. AIR NAVIGATION FACILITIES AND EQUIPMENT.

Section 48101(a)(5) of title 49, United States Code, is amended by striking "\$1,360,188,750 for the 6-month period beginning on October 1, 2008," and inserting "\$2,742,095,000 for fiscal year 2009."

SEC. 8. RESEARCH, ENGINEERING, AND DEVELOPMENT.

Section 48102(a)(13) of title 49, United States Code, is amended by striking "\$85,507,500 for the 6-month period beginning on October 1, 2008," and inserting "\$171,000,000 for fiscal year 2009."

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Georgia (Mr. LEWIS) and the gentleman from Ohio (Mr. TIBERI) each will control 20 minutes.

The Chair recognizes the gentleman from Georgia.

GENERAL LEAVE

Mr. LEWIS of Georgia. Mr. Speaker, I ask unanimous consent to give Members 5 legislative days to revise and extend their remarks on House bill 1512.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

Mr. LEWIS of Georgia. Mr. Speaker, I yield myself such time as I may consume.

H.R. 1512, the Federal Aviation Administration Extension Act of 2009, extends the financing and spending authority for the Airport and Airway Trust Fund.

The trust fund taxes and spending authority are scheduled to expire on March 31, 2009. This bill extends these taxes at current rates for 6 months, through the end of the fiscal year on September 30.

Failure to act on this bill would mean that the taxes expire and the trust fund would lose revenues that are necessary to finance future airport construction projects and updates to the air traffic control system. It would also prevent the FAA from spending funds that are already in the trust fund, shutting down the Airport Improvement Program and critical airport construction projects around the country.

I know the importance of our air transportation system. The Hartsfield-Jackson Atlanta International Airport, located in my congressional district, is the world's busiest passenger airport. In 50 years the number of passengers traveling through that airport has grown from 2 million to almost 80 million a year. The airport has a direct and indirect impact on the economy of over \$20 billion. We must make sure that the taxes are extended and the FAA remains funded. It is critical to our economy and the safety of all of our passengers.

The bill also extends a number of authorizing provisions that are under the

jurisdiction of the Transportation and Infrastructure Committee. All of those provisions were also extended last September in the same bill that extended the expiring tax provisions. This bill will keep the Airport and Airway Trust Fund taxes and operations in place until a long-term FAA Reauthorization Act is signed into law.

Mr. Speaker, I reserve the balance of my time.

Mr. TIBERI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1512.

As the gentleman from Georgia said, this is a straightforward bill to provide a 6-month extension of the various excise taxes that support the Airport and Airway Trust Fund as well as the trust fund's expenditure authorities. These taxes and authorities are currently scheduled to expire at the end of this month, and today's legislation will permit Congress the time it needs to consider a longer-term FAA reauthorization bill.

As the ranking member of the Select Revenues Subcommittee, I'm pleased that Chairman RANGEL has asked our panel to examine tax issues related to the transportation trust funds, including the Airport and Airway Trust Fund. I certainly look forward to working with Chairman NEAL, Chairman LEWIS, and all the members of our committee over the months ahead as we determine whether modifications to the financing structure of the Airport and Airway Trust Fund are warranted going forward. Ways and Means is clearly the appropriate committee of jurisdiction regarding these tax issues, and I anticipate working with other members of the Ways and Means Committee of both parties to ensure that our committee continues to shape the FAA reauthorization process this year.

I would note for my colleagues that under the CBO baseline, expiring excise taxes that are dedicated to a trust fund are assumed to be extended at current rates for budgeting purposes. Consequently, the Joint Committee on Taxation is expected to score H.R. 1512 as having no revenue effect, Mr. Speaker, no revenue effect, just as it has with similar short-term extensions of FAA taxes in the past. While many Members on our side of the aisle would argue that CBO and Joint Tax should make that same assumption about expiring tax cuts as well, that's a bigger debate for another day.

For now it's important that we all extend the current FAA excise taxes on a temporary basis, and I am pleased to join with my colleagues from the other side of the aisle and Chairman LEWIS in support of this legislation.

Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. LEWIS of Georgia. Mr. Speaker, I fully support House bill 1512. I urge

my colleagues on both sides of the aisle to vote "yes" for this bill.

Mr. COSTELLO. Mr. Speaker, I rise today in support of H.R. 1512, the Federal Aviation Administration (FAA) Extension Act of 2009. I want to thank Chairman RANGEL and Ranking Member CAMP for bringing this to the floor today, as well as Chairman OBERSTAR and Ranking Members MICA and PETRI.

Earlier this month, the Transportation and Infrastructure Committee marked up H.R. 915, the FAA Reauthorization Act of 2009, a long-term authorization of the Federal Aviation Administration's (FAA) programs. It should be to the House floor in the coming weeks. However, until H.R. 915 is signed into law, it is imperative that we not allow FAA's critical programs to lapse.

The Aviation Trust Fund is currently operating under a short-term extension that expires on March 31, 2009. To that end, H.R. 1512 would extend not only the aviation taxes and expenditure authority, but also Airport Improvement Program (AIP) contract authority, until September 30, 2009.

H.R. 1512 also provides an additional \$1.95 billion in AIP contract authority, resulting in a full-year contract authority level of \$3.9 billion for fiscal year 2009. These additional funds will allow airports to proceed with critical safety and capacity enhancement projects, particularly larger projects that require a full-year's worth of AIP funds to move forward.

Mr. Speaker, aviation is too important to our nation's economy—contributing \$1.2 trillion in output and approximately 11.4 million U.S. jobs—to allow the taxes or funding for critical aviation programs to expire.

Congress must ensure that this extension passes expeditiously to reduce delays and congestion; improve safety and efficiency; stimulate the economy; and create jobs. I urge my colleagues to support the bill.

Mr. PETRI. Mr. Speaker, in September 2007, the House considered and passed the FAA Reauthorization Act of 2007, H.R. 2881. That legislation reauthorized the FAA for four years.

Unfortunately, the Senate was unable to come to an agreement on its bill, and so in September 2008 Congress extended the Federal Aviation Administration's (FAA) funding and authority for a fifth time.

That extension will expire on March 31, 2009, so today we are considering another extension.

H.R. 1512 would extend the taxes, programs, and funding of the FAA through September of 2009.

This bill—

Extends FAA Funding and contract authority for 6 months;

Funds the Airport Improvement Program at \$1.95 billion through September 2009;

Extends the War Risk Insurance program; and

Extends the Small Community Air Service Development Program.

H.R. 1512 will ensure that our National Aviation System continues to operate until a full FAA Reauthorization can be enacted.

As I have indicated many times since the passage of the House FAA Reauthorization bill back in 2007, we need to pass a long-term bill so that we can meet the growing demands

placed on our nation's infrastructure. Modernizing our antiquated air traffic control system and repairing our crumbling infrastructure need to be at the top of our priorities.

As we begin the 111th Congress, there is still much work to be done. This 6-month extension gives us time to improve H.R. 915, the "FAA Reauthorization Act of 2009," which was introduced by Chairmen OBERSTAR and COSTELLO last month and approved by our Committee earlier this month.

As we move toward Floor consideration of the FAA Reauthorization bill, I look forward to working with my colleagues to address ongoing concerns with some of the provisions in H.R. 915.

I also urge our colleagues in the other body to take up a comprehensive FAA reauthorization package as early as possible this year.

I support this extension as the best alternative to keep the FAA and the National Airspace System running safely until we can take up and pass a bipartisan and bicameral bill.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I rise today in strong support of H.R. 1512. To amend the Internal Revenue Code of 1986 to extend the funding and expenditure authority of the Airport and Airway Trust Fund, and for other purposes, introduced by my distinguished colleague from New York, Representative CHARLES B. RANGEL. This important legislation will extend funding in order to improve transportation for Americans across the nation.

The costs of air travel have increased rapidly in the last few months. Airlines have not only increased the price of air fare, but they have been forced to put charges on extra baggage, cut flights, and lay off hundreds of employees. Air travel is essential, as it is beneficial environmentally, socially, and especially economically. Without the ability to travel by air cheaply and easily, the flow of people, goods, and ideas would substantially decrease.

If we do not extend funding to airline programs, many negative consequences will ensue, including cutting services, such as air traffic control, certification, and inspection, as well as the inability by the airlines to buy new equipment for the aging infrastructure.

It is obvious that something must be done to solve this pressing problem. It is necessary for airlines to look into 2 alternative means in order to increase their effectiveness. However, it is also necessary for the United States to fund several programs.

The Airport and Airway Trust Fund was established in 1970 "to provide for the expansion and improvement of the nation's airport and airway system." Since then, it has provided funds for the Federal Aviation Administration. Various pieces of legislation have come before the Congress to extend this fund, and yet partisanship has stalled these bills. It is necessary for us to extend this program in order to modernize our air traffic control system. NextGen, a state-of-the-art air traffic control system would allow control towers to pinpoint the exact locations of aircrafts, making the skies less chaotic, and air travel much more efficient.

Additionally, the extension of the Airport Improvement Program is necessary in order to improve safety and efficiency in our air travel. Airports are sites used by millions and millions

of Americans every single day. It is vital that airports, travelers, and air flight personnel be secure, and thus it is important to continue to fund this program.

Even though air travel is obviously important, other forms of travel contribute to the nation as well. The Highway Trust Fund was created by the Highway Revenue Act of 1956 to ensure a dependable source of financing for the National System of Interstate and Defense Highways. This is the premier fund for government spending on highways, with approximately 45% of all highway spending coming from this fund. The Congressional Budget Office predicts the fund will run a deficit of \$1.7 billion at the end of 2009 and \$8.1 billion by the end of 2010. The Highway Trust Fund balance must be restored.

This bill will extend the taxes that fund The Airport and Airway Trust Fund, extend the expenditure authority of The Airport and Airway Trust Fund, extend the Airport Improvement Program, and restore the Highway Trust Fund balance. This is a vital bill for cities like Houston, Texas, which happens to have one of the top 10 airports in the Nation. I urge my fellow members of Congress to support H.R. 1512 in order to increase efficiency, safety, and functioning of our nation's transportation systems.

Mr. LEWIS of Georgia. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Georgia (Mr. LEWIS) that the House suspend the rules and pass the bill, H.R. 1512.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

IN SUPPORT OF THE FEDERAL AVIATION ADMINISTRATION EXTENSION ACT OF 2009

(Mr. OBERSTAR asked and was given permission to address the House for 1 minute.)

Mr. OBERSTAR. Mr. Speaker, the Ways and Means Committee under Chairman RANGEL was so efficient, they completed action on the extension bill for the FAA authorization before I could reach the House floor from a hearing the Committee on Transportation and Infrastructure is holding on the next-generation aviation technology for FAA, and I wanted to be here to thank the chairman, Chairman RANGEL, and the ranking Republican for moving the bill quickly and without dispute or without a recorded vote.

But I want to supplement those comments by observing that the Committee on Transportation and Infrastructure has done its work. In the last Congress, we reported the 4-year authorization for FAA, but the other body didn't act on it. So we quickly moved our bill with bipartisan support through committee March 5, just earlier this month, to extend, with a great many improvements and upgrades in

the operations of FAA, and provide authority for the next-generation technology. Again, the other body is not prepared to act.

Now, the reason we need an extension through the end of this fiscal year is to avoid disruption in the Airport Improvement Program. If we have a stop-and-go, 3-month extension and another 3-month extension, then the funding for the airport grants for increasing capacity on the air side of airports would stop and go as well. That's not good public investment strategy.

But I regret that we have to do this. The other body simply is not ready to move ahead with full consideration of the bill. We should be able to do that in a matter of days. Unfortunately, they are not ready to do that. And I just want to make it clear that the Committee on Transportation and Infrastructure, in partnership with the Committee on Ways and Means, is ready to do the job of the House in moving the agenda forward and continuing the modernization of the Air Traffic Control System, rebuilding the air traffic control workforce, and investing in the hard side of airports, and we will continue to do that. We stand ready. Although our patience is running out, we await the administration's proposals for the future revenue stream for the FAA and the Air Traffic Control System.

□ 1045

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 968

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I ask unanimous consent to have my name removed as a cosponsor of H.R. 968. My name was added in error.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 1388, GENERATIONS INVIGORATING VOLUNTEERISM AND EDUCATION ACT

Ms. MATSUI. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 250 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 250

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 2(b) of rule XVIII, declare the House resolved into the Committee of the Whole House on the state of the Union for consideration of the bill (H.R. 1388) to reauthorize and reform the national service laws. The first reading of the bill shall be dispensed with. All points of order against consideration of the bill are waived except those arising under clause 9 or 10 of rule XXI. General debate shall be confined to the bill and

shall not exceed one hour equally divided and controlled by the chair and ranking minority member of the Committee on Education and Labor. After general debate the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider as an original bill for the purpose of amendment under the five-minute rule the amendment in the nature of a substitute recommended by the Committee on Education and Labor now printed in the bill. The committee amendment in the nature of a substitute shall be considered as read. All points of order against the committee amendment in the nature of a substitute are waived except those arising under clause 10 of rule XXI. Notwithstanding clause 11 of rule XVIII, no amendment to the committee amendment in the nature of a substitute shall be in order except those printed in the report of the Committee on Rules accompanying this resolution. Each such amendment may be offered only in the order printed in the report, may be offered only by a Member designated in the report, shall be considered as read, shall be debatable for the time specified in the report equally divided and controlled by the proponent and an opponent, shall not be subject to amendment, and shall not be subject to a demand for division of the question in the House or in the Committee of the Whole. All points of order against such amendments are waived except those arising under clause 9 or 10 of rule XXI. At the conclusion of consideration of the bill for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted. Any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommend with or without instructions.

The SPEAKER pro tempore. The gentlewoman from California is recognized for 1 hour.

Ms. MATSUI. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentleman from Florida (Mr. LINCOLN DIAZ-BALART). All time yielded during consideration of this rule is for debate only. I yield myself such time as I may consume.

GENERAL LEAVE

Ms. MATSUI. I also ask unanimous consent that all Members be given 5 legislative days in which to revise and extend their remarks on House Resolution 250.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from California?

There was no objection.

Ms. MATSUI. Mr. Speaker, H. Res. 250 provides for consideration of H.R. 1388, the Generations Invigorating Volunteerism and Education, or the GIVE Act, under a structured rule. The rule provides 1 hour of general debate controlled by the Committee on Education and Labor.

The rule makes in order 11 amendments which are listed in the Rules Committee report accompanying the

resolution. Each amendment is debatable for 10 minutes except the manager's amendment, which is debatable for 30 minutes. The rule also provides one motion to recommit with or without instructions.

Mr. Speaker, I rise today in support of a vital piece of bipartisan legislation that directly affects all of our communities and the lives of millions of Americans.

Legislation that strengthens our communities helps educate our future generations, teaches our youth to prepare for and respond to unthinkable tragedies and fosters the growth of respect and compassion throughout our entire society.

The GIVE Act will help launch a new era of American service and volunteerism. The bill answers President Obama's call for Americans of all generations to help get the country through the economic crisis by serving and volunteering in their communities.

The GIVE Act reauthorizes, for the first time in 15 years, our country's investment in community service and volunteerism. As a cochair of the National Service Caucus, it is a pleasure to call attention to the tremendous work of those involved at every level and in every program of the corporation.

Service programs not only help each of our communities but also provide training that could lead to future careers. Many individuals who are involved in service at a young age continue in public service careers and in service programs throughout their lives.

Mr. Speaker, service and volunteerism are the bedrock of emergency preparedness and national security. In times of strife, the American people have always shown a spirit of service and ingenuity. Investing in service and volunteer programs prepares us to handle any crisis.

We must focus on building our national capacity, and harnessing the enterprising spirit of the American people is a good way to do so. In the wake of a catastrophe, a first responder is likely to be a civilian. A neighbor is likely to be the first one to provide assistance. By building up our service and volunteer programs, we are taking proactive steps to bolster our national security and capability to weather a disaster now and in the years to come.

We saw firsthand the importance of having trained volunteers in the wake of the 2005 hurricanes, Katrina and Rita. These forever changed thousands of lives and communities in the gulf coast. We also witnessed an outpouring of support and compassion from individuals who were touched by this immense tragedy.

Following the devastation in the gulf coast, more than 92,000 national service volunteers contributed over 3.5 million hours of work to the recovery effort.

They repaired neighborhoods. They rebuilt lives.

Since September of 2005, over 4,070 National Civilian Community Corps—or NCCC—members have served more than 2.1 million hours in the gulf coast on over 830 relief and recovery projects. Through programs such as AmeriCorps State and national, Volunteers in Service to America—or VISTA—and NCCC, servicemembers address critical needs in our communities.

AmeriCorps and NCCC members are disaster trained and available for immediate deployment in the event of a natural disaster anywhere within the United States, just as they were to the gulf coast.

In fact, NCCC teams have responded to every national disaster, including the recent fires in my home State of California. Disaster relief and emergency response now accounts for over 60 percent of the NCCC portfolio. Over \$42 million worth of hurricane recovery resources have come from AmeriCorps and NCCC alone, which is millions more than we have spent on the entire program nationwide. This is a clear return on our investment.

These exceptional young men and women are especially trained in disaster preparedness and organizing local volunteers into an effective recovery operation. These programs continually put more back into the community than we put into them. The GIVE Act shows Congress' support for their heroic and continued efforts and ensures these programs continue for years to come.

The GIVE Act of 2009 will strengthen the emergency preparedness and response training of our country's NCCC participants. The changes will also help the program continue to grow.

The legislation expands the scope of NCCC to specifically include disaster relief, infrastructure improvement, environmental and energy conservation and urban and rural development.

The GIVE Act also establishes four new service corps, including a Clean Energy Corps to encourage energy efficiency and conservation measures; an Education Corps to help increase student engagement, achievement and graduation; a Healthy Futures Corps to improve health care access; and a Veterans Service Corps to enhance services for veterans.

This bill includes a Call to Service Campaign to encourage all Americans to engage in service and to observe September 11 as a National Day of Service and Remembrance.

The bill seeks to tap the growing pool of baby boomers reaching retirement that wish to continue serving their country and provides real alternatives to traditional employment at a time when jobs are scarce. The GIVE Act also seeks to engage our future generations in lifetimes of service. Engaging young men and women is vi-

tally important. The Education Awards, which will be increased in this bill, encourage our youth to apply the skills that they learn at volunteerism to a successful education and the lessons they learn in school to improving their communities.

The GIVE Act specifically seeks to make a difference, not only by the services that are provided but by who we are engaged in serving. It seeks to exponentially increase the numbers of disadvantaged and at-risk youth participating in service. Each one of these valuable young men and women will take the respect and compassion that they learn at service programs back to their schools and to their families and be a seed of inspiration amongst those who need it most.

We cannot pass up the opportunity to better our future generations. Service programs provide an opportunity to give our youth the most valuable lesson of all, positive personal experience.

Mr. Speaker, as a result of the great work of AmeriCorps members, extraordinary things are happening all around America. The corporation supports such important nonprofit organizations as Habitat for Humanity, City Year and the American Red Cross.

National service participants have built homes, healed wounds, worked in national parks and taught elementary school kids. These volunteers are part of the backbone of our country. With very little funding, service participants leverage millions of dollars and perform crucial work in classrooms and in areas of our Nation hit by disaster.

The service programs and new initiatives in H.R. 1388 help address some of our Nation's toughest problems, from poverty and unmet education needs to natural disasters. Just this week, The New York Times and the Wall Street Journal pointed to the rise in the number of volunteers nationwide. Many who have been laid off or are in between jobs have joined volunteer programs to stay connected to their community and learn new skills. Some have even benefited by gaining employment through their work as volunteers.

The GIVE Act will expand these opportunities as well as health care access, provide seniors with help living independently, enhance services for veterans, and help build a clean, green, energy-efficient economy.

As a result, I hope that my colleagues will support the rule and the underlying legislation. The spirit of service has been renewed at a time of economic challenges, and it is time for our government to foster a continued dedication to our country's prosperity through national service.

Mr. Speaker, I reserve the balance of my time.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I would like to thank my friend from California (Ms. MATSUI) for the time, and I yield myself such time as I may consume.

It can sometimes seem that we are surrounded by news of selfishness and greed. I think, very appropriately, and I will discuss this later, the American people are outraged by an example of really cynicism intertwined with greed in this AIG example. More about that later.

However, those individuals, those few individuals, those cynics who utilized taxpayer dollars to give out bonuses for AIG, those really few individuals, Mr. Speaker, when you think about it in comparison to the myriad of individuals who really commit themselves to the service of others through volunteerism, those who serve are a beacon of compassion and hope for us all. Community service is one of the most gratifying, rewarding, fulfilling ways people can spend their time and their efforts.

Community service has always been a vital pillar of American society. It's one of the things that distinguishes the United States and exalts the American people.

Volunteers all over the United States dedicate millions of hours to their contemporaries in the hope of making people's lives better. Through their selfless work, volunteers help improve the lives of millions of Americans. In 1993, the Congress, with my support, passed legislation creating AmeriCorps and the Corporation for National and Community Service to administer and coordinate Federal service community programs.

Since then, almost 500,000 Americans have served with thousands of not-for-profit organizations, public agencies and faith-based organizations nationwide.

□ 1100

These citizens tackle many unmet needs in our communities. They provide for our youth through tutoring, mentoring, and after-school programs. They provide for the disadvantaged by building homes for the needy and reaching out to misguided youth. They conduct neighborhood patrols; they care for our environment; respond to disasters, engage citizens in public, health, safety, and emergency preparedness services. And they support those who have served and continue to serve our Nation in the Armed Forces by meeting the needs of our Nation's veterans, active duty servicemembers, and their families. They do, oftentimes, exemplary work.

The underlying legislation, known as the Generations Invigorating Volunteerism and Education Act, referred to as the GIVE Act because of its initials, will reauthorize the national service programs administered by the Corporation for National and Community Service. This reauthorization sets the goal to recruit 250,000 volunteers for AmeriCorps by 2014. It will also create service opportunities for middle

school and high school students through the Summer of Service program.

The legislation emphasizes the critical role of service in meeting the national priorities of emergency and disaster preparedness, and it will help improve program integrity.

I am pleased that the committee, the Committee on Education and Labor, worked in a bipartisan manner to reauthorize this program and to include provisions that will make the programs more effective and efficient, responding to State and local needs with performance orientation.

It goes to show, Mr. Speaker, that when there is a willingness to work together and to negotiate, we can bring forth good pieces of legislation with bipartisan support.

I know the majority is trumpeting this rule with which we bring this underlying legislation to the floor because it will allow Members to debate all of the amendments that were submitted to the Rules Committee by Republicans. And that's appropriate. Nevertheless, I remind my colleagues the majority does this when the underlying legislation is uncontroversial.

Even though the majority promised to be the most open Congress in history, if the majority is so proud of this rule, then they should allow a more open process when controversial bills come before the floor as well.

I urge Americans everywhere, regardless of whether they take part in AmeriCorps, to volunteer and give back to their communities. The rewards are extraordinary to both the volunteer and to the community. As Winston Churchill said, "We make a living by what we do, but we make a life by what we give."

I reserve the balance of my time.

Ms. MATSUI. Mr. Speaker, I yield 3 minutes to my good friend, the gentlewoman from Ohio (Ms. SUTTON).

Ms. SUTTON. I thank the gentlewoman from California for the time and for her leadership on this bill. I also want to thank my good friend from across the aisle, Mr. DIAZ-BALART, for his thoughtful words about this bill and about the amazing character of the American people to serve and reach out to others in their communities through volunteerism.

This bill, Mr. Speaker, will unite Americans during these challenging economic times through service and volunteerism in our communities. And I am pleased that this Congress is moving swiftly to reauthorize and expand national service programs managed by the Corporation for National and Community Service.

I am particularly supportive of two initiatives that are included in this bill that I sponsored in the last Congress.

The first proposal requires the Corporation to conduct a study to identify specific areas of need for displaced

workers, and to identify how existing programs and activities carried out under our national service laws can better serve displaced workers and the communities affected by plant closings and job losses.

Communities in Ohio and across our Nation are being devastated by the economic downturn, and it's essential that we support new opportunities for Americans who have lost their jobs through no fault of their own.

Our workers who have toiled for so long in manufacturing plants have unique skill sets and leadership capabilities that can be of great value when utilized through service projects.

In Ohio, we face an unemployment rate of 8.8 percent. I eagerly look forward to seeing how new service programs like this will help us help our displaced workforce.

The second proposal requires the Corporation to consider whether an area has a mortgage foreclosure rate greater than the national average when considering grant applications from States and other eligible entities.

Ohio has been particularly devastated by the mortgage crisis and ranks 10th in the Nation in home foreclosures. According to recent statistics, my congressional district is projected to have over 5,000 foreclosures in the coming year.

In a time when so many of our communities are struggling, we need to pursue every avenue available to make sure that the cities and towns with the greatest needs have access to the assistance that we can provide.

Mr. Speaker, this legislation will go a long way to energize and create new opportunities for Americans to build confidence and assist in our country's recovery.

I urge a "yes" vote on the rule and the underlying bill.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, it is my pleasure at this time to yield 5 minutes to a distinguished colleague from the Rules Committee, who has brought to our committee great wisdom and tenacity, the gentlewoman from North Carolina (Ms. FOXX).

Ms. FOXX. I thank my colleague from Florida for his gracious comments. It's a joy to serve on the Rules Committee. It's a joy, actually, to serve with all the folks on the Rules Committee. I am learning a great deal. We have some very talented people on that committee.

I do have to say, though, that I disagree with many of my colleagues about this rule and about this bill. I appreciated the comments that have been made. I particularly appreciate my colleague giving the definition from Winston Churchill because I use that definition often when I write volunteers to congratulate them on what they do.

To quote it again, "We make a living by what we do, but we make a life by

what we give." The word "give" is the important word here.

I looked up the definition of volunteer, and it says "a person who voluntarily offers himself or herself for a service or undertaking." The second definition is "a person who performs a service willingly and without pay."

What this bill does is expands dramatically the government's role in an area that I don't think the government should be dealing with. Our colleague from Ohio just said this is an opportunity for people who have lost their jobs. Well, I think it's important that we encourage volunteers, but this is a paid job.

This is a government-authorized charity. And it concerns me a great deal because I see our taking over what is being done voluntarily by people—this, and in the budget. The President wants to tax people who give money to volunteer organizations and to charities. He says that's okay because the government's going to pay it.

We're pretty soon going to have a government that controls everything in our society. That's not what America is all about.

When de Tocqueville came here in the 1800s—and he is quoted over and over—he said he never saw a society with so many associations. Those are voluntary associations. We have Ruritan clubs, Civitan clubs, Rotary clubs. They do their work without pay. That is what America's all about.

What we are doing is creating a 1984 because we're setting up paid volunteers. That's not what America's all about.

Someone sent me an e-mail last night and said we need to give this GIVE Act a new name: People Audaciously and Insidiously Demanding Vituperously Outlandish, Laughable, Unsustainable, Needless, Totally Egregious and Extortionary Recompense Act, or the PAID VOLUNTEER Act. That is what this is all about.

That is not what America is all about. We need to be encouraging people to be volunteers and not be paid for it.

The other concern that I have is that there is no accountability in this bill. The Learn and Serve program that is already in existence was rated the lowest rating possible—not performing; results not demonstrated by OMB's Program Assessment Rating Tool.

Yesterday, in the committee, the gentleman from the Education Committee made a big deal about the fact that these programs are going to be evaluated by PART. But they've already been evaluated, and they've been evaluated as basically no good and as wasting money.

The AmeriCorps National Community Corps Program was rated as a low rating, of not performing, and ineffective by OMB's PART program. OMB defines a rating of ineffective as pro-

grams not using your tax dollars effectively. Ineffective programs have been unable to achieve results due to a lack of clarity regarding the program's purpose or goals, poor management, or some other significant weakness.

Well, ladies and gentlemen, Mr. Speaker, it is very difficult to establish evaluation programs. I know. I was in education for a long, long time. It is difficult to do that. These programs are not establishing credible evaluation programs. We demand that of our education programs, we demand it of teachers. No Child Left Behind has the most egregious kinds of evaluation programs that we hear about all the time.

Here, we are spending \$27,000 dollars per person; \$27,000. In North Carolina, I think we are spending about an average of \$7,000 dollars per child in public education. That may not be the most up-to-date figure, but it's something like that. And here we are going to pay \$27,000 dollars per person for these volunteers? What about that?

I know that probably hospitals in my community and other groups that use volunteers extensively don't spend hundreds of dollars for volunteers, let alone \$27,000.

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Mr. LINCOLN DIAZ-BALART of Florida. I yield an additional 2 minutes.

Ms. FOXX. I thank the gentleman for yielding additional time. As I said, one of my concerns is here we are in a time when we need to be looking at every single dollar we spend. I take that approach every day. I don't care if the Federal Government is flush with money, we should be very careful with every penny we spend.

The American public are watching us like never before. And here we are, about to put these programs out. One of the concerns I had, too, is how the people are going to be counted. Again, where is the evaluation?

In the rule that was adopted yesterday, it said that this bill adds language to promote community-based efforts to reduce crime and recruit public safety officers in the service opportunities.

Well, I wonder if every community-watch program in the country, which can have hundreds of people in them who do very little, but they perform an important service for their community. They may be assigned an hour a week to do something. Are they going to be part of these 250,000 volunteers? That's not at all clear. But I have a suspicion they're going to be counted if they can get to that magic number. And they will say, Look, we have 250,000 people.

But the effectiveness is not being gauged, and I think this is a tremendous waste of money where we could be doing this for a lot less.

Ms. MATSUI. Mr. Speaker, before I yield to my next speaker, I'd like to make a couple of comments. First of

all, we aren't paying volunteers, we're supporting an infrastructure that removes barriers to service. We're making volunteers more accessible and more effective by creating an infrastructure in which everyday citizens can volunteer and be effective, without having resources, prior experience, or formal training.

Also, one of the GIVE Act's major themes is to increase transparency and accountability in national service programs, particularly in showing program outcomes. Section 179 of the Act establishes performance measures for each national service program and a framework for ensuring that Federal dollars go to high-performing programs.

With that, I yield 3 minutes to my fellow Rules Committee colleague, the gentleman from Colorado (Mr. POLIS).

Mr. POLIS. Today, I rise in support of the Generations Invigorating Volunteerism and Education, the GIVE Act, and the rule. I thank Chairman MILLER for his leadership in introducing this bipartisan comprehensive legislation, which answers President Obama's call to launch a new era of national service and volunteerism.

I'd also like to thank Congresswoman MCCARTHY for her efforts as chairwoman of the Healthy Families and Communities Subcommittee to expand opportunities for all.

□ 1115

The GIVE Act's new programs, expanded capacity, meaningful incentives, and innovative approaches will allow us to come together and rise to the challenges we face. It also represents a historic call to action that reaches out to all Americans from all walks of life and asks them to commit to service.

During these difficult times, our Nation needs the help of each and every one of us more than ever. The generosity, energy, and goodwill of the American people has fueled our Nation throughout its history and seen us through our darkest hours. If we want to restore our economy, rebuild our schools, and revitalize our neighborhoods, we must once again draw on this powerful spirit of service that pervades the American psyche. The GIVE Act harnesses the power of America's two greatest natural resources, our ingenuity and our work ethic, to generate a new era of national service.

More than 15,000 of my fellow Coloradans are strengthening our communities, helping others, and serving unmet needs in our neighborhoods through 147 national service projects in our State: more than 9,000 in Senior Corps, 2,500 in AmeriCorps—and I have had the opportunity to work with a number of AmeriCorps volunteers in our schools—and 4,200 in Learn and Serve America. This legislation will allow even more Coloradans to participate by creating thousands of new opportunities to volunteer and offering

training in green energy products, veterans services, and community services across the communities, health and wellness initiatives as well.

As a former chairman of our Colorado State Board of Education, I am particularly pleased with the establishment of the Summer of Service program which will engage middle and high school students in volunteer activities in their communities. The Youth Engagement Zones will capitalize on the largely untapped energy of American youth, especially disadvantaged high school students and out-of-school youth, and put them to work in service of our communities.

Again, I applaud the efforts of all those involved in the crafting of this historic bipartisan legislation, and encourage our body to pass both the rule and the bill.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, it is my pleasure to yield 5 minutes to a brilliant new Member of this House who is already leaving a mark on Congress by facing the important issues of our day, Mr. PAULSEN of Minnesota.

Mr. PAULSEN. I thank the gentleman for yielding and appreciate his leadership as well.

Mr. Speaker, I understand that my colleague from Florida will offer my legislation to help recoup the \$165 million in taxpayer dollars that were paid out as AIG bonuses as part of the previous question.

Mr. Speaker, when the latest unemployment figures came out and were released earlier this month, America saw its jobless rate soar to over 8.1 percent. That is the highest percentage that we have seen in over 25 years in the United States. This equates to approximately 12.5 million Americans who are currently out of work. Against this grim backdrop, AIG has announced that it intends to pay out \$165 million in bonuses to its employees, with a number of those employees receiving more than \$3 million. To date, \$55 million in Federal money has been used to pay AIG employees directly. Additionally, AIG expects to see total bonus payouts to its financial products division increase by nearly \$15 million over the next year.

Mr. Speaker, most troubling is that this \$165 million comes directly out of the nearly \$170 billion that U.S. taxpayers have given to AIG over the last 8 months. In only 8 months, \$170 billion.

In early March, AIG announced a corporate loss of nearly \$62 billion. That is the single greatest quarterly loss in U.S. history of any corporation. While Americans are struggling to put food on the table, I wonder if they are going to be able to ever see the repayment of their investment in the companies that they are participating in, companies like AIG who are paying bonuses, which is the height of irresponsibility.

This money belongs to the American public. It does not belong to the executives at AIG. So I, like my constituents, am shocked. I am shocked at the corruption, especially when AIG's actions come at the expense of America's public. To pay bonuses which in some circumstances can be as high as \$6.5 billion is really antithetical to what the U.S. Government should stand for and the very reason the U.S. Government was lending this money in the first place. Allowing AIG to spend taxpayer money on paying these bonuses can only be seen as reckless incompetence.

The legislation will do three things:

Number one, it is going to require that the Treasury Department recoup all of the bonuses that have been paid.

Number two, no more excuses. It will require the Treasury Department and the Treasury Secretary to sign off on any future bonuses with his signature.

And, number three, it would require the Treasury Secretary to sign off on any future contracts as a part of any ongoing TARP legislation. That is where accountability is needed for the American taxpayer.

Mr. Speaker, we were sent here by our constituents to bring accountability back to government and protect the taxpayers from reckless spending. I strongly urge my colleagues to do just that. They should vote "no" on the previous question.

We have a chance to do this today, Members. This is the issue of urgency today. This is nothing but bad government incompetence. It is not acceptable for the Treasury Secretary to throw his hands up in the air and walk away from this. Congress should act today. We should move forward, vote "no" on the previous question, and defeat the rule so that we can consider this very important legislation.

Ms. MATSUI. Mr. Speaker, I reserve the balance of my time.

Mr. LINCOLN DIAZ-BALART of Florida. At this time it is my privilege, Mr. Speaker, to yield an additional 2 minutes to Dr. FOXX of North Carolina.

Ms. FOXX. Again I thank my colleague for yielding me this time.

It is interesting. I had intended to say something about this sounding to me like AIG in many ways. I didn't realize that my colleague from Minnesota was going to say that when he got up to speak. But I wanted to point out the purpose of this program as stated in section 1201. It is to: Support high-quality service-learning projects that engage students in meeting community needs with demonstrable results, while enhancing students' academic and civic learning; and build institutional capacity, including the training of educators, and to strengthen the service infrastructure. That is the purpose.

When you get over in the evaluation section, it is pretty nebulous. One of

the interesting things that I find is that they are saying that if the program doesn't perform, if they received assistance for less, they mean fewer, than 3 years, and is failing to achieve the performance measures, then they give them technical assistance. They give them technical assistance for 3 more years, and then they make some decision about whether they are going to continue funding the program.

I think we are setting up AIG programs all over this government. We just happen to know about AIG because of the egregious situation that has come up. But we have a potential AIG program right here. We are funding these people. We have no way to evaluate it. The expectations are not set out to begin with, and that is a great failing in this program.

So I can tell you that if we examine this program closely, we could show at least as much or maybe more money being abused by this program than is being used by AIG. The American people should be up in arms about all of these programs that we are funding from which we get no value.

Now what we are getting, we are employing a lot of bureaucrats, a lot of bureaucrats at high salaries. I call that high-priced welfare. But we are not getting a good return on our investment, just like we haven't gotten a good return on our investment from AIG.

Ms. MATSUI. Mr. Speaker, before I yield to the next speaker, let me just say this is not AIG. The bill on the floor today is the GIVE Act. And to compare AIG to the GIVE Act is absolutely, astoundingly ridiculous.

With that, I yield 3 minutes to my good friend, the gentlelady from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, I had the pleasure this morning of visiting with a number of youngsters from the Youth Build Program. They participated with Mrs. Obama yesterday in building a home.

It is interesting, when you speak of the words GIVE, that you can equate it to an organization such as AIG that simply takes. So I rise today to support the rule and the underlying bill. And let me explain to you what this means to America.

How many of us can raise our hand and say that we understand what USAID means, or we understand what the Peace Corps means or AmeriCorps? And how many countless hours of youthful enthusiasm did we see after Hurricane Katrina? I know, because I am from Houston, Texas, and the thousands and thousands of survivors and evacuees that came, we were inundated, rightfully so and enthusiastically so, by these volunteers and by these workers from these many different aspects.

Unregulated? No. Much of this will be volunteer service. Much of this will be

educating people about service. Much of this will be doing what young people across America have asked us to do: Give them something to do. And that is what this bill intends.

I am delighted to have joined as a cosponsor in the recent days. I am delighted to have been able to work on a specific amendment that is incorporated in the bill that reaches out to the underserved like Historically Black Colleges and Hispanic Serving Colleges, because America is a potpourri, it is a mosaic of so many different people with so many different histories, people who are already bilingual, who can speak to people who are in need, refugees, people who are fleeing oppression. There are so many different aspects of letting young people help other young people or young people help children.

As the cofounder of the Congressional Children's Caucus, this bill specifically provides for enhanced community services with AmeriCorps, Learn and Serve America, VISTA, the National Civilian Community Corps, and Senior Corps.

Mr. Speaker, this is the right direction for America in the 21st century. Be reminded that we ask not what this country can do for us. We don't equate AIG's insensitivity to the American taxpayer to this bill that gives everybody the opportunity to say, what can I do for my country, America the beautiful? That is what this bill is all about.

I am so proud to stand alongside of this kind of legislation, because as our military forces are on the front lines, I want Americans to be able to stand on the front lines of this Nation, helping those who cannot help themselves. That is what this GIVE bill is all about. And I think we need to go around with a GIVE Bill button like I have got the Youth Bill button saying, Yes, We Can.

Mr. Speaker, I rise today in strong support of H.R. 1388, the "Generations of Invigorating Volunteerism and Education Act or the 'GIVE Act'." I would like to thank my colleague Congresswoman MCCARTHY for introducing this important legislation, as well as the Chairman of the Committee on Education and Labor, Congressman GEORGE MILLER, for his leadership in bringing this bill to the floor today.

Mr. Speaker, this legislation will expand the already highly successful volunteer programs that empower community activists and improve the education and economic conditions of cities throughout the United States. It supports and increases funding for key community services programs, including AmeriCorps, Learn and Serve America, VISTA, National Civilian Community Corps, and Senior Corps.

The GIVE Act creates opportunities for green jobs that will contribute to energy conservation and environmental protection. It will create critical educational opportunities for disadvantaged youth and will create incentives for students to improve their communities.

Every year, more than 70,000 Americans participate in the AmeriCorps program alone,

which provides relief to cities during natural disasters and reinvigorates communities. Over 50 million American volunteers build homes, organize food-drives, and improve schools through national service programs. The GIVE Act will broaden the opportunities for students and activists to participate in national service via education rewards that keep up with soaring costs of universities and Summer Service programs. After Ike and Katrina, thousands of local students worked to help rebuild communities and provide necessary services to distressed families. The GIVE Act is the critical linchpin in sustaining this civic activism.

Specifically, the GIVE Act would expand the job opportunities for Volunteers in Service to America, or VISTA, to re-integrate youth into society, increase literacy in communities through teaching opportunities in before and after-school programs, and to provide health and social services to low-income communities. VISTA is a critical step toward poverty alleviation, and the GIVE Act will equip it with the resources to fulfill its obligations.

I am pleased to see that my colleague, representative CUELLAR, revised the legislation to increase the number of volunteers from 75,000 to 250,000 members and added provisions for unemployed individuals to be included in the national service workforce, a step that will be a critical step to combating the employment crisis afflicting millions. I am also pleased that Congressman MILLER further specified that the increase in volunteers is not just designed for AmeriCorps, but for all national service programs such as the Peace Corps and Opportunity Corps, and also included language to promote community based efforts to reduce crime and recruit public safety officers.

In addition, the GIVE Act will create 4 new service opportunities including a Clean Energy Corps, an Education Corps, a Healthy Futures Corps, and a Veteran Service Corps. These volunteer opportunities will further improve environmental protection, health-care access, and services for veterans. These new service corps will address critical concerns in low-income communities. I am very happy that Congressman TEAGUE revised the legislation to aid veterans in their pursuit of education and professional opportunities, and help veterans with the claims process, and assist rural, disabled, and unemployed veterans with transportation needs. Moreover, the GIVE Act will recognize colleges and universities that are strongly engaged in service through grants and rewards that will in turn improve educational access in the United States.

I am pleased to see the retention of my language from the 110th Congress that gives special consideration to historically black colleges and universities, Hispanic-serving institutions, Tribal universities, and colleges serving predominantly minority populations. So strong are these universities' support of service, that "veritas et beneficium," or "truth and service" in Latin, is inscribed on their insignias.

The GIVE Act will create a Campuses of Service Program that will encourage and assist students in pursuing public service careers. It will also focus on recruiting scientists and engineers to keep America competitive for years to come. The Act will expand the Senior Corps as a way to keep Older Americans in-

cluding seniors engaged in public service, and will create a Youth Engagement Zone to increase the number of young students in volunteer services.

Moreover, it expands the focus of The National Civilian Community Corps to include disaster relief efforts and infrastructure improvement to allow quicker and more effective responses to disasters like Katrina and Ike that devastated numerous communities in the United States. Finally, the Give Act will launch a nation-wide Call to Service Campaign that encourages all Americans to engage in national service and to recognize September 11th as a National Day of Service and Remembrance.

I am honored to cosponsor this legislation that will add service before self to America's future leaders. I urge my colleagues to join me in supporting this legislation.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Ohio (Mr. LATOURETTE).

Mr. LATOURETTE. I thank the gentleman for yielding.

I intend to vote "no" on the previous question on this particular rule. I don't have any big problem with the rule, but it is my understanding that Mr. DIAZ-BALART will, if it is defeated, offer an amendment to the rule that will address a topic that isn't the subject of the GIVE Act, but the AIG bonuses.

Yesterday, the country was roiled by the fact that a company that has received \$175 billion has handed out to 73 individuals bonuses of \$1 million or more. Multiple pieces of legislation were introduced yesterday to put a stop to it. We see a lot of gnashing of teeth on the other side of the Capitol like, "How could this happen? We didn't know it happened." We have some Senators introducing bills to tax these bonuses at 100 percent. But, Mr. Speaker, we know how this happened, and yesterday we filed legislation and Mr. DIAZ-BALART's amendment would move the process along. In deference to the gentlelady who just spoke, we can chew gum and walk at the same time. We can consider the GIVE Act and we can also talk about the Nation's economy, which is critical.

But we know that when the stimulus bill was passed, there was an amendment offered, a bipartisan amendment, by Senators WYDEN and SNOWE that would have said that if there are in fact these egregious bonuses—and think about it for just a minute. You run a company into the ground and participate in causing the greatest economic crisis since the Great Depression, and you get millions of dollars in bonuses. I would like that job, and a lot of people that I represent would like that job.

There was a provision in the stimulus bill that would have said that if you give out these egregious bonuses, there is going to be an excise tax of 35 percent. It goes to conference. All of a

sudden, that provision is then gone, and what is inserted in section 111, paragraph 3(iii) is that: No bonus that was agreed to or negotiated prior to February 11 will be subject to this restriction.

Does anybody think that the bonuses that were just given out that were the subject of a CNN report on January 28 was negotiated after February 11? It is ridiculous. They knew it was going to happen. They let it happen. And now that the public has somehow said we don't think this should happen, we have a lot of finger-pointing going on on Capitol Hill.

Yesterday, I filed a Resolution of Inquiry directing the Secretary of the Treasury to hand over all of the documents leading up to why this transpired, why it was permitted to transpire. And we hear the Constitution being bandied about. "We can't interfere with contract law." I am going to tell you, since the beginning of this Congress, the 111th Congress, if you are an auto worker, even though you had a contract to make X number of dollars to build automobiles in this country, we violated those contracts and said let's cram those down if you want to get Federal assistance.

□ 1130

If you lied on your mortgage application when you went to the ABC bank, and they gave you a \$100,000 mortgage, and they said, "you lied to get that mortgage," we just passed a piece of legislation that says, "we don't care if you lied. If you get in financial trouble, we are going to cram down the mortgage, and you don't owe the bank \$100,000 anymore."

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. LINCOLN DIAZ-BALART of Florida. I yield the gentleman 30 additional seconds.

Mr. LATOURETTE. Clearly, those are contracts. We can mess with those contracts. We can mess with people that are working hard every day. We can mess with people that lend money so people can have the American Dream of homeownership. But we can't mess with 73 people who directed a company into near bankruptcy and needed \$175 billion of my constituents' money and your constituents' money. But that is okay. We can't mess with those contracts.

Please defeat the previous question and support Mr. DIAZ-BALART's amendment.

Ms. MATSUI. Mr. Speaker, I just want to say that both sides of this aisle are absolutely outraged about what happened at AIG, absolutely outraged. We agree with you on that, definitely. And we will be taking action immediately. In fact, I have been informed that we will be having a Rules meeting this afternoon. But let's get the GIVE Act through. Let's do the rule on this and move forward.

With that, I reserve my time.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, first yielding myself such time as I may consume, I'm very happy that we have gotten the message to the majority leadership and that they have set a Rules meeting, we have just been informed, for 3 p.m. to address this issue. It shows that the rules protect the minority and that the minority can bring issues of great importance to the American people and get the attention of the majority. So I'm glad that the majority will be addressing this at 3.

But we don't have to wait until 3. It is 11:30. We can address it now. And then after we address it—we are not saying that we won't pass the GIVE Act. But let's address at 11:30, not at 3 in the Rules Committee, this issue that is of great importance to the American people.

I yield 2 minutes to my friend, Dr. FOXX, from North Carolina.

Ms. FOXX. Mr. Speaker, again, I thank my colleague. I agree with him. I think this should be dealt with right now. This is something we very much agree on. And my colleague from California, I think, has just made the case for why this bill should not be passed. She said, let's get this on through. Let's move it through. That is the same thing we heard about the stimulus: We don't have time to wait; we have got to move this on through.

Every time the majority wants to get something passed that ought not to be passed, they are ramming it through. That has been the whole story of this session.

I just want to share with you from the White House OMB, Washington, ExpectMore, their program assessment of the AmeriCorps National Civilian Community Corps. It says, "not performing, ineffective, the program has never conducted a comprehensive evaluation. Compared to other AmeriCorps service programs, this program is very costly. Performance goals are not measurable."

Ladies and gentlemen, and Mr. Speaker, these are not my words. These are coming from OMB. We know the program is not effective, and we are going to be spending \$3 billion. With AIG, the contention is \$165 million. It is a pittance compared to the money that is going to be spent on this program. And the program says "and such sums." That, ladies and gentlemen, means any money they want to spend. It is open-ended. They can spend anything.

I want to say, again, what is happening here is that we are confusing government work with public service. Yesterday our colleague from the Education Committee said, "well, this program gets kids in middle school, it moves them into high school and moves them into that, and eventually they get a government job." We are

teaching people to go to work for the government through this program. What a shame. Shame on us. This country was not built on working for the government. It was built on volunteering and on the private sector. We are taking this country over with the government.

Ms. MATSUI. Mr. Speaker, I have no further speakers.

I inquire of the gentleman, does he have any speakers?

Mr. LINCOLN DIAZ-BALART of Florida. I'm ready.

Ms. MATSUI. So you're ready to close.

I reserve my time.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, the rule before us brings to the floor the GIVE Act, which is a bill to reauthorize the National Service programs. And the majority on our side supports that. I support that legislation. It is a good piece of legislation. It has the support of the ranking member of the Education and Labor Committee, and we are in support of the underlying legislation.

What we are saying, though, is that—and by the way, I reiterate that I'm pleased that we have caught the attention of the majority leadership and that they have convened a rules meeting for 3 p.m. to deal with the issue of AIG, the outrage of the AIG bonuses. At a time when the Federal Government is propping up AIG with over \$170 billion in taxpayer funds, it is unconscionable that AIG is giving its executives bonuses, some of them which are over \$1 million.

That is why today I will be asking for a "no" vote on the previous question. We don't have to wait until a rules meeting and then who knows when they will bring to the floor—if they do—legislation. We don't know what it will say.

What I'm saying is that right now we can amend this rule and allow the House to consider H.R. 1577, a bill by my colleagues, Representatives PAULSEN and LANCE, that will require that the Treasury Department implement a plan within the next 2 weeks to recoup the AIG bonuses. And in order to prevent another bonus controversy, the bill will require that any future bonus payments from TARP funds be approved by the Treasury Department in writing, including any contractual bonus obligations.

Now, Mr. Speaker, Americans are rightfully upset over the use of taxpayer funds to give executives million-dollar bonuses. They expect the administration will keep a watchful eye on the proper use of bailout funds. Just 2 weeks ago, the President's spokesman said that they were confident that they knew how every dime was being spent at AIG. Well, obviously, Mr. Speaker, that doesn't seem to be the case. That is the reason that I am calling for Members of this House to vote "no" on the previous question.

The Paulsen-Lance legislation is just another example of how the responsible and vigilant opposition, the Republicans, we are working to provide transparency and oversight of taxpayer funds in the TARP program. We must demand that the administration provide proper accounting of TARP funds. Americans deserve to know how their tax dollars are being utilized.

Now, if Members support transparency and oversight of taxpayer funds in the TARP program, then they should vote "no" on the previous question.

Now, our friends on the other side of the aisle said they have discovered the issue, and they are calling a rules meeting at 3 p.m. to deal with it. We don't know what they are going to be bringing forward. But we have brought forward legislation. Our colleagues have filed legislation, Representatives Paulsen and Lance, to deal with this issue today and to require the Treasury Department to recoup those unconscionable bonuses within 2 weeks. And we should vote on it today.

So I urge my colleagues to vote "no" on the previous question and to make a statement: Enough is enough. Enough of these bailouts so that millionaires can become billionaires and billionaires can give their cronies bonuses with taxpayer dollars. Enough is enough. And we can vote on it right now, Mr. Speaker.

By the way, we will vote on the amendment on the legislation with regard to volunteerism. This does not negate that. But before, we must and we should address the issue of the unconscionable bonuses by defeating the previous question.

I ask unanimous consent to insert the text of the amendment and extraneous materials immediately prior to the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. LINCOLN DIAZ-BALART of Florida. I yield back the balance of my time.

Ms. MATSUI. Mr. Speaker, this reauthorization, the first in 15 years, takes programs and infrastructure that touch so many lives and builds off its foundation to greatly increase the quantity and improve the quality of service that we, as a Nation, work to provide.

National Service is a proven return on our investments. With this bill, we will broaden those involved in service across the country, and in doing so, foster the values of civic engagement and duty that can change a life and a community.

This bipartisan legislation is truly a win-win for all those involved and for our country. It makes excellent improvements to an already successful Corporation for National and Commu-

nity Service. It improves access and support for organizations and grant applicants, and most importantly, reassures our valued servicemembers that Congress supports them and their work in our communities.

I urge a "yes" vote on the previous question and on the rule.

Mr. CARDOZA. Mr. Speaker, I thank my good friend from California, Ms. MATSUI and I also thank her for her passion and dedication to increasing our country's commitment to community service and volunteerism.

Mr. Speaker, I rise today in support of the rule and the underlying bill, the Generations Invigorating Volunteerism and Education Act.

As we all know, our country is at a significant crossroads of the likes we've never known. And my own district has been hit like no other.

My district is saddled with the nation's highest foreclosure rates and drops in home equity, unemployment rates approaching 20 percent, my dairy farmers are in crisis, and we have the worst drought in a century.

There is an unmistakable feeling of despair in every coffee shop I visit. My constituents are hurting and need help getting through this economic crisis.

But beyond the housing, infrastructure, and other assistance to stimulate my district's economy, we will surely benefit from the countless Good Samaritans who are willing to answer our country's call to service and help communities most in need.

To that end, I proposed two amendments to ensure that the hardest-hit areas of the country such as mine would not be overlooked.

All told, my amendments added home price declines as an eligible criteria; defined "severely economically distressed areas" to include staggering foreclosure rates, home price declines, and unemployment rates; and most importantly, waived the matching grant requirements in economically distressed areas where it is impossible to raise any local funding.

And thanks to my good friend from Texas, Mr. CUELLAR, the "distressed areas" definition was further expanded to include areas that lack basic needs such as water and electricity.

Together, these changes put the hardest-hit districts such as mine on the volunteer map. And it will give us the ability to enlist a cadre of willing volunteers to provide my constituents and my community with the support and assistance they need to overcome these trying times.

I would like to thank my friend and fellow Californian, and Chairman of the Education and Labor Committee Mr. MILLER—and his staff—for supporting my proposals and including them in the manager's amendment.

Mr. Speaker, the fact remains that these are tough times for our country. But with opportunities like this where we can tap the American spirit, promote community service, and come together to give those in need a hand up, I know we will be able to rebuild our communities, recover from this economic disaster, and come out stronger at the end of the day.

The material previously referred to by Mr. LINCOLN DIAZ-BALART of Florida is as follows:

At the end of the resolution, insert the following new section:

SEC. 2. Upon adoption of this resolution, the House shall, without intervention of any point of order, consider the bill (H.R. 1577) to require the Secretary of the Treasury to pursue every legal means to stay or recoup certain incentive bonus payments and retention payments made by American International Group, Inc. to its executives and employees, and to require the Secretary's approval of such payments by any financial institution who receives funds under title I of the Emergency Economic Stabilization Act of 2008. The bill shall be considered as read. All points of order against the bill are waived. Notwithstanding clause 1(c) of rule XIX, the previous question shall be considered as ordered on the bill to final passage without intervening motion except (1) one hour of debate equally divided and controlled by the chairman and ranking minority member of the Committee on Financial Services; and (2) one motion to recommit.

(The information contained herein was provided by Democratic Minority on multiple occasions throughout the 109th Congress.)

THE VOTE ON THE PREVIOUS QUESTION: WHAT IT REALLY MEANS

This vote, the vote on whether to order the previous question on a special rule, is not merely a procedural vote. A vote against ordering the previous question is a vote against the Democratic majority agenda and a vote to allow the opposition, at least for the moment, to offer an alternative plan. It is a vote about what the House should be debating.

Mr. Clarence Cannon's *Precedents of the House of Representatives*, (VI, 308-311) describes the vote on the previous question on the rule as "a motion to direct or control the consideration of the subject before the House being made by the Member in charge." To defeat the previous question is to give the opposition a chance to decide the subject before the House. Cannon cites the Speaker's ruling of January 13, 1920, to the effect that "the refusal of the House to sustain the demand for the previous question passes the control of the resolution to the opposition" in order to offer an amendment. On March 15, 1909, a member of the majority party offered a rule resolution. The House defeated the previous question and a member of the opposition rose to a parliamentary inquiry, asking who was entitled to recognition. Speaker Joseph G. Cannon (R-Illinois) said: "The previous question having been refused, the gentleman from New York, Mr. Fitzgerald, who had asked the gentleman to yield to him for an amendment, is entitled to the first recognition."

Because the vote today may look bad for the Democratic majority they will say "the vote on the previous question is simply a vote on whether to proceed to an immediate vote on adopting the resolution . . . [and] has no substantive legislative or policy implications whatsoever." But that is not what they have always said. Listen to the definition of the previous question used in the *Floor Procedures Manual* published by the Rules Committee in the 109th Congress, (page 56). Here's how the Rules Committee described the rule using information from *Congressional Quarterly's "American Congressional Dictionary"*: "If the previous question is defeated, control of debate shifts to the leading opposition member (usually the minority Floor Manager) who then manages an hour of debate and may offer a germane amendment to the pending business."

Deschler's *Procedure in the U.S. House of Representatives*, the subchapter titled

"Amending Special Rules" states: "a refusal to order the previous question on such a rule [a special rule reported from the Committee on Rules] opens the resolution to amendment and further debate." (Chapter 21, section 21.2) Section 21.3 continues: "Upon rejection of the motion for the previous question on a resolution reported from the Committee on Rules, control shifts to the Member leading the opposition to the previous question, who may offer a proper amendment or motion and who controls the time for debate thereon."

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Democratic majority's agenda and allows those with alternative views the opportunity to offer an alternative plan.

Ms. MATSUI. I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. LINCOLN DIAZ-BALART of Florida. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for any electronic vote on the question of adoption.

The vote was taken by electronic device, and there were—yeas 221, nays 182, not voting 28, as follows:

[Roll No. 131]

□ 1214

Messrs. WILSON of South Carolina, WITTMAN, GOODLATTE, BARTON of Texas, BRADY of Texas, YOUNG of Alaska and Mrs. BACHMANN changed their vote from "yea" to "nay."

Messrs. BERRY and RUSH changed their vote from "nay" to "yea."

So the previous question was ordered.

The result of the vote was announced as above recorded.

Stated for:

Ms. ROYBAL-ALLARD. Mr. Speaker, I was unavoidably detained at the White House today and was not present for votes on the Motion on Ordering the Previous Question on the Rule for H.R. 1388 (rollcall 131). Had I been present, I would have voted "yea."

The SPEAKER pro tempore. The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Ms. MATSUI. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The SPEAKER pro tempore. This will be a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 248, noes 174, not voting 9, as follows:

[Roll No. 132]

Miller, Gary
Olson
Sanchez, Loretta

□ 1227

Mr. LAMBORN changed his vote from “aye” to “no.”

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GEORGE MILLER of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and insert extraneous material on H.R. 1388.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

GENERATIONS INVIGORATING VOLUNTEERISM AND EDUCATION ACT

The SPEAKER pro tempore. Pursuant to House Resolution 250 and rule XVIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 1388.

□ 1228

IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 1388) to reauthorize and reform the national service laws, with Mr. PASTOR of Arizona in the chair.

The Clerk read the title of the bill.

The CHAIR. Pursuant to the rule, the bill is considered read the first time.

The gentleman from California (Mr. GEORGE MILLER) and the gentleman from Pennsylvania (Mr. PLATTS) each will control 30 minutes.

The Chair recognizes the gentleman from California.

Mr. GEORGE MILLER of California. I yield myself 4 minutes.

Mr. Chairman, today we consider legislation that is vital to the spirit of America and to our future. A few weeks ago, President Obama called on Congress to quickly deliver legislation that will launch a new era of American service.

Today the House will answer that call. The GIVE Act will help our country get through these crises and recognize that service is a deeply ingrained and deeply valued American trait.

I want to thank all my colleagues on the committee on both sides of the aisle for their support of this legislation.

We consider this bill at a time when our Nation faces enormous challenges. Families are losing jobs, health care, child care and other key services. Schools and colleges are seeing their budgets evaporate. Our public needs are growing while the resources to meet them are disappearing.

This legislation will make Americans part of the solution in getting our country back on track. Service is the lifeblood of this country. We have seen this throughout our history. In times of crisis, Americans stand up. Americans give back.

We saw it during World Wars I and II, when the Red Cross helped soldiers and their families and returning veterans, and later relief efforts during the Great Depression. We saw this after 9/11 when our citizens, young and old, sprung into action to help their fellow neighbors.

We saw it in the wake of Hurricanes Katrina and Rita when volunteers on the ground were there before the Federal Government. They were beacons of hope amidst serious despair. Today volunteers continue to play a huge role in gulf coast relief efforts. We have seen it in my State of California when communities were ravaged by floods, by earthquakes and wildfires.

We saw it this last June in the floods that devastated homes and businesses in southeast Iowa. Even before the storms came, volunteers were there. To date, AmeriCorps has coordinated over 800,000 volunteer hours in Iowa.

Volunteers play many roles. They teach in our classrooms. They clean up our trails and our public lands. They build and weatherize homes. They shelter the homeless and feed the hungry. That's what Americans do for one another. That's what Americans do in the name of service.

They learn skills. They teach others those skills so they can not only participate with Habitat for Humanity but they can develop a career ladder in the construction trades. They pass on those skills to others in communities so communities can help build, help build stronger communities and better homes to be weatherized and to be energy-efficient.

They tutor our children. They mentor students in school. They help our community. They build our communities. They strengthen our communities. We have seen them come from all walks of life, from young students who want to give to their community, who want to participate, to senior citizens who continue to take their skills and their talents from their working

life and repatriate them back to the community and helping others, the next generation after them.

Our generation was called by President Kennedy to do this. This generation is being called by President Obama to do this, and millions of Americans are answering the call and preparing others to answer that call. This is what strengthens our communities. This is what builds our communities. This is what makes America, America.

People do it, some for a small stipend, some for an educational benefit, some for free. They come from all different places on the compass to help Americans in our communities.

There is a huge focus in this legislation, from middle school to senior citizens, to tying this to a benefit for education. Young students in middle schools can earn a small educational benefit that they can redeem when they go to community college or to the university.

For students, for young people who work full time in AmeriCorps, they can earn a stipend of almost \$4,700, \$4,800 that they can redeem to help pay for their college education. Senior citizens too can get a stipend and get help for education if they want to continue their education.

It's a very important piece, and it's about American values. It's about the value of education, it's about the value of Americans helping one another, it's about how we treat our communities. That's what AmeriCorps has done.

We have an organization that has been building homes in Louisiana after Hurricane Katrina in St. Bernard Parish, and today they will welcome their 200th family back to a home, a gift from the community, from volunteers in America, to those families that were ravaged, that lost everything.

That's what this bill will enable more Americans to do. That's what this bill will do for our communities.

I reserve the balance of my time.

Mr. PLATTS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I rise in support of H.R. 1388, the Generations Invigorating Volunteerism and Education Act, the GIVE Act, which will strengthen and reauthorize America's national community service programs. After 16 years, this reauthorization is certainly overdue.

In 1973, Congress passed the Domestic Volunteer Service Act, DVSA, to foster and expand voluntary service in communities while helping vulnerable and disadvantaged populations, such as the elderly and the poor. DVSA also authorized the National Senior Volunteer Corps, made up of the Foster Grandparents Program, the Senior Companion Program and the Retired and Senior Volunteer Program.

Seventeen years later, Congress passed the National and Community

Service Act, NCSA, of 1990. NCSA aims to address unmet human, educational, environmental and public safety needs as well as to renew a sense of civic responsibility by encouraging citizens to participate in national service programs. Authorized under NCSA are Learn and Serve America, AmeriCorps State and National Grants and the National Civilian Community Corps.

Both DVSA and NCSA are administered by the Corporation for National and Community Service, and both laws were most recently amended in 1993 by the National and Community Service Act. While authorization of appropriations for both of these laws expired at the end of fiscal year 2006, the programs have remained funded through annual appropriations measures.

I am pleased to have worked with the chairman of the Education and Labor Committee, Chairman MILLER, with my subcommittee chairwoman, CAROLYN MCCARTHY from New York, as well as the distinguished ranking member of the full committee, BUCK MCKEON of California, on crafting the GIVE Act, and believe that the bill makes commonsense improvements to our Nation's national service programs. Not only does it provide increased flexibility for States but it also increases accountability and efficiency within the administration of the programs.

H.R. 1388 strengthens existing community and national service programs by providing year-round service opportunities for students and the elderly alike, and further encourages volunteer involvement by disadvantaged youth.

This legislation also expands eligibility requirements for senior-focused programs such as Foster Grandparents and the Senior Companion Program, ensuring that individuals with an interest in serving have options available to them. Finally, I am pleased that the legislation reorganizes AmeriCorps activities into several different corps focused on national areas of need such as education, health care, clean energy and veterans.

In recent years, natural disasters such as hurricanes in the South as well as the wildfires in California have showcased the important efforts of AmeriCorps and NCCC volunteers. I am proud to support this effort to strengthen national service programs and to ensure that participants can continue to aid disadvantaged and needy populations.

Mr. Chairman, I hope all Members will join me in supporting the GIVE Act.

I reserve the balance of my time.

Mr. GEORGE MILLER of California. I yield myself 15 seconds.

I want to thank Congressman PLATTS and Congressman MCKEON for all their cooperation, and for the staff on the minority side, because without their cooperation, I don't think we would be here today. I want to thank them.

At this time I want to recognize for 3 minutes subcommittee Chair CAROLYN MCCARTHY from New York who has been an absolute driving force on this issue of national service and thank her for all of her work.

Mrs. MCCARTHY of New York. I would like to thank Chairman MILLER for his leadership and dedication to national service and for moving this important bill towards passage.

Also Ranking Member MCKEON, and certainly my good friend on the Subcommittee on Healthy Families and Communities, Mr. TODD PLATTS, I would like to thank them for all the work they have done, and also the staff. This is a bill that has been put together for over a year and a half, and they have worked tireless hours.

Last month President Obama stood in this Chamber and called on Congress to pass legislation that would inspire a new generation of service and volunteerism in our Nation. Serving our fellow citizens for the sake of the service itself has become a hallmark of who we are as Americans.

Beginning with President Roosevelt's Civilian Conservation Corps and continuing with President Kennedy's creation of the Peace Corps and more recently programs like AmeriCorps, our Nation has time and again shown that Americans respond when they are needed. Mr. Chairman, I want to say that over the process of this last year and a half, so many different groups that have already been serving this country have come forward with new ideas, new suggestions, and we have put that all into this bill.

The GIVE Act is a piece of legislation, in my opinion, that is going to change, again, the way we as Americans work together. After World War II we had the veterans that came home and gave so much to this country to make it what it is. In this bill, we are reaching out, from students in middle school all the way through to our seniors and our retirees who have done so much to improve people's lives.

We have programs in here that are going to basically help with our energy. We have mentoring programs. We have programs for our veterans coming home to help other veterans get accustomed to being home again and helping them find jobs and also to see service.

I have to say, for those who have disabilities, we are bringing them into the fold now, too, so they can work with other students that might have disabilities and to help them.

Mr. Chairman, this is a bill that in my opinion is going to change the communities around this country. We have always seen Americans stand together any time there was an emergency. We saw that during, unfortunately, Hurricane Katrina. We have seen it after 9/11. We have seen it in so many tragedies.

This is going to encourage those that have been trained to continue with

their service, to be there, the first responders, when neighbors need help.

Mr. Chairman, this is a bill that Republicans and Democrats alike should support. There is no name on this on who should be part of this. This is a bill that could actually get this country up and going. We all know that we are facing terrible times during this economic downturn. I happen to believe that we will come out of it fully. I happen to believe that Americans will come together and make this a better country. This is our opportunity.

I encourage everyone to vote for this bill.

Last month, President Obama stood in this chamber and called on Congress to pass legislation that would inspire a new generation of service and volunteerism in our nation.

In calling for a national service bill, President Obama has renewed the spirit of a practice in our country that is as old as the Union itself; the call to public service.

Americans have developed an extraordinary tradition of public service and volunteerism.

Serving our fellow citizens for the sake of the service itself, has become a hallmark of what it means to be an American.

Beginning with President Roosevelt's Civilian Conservation Corps and continued with President Kennedy's creation of the Peace Corps and more recent programs like AmeriCorps, our nation has time and again shown that Americans respond when they are needed.

No statement has put the sentiment of Americans' willingness to serve better than when President Kennedy told a generation to "Ask not what your country can do for you, but what you can do for your country."

Public service and volunteerism provide the means through which Americans can give back to their communities while gaining the tools they need to achieve their own goals.

The GIVE Act will create a framework to develop national service programs that will improve their communities and enrich the lives of all of those who answer the call to serve.

The GIVE Act contains important provisions that will help strengthen communities and provide real opportunities for Americans to serve in meaningful ways.

The bill before us, which builds upon last year's GIVE act, will help thousands of Americans who choose to serve our communities.

I am proud of the focus the bill places on providing opportunities for disadvantaged youth, strengthening mentoring programs, increasing service opportunities in cities and urban centers for vets and people with disabilities.

This bill creates 175,000 new service opportunities for Americans.

Under the GIVE Act volunteer and service opportunities are made available to people of all ages.

The bill puts an emphasis on service-learning efforts, establishing programs to engage kids of all ages, middle school, high school and college.

For middle school and high school students, there are opportunities through the Summer of Service service-learning program to earn an award to pay toward college expenses and

serve in the summer months when school is out of session. Priority is given to programs enrolling middle school students.

The bill makes high school students part of the solution to challenges faced in their communities by establishing Youth Engagement Zones. These programs will help bridge partnerships between community based organizations and schools in high-need, low-income communities to engage high school students and out-of-school youth in service learning to address specific challenges their communities face.

I am proud that this bill contains an important focus on disadvantaged youth.

By providing the right types of outlets, young people coming from difficult circumstances will have a chance to lift themselves up through service.

In addition to strengthened efforts in our middle and high schools, the bill also recognizes outstanding institutions of higher education which engage in service learning through the Campuses of Service.

The bill will help students by linking the full-time education awards to the maximum authorized Pell Grant award amount for the first time, in order to keep up with rising college costs.

It will also engage more retirees to volunteer, particularly those who have backgrounds in the science, law enforcement and military professions to help in afterschool programs.

This will give thousands of older Americans the opportunity to share their knowledge and skills for the benefit of their communities while offering young people guidance and support.

We establish Silver Scholarships and Encore Fellowships to further expand service opportunities for older Americans.

Encore Fellows are individuals, age 55 or older, that want to transition into a second career in the public or nonprofit sector and who agree to be placed with a nonprofit organization to carry out service projects in specified areas of national need.

Silver Scholarships give individuals age fifty five or older who complete five hundred hours of service in a year an education award of one thousand dollars.

To focus on addressing the nation's most pressing needs, the GIVE Act establishes a Clean Energy Corps to encourage energy conservation in low income communities, an Education Corps to help improve graduation rates, a Healthy Futures Corps to increase access to healthcare, and a Veterans Corps that will help provide services to those brave Americans that have already served our nation.

What the GIVE Act will do is to build a national infrastructure for service and volunteerism and makes an historic investment in way our service programs are administered.

Just as we did in the last Congress the bill expands the focus of the National Civilian Community CORE (NCCC) to include disaster relief.

It was NCCC members who answered the call when disasters such as Hurricane Katrina occurred and this bill recognizes how important it is to have trained folks on the ground during a disaster by allowing members engaged in disaster relief to extend their service term if necessary.

The bill focuses on building our national service participation while providing much

needed streamlining to reduce administrative burdens.

One of the concerns I have heard during this process was that currently there is not enough consultation between the Corporation, States and local government.

This can result in local program needs not being addressed when national service plans are being developed.

This bill requires states to ensure outreach to local government such as cities and counties when preparing national service plans.

Better outreach will result in being able to target program funds to where the local folks think they need to go.

I am also pleased that this bill includes an investment in mentoring partnerships.

I would like to thank Rep. SUSAN DAVIS for her hard work on this issue.

Youth mentoring programs can have a profound effect on efforts to increase both the quality and quantity of mentoring opportunities available to America's young people.

In my home district, we have the Mentoring Partnership of Long Island and they do terrific work getting students connected with successful mentoring programs in Nassau County.

Finally, the bill includes a requirement that the Corporation conduct a nationwide "Call to Service" campaign to encourage all of our nation's citizens to engage in service.

I worked with my colleague from New York, Rep. PETER KING, on this provision.

As part of this campaign, Americans will be urged to observe September 11th as a National Day of Service and Remembrance.

It is important that Congress work together to continue to build on America's traditions of public service and volunteerism.

The GIVE Act creates a path through which we can help ourselves by helping others.

We need to work to create more volunteer and service opportunities by finding more ways for more Americans to become stewards of public service—and the GIVE Act does exactly that.

We have worked for years to develop a comprehensive service program in this nation.

We have the opportunity to do something truly significant with this bill, which is to make a cultural change in the way we relate to our community and support each others needs.

As a young woman I was inspired by President Kennedy's call to public service.

Today, a new generation is being called on by this Congress and President Obama to contribute to the strength of our nation by engaging in public service and volunteerism.

The GIVE Act is a once in a generation bill that will change the fabric of our nation for generations to come and I call on all of my colleagues to enthusiastically support this groundbreaking legislation.

Mr. PLATTS. Mr. Chairman, I yield such time as he may consume to the distinguished ranking member of the full committee, Mr. MCKEON from California.

Mr. MCKEON. I thank the gentleman for yielding, and I rise in strong support of H.R. 1388.

Neighbors helping neighbors. This happens countless times every day across America. A college student teaching English to immigrants, a Boy

Scout troop collecting canned food for the hungry, families taking in neighbors who have lost their homes in floods or tornado or fire.

Mr. Chairman, the bill before us today, aptly named the GIVE Act, encourages the selfless actions I just described by updating decades-old national service programs to make them even more effective in the 21st century.

H.R. 1388 allows for year-round service learning opportunities. It also offers a new emphasis on emergency and disaster relief and recovery. Finally, it offers increased opportunities for baby boomers, a generation known for its social activism.

But I would like to inform my colleagues of one fact that has not been given much attention. This bill includes powerful new safeguards to protect taxpayers by making the service programs more accountable and performance based. The bill also makes the programs it funds more competitive to ensure efficiency and effectiveness. In addition to H.R. 1388, individuals can receive Federal funding to serve at organizations of their choosing.

Of course, to prevent fraud, these organizations will be closely examined. But after such screening, part of the funds the bill provides will be dedicated to those people who believe they can make the greatest difference at small organizations.

And yet this bill also addresses national needs. For example, this proposal adds a new Veterans Corps, giving people who served in our military a chance to serve their Nation once more and a chance for our Nation to serve them. Through the Veterans Corps, veterans and others can help the families of servicemembers through their hardships and aid fellow veterans as they readjust to civilian life.

Finally, this bill makes disaster assistance a priority. It allows the Corporation for National and Community Service to develop a system to quickly mobilize former participants, if they are needed. It also allows people to extend their service if their term has run out in the middle of a disaster.

I would like to thank Chairman MILLER, Subcommittee Chairman MCCARTHY, Ranking Member PLATTS and our staff for such an excellent job to work together to craft this bill.

This is the way legislation should be passed, and I think it has been an example, and I wish all bills were passed in this manner.

You know, we have been hearing a lot in the last couple of days about AIG and about the bonuses that were made to leaders of that company, a company that would not even be in existence if it were not for the Federal Government and the taxpayers that bailed them out.

The stimulus package that was passed was the last attempt that would

have been able to stop those bonuses. There was an amendment in there, and I know the Senator that's credited for that amendment, he says he didn't know about it, or didn't have part in it. That could have been taken care of if we had what was promised to us, 48 hours at least, to review that bill, or if we had worked together in a bipartisan way to craft that bill.

□ 1245

I'm sorry that that did not happen. Because of that, we have found now a terrible tragedy has taken place, and I hope that we will be able to correct it. But it could have been avoided if we had just simply worked, as we did on this bill, in a bipartisan way to see that that never happened.

Mr. Chair, I support this bill because Americans who give their time, talent, and compassion to others clearly can help our Nation. And we, as their representatives, should help them.

Thank you. I ask all of our colleagues to support this bill.

Mr. GEORGE MILLER of California. I yield 1½ minutes to a gentleman who's been key in this legislation, given his background and history in energy conservation and efficiencies and weatherization, the gentleman from New York (Mr. TONKO).

Mr. TONKO. Thank you, Mr. Chairman. The GIVE Act before us responds to President Obama's call to service for our Nation's volunteers to help move our country forward by launching a new era of service during these challenging economic times.

Certainly, there are many new corps established in this legislation; amongst them, Clean Energy as a corps. Those members will be able to work in their given communities providing valuable services that range from retrofitting housing for low-income households to improving their energy efficiency outcomes; to building energy-efficient housing in low-income communities; conducting energy audits for low-income households; and to installing renewable energy technologies, amongst other things.

This energy improvement will be an empowerment to the given communities. I am fortunate to have thriving programs in my Capital District region of New York State. Amongst them are the Self Advocacy Association of New York, conducted through the auspices of an organization in Schenectady. They deal with those of the developmental disability community that enable them to provide for self-advocacy for people with disabilities. Also, the Capital District RSVP, which places retired people in projects that address the needs of their community, where we have over 1,200 volunteers providing over 250,000 hours of service.

Mr. Chair, this is an exciting bit of legislation. It allows us to utilize volunteer power that has been a tradition

with this Nation. It dispels loneliness and despair, it builds a sense of dignity and hope, and certainly, as they do that, they will deliver services, very valuable services, to the doorstep of their communities.

Let it be said that volunteers are the muscle of America.

Mr. PLATTS. I yield such time as he may consume to the ranking member of the Ways and Means Subcommittee on Social Security, the distinguished gentleman from Texas (Mr. SAM JOHNSON).

Mr. SAM JOHNSON of Texas. Today, we're debating the merits of paying volunteers. Experts estimate this bill will cost the government about \$1 billion for just 1 year.

I've got a better idea. Let's redirect just a small portion of that money to the real volunteers—those who voluntarily serve in the Armed Forces. They volunteer to wear the uniform. There is no draft. Some volunteer their limbs, their lives. Surely, these folks deserve special treatment too. Not so, says the White House.

The White House has floated a plan to save the government \$540 million. The White House will cut costs by forcing wounded warriors to pay for their own treatment. Talk about the cost of war!

As a combat-wounded fighter pilot who served in two wars, I find the White House idea of charging wounded war heroes for care absurd, abhorrent, and unconscionable.

It's sad and shameful that the administration is willing to force our combat wounded to foot the bill for their own recovery and rehab.

I will fight like mad to stop this rash and reckless proposal and back a new resolution blasting the White House plan. I urge every American who loves freedom and supports the troops, why don't you just call the White House at 202-456-1414.

Tell the President those who voluntarily choose the Armed Forces and voluntarily serve in harm's way, voluntarily leave their loved ones, and voluntarily endure enemy fire, are the absolute last people we need to hit up to balance any budget.

Again, that number is 202-456-1414. Tell the White House that forcing veterans to pay for the cost of war out of pocket is just plain wrong. Our troops fight, they lose legs, they lose arms. Support the troops.

Mr. GEORGE MILLER of California. Mr. Chairman, I yield myself 30 seconds.

Mr. Chairman, one of the very exciting parts of this legislation, as pointed out by Mr. MCKEON, is the full integration of our veterans into national service.

Today, earlier, we heard from Captain Scott Quilty, who is a decorated infantry captain and Army major retired who lost both his legs and one of

his arms in Iraq. Scott has come back to assume the management responsibilities for Survivor Corps, a U.S.-based program that serves the needs of servicemembers and veterans returning from Iraq and Afghanistan. And Survivor Corps spoke in strong support of this legislation, recognizing that we now are extending full partnership to the veterans of this country, thanking them for their services, and providing services to them as they return home.

I yield 1½ minutes to a leader in service, the gentleman from Georgia (Mr. LEWIS).

Mr. LEWIS of Georgia. Mr. Chairman, I want to thank Chairman MILLER, my good friend, for yielding time. Mr. Chairman, I rise in strong support of H.R. 1388, the GIVE Act. People are hurting. Americans are having to choose between paying their mortgages and putting food on the table. In these tough times, it's more important than ever that we, as American citizens, yield back to those in need.

National service becomes ever more important when people are hurting, when people are in need. We need to do more to show our appreciation to people who get out there, they get in the way, they stand up, they speak up, they speak out. They work hard to get their hands dirty helping their neighbor.

The GIVE Act is a great step forward for national service. However, we also need to make the AmeriCorps Education Award, in my estimation, tax exempt. We need to do more to encourage and reward Americans who answer the call of national service. It is a call that we responded to in 1961 when President Kennedy issued a call for the Peace Corps. And it is a call now in 2009 when President Barack Obama is urging national service.

I urge all of my colleagues to support national service and vote "yes" on this important piece of legislation.

Mr. PLATTS. I reserve the balance of my time.

Mr. GEORGE MILLER of California. I yield 1½ minutes to a member of the committee, a strong supporter of the bill, the gentleman from the Northern Mariana Islands (Mr. SABLÁN).

Mr. SABLÁN. Thank you, Mr. Chairman. H.R. 1388 answers President Obama's call to service and helps Americans invest in their communities by greatly expanding potential service opportunities and increasing educational and other benefits.

Provisions like those in the GIVE Act are especially effective in the Northern Mariana Islands. They allow our young people to help their communities while also doing something positive for themselves.

In these areas of high unemployment, community service programs like those in the GIVE Act allow participants to receive benefits, including health care, earn money for college, re-

ceive important career and technical training, make connections with potential employers, and develop confidence, self-esteem, and leadership skills.

Not just that, but participants are also able to give back to those around them, providing support for the people and communities that are suffering during these tough economic times. This is what America is all about.

We hope that this program, along with the President's call to action, strengthens our citizens' pride in themselves, their communities, and their Nation, and allows them to feel like they are truly a part of the American Dream.

For these reasons, I urge my colleagues to support H.R. 1388, the GIVE Act.

Mr. PLATTS. Mr. Chairman, I continue to reserve the balance of my time.

Mr. GEORGE MILLER of California. I yield 1½ minutes to the gentleman from Maryland (Mr. SARBANES).

Mr. SARBANES. Chairman MILLER, Americans everywhere should thank you and they should thank Congresswoman MCCARTHY, and all of those who are part of this GIVE Act and made it happen, because it stands for a very simple and elegant proposition and purpose, and that is that if Americans want to serve, they ought to be given that opportunity.

The GIVE Act creates many different dimensions of service that Americans can pursue. I'm very proud to have worked closely with Congressman PHIL HARE in introducing the Vet Corps component of this service corps. I want to thank Chairman MILLER for working to include that in the final version of the bill.

We owe so much to our veterans. We can never fully repay the debt that we owe them, but we can try. The way we can try is to create a service corps program like Vet Corps that is going to make sure that when veterans return from their service, we have an opportunity to serve them and that they in turn can serve the broader communities and serve other military families and other veterans.

The statistics are alarming. The unemployment rate for returning veterans is as high as 18 percent. We can give them the training and the opportunity to become engaged and re-engaged in our communities through service corps programs like Vet Corps. I'm so very pleased that that is part of this opportunity here.

I'd also like to say before I yield back that I enjoyed working with Congressman JAY INSLEE on the Clean Energy Corps, which is going to provide opportunities for young people to get involved in improving energy efficiency and the green revolution.

Mr. PLATTS. I continue to reserve the balance of my time.

Mr. GEORGE MILLER of California. Mr. Chairman, I yield 1½ minutes for

the purpose of entering into a colloquy with the gentleman from Florida (Mr. GRAYSON.)

Mr. GRAYSON. Mr. Chair, I'd like to engage in a colloquy with the chairman.

Mr. Chairman, I want to thank you for working with me on increasing the number of volunteers trained and available for immediate deployment to States with high vulnerability to hurricanes and various natural disasters, like my State of Florida.

As you know, the National Civilian Community Corps is a full-time team-based residential program for men and women aged 18 to 24 that helps meet critical community needs. The mission of the NCCC is to strengthen communities and to develop leaders through direct, team-based national and community service.

Drawn from the successful models of the Civilian Conservation Corps in the 1930s and the U.S. military, the NCCC is built on the belief that civic responsibility is an inherent duty of all citizens. These members have been instrumental in assisting communities with relief and recovery needs during times of natural disasters.

According to the Corporation for National and Community Service, more than 2,900 NCCC members have served on disaster-related projects in the Gulf Coast region since September 2005, in coordination with such groups as the Red Cross, Salvation Army, the Army Corps of Engineers, and various State service commissions.

In all, NCCC members have contributed more than 1.4 million hours of service and have completed nearly 13,000 damage assessments, refurbished more than 6,500 homes, put tarps on thousands of homes, served 1.3 million meals, and distributed more than 2,200 tons of food.

Given the critical needs that this program provides, I would like to work with you on exploring potential options to establish an NCCC campus in Florida.

Mr. GEORGE MILLER of California. I yield myself 15 seconds to respond to the gentleman and say that I agree that many of our communities' needs, especially in times of natural disaster, are being met through the hard work of the NCCC members, and I look forward to working with you in exploring this issue and certainly recognizing the needs of those States that are hit repeatedly by natural disasters, representing one of those States, but knowing what has taken place in Florida and others with hurricanes and storms that we are now experiencing. And I look forward to working with him as this bill progresses.

Mr. PLATTS. Mr. Chairman, I continue to reserve the balance of my time.

Mr. GEORGE MILLER of California. I yield 2 minutes to the gentlewoman from Connecticut (Ms. DELAURO).

□ 1300

Ms. DELAURO. Mr. Chairman, I want to say thank you to Chairman MILLER for his commitment to this effort.

For generations, during times of great crisis, Americans have stepped up and served their country and their communities. Today, with soaring unemployment, rising health care costs, and a financial system turned upside down, we face one of those moments.

When the National Community Service Act was enacted in 1990, we saw powerful new opportunities to inspire civic engagement to transform our communities. And today, the Generations Invigorating Volunteerism and Education Act, yes, the GIVE Act, renews and enhances these opportunities by providing Americans of all ages, from middle schoolers to baby boomers, the chance to reach their full potential as engaged and active members of their community.

The Summer of Service initiative is geared toward middle school students and provides a new opening to reach many young people who we know will benefit from the opportunity to spend a summer in service in their communities, a right of passage, as students make the transition from middle to high school. Through a competitive grant program, States and localities can offer students an opportunity to participate in a structured community service program, earning educational awards of up to \$500 upon completing 100 hours of service.

Research shows that, among those students who participate in in-service learning, teens from disadvantaged communities who serve hold more positive civic attitudes. Students who engage in volunteering are more likely to be successful at school and avoid risky behaviors, such as drugs, alcohol, and crime.

This legislation also provides a long-awaited increase to the Segal AmericaCorps Education Award, tying it to Pell grants to ensure that it stays in step with rising tuition rates. It will make it easier for older Americans to give back as well, to share their experience and expertise through Encore Fellowships and Silver Scholarships.

This is a transformational moment in our Nation's history. So today, with these efforts we hope to mark a new beginning, ready to meet that responsibility again to the greater good and to our shared community. I urge my colleagues to vote "yes."

Mr. PLATTS. Mr. Chairman, I yield such time as he may consume to the distinguished ranking member of the Homeland Security Subcommittee on Border and Port Security, Mr. SOUDER from Indiana.

Mr. SOUDER. I thank my friend from Pennsylvania, and Chairman MILLER.

I have some concerns about this bill. One of the challenges as a conservative Republican in a Congress dominated by

the Democrats in the House and Senate and the President is that it is likely to be that, for most bills, we are likely to have some concerns. We lost the election, we are not writing the bills, and so therefore we are likely to have some concerns.

When the Republicans last wrote this bill, for example, we had a clause in restricting sex education money usage. It is not likely to be a use of this bill, but as a conservative I sometimes have justifiable paranoia about how liberals may use this money. At the same time, we are not the majority, we don't get to write every clause in it, and, it is not necessarily a likely use.

I also have concerns about the amount of money that the Federal Government is spending. There are going to be bills in this cycle that many Republicans who might have supported them in the past will have reservations on. We have run up in the first 2 months more additions to the deficit than we had in the first 5 years of the last administration. At some point the question is, how are we going to fund these Treasury bills? Are interest rates going to go up and drive out the private market? How is a district like is mine that is hammered, how is Elkhart County going to recover? So I have deep concerns.

Now, I understand this is an authorizing bill, not an appropriations bill. Authorizing bills merely set the cap. That leads, however, to a lot of pressure internally of, like we saw in No Child Left Behind, you are only funding X amount of a bill. No, that was a cap; that wasn't a guarantee that the funding was going to go through. So when we go through authorizing bills, does this in fact push the spending, or not?

But authorizing bills fundamentally guide the programs. And if we as Republicans say we are never going to participate because we are not in the majority and these are authorizing bills that guide the guidelines, are we going to give up both the actual spending and not participating in the authorizing process?

There are fundamental differences inside any kind of coalition of people on what the role of government should be. If you are a pure libertarian, it is unlikely that you like any of these kind of programs. Volunteers are volunteers; government employees are government employees. But if you have, as I have in the past, supported these different programs, some more than others, but basically believe that everything from the seniors' different programs to domestic volunteer groups are, as a whole, a benefit to the community, then trying to shape that as best we can and to participate I think is helpful.

In this particular bill, I want to thank the chairman for two particular amendments that we have worked

with, with Congressman GRIJALVA who heads the National Parks Committee in the Resources Committee, and Congressman RUSH HOLT who has been a big supporter of the national parks, and I, who along with BRIAN BAIRD co-chair the National Parks Caucus, we have worked from the Leave No Child Inside bill to this bill to try to include parks, and working with others to include not only the national parks, but other types of parks, particularly with Mr. SARBANES of Maryland in the previous bill.

But inside the Energy Corps, this will allow volunteers to work with our National Parks Service to help address backlog and maintenance issues; that whenever, particularly when you look at the type of economy we have right now, and we are coming up on the 100th birthday of the National Park Service, during the Great Depression quite frankly was one of the greatest moves toward American architecture. What we think of as a national park actually came from many of the summer jobs programs and WPA and CCC.

While this is not the same, this is a blended program, it is important that as we see whatever types of legislation goes through, even if I as a Republican have some concerns about the scope of government and the cost, I still feel that it is important that we participate in that. And one of the best uses of this is the National Park Service, which everybody benefits from, and it is an opportunity to try to address some of the backlog issues there.

There is a second part that was a program developed, Serve America, and I want to thank in this case not only Chairman MILLER and Ranking Member PLATTS and our Ranking Member BUCK MCKEON, but Senator HATCH, in working with a clause and refining it from the first bill where we had it a larger percentage. But basically it says that one-third of the Serve America grants can go to small institutions. As somebody who has been very passionate, who believes that many of these programs which are very small, don't have good grant writers, often don't have the ability to get as much match, particularly when you get into urban centers or in some of the rural areas, particularly when you get into a lot of the African American and Hispanic church groups or volunteer groups. They aren't United Way, so how can they partake of this? This says that up to one-third of this can be used for organizations with 10 full-time and up to 10 part-time, or 20 total, employees. And then they get up to one-third of the Serve America program, and they only have to have a smaller match of roughly \$1,000. This will enable lots of these small neighborhood groups to be eligible.

Now, Senator HATCH correctly pointed out, he and his staff, that maybe there won't be enough of these smaller

groups. So it doesn't guarantee a third of this, but it says that up to one-third can be used this way. I think this is a diversification of this program that it is an invaluable addition, and will empower lots of people to be able to do this in this community.

So while I have some reservations, I think this is basically a good bill. It is a bill that we worked on together cooperatively, and I appreciate the opportunity to do that even in a Congress that is marked by partisanship. But it is a way to show the American people that in fact we do work together on most pieces of legislation that come through here. There are differences between our parties, but we try to work in a bipartisan way when we can.

Mr. GEORGE MILLER of California. I yield to the gentleman from Texas (Mr. AL GREEN) for 1½ minutes.

Mr. AL GREEN of Texas. Mr. Chairman, Gandhi reminds us that we should be the change we wish to see.

I want to thank the President, President Obama, for sounding the clarion call for volunteerism such that we can see this change that we all desire to have in our country. I would like to thank Chairman MILLER and Ranking Member McKEON for answering the clarion call from the President with this bill, H.R. 1388.

This is a good piece of legislation. And, if I may be so bold as to say so, we are doing, Mr. Chairman, God's work today. This is what we are called upon to do, to be our brother's keeper, and we can do so by utilizing this army of volunteers to go out and make the change we wish to see in society.

Mr. Chairman, I especially thank you for including language in this legislation that will allow volunteers to help in the area of housing. You know and we know that we have an affordable housing crisis. We have lost more than 600,000 units in affordable housing since the mid-1990s that are subsidized. It is time for us to restock our affordable housing. These volunteers will help us to do so.

I will close with this. I thank you and all of the Members who have supported this legislation, and I trust that Gandhi would be proud of us today because we are affording people to transform neighborhoods into brotherhoods, and to make sure that we can see the change in our society and bring it about by virtue of our own hands and our creation.

The CHAIR. The time of the gentleman has expired.

Mr. GEORGE MILLER of California. I yield the gentleman 10 additional seconds, and I want to thank the gentleman for bringing the housing language that is based upon his expertise in this field, and along with MAXINE WATERS, thank you so very much. We are happy to include it.

Mr. AL GREEN of Texas. I thank you again, Mr. Chairman, as well as Chairperson WATERS and Chairman FRANK.

Mr. PLATTS. I yield 3 minutes to the distinguished gentleman from Louisiana (Mr. CASSIDY).

Mr. CASSIDY. Mr. Chairman, I wish to engage the chairman of Education and Labor in a colloquy.

Mr. Chairman, Teach for America has been in the AmericaCorps program since 1994 and is the Nation's largest professional service corps. This program recruits top college graduates of all backgrounds and career interests to commit to teach for at least 2 years in our Nation's most underserved classrooms.

To date, 20,000 Teach for America corps members have enriched the lives of more than 3 million low-income students in our Nation's lowest performing schools. While only the one in ten Teach for America corps members initially planned on a career in education, two-thirds remain in the field in some capacity. This only goes to further demonstrate the life-changing impact this kind of service can have on an individual.

Teach for America is also experiencing remarkable growth as more and more Americans look to give back to their communities. Applications are up 40 percent this year, with 35,000 people applying to serve through Teach for America alone.

Given this growth and its potential to expand and meet the needs of underserved students across the Nation, is it correct that, under this bill, Teach for America will continue to be eligible under the professional corps' description of the model for funding under the Education Corps or any of the other newly created corps programs under section 122?

I yield to the chairman of the Education and Labor Committee, and ask if this understanding is correct.

Mr. GEORGE MILLER of California. I thank the gentleman for yielding and for raising this issue. Thank you so much for bringing this to our attention.

I am proud to be a long-time supporter of Teach for America, and I am pleased to say that they will continue to be eligible to participate in AmeriCorps through the newly-created National Service Corps exactly as you have described.

Teach for America has demonstrated measurable effectiveness in the classroom and is exactly the type of measurable success that we are looking to scale up. Thank you again, Mr. CASSIDY, for your support of this program and for raising this issue and for the support of the GIVE Act.

Mr. CASSIDY. I thank the chairman.

Mr. GEORGE MILLER of California. I yield to the gentlewoman from Pennsylvania (Mrs. DAHLKEMPER) for 1½ minutes.

Mrs. DAHLKEMPER. Mr. Chairman, service has always been a deeply rooted American value, from service to our

country during times of war to service to our neighborhood in times of need. I believe that a commitment to service is one of the defining characteristics of being an American.

Service has also played an important role for my family and is a value I have tried to impart to my five children. I am so proud of my son, Nathan, who spent his time this spring volunteering in a homeless shelter in New York City. And I love our family tradition of adopting a family at the holiday season.

I have spent my life doing community service, founding and operating a Lake Erie arboretum for over a decade, and serving on the board of the Erie Community Foundation. Mr. Chairman, it is because of this background and service that I rise today in strong support of the GIVE Act.

This legislation will provide hundreds of thousands of Americans the opportunity to invest through service in our Nation's recovery. And it will not have a bigger impact anywhere than in Pennsylvania's Third District. One county in my district, Erie County, has nearly 250 different nonprofit organizations that depend on volunteers to support their work, work that improves the quality of life for the region.

Mr. Chairman, the economic recession has been especially difficult to my constituents. With lines at our food banks, and our shelters literally full, these groups take care of tens of thousands of adults and children who live in poverty.

□ 1315

Last year, the Erie County homeless shelters served 1,500 homeless individuals, 200 of which were children.

With the recession deepening, there is no better time to support community service and volunteerism to help our country get through this economic crisis, restore confidence and prepare our Nation for the future.

Therefore, I urge my colleagues to join me in supporting the GIVE Act.

Mr. PLATTS. Mr. Chairman, I continue to reserve my time.

Mr. GEORGE MILLER of California. I yield 1½ minutes to the gentleman from Ohio (Mr. DRIEHAUS).

Mr. DRIEHAUS. Mr. Chairman, I stand today on the floor to also give my support to this important piece of legislation. Mr. Chairman, I am one of four Members of this House who is a former Peace Corps volunteer. I had the privilege of serving this country in the United States Peace Corps for almost 2½ years in West Africa. I can speak on behalf of the returning volunteers in this body and the returning volunteers across this country as to the importance of service, both at home and abroad.

This is an important step in the right direction. As we ask so many sons and

daughters of this country to serve in our military in Iraq and Afghanistan, I think it is critically important that we open up doors of opportunity for young men and women and older men and women across this country to also serve right here at home. Service is critically important to show that they believe in this country, to show that they believe in their community and that they are able to give back. This is an important step in the right direction.

I have had the privilege in Cincinnati of working with the Public Allies Program, an AmeriCorps program which has contributed to tremendous work for nonprofit organizations across the region. This expands that opportunity for so many more people.

Again I applaud the President for his efforts. I applaud the First Lady for shining the light on service in the United States. I want to thank the chairman and the committee for their tremendous work.

Mr. PLATTS. Mr. Chairman, I continue to reserve.

Mr. GEORGE MILLER of California. I yield now 1 minute to the gentleman from Maryland, the leader, Mr. HOYER.

Mr. HOYER. I thank the chairman for yielding. I thank Mr. PLATTS for his leadership on this bill, and I thank BUCK MCKEON, the ranking Republican who leads this committee for his party. I want to say this is a perfect example of when we can work in a bipartisan way, we do work in a bipartisan way.

Mr. Chairman, in my view what has angered so many people about this recession is the perception that its causes are not simply material, not simply financial, but in many ways moral. Ask most Americans what got us to this point, and I doubt the first words they will reach for will be "credit default swaps" or "troubled assets" or "overleveraging." They will turn, I think, to older ideas—greed, recklessness, self-dealing and profit-taking. In sum, they will think there is a moral deficiency.

It follows that our economy and our recovery will not be whole if it only encompasses renewed balance sheets or consumer demand. What is also required is a renewed public spirit. Government cannot create that spirit. We would be fools to think it could. But it can recognize it, applaud it and give avenues for its manifestation. We can coordinate it and give it productive outlets. That is exactly what this bill does.

I want to congratulate the President of the United States, Barack Obama, for his leadership, and Michelle Obama for working so avidly on behalf of public service and a renewed spirit of giving to our country. Our President has not just talked about that, he has lived a life of service. I said with Chairman MILLER at a press conference just a few hours ago that Barack Obama grad-

uated from one of the best law schools in this country. He was editor of the Law Review. He had one of the keenest minds in his class, indeed in the country. He could have made literally millions of dollars practicing law representing the most powerful interests of our country. He choose not to do that. He went to Chicago, his hometown, and he spent his time reaching out to those who needed help, those who didn't have power and those who did not have economic might, to assist them in making their lives better and their communities better.

That is what this bill does. So the principal spokesperson for this bill, President Obama, has lived it, not just talked it. We are blessed with a young generation remarkably committed to public service. This bill gives them the outlets and the opportunities to contribute to our recovery.

Mr. Chairman, I would also say there are a whole lot of seniors who have retired from their careers but don't want to retire from life, don't want to retire from their communities and don't want to retire from continuing to give service to their fellow men and women. This bill strengthens the bond between service and education by helping volunteers pay for college. It focuses volunteer efforts on our most pressing needs, including rebuilding our infrastructure and retooling our economy for clean energy and expands opportunity for volunteers of all ages, from middle schoolers to baby boomers.

In sum, this bill represents the greatest expansion in national service since the days of John F. Kennedy. He asked us to not ask what the country could do for us, but what we could do for our country. In fact, that is what our faiths ask us as well, for all of our faiths have a central theme: love God and love God's children as well. And we love God's children by giving them a hand up and helping to serve with them in making their lives better.

These new ranks of volunteers will be making tangible contributions that benefit all of us. According to House testimony from Time Magazine's managing editor, Richard Stengel, and I quote, 61 million Americans volunteered in their communities in 2007, giving more than 8 billion hours—that is billion—8 billion hours of community service worth more than \$158 billion to America's communities.

In my community, we have volunteer fire companies in the southern part of my district. The cost of providing fire service in St. Mary's, Calvert and Charles Counties would be a lot higher if it weren't for the literally tens of thousands of hours volunteered by citizens who care about their communities and care about keeping us safe when fire occurs.

He continued:

"A cost-benefit analysis of AmeriCorps programs has concluded

that every \$1 that we invest in AmeriCorps results in \$1.50 to \$3.90 of direct measurable benefits to the community."

Wouldn't it be wonderful if all of our businesses had been as successful? We wouldn't be in the pickle we are in.

Those are the material rewards of this bill. But, Mr. Chairman, I think we all know that the rewards we can't measure are far greater. They are the virtues of community and self-sacrifice, of responsibility and teamwork, of a better country and a better community. JOHN LEWIS talks about the beloved community. This bill seeks to serve the beloved community.

I urge its adoption. I thank Mr. MILLER for his leadership, I thank the Speaker for her pressing us to consider this early, and I thank Mr. PLATTS and Mr. MCKEON for their leadership and work on this bill as well.

Mr. PLATTS. Mr. Chairman, I continue to reserve my time.

Mr. GEORGE MILLER of California. Mr. Chairman, I yield myself 1 minute.

Questions have been raised about the intent of section 1705 giving the Chief Executive Officer authority to delegate specific programmatic authority to the States. In particular, strong concerns have been raised that corporation officials would use this authority to eliminate the State offices of the corporation and adversely impact the operation of VISTA and the Senior Corps.

The committee intends that the Chief Executive Officer will use this authority judiciously to improve the operation of all of the corporation's programs by using a consultative process that includes all of the stakeholders in the affected programs. The committee expects the corporation to continue the staff from State offices at an operational level that is at least equal to the current one.

I yield 1½ minutes to the gentleman from Texas (Mr. CUELLAR).

Mr. CUELLAR. I thank Chairman MILLER for the work that he has done on this bill.

I rise to support the manager's amendment which has language from an amendment that I have submitted. This language goes a long way to support the poor communities in different parts of the Nation, especially around the southern border.

In particular, I'm talking about adding the definition of colonias as part of the definition of "severely economically distressed areas" that under this bill receive special financial consideration in the operation of national volunteer services. Colonias are found in Texas, New Mexico, Arizona and California along the border. These colonias are areas that have no water, no sewage or paving. It is almost Third World conditions, Mr. Chairman and Members of Congress, where we have to do something to help these people. Just in my area, for example, it is estimated in the

State of Texas that we have over 400,000 Texans that live along the border in colonias.

This help will go a long way, and this is why the manager's amendment that includes my language gives critical financial assistance to the areas that contain colonias to facilitate the operation in support of national service programs that are working to solve many of these problems in colonias.

With this amendment, we are one step closer to helping colonias to have the basic living conditions that all Americans deserve. Mr. Chairman, I want to thank you for allowing this language to be added dealing with colonias.

I urge all colleagues to vote "yes."

Mr. PLATTS. Mr. Chairman, I continue to reserve.

Mr. ANDREWS. Mr. Chairman, I ask unanimous consent to control the time for the chairman of the committee.

The CHAIR. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. ANDREWS. Mr. Chairman, may I inquire as to how much time we have left in general debate.

The CHAIR. The gentleman has 5 minutes. The gentleman from Pennsylvania has 12½ minutes.

The Chair recognizes the gentleman from New Jersey.

Mr. ANDREWS. Mr. Chairman, I yield myself 3 minutes.

Mr. Chairman, this bill answers the question, whose skills does America need? Every day in our districts and in our travels, we see heartrending examples of the needs of our country. There are men and women who are struggling to find a job who cannot read and write. They need a literacy coach. There are elderly people who don't see anyone come visit with them at all during the course of a week who may be sick or hungry or certainly are very lonely. They need geriatric care workers to come in, friends to come in and be with them. There are children who today after school will face a choice between the ravages of drugs and alcohol, the irresponsibility of bad personal behavior, the violence of gang warfare, and really nothing else. They need an afterschool program. They need a loving and supportive family or religious institution to help them out.

Everywhere we look in this country, there are examples of great, unmet needs. Now, many of these needs require money to meet. And this President has proposed a budget, and this Congress just enacted, and the President signed, a stimulus bill that provides great new resources toward those needs. But money will never be enough, because in addition to financial resources, we also need the spirit, enthusiasm and integrity of our people.

The answer to the question, whose skills does America need, is America

needs everyone's skills, everyone's skills to move forward as a country. This legislation is supported by both the Republican and Democratic Parties and is supported by the President. We are very hopeful it will be supported by the other body in short order. This legislation provides powerful new ways for people to offer those skills that America needs. It will be open to very young Americans who want to gain the experience of helping their neighbors while helping to finance their own education. It will be open to vastly experienced Americans who have achieved success in the classroom or the lab or the military base who now want to use the lessons of that success to help their friends and neighbors.

This is a bill that unlocks the door for opportunity, not just for those of our neighbors who are in need of these services, but also for those of us who will provide those services. There is very little in life that is more fulfilling than doing a job well whose benefits reach beyond your own personal interests and values.

□ 1330

The power of this bill, which is so well put together, is not its scholarship programs, although they are very needed; it is not its broad reach among the American people, although it is very desirable; it is not the track record of success that national service has already provided, although it is very admirable. The power of this bill is it provides bold new pathways for people to do right by their communities and right by themselves. I would urge a "yes" vote.

I reserve the balance of my time.

Mr. PLATTS. Mr. Chairman, I reserve the balance of my time.

Mr. ANDREWS. I yield to the gentleman from Mississippi (Mr. TAYLOR), who has been a leader in the reconstruction efforts after the devastation in the gulf, and I am pleased to yield to him 1 minute.

Mr. TAYLOR. Mr. Chairman, I thank the gentleman. There is nothing I can say that can top the words of the gentleman from New Jersey, but I do want to use this opportunity to say what a magnificent job the AmeriCorps volunteers did down in southern Mississippi after Hurricane Katrina. They showed up almost as soon as the dust settled from the storm, and they are still there 3½ years later doing things for people who need some hope. I wanted to take this opportunity to heartily endorse this program.

Mr. PLATTS. Mr. Chairman, I yield myself the balance of my time to close.

Mr. Chairman, just again I would urge a "yes" vote in favor of GIVE Act. I want to again recognize both Chairman MILLER and Ranking Member MCKEON, and especially the staff on both sides, for their tireless effort and many, many hours working together in

a bipartisan way to bring this bill to fruition.

The last speaker's comments about the work of AmeriCorps working in the gulf region, it is my understanding that over the last 3 years, more than 4 million hours of service have been provided through national service programs, and that is just one example of how effective these programs can be to assisting those in need. Again I encourage a "yes" vote in favor of the GIVE Act.

I yield back the balance of my time.

Mr. ANDREWS. On behalf of the chairman and the ranking member, we would urge a "yes" vote from all Members. We proudly support this legislation.

Mr. KING of New York. Mr. Chair, today I rise in support of H.R. 1388, the GIVE Act, which would encourage a new generation of Americans to answer the call and get involved in service to their communities and their country. However, there is one provision of particular importance to me and my constituents.

The GIVE Act will authorize a call to service campaign, encouraging all Americans to observe September 11th as a national day of service. As the representative of a district that lost over a hundred people on 9/11 and includes thousands more who worked in the area or were involved in cleanup efforts, I believe it is right that we as a nation honor the lives lost on 9/11 by giving back to our country.

In my district office in New York, I have hosted a blood drive on the anniversary of 9/11 and I know that many others in my home state have taken part in similar activities. I am pleased that this bill will encourage all those across the United States to join in this effort, which is important not only for the 9/11 families, volunteers, rescue and recovery workers, but for the entire country.

America came together in the aftermath of 9/11, reminding us what it truly means to be part of this great nation. By making 9/11 a national day of service, that same spirit of giving will continue in a day of remembrance, unity, and selflessness. Let us never forget the unity we felt as a nation following the tragedy of 9/11.

I would like to thank my friend and colleague Representative MCCARTHY for her work on this issue, as well as Jay Winuk and David Paine of the organization My Good Deed, who pioneered the 9/11 day of service movement. I look forward to working with my colleagues on both sides of the aisle to continue to ensure that we always remember 9/11, particularly to preserve the spirit of patriotism we all felt as Americans in the months and weeks following the attacks.

Mr. EHLERS. Mr. Chair, I rise in support of the Generations Invigorating Volunteerism and Education (GIVE) Act.

For many years, organizations in my congressional district have run excellent service programs. For example, approximately 26 AmeriCorps members serve low-income people with health care needs through the Cherry Street Health Center in Grand Rapids, Michigan. I applaud the efforts of all of the organizations and participants that have served the needs of West Michigan and our nation.

Recently, I met with a group of seniors who were very motivated to help their community with energy efficiency projects. They gave me the idea to expand the focus of the Senior Corps programs. I am very pleased that the Education and Labor Committee accepted my amendment to clarify that activities for older adults who participate in the National Senior Volunteer Programs may include conducting energy audits, insulating homes, and conducting other activities to promote energy efficiency.

The number of participants in the Senior Corps programs will be increasing as the almost 79 million members of the "Baby Boomer" generation retire and look for other activities to fill their days. Many of these individuals have unique skill sets that could be put to use in helping our country become more energy efficient. Also, in the modern home, insulation and other energy efficiency techniques have become very sophisticated.

This program will provide participants with the opportunity to learn about these new methods. These participants can also pass their knowledge on to the younger generations through the relationships developed with youth, including disadvantaged youth, through the Senior Corps programs. The concept of energy efficiency provides multidisciplinary learning opportunities in math, science, and language arts—subjects that America's Baby Boomers and seniors can assist students with by using hands-on, real-world projects.

I urge all Members to support this important legislation to reauthorize our national service programs, and I encourage people of all ages to seek ways to serve our communities.

Mr. SPACE. Mr. Chair, I rise today in support of the Generations Invigorating Volunteerism and Education, GIVE, Act. The GIVE Act is an important piece of legislation that is instrumental expanding AmeriCorps and increasing volunteerism in our country. I commend Chairman MILLER and Ranking Member McKEON for their work on this critical piece of legislation.

In particular, I would like to thank Chairman MILLER for his work to include language, in the Manager's Amendment, which encourages the recruitment of youth to work in health professions in communities where there are unmet needs. This legislation is extremely important to my District, where we are facing a lack of access to health care. The recruitment of health professionals is vital to maintaining a strong, healthy country and I am grateful that the Chairman and Ranking Member recognize this as they work to enact this legislation.

Community service is a cornerstone of American society and our Domestic Volunteer Programs, which encourage individuals to meet needs of others, are critical in hard economic times such as these. National support for reauthorization and expansion of community service programs is a testament to the resolve of Americans to help those who are most in need. Again, I thank Chairman MILLER and Ranking Member McKEON for taking the steps to expand the recruitment of youth to health care professions.

Mr. STARK. Mr. Chair, I rise today in support of H.R. 1388, the Generations Invigorating Volunteerism & Education, GIVE, Act.

The challenges we face have never been greater. Unemployment, foreclosures, inad-

equated health care, and dwindling retirement accounts are plaguing communities all over our country. Congress and the President are acting quickly and boldly, passing unprecedented measures to create jobs and bolster the frayed safety net.

Ordinary Americans are also rising to the challenge. They understand that this recession is not just a collection of statistics but an everyday reality for them and their neighbors. People are lining up in record numbers—for AmeriCorps, VISTA, Learn and Serve America and many other national volunteer programs—hoping to have the opportunity to contribute to their communities. Yet these organizations are turning people away because they do not have the necessary funds. This is a tragedy and a wasted opportunity. In these times of crisis, it is imperative that we make use of all our resources.

H.R. 1388 brings together America's human capital—our engineers and entrepreneurs, our students and seniors—to find new solutions to pressing community challenges. This bill will more than triple the number of volunteers in these programs nationwide to 250,000 and give people from all backgrounds the opportunity to contribute to a common purpose. In addition to improving existing service programs, the bill also creates a number of new programs that will allow volunteers to help address the energy, health care and education needs in our communities.

The GIVE Act is the right legislation at the right time. Thousands of Americans want to invest their time and their energy in the future of our nation. I urge my colleagues to join me in providing them that opportunity.

Mr. PAUL. Mr. Chair, I rise to oppose H.R. 1388. The idea that it is legitimate for the federal government to take money from one group of citizens and use that money to bribe other citizens into performing "national service" violates the basic moral principles of individual liberty that this country was founded upon.

I would make three points to those of my colleagues who try to justify this bill by saying that participation in the programs are voluntary. First, participation in the program is not voluntary for the taxpayers. Second, nothing in the bill prevents federal taxpayer dollars from being used to support state and local programs that force children to perform "community service" as a condition of graduating from high school. Because an increasing number of schools across the nation are forcing children to provide "service" as a condition of graduating, it is quite likely that the funds authorized by this bill will be used to support mandatory service. Third, and most importantly, by legitimizing the idea that it is an appropriate role for the government to promote "service," legislation such as H.R. 1388 opens the door for mandatory national service. Today, influential voices in both major parties are calling for a national program of mandatory service as well as a resumption of the military draft. With the increased need for more troops for the administration's expanded military adventurism in Afghanistan, as well as the continuing movement to conscript young people not eligible for military service to serve the government at home, can anyone doubt that this bill is only the down payment on a much larger program of mandatory national service?

The moral case against national service was eloquently expressed by former President Ronald Reagan in the publication *Human Events* in 1979: "... it [national service and conscription] rests on the assumption that your kids belong to the state. If we buy that assumption then it is for the state—not for parents, the community, the religious institutions or teachers—to decide who shall have what values and who shall do what work, when, where and how in our society. That assumption isn't a new one. The Nazis thought it was a great idea."

Mr. Chair, millions of Americans including many young people, are already volunteering their time and talents to help their fellow citizens and better their communities without being bribed by the government. In fact, to suggest that the young Americans need a federal check as an incentive to volunteer is an insult to the American people. I hope all my colleagues to join me in standing up for individual liberty, the great American tradition of true volunteerism, and the Constitution by opposing H.R. 1388.

Mrs. MALONEY. Mr. Chair, I am pleased to support H.R. 1388, the Generations Invigorating Volunteerism and Education (GIVE) Act, legislation which will launch a new era of American service and volunteerism. I thank Mrs. MCCARTHY of New York for her hard work on the bill, which answers President Obama's call for Americans of all ages to help get the country through the economic crisis by serving and volunteering in their communities.

Among other provisions, the bill creates 175,000 new service opportunities and rewards Americans for their commitment to service. From middle school students to baby boomers and retirees, the GIVE Act provides incentives for Americans of all generations to be part of the solution to challenges in their communities. To meet the key needs in low income communities, the legislation also establishes four new service corps to tackle important issues including clean energy, education, health care access, and services for veterans.

In addition, I am pleased that the bill encourages Americans to observe September 11th as a National Day of Service and Remembrance.

There is no better time to support and energize community service and volunteerism to help our country get through the economic crisis we face. I will proudly cast my vote for the GIVE Act and encourage my colleagues to do the same.

Mrs. BIGGERT. Mr. Chair, I rise today in strong support of H.R. 1388, the Generations Invigorating Volunteerism and Education, or GIVE Act.

This important legislation will reauthorize AmeriCorps and other programs under the Corporation for National and Community Service. I was particularly pleased by the addition of new performance measures that will ensure that AmeriCorps funds go to organizations that are efficient and effective with taxpayers' dollars. Also, by using fixed grants and eliminating costly bureaucratic red tape, the GIVE Act will ensure that small organizations have an equal opportunity to obtain federal service funds, without compromising the accountability of the program.

Finally, I would like to applaud the addition of a veterans corps, which will dedicate a specific funding stream to organizations that assist veterans and their families. These brave men and women have served our country honorably, and we have a responsibility to help them in their transition back to civilian life.

I would like to thank Chairman MILLER and Ranking Member McKEON for crafting a compromise bill that will receive broad, bipartisan support. It is my hope that this can be a model for cooperation on future legislation.

I urge my colleagues to support this bill.

Mr. VAN HOLLEN. Mr. Chair, throughout our history, American citizens have never hesitated to heed the call to service. They have answered in times of peace and prosperity, in times of war and recession. They have donated time and money and sweat—as much as they could, whenever it was needed.

When our nation faced the Great Depression, President Roosevelt formed the Civilian Conservation Corps and put citizens to work for the national interest. When we faced political uncertainty in the world, President Kennedy challenged our young people to serve and dispatched the Peace Corps on missions of international aid and public diplomacy. And when neighbors have challenges, when communities struggle, or when the nation sees tragedy, our citizens rally and lend a hand.

In recent years, we have seen some of the largest increases in volunteerism in history. This new trend is led by our young people, who are serving in record numbers. The number of college students who volunteer increased by 20 percent between 2002 and 2005. And the programs we consider today are a key part of that service.

Today's legislation will create new opportunities for Americans to volunteer and serve their communities while encouraging innovation and expanding on successful models. I have no doubt that Americans will take advantage of these programs.

As we emphasize the importance of volunteer service, I also want to call attention to the tremendous work done by our federal workforce. In the coming weeks, I will be introducing legislation to continue our support for service by cultivating our next generation of civil servants. My legislation will set up a scholarship program that will identify areas of national need in the federal workforce and recruit exceptional students to fill those positions after they graduate. In exchange for their commitment to serve, we will help them pay for school.

Mr. Chair, Americans have made tremendous investments through national service. Let us, in turn, pass this legislation today to assist their efforts and continue their commitment to our nation's future.

Mr. HONDA. Mr. Chair, I rise today in support of the Generations Invigorating Volunteerism and Education Act, the GIVE Act. In this time of economic crisis, when people all around our nation are suffering, an increase in service and volunteerism is what we need for a better, safer, kinder country and world.

It is more important now than ever before to support and reinvigorate the spirit of service in our country. As the recession intensifies, as more families are left without food, health

care, or homes and as our schools suffer, the GIVE Act offers solutions to restore confidence and put our nation on a path to recovery by rebuilding cities, creating green jobs, improving communities, and establishing new service corps for every walk of life.

President Obama has asked us all to expand and create new opportunities for service and to recommit ourselves to the spirit of service that has always characterized our Nation. President Obama understands that the benefits of service are immeasurable. Other than the obvious personal gains that can be derived from volunteering, the concept of volunteerism is a simple one—service to our neighbors, near or far, that need a hand in this time of economic hardship.

America is facing challenges today. We have seen higher unemployment, more people without insurance, more homes in foreclosure, and the number of people in poverty rise all as a result of a struggling economy, a lack of skills training, and poor education. The GIVE Act will help fund service programs for high-need, low-income communities which will in turn provide training programs, support social entrepreneurship, and help engage citizens in service-learning to address the specific challenges faced by their communities.

As a teacher and returned Peace Corps Volunteer, I cannot tell you how happy I am to see us focus our attention on national service. The GIVE Act's strength lies not only in the number of programs it expands and creates, but in its desire to provide service opportunities for people of all ages and for future generations. It takes important steps to incentivize service, grow the number of AmeriCorps volunteers nationwide to 250,000, and assist students in the pursuit of public service careers.

The GIVE Act is an incredibly important and comprehensive piece of legislation that reflects our values as a nation. I urge my colleagues in the House to support this legislation and those in the Senate to quickly pass it so that we can expand federally funded national service opportunities.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Chair, I rise today in strong support of the Generations Invigorating Volunteerism and Education Act. During this time of economic challenges the idea of helping one's community through volunteerism is particularly important.

The GIVE Act will expand the Corporation for National and Community Service which has been instrumental in helping connect Americans to high quality, meaningful service and service-learning opportunities. The GIVE Act will create new service programs for thousands of Americans and provide additional opportunities and incentives for middle and high school students to participate in service programs. The GIVE Act also improves program quality, ensures participant diversity, increases the value of the AmeriCorps education award, and reduces the age eligibility for Senior Corps to 55.

In particular, I would like to thank Chairman MILLER for incorporating into the Manager's Amendment my proposed language to engage public safety officers to volunteer with disadvantaged youth and provide opportunities for community based crime prevention efforts. It is important that we engage our commu-

nities and at-risk youth with law enforcement efforts. Too often there is a disconnect between the police and citizens of high-crime communities. It is important that these two groups recognize they can be partners in crime prevention, instead of having a fearful or untrusting relationship.

Since AmeriCorps was created in 1994, Texas has benefited from over 22,000 young people serving for at least one year in our communities. Through programs such as the 'National Civilian Community Corps' and 'City Year,' AmeriCorps volunteers address critical Texas needs in the areas of education, public safety, disaster response and recovery, and environment preservation. These programs serve the important role of providing an outlet for service to the country in a manner previously not afforded.

Mr. Chair, the AmeriCorps program has done great things for Texas and this nation as a whole, as is reflected in the AmeriCorps members' pledge to 'get things done.' I am indeed honored to support this wonderful program which represents the very best of the United States of America.

Mr. LARSON of Connecticut. Mr. Chair, I rise today in strong support of H.R. 1388, the Generations Invigorating Volunteerism and Education Act. I would like to thank Congresswoman MCCARTHY and Congressman MILLER for their persistent advocacy on such an important priority for our country. The GIVE Act will build on the President's call to action for public service by increasing opportunities available to citizens to help their communities and enhancing incentives for participation.

This bill will amend and extend programs that promote active community engagement. It will strengthen programs like Learn and Serve and AmeriCorps and will establish the Summer of Service program, which will reward middle and high school students that participate in eligible community service activities with money toward their college education.

In Connecticut, these programs have had an impact on thousands of our residents. Over 3,700 students participated in Learn and Serve activities last year and across the state we had 549 AmeriCorps volunteers. These programs offer vital services for our residents. Hartford's AmeriCorps program provided classroom support to 633 students last year, giving them one-on-one tutoring and helping them to improve their reading skills. The Learn and Serve program has also provided great benefits to Connecticut through programs that promote Civic engagement, environmental awareness, and fire-safety.

The GIVE Act is really a stimulus bill. It is estimated that every dollar spent on service initiatives is worth three dollars of investment in a community. These dollars go to repair community centers, build homes and bring back the neighborhoods that have been hit hardest by the economic downturn. This money will go to our students to provide them with the resources they need to go to college and the skills that will help them land jobs when they are done.

This legislation speaks to what is at the heart of American values. America is strongest when we are united and work together. The GIVE Act encourages just that. Once again, I would like to express my support for this bill

and urge my colleagues to vote in favor of the GIVE Act.

Mr. GENE GREEN of Texas. Mr. Chair, I rise today to show my support for H.R. 1388, the Generations Invigorating Volunteerism and Education Act of 2009 or the GIVE Act.

President Obama called on Congress to create new opportunities for Americans to build a stronger country by helping students perform better in school, prepare Americans for green and innovative 21st century jobs, rebuild cities in times of disaster, and improve communities. I am proud to say that through the various programs contained in the GIVE Act—whether new or old but reinvigorated—this bill meets President Obama's call.

Most importantly, I am pleased that this bill encourages our younger generations to engage in volunteerism while allowing them the opportunity to gain real-world experience working in our communities and addressing issues that are sometimes hard to face. During these trying times and with so many individuals losing their jobs, it is important to equip our youth with this type of experience.

I support the programs in the GIVE Act because its goals seek to better not only our future, but the future of generations to come. I urge my colleagues support this bill.

Mr. CROWLEY. Mr. Chair, I rise today in support of H.R. 1388, the Generations Invigorating Volunteerism and Education (GIVE) Act, and I want to thank Representative MILLER and his staff for all their good work on this bill.

Among the bill's many provisions is one I helped to craft that will increase service opportunities for musicians and artists.

Specifically, it would create a Musicians and Artists Corps to train and deploy skilled musicians and artists to low-income communities, schools, healthcare and therapeutic settings, and other areas, where they will promote music and arts engagement programs.

As someone who has had music play an important role in my life, I know firsthand that music and the arts are about far more than just entertainment—they have the power to change lives.

Indeed, research has also backed this up. Music and arts education has been proven to contribute to lower crime rates among disadvantaged youth, and it improves graduation rates and academic performance in schools.

In the world of healthcare, we see even more benefits. Patients who have undergone trauma or are suffering from chronic illness, as well as those with emotional and mental health problems, all benefit from being engaged in art and music programs.

Clearly, there is a wide span of areas where music and the arts can play a key role, and there are hundreds of thousands of musicians and artists that have the talent and the skills to help their communities.

President Obama has called on us all to increase our service to our nation, and these musicians and artists are ready and eager to serve. The Musicians and Artists Corps will connect these volunteers with the settings where they can make a world of difference.

Our citizen service programs, like AmeriCorps, have done a great job of engaging Americans of all ages, from a variety of professions, in national service. It is time now

that we bring more musicians and artists into this community.

Passage of the GIVE Act will go a long way toward increasing service in our country, and I am proud to support the measure.

Mr. KENNEDY. Mr. Chair, I rise in support of the Generations Invigorating Volunteerism and Education (GIVE) Act which will renew our nation's commitment to service and volunteerism. Public service is something my family knows a little bit about. Countless Americans were called to public service by President Kennedy's famous appeal: "Ask not what your country can do for you but what you can do for your country." It is my hope that with the passage of the GIVE Act, Congress and President Obama will create a new era of public service that goes beyond any one group or generation. The bill we are considering today expands opportunities for volunteerism to include disadvantaged youth, seniors and people with disabilities. If we are going to regain a sense of community and shared responsibility in this country, we must encourage national service among all people. I'm a strong believer in the abilities of the American people to confront our biggest challenges with perhaps our biggest asset: our manpower.

The creation of new programs like the Clean Energy Corps, to focus on environmental conservation, will work with our economy as we forge a new direction on energy. I am pleased that this bill provides new incentives for middle and high school students to volunteer in their communities, and will allow them to earn a \$500 education award to be used for college costs. In addition, this legislation will increase the number of AmeriCorps volunteers and increase the education reward they receive to match the maximum Pell Grant scholarship award.

The benefits that this legislation would bring to our struggling communities, across this country, and in my home state of Rhode Island, are endless. When President Obama took office just a few short months ago, he called upon Congress to expand federally funded national service opportunities. Today, we fulfill that promise. I am proud to vote in favor of this bill.

Mr. HARE. Mr. Chair, President Obama has set high goals for this nation to improve public education, combat climate change, extend quality affordable health care to all Americans, and honor our veterans. I believe renewing our nation's commitment to service will be the vehicle through which we meet these challenges.

Under the leadership of Chairman MILLER and Subcommittee Chair, Congresswoman MCCARTHY, the GIVE Act (H.R. 1388) answers the President's call to service, and I am proud to be an original cosponsor of this legislation.

Mr. Chair, very important to me as a veteran of the Army Reserves and the veterans' community is a provision I worked to secure in the GIVE Act that establishes a Veterans' Corps.

Last Congress when we considered legislation similar to H.R. 1388, I offered an amendment to create a grant program to enhance service opportunities for veterans and military families. The GIVE Act builds upon this effort by establishing a separate Veterans' Corps.

As more and more troops return from Iraq and Afghanistan, fulfilling our promise to them

will be an even greater challenge and priority for our nation. Through the Veterans' Corps we can recruit and mobilize veterans into service projects that provide educational and economic opportunities, job training, mentoring and outreach to other veterans.

Mr. Chair, our nation's veterans have already demonstrated a profound commitment to service. The Veterans' Corps aims to harness that spirit and in the process give back to those who have sacrificed so much for us.

I would like to acknowledge the work of my friend and colleague, Congressman JOHN SARBANES of Maryland. Together, we introduced H.R. 1401, the VET Corps Act, which was the foundation for the Veterans' Corps in the GIVE Act.

I ask my colleagues to vote yes on the GIVE Act.

Ms. JACKSON-LEE of Texas. Mr. Chair, I rise today in strong support of H.R. 1388, the "Generations of Invigorating Volunteerism and Education Act or the 'GIVE Act'." I would like to thank my colleague Congresswoman MCCARTHY for introducing this important legislation, as well as the Chairman of the Committee on Education and Labor, Congressman GEORGE MILLER, for his leadership in bringing this bill to the floor today.

Mr. Chair, this legislation will expand the already highly successful volunteer programs that empower community activists and improve the education and economic conditions of cities throughout the United States. It supports and increases funding for key community services programs, including AmeriCorps, Learn and Serve America, VISTA, National Civilian Community Corps, and Senior Corps.

The GIVE Act creates opportunities for green jobs that will contribute to energy conservation and environmental protection. It will create critical educational opportunities for disadvantaged youth and will create incentives for students to improve their communities.

Every year, more than 70,000 Americans participate in the AmeriCorps program alone, which provides relief to cities during natural disasters and reinvigorates communities. Over 50 million American volunteers build homes, organize food-drives, and improve schools through national service programs. The GIVE Act will broaden the opportunities for students and activists to participate in national service via education rewards that keep up with soaring costs of universities and Summer Service programs. After Ike and Katrina, thousands of local students worked to help rebuild communities and provide necessary services to distressed families. The GIVE Act is the critical linchpin in sustaining this civic activism.

Specifically, the GIVE Act would expand the job opportunities for Volunteers in Service to America, or VISTA, to re-integrate youth into society, increase literacy in communities through teaching opportunities in before and after-school programs, and to provide health and social services to low-income communities. VISTA is a critical step toward poverty alleviation, and the GIVE Act will equip it with the resources to fulfill its obligations.

I am pleased to see that my colleague, representative CUELLAR, revised the legislation to increase the number of volunteers from 75,000 to 250,000 members and added provisions for unemployed individuals to be included in the national service workforce, a

step that will be a critical step to combating the employment crisis afflicting millions. I am also pleased that Congressman MILLER further specified that the increase in volunteers is not just designed for AmeriCorps, but for all national service programs such as the Peace Corps and Opportunity Corps, and also included language promote community based efforts to reduce crime and recruit public safety officers.

In addition, the GIVE Act will create 4 new service opportunities including a Clean Energy Corps, an Education Corps, a Healthy Futures Corps, and a Veteran Service Corps. These volunteer opportunities will further improve environmental protection, health-care access, and services for veterans. These new service corps will address critical concerns in low-income communities. I am very happy that Congressman TEAGUE revised the legislation to aid veterans in their pursuit of education and professional opportunities, and help veterans with the claims process, and assist rural, disabled, and unemployed veterans with transportation needs. Moreover, the GIVE Act will recognize colleges and universities that are strongly engaged in service through grants and rewards that will in turn improve educational access in the United States.

I am pleased to see the Retention of my Language from the 110th Congress that gives special consideration to historically black colleges and universities, Hispanic-serving institutions, Tribal universities, and colleges serving predominantly minority populations. So strong are these universities' support of service, that "veritas et beneficium," or "truth and service" in Latin, is inscribed on their insignias.

The GIVE Act will create a Campuses of Service Program that will encourage and assist students in pursuing public service careers. It will also focus on recruiting scientists and engineers to keep America competitive for years to come. The Act will expand the Senior Corps as a way to keep Older Americans including seniors engaged in public service, and will create a Youth Engagement Zone to increase the number of young students in volunteer services.

Moreover, it expands the focus of The National Civilian Community Corps to include disaster relief efforts and infrastructure improvement to allow quicker and more effective responses to disasters like Katrina and Ike that devastated numerous communities in the United States. Finally, the Give Act will launch a nation-wide Call to Service Campaign that encourages all Americans to engage in national service and to recognize September 11th as a National Day of Service and Remembrance.

I am honored to cosponsor this legislation that will add service before self to America's future leaders. I urge my colleagues to join me in supporting this legislation.

Ms. MCCOLLUM. Mr. Chair, as a member of the National Service Caucus, I rise today in strong support of H.R. 1388, the Generations Invigoration, and Education or GIVE Act.

President and First Lady Obama have encouraged a renewed spirit of service and active citizenship in America. The GIVE Act answers that call to service by reauthorizing and expanding the National and Community Service Act of 1990.

H.R. 1388 will increase national service opportunities for many more of our citizens. This bill expands AmeriCorps, an existing and outstanding service-learning program with a proven track record of integrating academic study with community service. It also creates four new service corps in the areas of clean energy, education, health care, and veteran service and adds new programs to enable middle and high-school youth and retirees to serve their communities. Finally, this bill expands the National Civilian Community Corps to include disaster relief and energy conservation and provides funds to help non-profits recruit new volunteers.

The GIVE Act more than triples the number of federal volunteers serving in our communities so that an estimated 250,000 Americans will be able to participate in a year of service by 2014. These extra volunteers will help their neighbors endure these tough economic times by improving education, providing food and other services to the disadvantaged, and rebuilding towns and cities after disasters. This bill will also strengthen the economy because every dollar invested in service produces up to \$3.90 in direct, measurable benefits.

Volunteerism is growing in America. From 2002 to 2007, one million more citizens across the country started dedicating their time to worthy causes. Twenty-seven percent of all Americans are now volunteering. My state of Minnesota has a proud tradition of civic engagement. In a study conducted by the Corporation for National and Community Service, Minneapolis-St. Paul was ranked number one for volunteer rates in a large city.

American men and women who choose to better their communities and themselves by responding to the nation's critical education, safety, homeland security, and health needs exemplify the values of America. I want to thank every American volunteer and urge my colleagues to support this important bill.

Mr. ANDREWS. I yield back the balance of my time.

The CHAIR. All time for general debate has expired.

Pursuant to the rule, the amendment in the nature of a substitute printed in the bill shall be considered as an original bill for the purpose of amendment under the 5-minute rule and shall be considered read.

The text of the committee amendment is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) **SHORT TITLE.**—This Act may be cited as the "Generations Invigorating Volunteerism and Education Act" or the "GIVE Act".

(b) **TABLE OF CONTENTS.**—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.

TITLE I—AMENDMENTS TO NATIONAL AND COMMUNITY SERVICE ACT OF 1990

Sec. 1001. References.

Subtitle A—Amendments to Subtitle A (General Provisions)

Sec. 1101. Purposes; sense of Congress.

Sec. 1102. Definitions.

Subtitle B—Amendments to Subtitle B (Learn and Serve America)

Sec. 1201. School-based allotments.

Sec. 1202. Higher education provisions and Campuses of Service.

Sec. 1203. Innovative programs and research.

Subtitle C—Amendments to Subtitle C (National Service Trust Program)

Sec. 1301. Prohibition on grants to Federal agencies; limits on Corporation costs.

Sec. 1302. Required and eligible national service programs.

Sec. 1303. Types of positions.

Sec. 1304. Conforming repeal relating to training and technical assistance.

Sec. 1305. Assistance to State Commissions; challenge grants.

Sec. 1306. Allocation of assistance to States and other eligible entities.

Sec. 1307. Additional authority.

Sec. 1308. State selection of programs.

Sec. 1309. National service program assistance requirements.

Sec. 1310. Consideration of applications.

Sec. 1311. Description of participants.

Sec. 1312. Selection of national service participants.

Sec. 1313. Terms of service.

Sec. 1314. Adjustments to living allowance.

Subtitle D—Amendments to Subtitle D (National Service Trust and Provision of National Service Educational Awards)

Sec. 1401. Availability of funds in the National Service Trust.

Sec. 1402. Individuals eligible to receive a national service educational award from the Trust.

Sec. 1403. Determination of the amount of national service educational awards.

Sec. 1404. Disbursement of educational awards.

Sec. 1405. Process of approval of national service positions.

Subtitle E—Amendments to Subtitle E (National Civilian Community Corps)

Sec. 1501. Purpose.

Sec. 1502. Program components.

Sec. 1503. Eligible participants.

Sec. 1504. Summer national service program.

Sec. 1505. Team leaders.

Sec. 1506. Training.

Sec. 1507. Consultation with State Commissions.

Sec. 1508. Authorized benefits for Corps members.

Sec. 1509. Permanent cadre.

Sec. 1510. Contract and grant authority.

Sec. 1511. Other departments.

Sec. 1512. Advisory Board.

Sec. 1513. Evaluation.

Sec. 1514. Repeal of funding limitation.

Sec. 1515. Definitions.

Sec. 1516. Terminology.

Subtitle F—Amendments to Subtitle F (Administrative Provisions)

Sec. 1601. Family and medical leave.

Sec. 1602. Additional prohibitions on use of funds.

Sec. 1603. Notice, hearing, and grievance procedures.

Sec. 1604. Resolution of displacement complaints.

Sec. 1605. State Commissions on National and Community Service.

Sec. 1606. Evaluation and accountability.

Sec. 1607. Technical amendment.

Sec. 1608. Partnerships with schools.

Sec. 1609. Rights of access, examination, and copying.

Sec. 1610. Additional administrative provisions.

Subtitle G—Amendments to Subtitle G (Corporation for National and Community Service)

Sec. 1701. Terms of office.

Sec. 1702. Board of Directors authorities and duties.

Sec. 1703. Chief executive officer compensation.

- Sec. 1704. Authorities and duties of the Chief Executive Officer.
 Sec. 1705. Delegation to States.
 Sec. 1706. Chief financial officer compensation.
 Sec. 1707. Nonvoting members; personal services contracts.
 Sec. 1708. Donated services.
 Sec. 1709. Study to examine and increase service programs for displaced workers.
 Sec. 1710. Study to evaluate the effectiveness of a centralized electronic citizenship verification system.

Subtitle H—Amendments to Subtitle H

- Sec. 1801. Technical amendments to subtitle H.
 Sec. 1802. Repeals.
 Sec. 1803. New Fellowships.
 Sec. 1804. Innovative and model program support.
 Sec. 1805. Clearinghouses.
Subtitle I—Training and Technical Assistance
 Sec. 1821. Training and technical assistance.
Subtitle J—Repeal of Title III (Points of Light Foundation)
 Sec. 1831. Repeal.

Subtitle K—Amendments to Title V (Authorization of Appropriations)

- Sec. 1841. Authorization of appropriations.

TITLE II—AMENDMENTS TO THE DOMESTIC VOLUNTEER SERVICE ACT OF 1973

- Sec. 2001. References.

Subtitle A—Amendments to Title I (National Volunteer Antipoverty Programs)

- Sec. 2101. Purpose.
 Sec. 2102. Purpose of the VISTA program.
 Sec. 2103. Applications.
 Sec. 2104. VISTA programs of national significance.
 Sec. 2105. Terms and periods of service.
 Sec. 2106. Support Service.
 Sec. 2107. Sections repealed.
 Sec. 2108. Conforming amendment.
 Sec. 2109. Financial assistance.

Subtitle B—Amendments to Title II (National Senior Volunteer Corps)

- Sec. 2201. Change in name.
 Sec. 2202. Purpose.
 Sec. 2203. Grants and contracts for volunteer service projects.
 Sec. 2204. Foster Grandparent Program grants.
 Sec. 2205. Senior Companion Program grants.
 Sec. 2206. Promotion of National Senior Service Corps.
 Sec. 2207. Technical amendments.
 Sec. 2208. Programs of national significance.
 Sec. 2209. Additional provisions.
 Sec. 2210. Authority of Director.

Subtitle C—Amendments to Title IV (Administration and Coordination)

- Sec. 2301. Nondisplacement.
 Sec. 2302. Notice and hearing procedures.
 Sec. 2303. Definitions.
 Sec. 2304. Protection against improper use.

Subtitle D—Amendments to Title V (Authorization of Appropriations)

- Sec. 2401. Authorization of appropriations for VISTA and other purposes.
 Sec. 2402. Authorization of appropriations for National Senior Service Corps.

TITLE III—AMENDMENTS TO OTHER LAWS

- Sec. 3101. Inspector General Act of 1978.

TITLE IV—TECHNICAL AMENDMENTS TO TABLES OF CONTENTS

- Sec. 4101. Table of contents for the National and Community Service Act of 1990.
 Sec. 4102. Table of contents amendments for the Domestic Volunteer Service Act.

TITLE V—EFFECTIVE DATE

- Sec. 5101. Effective date.
 Sec. 5102. Service assignments and agreements.

TITLE VI—CONGRESSIONAL COMMISSION ON CIVIC SERVICE

- Sec. 6101. Short title.
 Sec. 6102. Findings.
 Sec. 6103. Establishment.
 Sec. 6104. Duties.
 Sec. 6105. Membership.
 Sec. 6106. Director and Staff of Commission; Experts and Consultants.
 Sec. 6107. Powers of Commission.
 Sec. 6108. Reports.
 Sec. 6109. Termination.

TITLE I—AMENDMENTS TO NATIONAL AND COMMUNITY SERVICE ACT OF 1990

SEC. 1001. REFERENCES.

Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or repeal of, a provision, the reference shall be considered to be made to a provision of the National and Community Service Act of 1990 (42 U.S.C. 12501 et seq.).

Subtitle A—Amendments to Subtitle A (General Provisions)

SEC. 1101. PURPOSES; SENSE OF CONGRESS.

(a) PURPOSES.—Section 2(b) (42 U.S.C. 12501(b)) is amended—

(1) in paragraph (2), by striking “community throughout” and inserting “community and service throughout the varied and diverse communities of”;

(2) in paragraph (4), by inserting after “income,” the following: “geographic location,”;

(3) in paragraph (6), by inserting after “existing” the following: “national”;

(4) in paragraph (7)—
 (A) by striking “programs and agencies” and inserting “programs, agencies, and communities”; and

(B) by striking “and” at the end;

(5) in paragraph (8), by striking the period and inserting a semicolon; and

(6) by adding at the end the following:
 “(9) recognize and increase the impact of social entrepreneurs and other nonprofit community organizations in addressing national and local challenges;

“(10) increase public and private investment in nonprofit community organizations that are effectively addressing national and local challenges and to encourage such organizations to replicate and expand successful initiatives;

“(11) leverage Federal investments to increase State, local, business, and philanthropic resources to address national and local challenges;

“(12) expand and strengthen service-learning programs through year-round opportunities, including during the summer months, to improve the education of children and youth and to maximize the benefits of national and community service, in order to renew the ethic of civic responsibility and the spirit of community to children and youth throughout the United States;

“(13) assist in coordinating and strengthening Federal and other service opportunities, including opportunities for participation in emergency and disaster preparedness, relief, and recovery;

“(14) increase service opportunities for our Nation’s retiring professionals, including such opportunities for those retiring from the science, technical, engineering, and mathematics professions to improve the education of our Nation’s youth and keep America competitive in the global knowledge economy, and to further utilize the experience, knowledge, and skills of older Americans;

“(15) encourage the continued service of the alumni of the national service programs, including service in times of national need;

“(16) support institutions of higher education that engage students in community service ac-

tivities, provide service-learning courses, and encourage or assist graduates to pursue careers in public service in the nonprofit or government sector; and

“(17) encourage members of the Baby Boom generation to partake in service opportunities.”.

(b) SENSE OF CONGRESS.—The Act is amended by inserting after section 2 the following:

“SEC. 3. SENSE OF CONGRESS.

“It is the sense of Congress that the number of participants in the programs authorized under subtitle C, including the Volunteers in Service to America (VISTA) and the National Civilian Community Corps (NCCC), should grow to reach 250,000 participants by 2014.”.

SEC. 1102. DEFINITIONS.

Section 101 (42 U.S.C. 12511) is amended—

(1) by redesignating—

(A) paragraphs (21) through (29) as paragraphs (28) through (36), respectively;

(B) paragraphs (9) through (20) as paragraphs (15) through (26), respectively;

(C) paragraphs (7) and (8) as paragraphs (10) and (11), respectively; and

(D) paragraphs (3) through (6) as paragraphs (5) through (8), respectively;

(2) by inserting after paragraph (2) the following:

“(3) APPROVED SUMMER OF SERVICE POSITION.—The term ‘approved summer of service position’ means a position in a program described under section 120(c)(8) for which the Corporation has approved the provision of a summer of service educational award as one of the benefits to be provided for successful service in the position.

“(4) BABY BOOM GENERATION.—The term ‘Baby Boom generation’ means the generation that consists of individuals born during the period beginning with 1946 and ending with 1964.”.

(3) in paragraph (5) (as so redesignated), by striking “described in section 122”;

(4) in paragraph (7) (as so redesignated), by striking “church or other”;

(5) by inserting after paragraph (8) (as so redesignated) the following:

“(9) DISADVANTAGED YOUTH.—The term ‘disadvantaged youth’ includes those youth who are economically disadvantaged and one or more of the following:

“(A) Who are out-of-school youth, including out-of-school youth who are unemployed.

“(B) Who are in or aging out of foster care.

“(C) Who have limited English proficiency.

“(D) Who are homeless or who have run away from home.

“(E) Who are at-risk to leave school without a diploma.

“(F) Who are former juvenile offenders or at risk of delinquency.

“(G) Who are individuals with a disability.”;

(6) by inserting after paragraph (11) (as so redesignated) the following:

“(12) COMMUNITY-BASED ORGANIZATION.—The term ‘community-based organization’ means a public or private nonprofit organization that—

“(A) has experience with meeting unmet human, educational, environmental, or public safety needs; and

“(B) meets other such criteria as the Chief Executive Officer may establish.

“(13) HISPANIC-SERVING INSTITUTION.—The term ‘Hispanic-serving institution’ has the meaning given such term in section 502(a) of the Higher Education Act of 1965 (20 U.S.C. 1101a(a)).

“(14) HISTORICALLY BLACK COLLEGE OR UNIVERSITY.—The term ‘historically black college or university’ means a part B institution, as defined in section 322 of the Higher Education Act of 1965 (20 U.S.C. 1101a(a)).”;

(7) in paragraph (19) (as so redesignated), by striking “section 101(a) of the Higher Education

Act of 1965" and inserting "sections 101(a) and 102(a)(1) of the Higher Education Act of 1965";

(8) in paragraph (23)(B) (as so redesignated), by striking "program in which the participant is enrolled" and inserting "organization receiving assistance under the national service laws through which the participant is enrolled in an approved national service position";

(9) by inserting after paragraph (26) (as so redesignated) the following:

"(27) **QUALIFIED ORGANIZATION.**—The term 'qualified organization' means a public or private nonprofit organization with experience working with school-age youth that meets such criteria as the Chief Executive Officer may establish.;"

(10) in paragraph (28)(B) (as so redesignated)—

(A) by striking "602" and inserting "602(3)"; and

(B) by striking "1401" and inserting "1401(3)"; and

(11) by adding at the end the following:

"(37) **PREDOMINANTLY BLACK INSTITUTION.**—The term 'predominantly black institution' has the meaning given such term in section 318 of the Higher Education Act of 1965 (20 U.S.C. 1059e).

"(38) **TRIBALLY CONTROLLED COLLEGE OR UNIVERSITY.**—The term 'tribally controlled college or university' has the meaning given such term in section 2 of the Tribally Controlled College or University Assistance Act of 1978 (25 U.S.C. 1801).

"(39) **MEDICALLY UNDERSERVED POPULATION.**—The term 'medically underserved population' has the meaning given that term in section 330(b)(3) of the Public Health Service Act (42 U.S.C. 254b(b)(3)).

"(40) **VETERAN.**—The term 'veteran' means any individual who has engaged in the active duty in the United States Army, Navy, Air Force, or Coast Guard and was released under a condition other than dishonorable."

Subtitle B—Amendments to Subtitle B (Learn and Serve America)

SEC. 1201. SCHOOL-BASED ALLOTMENTS.

Part I of subtitle B of title I (42 U.S.C. 12521 et seq.) is amended to read as follows:

"PART I—PROGRAMS FOR ELEMENTARY AND SECONDARY STUDENTS

"SEC. 111. ASSISTANCE TO STATES, TERRITORIES, AND INDIAN TRIBES.

"(a) **PURPOSE.**—School-based service learning programs promote service-learning as a strategy to—

"(1) support high-quality service-learning projects that engage students in meeting community needs with demonstrable results, while enhancing students' academic and civic learning; and

"(2) support efforts to build institutional capacity, including the training of educators, and to strengthen the service infrastructure to expand service opportunities.

"(b) **ALLOTMENTS TO STATES, TERRITORIES, AND INDIAN TRIBES.**—The Corporation, in consultation with the Secretary of Education, may make allotments to State educational agencies, Territories, and Indian tribes to pay for the Federal share of—

"(1) planning and building the capacity within the State, Territory, or Indian tribe to implement service-learning programs that are based principally in elementary and secondary schools, including—

"(A) providing training for teachers, supervisors, personnel from community-based agencies (particularly with regard to the recruitment, utilization, and management of participants), and trainers, to be conducted by qualified individuals or organizations that have experience with service-learning;

"(B) developing service-learning curricula, consistent with State or local academic content standards, to be integrated into academic programs, including an age-appropriate learning component that provides participants an opportunity to analyze and apply their service experiences;

"(C) forming local partnerships described in paragraph (2) or (4) to develop school-based service-learning programs in accordance with this part;

"(D) devising appropriate methods for research and evaluation of the educational value of service-learning and the effect of service-learning activities on communities;

"(E) establishing effective outreach and dissemination of information to ensure the broadest possible involvement of community-based agencies with demonstrated effectiveness in working with school-age youth in their communities; and

"(F) establishing effective outreach and dissemination of information to ensure the broadest possible participation of schools throughout the State, with particular attention to schools identified for school improvement under title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6301 et seq.);

"(2) implementing, operating, or expanding school-based service-learning programs, which may include paying for the cost of the recruitment, training, supervision, placement, salaries, and benefits of service-learning coordinators, through distribution of Federal funds by State educational agencies, Territories, and Indian tribes made available under this part to projects operated by local partnerships among—

"(A) local educational agencies; and

"(B) 1 or more community partners that—

"(i) shall include a public or private nonprofit organization that—

"(I) has a demonstrated expertise in the provision of services to meet unmet human, education, environmental, or public safety needs;

"(II) will make projects available for participants, who shall be students; and

"(III) was in existence at least 1 year before the date on which the organization submitted an application under section 113; and

"(ii) may include a private for-profit business, private elementary or secondary school, or Indian tribe (except that an Indian tribe distributing funds to a project under this paragraph is not eligible to be part of the partnership operating that project);

"(3) planning of school-based service-learning programs, through distribution by State educational agencies, Territories, and Indian tribes of Federal funds made available under this part to local educational agencies and Indian tribes, which planning may include paying for the cost of—

"(A) the salaries and benefits of service-learning coordinators; or

"(B) the recruitment, training, supervision, and placement of service-learning coordinators who may be participants in a program under subtitle C or receive a national service educational award under subtitle D, who may be participants in a project under section 201 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5001), or who may participate in a Youthbuild program under section 173A of the Workforce Investment Act of 1998 (29 U.S.C. 2918a),

who will identify the community partners described in paragraph (2)(B) and assist in the design and implementation of a program described in paragraph (2);

"(4) implementing, operating, or expanding school-based service-learning programs to utilize adult volunteers in service-learning to improve the education of students, through distribution by State educational agencies, Territories, and Indian tribes of Federal funds made available under this part to—

"(A) local educational agencies;

"(B) Indian tribes (except that an Indian tribe distributing funds under this paragraph is not eligible to be a recipient of those funds);

"(C) public or private nonprofit organizations; or

"(D) partnerships or combinations of local educational agencies and entities described in subparagraph (B) or (C); and

"(5) developing civic engagement programs that promote a better understanding of—

"(A) the principles of the Constitution, the heroes of American history (including military heroes), and the meaning of the Oath of Allegiance;

"(B) promote a better understanding of how the Nation's government functions; and

"(C) promote a better understanding of the importance of service in the Nation's character.

"(c) **CONSULTATION WITH SECRETARY OF EDUCATION.**—The Corporation is authorized to enter into agreements with the Secretary of Education for initiatives that may include—

"(1) identification and dissemination of research findings on service-learning and scientifically-valid research based practices; and

"(2) Provision of professional development opportunities that—

"(A) improve the quality of service-learning instruction and delivery for teachers both pre-service and in-service, personnel from community-based agencies and youth workers; and

"(B) create and sustain effective partnerships between local education agencies, community-based organizations, businesses, and other stakeholders.

"(d) **DUTIES OF SERVICE-LEARNING COORDINATOR.**—A service-learning coordinator referred to in paragraph (2) or (3) of subsection (b) shall provide services that may include—

"(1) providing technical assistance and information to, and facilitating the training of, teachers and assisting in the planning, development, execution, and evaluation of service-learning in their classrooms;

"(2) assisting local partnerships described in subsection (b) in the planning, development, and execution of service-learning projects, including summer of service programs; and

"(3) carrying out such other duties as the recipient of assistance under this part may determine to be appropriate.

"(e) **RELATED EXPENSES.**—An entity that receives financial assistance under this part may, in carrying out the activities described in subsection (b), use such assistance to pay for the Federal share of reasonable costs related to the supervision of participants, program administration, transportation, insurance, and evaluations and for other reasonable expenses related to the activities.

"SEC. 112. ALLOTMENTS.

"(a) **INDIAN TRIBES AND TERRITORIES.**—Of the amounts appropriated to carry out this part for any fiscal year, the Corporation shall reserve an amount of not less than 2 percent and not more than 3 percent for payments to Indian tribes, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, to be allotted in accordance with their respective needs.

"(b) **ALLOTMENTS THROUGH STATES.**—After reserving the amount under subsection (a), the Corporation shall use the remainder of the funds appropriated to carry out this part for any fiscal year as follows:

"(1) **ALLOTMENTS.**—

"(A) **SCHOOL-AGE YOUTH.**—From 50 percent of such remainder, the Corporation shall allot to each State an amount that bears the same ratio to 50 percent of such remainder as the number of school-age youth in the State bears to the total number of school-age youth of all States.

"(B) **ALLOCATION UNDER ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965.**—From 50

percent of such remainder, the Corporation shall allot to each State an amount that bears the same ratio to 50 percent of such remainder as the allocation to the State for the previous fiscal year under title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311 et seq.) or its successor authority bears to such allocations to all States.

“(2) **DEFINITION.**—Notwithstanding section 101, for purposes of this subsection, the term ‘State’ means each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

“(c) **REALLOTMENT.**—If the Corporation determines that the allotment of a State, Territory, or Indian tribe under this section will not be required for a fiscal year because the State, Territory, or Indian tribe did not submit and receive approval of an application for the allotment under section 113, the Corporation shall make the allotment for such State, Territory, or Indian tribe available for grants to community-based organization to carry out service-learning programs as described in section 111(b) in such State, Territory, or Indian tribe. After community-based organizations apply for the allotment with an application at such time and in such manner as the Corporation requires and receive approval, the remainder of such allotment shall be available for reallocation to such other States, Territories, or Indian tribes with approved applications submitted under section 113 as the Corporation may determine to be appropriate.

“(d) **MINIMUM AMOUNT.**—For any fiscal year for which amounts appropriated for this part exceed \$50,000,000, the minimum allotment to each State (as defined in subsection (b)(2)) under this section shall be \$65,000.

“SEC. 113. APPLICATIONS.

“(a) **IN GENERAL.**—To be eligible to receive an allotment under section 112, a State, acting through the State educational agency, Territory, or Indian tribe shall prepare, submit to the Corporation, and obtain approval of, an application at such time and in such manner as the Chief Executive Officer may reasonably require.

“(b) **CONTENTS.**—An application for an allotment under this part shall include—

“(1) a proposal for a 3-year plan promoting service-learning, which shall contain such information as the Chief Executive Officer may reasonably require, including how the applicant will integrate service opportunities into the academic program of the participants;

“(2) information about the criteria the State educational agency, Territory, or Indian tribe will use to evaluate and grant approval to applications submitted under subsection (c), including an assurance that the State educational agency, Territory, or Indian tribe will comply with the requirement in section 114(a);

“(3) assurances about the applicant's efforts to—

“(A) ensure that students of different ages, races, sexes, ethnic groups, disabilities, and economic backgrounds have opportunities to serve together;

“(B) include any opportunities for students enrolled in schools or other programs of education providing elementary or secondary education to participate in service-learning programs and ensure that such service-learning programs include opportunities for such students to serve together;

“(C) involve participants in the design and operation of the program;

“(D) promote service-learning in areas of greatest need, including low-income or rural areas; and

“(E) otherwise integrate service opportunities into the academic program of the participants; and

“(4) assurances that the applicant will comply with the nonduplication and nondisplacement

requirements of section 177 and the grievance procedures required by section 176.

“(c) **APPLICATION TO STATE, TERRITORY, OR INDIAN TRIBE TO RECEIVE ASSISTANCE TO CARRY OUT SCHOOL-BASED SERVICE-LEARNING PROGRAMS.**—

“(1) **IN GENERAL.**—Any—

“(A) qualified organization, Indian tribe, Territory, local educational agency, for-profit business, private elementary, middle, or secondary school, or institution of higher education that desires to receive financial assistance under this subpart from a State, Territory, or Indian tribe for an activity described in section 111(b)(1);

“(B) partnership described in section 111(b)(2) that desires to receive such assistance from a State, Territory, or Indian tribe or community-based organization described in section 111(b)(2);

“(C) entity described in section 111(b)(3) that desires to receive such assistance from a State, Territory, or Indian tribe for an activity described in such section;

“(D) partnership described in section 111(b)(4) that desires to receive such assistance from a State, Territory, or Indian tribe for an activity described in such section; and

“(E) agency or partnership described in section 120(c)(8) that desires to receive such assistance, or approved summer of service positions, from a State, Territory, or Indian tribe for an activity described in such section to be carried out through a service-learning program described in section 111,

shall prepare, submit to the State educational agency, Territory, community-based organization, or Indian tribe, and obtain approval of, an application for the program.

“(2) **SUBMISSION.**—Such application shall be submitted at such time and in such manner, and shall contain such information, as the agency, Territory, Indian tribe, or entity may reasonably require.

“SEC. 114. CONSIDERATION OF APPLICATIONS.

“(a) **PRIORITY.**—In considering competitive applications under this part, the Corporation shall give priority to innovation, sustainability, capacity building, involvement of disadvantaged youth, and quality of programs, as well as other criteria approved by the Chief Executive Officer.

“(b) **REJECTION OF APPLICATIONS.**—If the Corporation rejects an application submitted by a State, Territory, or Indian tribe under section 113 for an allotment, the Corporation shall promptly notify the State, Territory, or Indian tribe of the reasons for the rejection of the application. The Corporation shall provide the State, Territory, or Indian tribe with a reasonable opportunity to revise and resubmit the application and shall provide technical assistance, if needed, to the State, Territory, or Indian tribe as part of the re-submission process. The Corporation shall promptly reconsider such resubmitted application.

“SEC. 115. PARTICIPATION OF STUDENTS AND TEACHERS FROM PRIVATE SCHOOLS.

“(a) **IN GENERAL.**—To the extent consistent with the number of students in the State, Territory, or Indian tribe or in the school district of the local educational agency involved who are enrolled in private nonprofit elementary and secondary schools, such State, Territory, Indian tribe, or agency shall (after consultation with appropriate private school representatives) make provision—

“(1) for the inclusion of services and arrangements for the benefit of such students so as to allow for the equitable participation of such students in the programs implemented to carry out the objectives and provide the benefits described in this part; and

“(2) for the training of the teachers of such students so as to allow for the equitable participation of such teachers in the programs imple-

mented to carry out the objectives and provide the benefits described in this part.

“(b) **WAIVER.**—If a State, Territory, Indian tribe, or local educational agency is prohibited by law from providing for the participation of students or teachers from private nonprofit schools as required by subsection (a), or if the Corporation determines that a State, Territory, Indian tribe, or local educational agency substantially fails or is unwilling to provide for such participation on an equitable basis, the Chief Executive Officer shall waive such requirements and shall arrange for the provision of services to such students and teachers. Such waivers shall be subject to the requirements of sections 9503 and 9504 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7883 and 7884).

“SEC. 116. FEDERAL, STATE, AND LOCAL CONTRIBUTIONS.

“(a) **FEDERAL SHARE.**—

“(1) **IN GENERAL.**—The Federal share of the cost of carrying out a program for which assistance is provided under this part—

“(A) for new grants, may not exceed 80 percent of the total cost for the first year of the grant, 65 percent for the second year, and 50 percent for each remaining year; and

“(B) for continuing grants, may not exceed 50 percent of the total cost of the program.

“(2) **NON-FEDERAL CONTRIBUTION.**—In providing for the remaining share of the cost of carrying out such a program, each recipient of assistance under this part—

“(A) shall provide for such share through a payment in cash or in kind, fairly evaluated, including facilities, equipment, or services; and

“(B) may provide for such share through State sources or local sources, including private funds or donated services.

“(b) **WAIVER.**—

“(1) **IN GENERAL.**—The Chief Executive Officer may, with respect to any such program for any fiscal year, and upon determination that such action would be equitable due to lack of resources at the local level—

“(A) waive the requirements of subsection (a) in whole or in part; or

“(B) allow a recipient to provide the non-Federal contribution required under subsection (a)(2) from funding available pursuant to title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6301 et seq.).

“(2) **RULES.**—The following rules apply to paragraph (1)(B):

“(A) Paragraph (1)(B) applies only to recipients that are schools receiving funding under title I of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6301 et seq.).

“(B) The non-Federal contribution provided under paragraph (1)(B) may only be used for purposes consistent with title I of such Act (20 U.S.C. 6301 et seq.).

“SEC. 117. LIMITATIONS ON USES OF FUNDS.

“Not more than 6 percent of the amount of assistance received by an applicant in a fiscal year may be used to pay, in accordance with such standards as the Corporation may issue, for administrative costs, incurred by—

“(1) the original recipient; or

“(2) the entity carrying out the service-learning program supported with the assistance.”.

SEC. 1202. HIGHER EDUCATION PROVISIONS AND CAMPUSES OF SERVICE.

(a) **PART HEADING.**—The heading relating to part II of subtitle B of title I is amended to read as follows:

“PART II—HIGHER EDUCATION PROVISIONS AND CAMPUSES OF SERVICE”.

(b) **HIGHER EDUCATION.**—Section 119 (42 U.S.C. 12561) is redesignated as section 118 and amended—

(1) in subsection (a), by inserting after “community service programs” the following: “through service-learning”;

(2) in subsection (b)—

(A) in the matter preceding paragraph (1), by striking “combination” and inserting “consortia”;

(B) in paragraph (1)—

(i) in subparagraph (A), by striking “and” at the end;

(ii) in subparagraph (B), by adding “and” at the end; and

(iii) by adding at the end the following:

“(C) may coordinate with service-learning curricula being offered in the academic curricula at the institution of higher education or at one or more members of the consortia;”;

(3) in subsection (b)(3)—

(A) in the matter preceding subparagraph (A), by striking “teachers at the elementary, secondary, and postsecondary levels” and inserting “institutions of higher education and their faculty”;

(B) in subparagraph (A), by striking “education of the institution; and” and inserting “curricula of the institution to strengthen the instructional capacity of service-learning at the elementary and secondary levels;”;

(C) by redesignating subparagraph (B) as subparagraph (E); and

(D) by inserting after subparagraph (A) the following:

“(B) including service-learning as a key component of the health professionals curricula, including nursing, pre-medicine, medicine, and dentistry curricula of the institution;

“(C) including service-learning as a key component of the criminal justice professionals curricula of the institution;

“(D) including service-learning as a key component of the public policy and public administration curricula of the institution; and”;

(4) by striking subsections (c), (d), (e), and (g);

(5) by redesignating subsection (f) as (i); and

(6) by inserting after subsection (b) the following:

“(c) **SPECIAL CONSIDERATION.**—To the extent practicable, the Corporation shall give special consideration to applications submitted by predominantly Black institutions, Historically Black Colleges and Universities, Hispanic-serving institutions, Tribal Colleges and Universities, and community colleges serving predominantly minority populations.

“(d) **FEDERAL, STATE, AND LOCAL CONTRIBUTIONS.**—

“(1) **FEDERAL SHARE.**—

“(A) **IN GENERAL.**—The Federal share of the cost of carrying out a program for which assistance is provided under this part may not exceed 50 percent of the total cost of the program.

“(B) **NON-FEDERAL CONTRIBUTION.**—In providing for the remaining share of the cost of carrying out such a program, each recipient of a grant under this part—

“(i) shall provide for such share through a payment in cash or in kind, fairly evaluated, including facilities, equipment, or services; and

“(ii) may provide for such share through State sources or local sources, including private funds or donated services.

“(2) **WAIVER.**—The Chief Executive Officer may waive the requirements of paragraph (1) in whole or in part with respect to any such program for any fiscal year if the Corporation determines that such a waiver would be equitable due to a lack of available financial resources at the local level.

“(e) **APPLICATION FOR GRANT.**—

“(1) **SUBMISSION.**—To receive a grant or enter into a contract under this part, an applicant shall prepare, submit to the Corporation, and obtain approval of, an application at such time, in such manner, and containing such information and assurances as the Corporation may reasonably require. In requesting applications for assistance under this part, the Corporation

shall specify such required information and assurances.

“(2) **CONTENTS.**—An application submitted under paragraph (1) shall contain, at a minimum—

“(A) assurances that—

“(i) prior to the placement of a participant, the applicant will consult with the appropriate local labor organization, if any, representing employees in the area who are engaged in the same or similar work as that proposed to be carried out by such program, to prevent the displacement and protect the rights of such employees; and

“(ii) the applicant will comply with the non-duplication and nondisplacement provisions of section 177 and the grievance procedures required by section 176; and

“(B) such other assurances as the Chief Executive Officer may reasonably require.

“(f) **PRIORITY.**—In making grants and entering into contracts under subsection (b), the Corporation shall give priority to applicants or institutions that submit applications containing proposals that—

“(1) demonstrate the commitment of the institution of higher education, other than by demonstrating the commitment of the students, to supporting the community service projects carried out under the program;

“(2) specify the manner in which the institution will promote faculty, administration, and staff participation in the community service projects;

“(3) specify the manner in which the institution will provide service to the community through organized programs, including, where appropriate, clinical programs for students in professional schools and colleges;

“(4) describe any partnership that will participate in the community service projects, such as a partnership comprised of—

“(A) the institution;

“(B)(i) a community-based agency;

“(ii) a local government agency; or

“(iii) a non-profit entity that serves or involves school-age youth, older adults, or low-income communities; and

“(C)(i) a student organization;

“(ii) a department of the institution; or

“(iii) a group of faculty comprised of different departments, schools, or colleges at the institution;

“(5) demonstrate community involvement in the development of the proposal and the extent to which the proposal will contribute to the goals of its community partners;

“(6) describe research on effective strategies and methods to improve service utilized in the design of the project;

“(7) demonstrate a commitment to perform service projects in underserved urban and rural communities;

“(8) specify that the institution will use such assistance to strengthen the service infrastructure in institutions of higher education;

“(9) with respect to projects involving delivery of services, specify projects that involve leadership development of school aged youth; or

“(10) describe how service projects and activities are associated with such ideas as housing, economic development, infrastructure, health care, job training, education, crime prevention, urban planning, transportation technology, and child welfare.

“(g) **DEFINITION.**—Notwithstanding section 101, as used in this part, the term ‘student’ means an individual who is enrolled in an institution of higher education on a full- or part-time basis.

“(h) **FEDERAL WORK-STUDY.**—To be eligible for assistance under this part, an institution of higher education must demonstrate that it meets the minimum requirements under section

443(b)(2) of the Higher Education Act of 1965 (42 U.S.C. 2753(b)(2)) relating to the participation of Federal Work-Study students in community service activities, or has received a waiver of those requirements from the Secretary of Education.”.

(c) **CAMPUSES OF SERVICE.**—Title I of the National and Community Service Act of 1990 (42 U.S.C. 12521 et seq.) is amended by adding after section 118 (as redesignated by subsection (a)) at the end the following:

“SEC. 119. CAMPUSES OF SERVICE.

“(a) **IN GENERAL.**—The Corporation, after consultation with the Secretary of Education, may annually designate not more than 25 institutions of higher education as Campuses of Service, from among institutions nominated by State Commissions.

“(b) **APPLICATIONS FOR NOMINATION.**—

“(1) **IN GENERAL.**—To be eligible for a nomination to receive designation under subsection (a), and have an opportunity to apply for funds under subsection (d) for a fiscal year, an institution of higher education in a State shall submit an application to the State Commission at such time, in such manner, and containing such information as the State Commission may require.

“(2) **CONTENTS.**—At a minimum, the application shall include information specifying—

“(A)(i) the number of undergraduate and, if applicable, graduate service-learning courses offered at such institution for the most recent full academic year preceding the fiscal year for which designation is sought; and

“(ii) the number and percentage of undergraduate students and, if applicable, the number and percentage of graduate students at such institution who were enrolled in the corresponding courses described in clause (i), for such preceding academic year;

“(B) the percentage of undergraduate students engaging in and, if applicable, the percentage of graduate students engaging in activities providing community services, as defined in section 441(c) of the Higher Education Act of 1965 (42 U.S.C. 2751(c)), during such preceding academic year, the quality of such activities, and the average amount of time spent, per student, engaged in such activities;

“(C) for such preceding academic year, the percentage of Federal work-study funds made available to the institution under part C of title IV of the Higher Education Act of 1965 (42 U.S.C. 2751 et seq.) that is used to compensate students employed in providing community services, as so defined, and a description of the efforts the institution undertakes to make available to students opportunities to provide such community services and be compensated through such work-study funds;

“(D) at the discretion of the institution, information demonstrating the degree to which recent graduates of the institution, and all graduates of the institution, have obtained full-time public service employment in the nonprofit sector or government, with a private nonprofit organization or a Federal, State, or local public agency; and

“(E) any programs the institution has in place to encourage or assist graduates of the institution to pursue careers in public service in the nonprofit sector or government.

“(c) **NOMINATIONS AND DESIGNATION.**—

“(1) **NOMINATION.**—

“(A) **IN GENERAL.**—A State Commission that receives applications from institutions of higher education under subsection (b) may nominate, for designation under subsection (a), not more than 3 such institutions of higher education, consisting of—

“(i) not more than one 4-year public institution of higher education;

“(ii) not more than one 4-year private institution of higher education; and

“(iii) not more than one 2-year institution of higher education.

“(B) **SUBMISSION.**—The State Commission shall submit to the Corporation the name and application of each institution nominated by the State Commission under subparagraph (A).

“(2) **DESIGNATION.**—The Corporation shall designate, under subsection (a), not more than 25 institutions of higher education from among the institutions nominated under paragraph (1). In making the designations, the Corporation shall, if feasible, designate various types of institutions, including institutions from each of the categories of institutions described in clauses (i), (ii), and (iii) of paragraph (1)(A).

“(d) **AWARDS.**—

“(1) **IN GENERAL.**—Using sums appropriated under section 501(a)(1)(C), the Corporation shall provide an award to institutions designated under subsection (c), to be used by the institutions to develop or disseminate service-learning models and best practices regarding service-learning to other institutions of higher education.

“(2) **PLANS.**—To be eligible to receive funds under this subsection, an institution designated under subsection (c) shall submit a plan to the Corporation describing how the institution intends to use the funds to encourage or assist those students to pursue public service careers in the nonprofit sector or government.

“(3) **ALLOCATION.**—The Corporation shall determine how the funds appropriated under section 501(a)(1)(C) for a fiscal year will be allocated among the institutions submitting acceptable plans under paragraph (2). In determining the amount of funds to be allocated to such an institution, the Corporation shall consider the number of students at the institution, and the quality and scope of the plan submitted by the institution under paragraph (2) and the institution's current (as of the date of submission of the plan) strategies to encourage or assist students to pursue public service careers in the nonprofit sector or government.”.

SEC. 1203. INNOVATIVE PROGRAMS AND RESEARCH.

Subtitle B of title I (42 U.S.C. 12521 et seq.) is further amended by adding after part II the following new part:

“PART III—INNOVATIVE DEMONSTRATION SERVICE-LEARNING PROGRAMS AND RESEARCH

“SEC. 120. INNOVATIVE DEMONSTRATION SERVICE-LEARNING PROGRAMS AND RESEARCH.

“(a) **IN GENERAL.**—From the amounts appropriated to carry out this part for a fiscal year, the Corporation may make grants and fixed-amount grants (in accordance with section 129(l)) with eligible entities for activities described in subsection (c).

“(b) **DEFINITIONS.**—For purposes of this part, the following definitions apply:

“(1) **ELIGIBLE ENTITIES.**—The term ‘eligible entity’ means a State education agency, a State Commission, a Territory, an Indian tribe, an institution of higher education, or a public or private nonprofit organization (including community-based organizations), a public or private elementary or secondary school, a local educational agency, or a consortia of such entities, where a consortia of two or more such entities may also include a for-profit organization.

“(2) **YOUTH ENGAGEMENT ZONE.**—The term ‘youth engagement zone’ means the area in which a youth engagement zone program is carried out.

“(3) **YOUTH ENGAGEMENT ZONE PROGRAM.**—The term ‘youth engagement zone program’ means a service learning program in which members of an eligible partnership described in paragraph (4) collaborate to provide coordinated school-based or community-based service learn-

ing opportunities, to address a specific community challenge, for an increasing percentage of out-of-school youth and secondary school students served by local educational agencies where—

“(A) not less than 90 percent of the students participate in service-learning activities as part of the program; or

“(B) service-learning is a mandatory part of the curriculum in all of the secondary schools served by the local educational agency.

“(4) **ELIGIBLE PARTNERSHIP.**—

“(A) **IN GENERAL.**—The term ‘eligible partnership’ means—

“(i) one or more community-based agencies that have demonstrated records of success in carrying out service-learning programs with disadvantaged students, and that meet such criteria as the Chief Executive Officer may establish; in combination with;

“(ii) (I) one or more local educational agencies for which—

“(aa) a high number or percentage of the students served by the agency, as determined by the Corporation, are disadvantaged students; and

“(bb) the graduation rate for the secondary school students served by the agency is less than 70 percent; or

“(II) a State Commission; or

“(III) a State educational agency.

“(B) **ADDITIONAL ENTITIES.**—An eligible partnership may also include—

“(i) a local government agency that is not described in subparagraph (A);

“(ii) the office of the chief executive officer of a unit of general local government; or

“(iii) an institution of higher education.

“(c) **AUTHORIZED ACTIVITIES.**—Funds under this part may be used to—

“(1) integrate service-learning programs into the science, technology, engineering, and mathematics (STEM) curricula at the elementary, secondary, or post-secondary, and post-baccalaureate levels in coordination with practicing or retired STEM professionals;

“(2) involve students in service-learning programs focusing on energy conservation in their community, including conducting educational outreach on energy conservation and working to improve energy efficiency in low income housing and in public spaces;

“(3) involve students in service-learning projects in emergency and disaster preparedness;

“(4) involve students in service-learning projects aimed at improving access to and obtaining benefits from computers and other emerging technologies, including improving such access to individuals with disabilities, in low income or rural communities, in senior centers and communities, in schools, in libraries, and in other public spaces;

“(5) involve high school age youth in the mentoring of middle school youth while involving all participants in service-learning to seek to meet unmet human, educational, environmental, public safety, or emergency disaster preparedness needs in their community;

“(6) conduct research and evaluations on service-learning, including service-learning in middle schools, and disseminate such research and evaluations widely;

“(7) conduct innovative and creative activities as described in section 111(b);

“(8) establish or implement summer of service programs (giving priority to programs that enroll youth in grades 6 through 9) during the summer months, including the cost of recruitment, training, and placement of service-learning coordinators—

“(A) for youth who will be enrolled in any grade from grade 6 through grade 12 at the end of the summer concerned;

“(B) for community-based service-learning projects that—

“(i) shall—

“(I) meet unmet human, educational, environmental (including energy conservation and stewardship), emergency and disaster preparedness, and public service needs; and

“(II) be intensive, structured, supervised, and designed to produce identifiable improvements to the community; and

“(ii) may include the extension of academic year service-learning programs into the summer months;

“(C) under which any student who completes 100 hours of service in an approved summer of service position, as certified through a process determined by the Corporation through regulations consistent with section 138(f), shall be eligible for a summer of service educational award of not more than \$500 (or, at the discretion of the Chief Executive Officer, not more than \$1,000 in the case of a participant who is economically disadvantaged) from funds deposited in the National Service Trust and distributed by the Corporation as described in section 148; and

“(D) subject to the limitation that a student may not receive more than 2 summer of service educational awards from funds deposited in the National Service Trust;

“(9) establish or implement youth engagement zone service learning programs in youth engagement zones for students in secondary school served by local educational agencies where a majority of such students do not participate in service learning activities carried out by eligible partnerships as defined in paragraph (4) that are designed to—

“(A) involve all students in secondary school in the local educational agency in service-learning to address a specific community challenge;

“(B) improve student engagement, including student attendance and student behavior, and student achievement, graduation rates, and college-going rates in secondary schools;

“(C) involve an increasing percentage of students in secondary school and out-of-school youth in the community in school-based or community based service-learning activities each year, with the goal of involving all students in secondary schools served by the local educational agency and involving an increasing percentage of the out-of-school youth in service learning activities; and

“(D) encourage participants to engage in service throughout their lives; and

“(10) carry out any other innovative service-learning programs or research that the Corporation considers appropriate.

“(d) **PRIORITY.**—Priority shall be given to programs that—

“(1) involve students and community stakeholders in the design and implementation of the service-learning program;

“(2) implement service-learning programs in low-income or rural communities; and

“(3) utilize adult volunteers, including tapping the resource of retired and retiring adults, in the planning and implementation of the service-learning programs.

“(e) **REQUIREMENTS.**—

“(1) **THREE-YEAR TERM.**—Each program funded under this part shall be carried out over a period of three years, including one planning year and two additional grant years, with a 1-year extension possible, if the program meets performance measures developed in accordance with section 179(a) and any other criteria determined by the Corporation.

“(2) **COLLABORATION ENCOURAGED.**—Each program funded under this part is encouraged to collaborate with other Learn and Serve programs, AmeriCorps, VISTA, and the National Senior Service Corps.

“(3) **EVALUATION.**—Upon completion of the program, the Corporation shall conduct an independent evaluation of the program and widely

disseminate the results to the service community through multiple channels, including the Corporation's Resource Center or a clearinghouse of effective strategies and recommendations for improvement.

“(f) MATCHING FUNDS.—

“(1) IN GENERAL.—The Federal share of the cost of carrying out a program for which a grant (that is not a fixed-amount grant as described in section 129(l)) is made under this part may not exceed 75 percent of the total cost of the program in the first year of the grant and 50 percent of the total cost of the program in the remaining years of the grant, including if the grant is extended for a fourth year.

“(2) NON-FEDERAL CONTRIBUTION.—In providing for the remaining share of the cost of carrying out such a program, each recipient of a grant under this part—

“(A) shall provide for such share through a payment in cash or in kind, fairly evaluated, including facilities, equipment, or services; and

“(B) may provide for such share through State sources or local sources, including private funds or donated services.

“(3) WAIVER.—The Chief Executive Officer may waive the requirements of paragraph (1) in whole or in part with respect to any such program for any fiscal year if the Corporation determines that such action would be equitable due to lack of resources at the local level.

“(g) APPLICATIONS.—To be eligible to carry out a program under this part, an entity shall prepare, submit to the Corporation, and obtain approval of, an application at such time and in such manner as the Chief Executive Officer may reasonably require.”.

**Subtitle C—Amendments to Subtitle C
(National Service Trust Program)**

SEC. 1301. PROHIBITION ON GRANTS TO FEDERAL AGENCIES; LIMITS ON CORPORATION COSTS.

Section 121 (42 U.S.C. 12571) is amended—

(1) in subsection (a), in the matter preceding paragraph (1), by inserting after “subdivisions of States,” the following: “Territories.”;

(2) in subsection (b)—

(A) in the heading, by striking “AGREEMENTS WITH FEDERAL AGENCIES” and inserting “RESTRICTIONS ON AGREEMENTS WITH FEDERAL AGENCIES”;

(B) in paragraph (1)—

(i) by striking “a contract or cooperative agreement” and inserting “an interagency agreement other than a grant”;

(ii) by inserting “or otherwise supported” after “program carried out”;

(iii) by striking “by the agency.” and inserting “by the agency, including programs under the Public Lands Corps and Urban Youth Corps as described in section 122(a)(2).”; and

(iv) by striking the second sentence;

(C) by striking paragraph (2) and inserting the following:

“(2) PROHIBITION ON GRANTS.—The Corporation may not provide a grant under this section to a Federal agency.”; and

(D) in paragraph (3), by striking “receiving assistance under this subsection” and inserting “operating a national service program”; and

(3) in subsection (c)(2)(B), by striking “to be provided” and inserting “to be provided or otherwise approved”;

(4) in subsection (d)—

(A) in the subsection heading, by striking “FIVE” and inserting “SIX”; and

(B) in paragraph (1), by striking “5 percent” and inserting “6 percent”; and

(5) in subsection (e)—

(A) in paragraph (1)—

(i) by striking “section 140” and inserting “paragraph (2)”; and

(ii) by striking “Federal share of the cost” and inserting “Corporation share of the cost, in-

cluding member living allowances, employment-related taxes, health care coverage, and worker's compensation and other necessary operation costs.”;

(iii) by striking “may not exceed 75 percent of such cost.” and inserting “may not exceed—”; and

(iv) by adding at the end the following:

“(A) for the first 3 years in which the recipient receives such assistance, 76 percent of such cost;

“(B) for the fourth through ninth years in which the recipient receives such assistance, a decreasing share of such cost between 76 percent and 50 percent, as established by the Corporation in regulation; and

“(C) for the tenth year (and each year thereafter) in which the recipient receives such assistance, 50 percent of such cost.”;

(B) by striking paragraph (3);

(C) by redesignating paragraph (2) as paragraph (3); and

(D) by inserting after paragraph (1) the following:

“(2) ALTERNATIVE CORPORATION SHARE FOR PROGRAMS IN RURAL OR SEVERELY ECONOMICALLY DISTRESSED COMMUNITIES.—Upon approval by the Corporation, the Corporation share of the cost, including member living allowances, employment-related taxes, health care coverage, and worker's compensation, of carrying out a national service program that receives assistance under subsection (a) and that is located in a rural or severely economically distressed community may not exceed—

“(A) for the first 6 years in which the recipient receives such assistance, 76 percent of such cost;

“(B) for the seventh through ninth years in which the recipient receives such assistance, a decreasing share of such cost between 76 and 65 percent as established by the Corporation in regulation; and

“(C) for the tenth year (and each year thereafter) in which the recipient receives such assistance, 65 percent of such cost.”; and

(E) by adding at the end the following:

“(5) OTHER FEDERAL FUNDS.—

“(A) RECIPIENT REPORT.—A recipient of assistance under section 121 (other than a recipient of assistance of a fixed-amount grant) shall report to the Corporation the amount and source of any Federal funds used to carry out the program other than those provided by the Corporation.

“(B) CORPORATION REPORT.—The Corporation shall report to the appropriate committees of Congress on an annual basis information regarding each recipient under subparagraph (A) that uses Federal funds other than those provided by the Corporation to carry out the program, including amounts and sources of other Federal funds.”.

SEC. 1302. REQUIRED AND ELIGIBLE NATIONAL SERVICE PROGRAMS.

Section 122 is amended to read as follows:

“SEC. 122. NATIONAL SERVICE PROGRAMS ELIGIBLE FOR PROGRAM ASSISTANCE.

“(a) REQUIRED NATIONAL SERVICE CORPS.—The recipient of a grant under section 121(a) and each Federal agency operating or supporting a national service program under section 121(b) shall, directly or through grants or subgrants to other entities, carry out or support the following national service corps, as full- or part-time corps, including during the summer months, to address unmet educational, health, veteran, or environmental needs:

“(1) EDUCATION CORPS.—An Education Corps that identifies unmet educational needs within communities through activities such as those described in subparagraph (A) and meets or exceeds the performance indicators under subparagraph (B).

“(A) ACTIVITIES.—An Education Corps described in this paragraph may carry out activities such as—

“(i) tutoring, or providing other academic support to students;

“(ii) full-time classroom instruction;

“(iii) mentoring students, including adult or peer mentoring;

“(iv) linking needed integrated services and comprehensive supports with students, their families, and their public schools;

“(v) improving school climate;

“(vi) providing assistance to a school in expanding the school day by strengthening the quality of staff and expanding the academic programming offered in an expanded learning time initiative, a program of a 21st century community learning center (as defined in section 4201 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7171)), or a high-quality after-school program, such as through recruiting, placing, training and supporting a full-time corps of Fellows who are graduates of 4-year institutions of higher education or 2-year institutions of higher education with a certificate or degree in youth development to administer the initiative or program at high-need school;

“(vii) assisting schools and local educational agencies in improving and expanding high-quality service-learning programs that keep students engaged in schools by providing service-learning coordinators;

“(viii) assisting students in being prepared for college-level work;

“(ix) involving family members of students in supporting teachers and students;

“(x) conducting a pre-professional training program in which students enrolled in an institution of higher education—

“(I) receive training in specified fields, which may include classes containing service-learning, including early childhood education, elementary and secondary education and other professions such as those in health care, criminal justice, environmental stewardship and conservation or public safety;

“(II) perform service related to such training outside the classroom during the school term and during summer or other vacation periods; and

“(III) agree to provide service upon graduation to meet unmet human, educational, environmental, or public safety needs related to such training;

“(xi) A campus-based program that is designed to provide substantial service in a community during the school term and during summer or other vacation periods through the use of—

“(I) students who are attending an institution of higher education, including students participating in a work-study program assisted under part C of title IV of the Higher Education Act of 1965 (42 U.S.C. 2751 et seq.);

“(II) teams composed of such students;

“(III) teams composed of a combination of such students and community residents; or

“(IV) students participating in service-learning programs at an institution of higher education;

“(xii) a program that provides specialized training to individuals in service-learning and places the individuals after such training in positions, including positions as service-learning coordinators, to facilitate service-learning in programs eligible for funding under part I of subtitle B;

“(xiii) providing education or job training services that are designed to meet the needs of rural communities; and

“(xiv) other activities addressing unmet educational needs as the Corporation may designate.

“(B) EDUCATION CORPS INDICATORS.—The corps indicators for a corps described in this paragraph are—

“(i) student engagement, including student attendance and student behavior;

“(ii) student academic achievement;

“(iii) high school graduation rates;

“(iv) rate of college enrollment and continued college enrollment for recipients of a high school diploma;

“(v) an additional indicator relating to improving education for students that the Corporation, in consultation with the Secretary of Education, establishes for a given year;

“(vi) a local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) relating to improving education for students, proposed by that eligible entity in an application submitted to, and approved by, a State Commission or the Corporation under this section; and

“(vii) any additional local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) that is approved by the Corporation.

“(2) HEALTHY FUTURES CORPS.—A Healthy Futures Corps that identifies unmet health needs within communities through activities such as those described in subparagraph (A) and meets or exceeds the performance indicators under subparagraph (B).

“(A) ACTIVITIES.—A Healthy Futures Corps described in this paragraph may carry out activities such as—

“(i) assisting economically disadvantaged individuals in navigating the health care system;

“(ii) assisting individuals in obtaining access to health care for themselves or their children;

“(iii) educating economically disadvantaged individuals and individuals who are members of medically underserved populations about, and engaging individuals described in this clause in, initiatives regarding navigating the health care system and regarding disease prevention and health promotion, with a particular focus on common health conditions, chronic diseases, and conditions, for which disease prevention and health promotion measures exist and for which socioeconomic, geographic, and racial and ethnic health disparities exist;

“(iv) improving health literacy of patients;

“(v) providing translation services at clinics and in emergency rooms to improve health care;

“(vi) providing services designed to meet the needs of rural communities;

“(vii) assisting in health promotion interventions that improve health status, and helping people adopt and maintain healthy lifestyles and habits to improve health status; and

“(viii) other activities addressing unmet health needs as the Corporation may designate.

“(B) HEALTHY FUTURES CORPS INDICATORS.—The corps indicators for a corps described in this paragraph are—

“(i) access to health care among economically disadvantaged individuals and individuals who are members of medically underserved populations;

“(ii) access to health care for uninsured individuals, including such individuals who are economically disadvantaged children;

“(iii) participation, among economically disadvantaged individuals and individuals who are members of medically underserved populations, in disease prevention and health promotion initiatives, particularly those with a focus on addressing common health conditions, addressing chronic diseases, and decreasing health disparities;

“(iv) health literacy of patients;

“(v) an additional indicator, relating to improving or protecting the health of economically disadvantaged individuals and individuals who are members of medically underserved popu-

lations, that the Corporation, in consultation with the Secretary of Health and Human Services and the Director of the Centers for Disease Control and Prevention, establishes for a given year;

“(vi) a local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) relating to improving or protecting the health of economically disadvantaged individuals and individuals who are members of medically underserved populations, proposed by that eligible entity in an application submitted to, and approved by, a State Commission or the Corporation under this section; and

“(vii) any additional local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) that is approved by the Corporation.

“(3) CLEAN ENERGY CORPS.—A Clean Energy Corps that identifies unmet environmental needs within communities through activities such as those described in subparagraph (A) and meets or exceeds the performance indicators under subparagraph (B).

“(A) ACTIVITIES.—A Clean Energy Corps described in this paragraph may carry out activities such as—

“(i) weatherizing and retrofitting housing units for low-income households to significantly improve the energy efficiency and reduce carbon emissions of such housing units;

“(ii) building energy efficient housing units in low-income communities;

“(iii) conducting energy audits for low-income households and recommending ways for the households to improve energy efficiency;

“(iv) the enhancement of renewable energy production by facilitating the installation or repair of renewable energy technologies;

“(v) assisting in emergency operations, such as disaster prevention and relief;

“(vi) the repair, renovation, or rehabilitation of an existing infrastructure facility including, but not limited to, rail, mass transportation, ports, inland navigation, schools and hospitals;

“(vii) working with schools and youth programs to educate students and youth about ways to reduce home energy use and improve the environment, including conducting service-learning projects to provide such education;

“(viii) assisting in the development of local recycling programs;

“(ix) improving national and State parks, city parks, county parks, forest preserves, and trails owned or maintained by the Federal Government or a State, including planting trees, carrying out reforestation, and making trail enhancements;

“(x) cleaning and improving rivers maintained by the Federal Government or a State;

“(xi) full-time, year-round youth corps program or full-time summer youth corps program, such as a conservation corps or youth service corps (including youth corps programs under subtitle I, the Public Lands Corps established under the Public Lands Corps Act of 1993, the Urban Youth Corps established under section 106 of the National and Community Service Trust Act of 1993, and other conservation corps or youth service corps that performs service on Federal or other public lands or on Indian lands or Hawaiian home lands), that—

“(I) undertakes meaningful service projects with visible public benefits, including projects involving urban renewal, sustaining natural resources, or improving human services;

“(II) includes as participants youths and young adults between the ages of 16 and 25, inclusive, and at least 50 percent of whom are out-of-school youths and other disadvantaged youths (such as youths with limited basic skills, youths in foster care who are becoming too old for foster care, youths of limited-English pro-

ficiency, homeless youths, youths who are individuals with disabilities), and youths who are economically disadvantaged who are between those ages; and

“(III) provides those participants who are youths and young adults with—

“(aa) crew-based, highly structured, and adult-supervised work experience, life skills, education, career guidance and counseling, employment training, and support services including mentoring; and

“(bb) the opportunity to develop citizenship values and skills through service to their community and the United States;

“(xii) projects designed to renew and rehabilitate National Park resources and enhance services and learning opportunities for National Park visitors, communities, and schools; and

“(xiii) other activities addressing unmet environmental needs as the Corporation may designate.

“(B) CLEAN ENERGY CORPS INDICATORS.—The corps indicators for a corps described in this paragraph are—

“(i) the number of housing units of low-income households weatherized or retrofitted to significantly improve energy efficiency and reduce carbon emissions;

“(ii) annual energy costs (to determine savings in those costs) at facilities where participants have provided service;

“(iii) the number of students and youth receiving education or training in energy-efficient and environmentally conscious practices;

“(iv) the number of national parks, State parks, city parks, county parks, forest preserves, or trails or rivers owned or maintained by the Federal Government or a State, that are cleaned or improved;

“(v) another indicator relating to clean energy that the Corporation, in consultation with the Administrator of the Environmental Protection Agency and the Secretary of Energy and the Department of Interior, as appropriate, establishes for a given year;

“(vi) another indicator relating to education or skill attainment for clean energy jobs that the Corporation, in consultation with the Secretary of Labor, establishes for a given year;

“(vii) a local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) relating to clean energy, or education or skill attainment for clean energy jobs, proposed by that eligible entity in an application submitted to, and approved by, a State Commission or the Corporation under this section; and

“(viii) any additional local indicator (applicable to a particular eligible entity and on which improvement in performance is needed) that is approved by the Corporation.

“(4) VETERANS' CORPS.—A Veterans' Corps that identifies unmet needs of veterans through activities such as those described in subparagraph (A) and meets or exceeds the performance indicators under subparagraph (B).

“(A) ACTIVITIES.—A Veterans' Corps described in this paragraph may carry out activities such as—

“(i) promoting community-based efforts to meet the unique needs of military families while a family member is deployed and upon that family member's return home;

“(ii) recruiting veterans, particularly returning veterans, into service opportunities;

“(iii) working to assist veterans in developing their educational opportunities, including opportunities for professional certification;

“(iv) promoting efforts within the community to serve the needs of veterans and active duty military members;

“(v) assisting veterans in developing mentoring relationships with economically disadvantaged students;

“(vi) developing projects to assist disabled, unemployed, and older veterans; and

“(vii) other activities addressing unmet veterans’ needs as the Corporation may designate.

“(B) VETERANS’ CORPS INDICATORS.—The corps indicators for a corps described in this paragraph are—

“(i) the number of housing units created for veterans;

“(ii) the number of veterans who pursue educational opportunities;

“(iii) the number of veterans receiving professional certification;

“(iv) outreach efforts to service organizations serving the needs to veterans;

“(v) the number of veterans engaged in service opportunities;

“(vi) the number of military families assisted by organizations while the family member is deployed and when the family member returns from deployment;

“(vii) the number of economically disadvantaged students engaged in mentoring relationships with veterans;

“(viii) projects designed to meet identifiable public needs with a specific emphasis on projects in support of veterans, especially disabled and older veterans;

“(ix) another indicator relating to education or skill attainment that assists in providing veterans with the skills to address identifiable public needs, that is approved by the Corporation;

“(x) other additional indicators that improve the lives of veterans and families of individuals deployed in service, that the Corporation, in consultation with the Department of Veterans Affairs, establishes for a given year; and

“(xi) any additional local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) that is approved by the Corporation.

“(b) ELIGIBLE OPPORTUNITY CORPS PROGRAMS.—The recipient of a grant under section 121(a) and each Federal agency operating or supporting a national service program under section 121(b) shall, directly or through grants or subgrants to other entities, carry out or support full- or part-time national service programs, including summer programs, to address unmet community needs.

“(1) ELIGIBLE PROGRAMS.—National service programs under this subsection shall be known as ‘Opportunity Corps’ and may include the following types of national service programs:

“(A) A community corps program that meets unmet human, educational, environmental, or public safety needs and promotes greater community unity through the use of organized teams of participants of varied social and economic backgrounds, skill levels, physical and developmental capabilities, ages, ethnic backgrounds, or genders.

“(B) A professional corps program that recruits and places qualified participants in positions—

“(i) such as teachers, nurses and other health care providers, police officers, early childhood development staff, engineers, or other professionals providing service to meet educational, human, environmental, or public safety needs in communities with an inadequate number of such professionals;

“(ii) that may include a salary in excess of the maximum living allowance authorized in subsection (a)(3) of section 140, as provided in subsection (c) of such section; and

“(iii) that are sponsored by public or private employers who agree to pay 100 percent of the salaries and benefits (other than any national service educational award under subtitle D) of the participants.

“(C) A community service program designed to meet the needs of rural communities, using teams or individual placements to address the

development needs of rural communities, including the issues of rural poverty, health care, education, and job training.

“(D) A program that seeks to eliminate hunger in communities and rural areas through service in projects—

“(i) involving food banks, food pantries, and nonprofit organizations that provide food during emergencies;

“(ii) involving the gleaning of prepared and unprepared food that would otherwise be discarded as unusable so that the usable portion of such food may be donated to food banks, food pantries, and other nonprofit organizations;

“(iii) seeking to address the long-term causes of hunger through education and the delivery of appropriate services; or

“(iv) providing training in basic health, nutrition, and life skills necessary to alleviate hunger in communities and rural areas.

“(E) An E-Corps program that involves participants who provide services in a community by developing and assisting in carrying out technology programs which seek to increase access to technology and the benefits thereof in such community.

“(F) A program that engages citizens in public safety, public health, and emergency and disaster preparedness, and may include the recruitment and placing of qualified participants in positions to be trainees as law enforcement officers, firefighters, search and rescue personnel, and emergency medical service workers, and may engage Federal, State, and local stakeholders in collaboration to organize more effective responses to issues of public safety and public health, emergencies, and disasters.

“(G) A program, initiative, or partnership that seeks to expand the number of mentors for youths (including by recruiting high-school and college-aged individuals to enter into mentoring relationships), including mentors for disadvantaged youths, either through provision of direct mentoring services, provision of supportive services to direct mentoring service organizations (in the case of a partnership), or through the creative utilization of current and emerging technologies to connect youth with mentors.

“(H) A program that has the primary purpose of re-engaging court-involved youth and adults with the goal of reducing recidivism.

“(I) Programs to support the needs of veterans or active duty service members and their families, including providing opportunities to participate in service projects.

“(J) Such other national service programs addressing unmet human, educational, environmental, or public safety needs as the Corporation may designate.

“(2) OPPORTUNITY CORPS INDICATORS.—The corps indicators for programs under this subsection are—

“(A) financial literacy among economically disadvantaged individuals;

“(B) housing units built or improved for economically disadvantaged individuals or low-income families;

“(C) economically disadvantaged individuals with access to job training and other skill enhancement;

“(D) economically disadvantaged individuals with access to information about job placement services;

“(E) a reduced crime rate in the community where service is provided;

“(F) established or improved access to technology in the community where service is provided;

“(G) mentor relationships among disadvantaged youth;

“(H) food security among economically disadvantaged individuals;

“(I) service opportunities through the programs described in subparagraphs (A), (B), and (F) for economically disadvantaged individuals;

“(J) an additional indicator relating to improving economic opportunity for economically disadvantaged individuals that the Corporation, in consultation with the Secretary of Health and Human Services, the Secretary of Labor, and the Attorney General, establishes for a given year;

“(K) a local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) relating to improving economic opportunity for economically disadvantaged individuals, proposed by that eligible entity in an application submitted to, and approved by, a State Commission or the Corporation under this section;

“(L) increase capacity of local nonprofit organizations to meet the needs of disadvantaged people and communities;

“(M) any additional indicator proposed by a Governor or State Commission that is approved by the Corporation; and

“(N) any additional local indicator (applicable to a particular eligible entity and on which an improvement in performance is needed) that is approved by the Corporation.

“(c) PRIORITIES FOR CERTAIN REQUIRED CORPS.—In awarding financial assistance and approved national service positions to eligible entities proposed to carry out the required corps described in subsection (a)—

“(1) in the case of a corps described in subsection (a)(2)—

“(A) the Corporation may give priority to such eligible entities that propose to develop policies to provide, and provide, support for participants who, after completing service under this section, will undertake careers to improve performance on health indicators; and

“(B) the Corporation shall give priority to such eligible entities that propose to carry out national service programs in medically underserved areas (as designated by the Secretary of Health and Human Services as an area with a shortage of personal health services); and

“(2) in the case of a corps described in subsection (a)(3), the Corporation shall give priority to such eligible entities that propose to recruit individuals for the Clean Energy Corps so that significant percentages of participants in the Corps are economically disadvantaged individuals, and provide to such individuals support services and education and training to develop skills needed for clean energy jobs for which there is current demand or projected future demand.

“(d) CONSULTATION ON PERFORMANCE INDICATORS.—The Corporation shall consult with the Secretaries of Education, Health and Human Services, Energy, Veterans Affairs, Department of Interior, the Administrator of the Environmental Protection Agency, and the Attorney General, as appropriate, in developing additional performance indicators for the corps and programs described in subsections (a) and (b).

“(e) QUALIFICATION CRITERIA TO DETERMINE ELIGIBILITY.—

“(1) ESTABLISHMENT BY CORPORATION.—The Corporation shall establish qualification criteria for different types of national service programs for the purpose of determining whether a particular national service program should be considered to be a national service program eligible to receive assistance or approved national service positions under this subtitle.

“(2) CONSULTATION.—In establishing qualification criteria under paragraph (1), the Corporation shall consult with organizations and individuals with extensive experience in developing and administering effective national service programs or regarding the delivery of human, educational, environmental, or public safety services to communities or persons.

“(3) APPLICATION TO SUBGRANTS.—The qualification criteria established by the Corporation

under paragraph (1) shall also be used by each recipient of assistance under section 121(a) that uses any portion of the assistance to conduct a grant program to support other national service programs.

“(4) ENCOURAGEMENT OF INTERGENERATIONAL COMPONENTS OF PROGRAMS.—The Corporation shall encourage national service programs eligible to receive assistance or approved national service positions under this subtitle to establish, if consistent with the purposes of the program, an intergenerational component of the program that combines students, out-of-school youths, disadvantaged youth, and older adults as participants to provide services to address unmet human, educational, environmental, or public safety needs.

“(f) NATIONAL SERVICE PRIORITIES.—

“(1) ESTABLISHMENT.—

“(A) BY CORPORATION.—In order to concentrate national efforts on meeting certain human, educational, environmental, or veterans’ needs and to achieve the other purposes of this Act, the Corporation, consistent with the strategic plan approved under section 192A(g)(1), shall establish (and may periodically alter) priorities regarding the types of national service programs and corps to be assisted under section 129 and the purposes for which such assistance may be used. In establishing such priorities, the Corporation—

“(i) shall select 2 or more of the corps described in subsection (a) to receive assistance under section 129(d); and

“(ii) may select other programs described in subsection (b) to receive assistance under such section.

“(B) BY STATES.—Consistent with paragraph (4), States shall establish, and through the national service plan process described in section 178(e)(1), periodically alter priorities as appropriate regarding the national service programs to be assisted under section 129(d) and 129(e). The State priorities shall be subject to Corporation review as part of the application process under section 130.

“(2) NOTICE TO APPLICANTS.—The Corporation shall provide advance notice to potential applicants of any national service priorities to be in effect under this subsection for a fiscal year. The notice shall specifically include—

“(A) a description of any alteration made in the priorities since the previous notice; and

“(B) a description of the national service programs that are designated by the Corporation under section 133(d)(2) as eligible for priority consideration in the next competitive distribution of assistance under section 121(a).

“(3) REGULATIONS.—The Corporation shall by regulation establish procedures to ensure the equitable treatment of national service programs that—

“(A) receive funding under this subtitle for multiple years; and

“(B) would be adversely affected by annual revisions in such national service priorities.

“(4) APPLICATION TO SUBGRANTS.—Any national service priorities established by the Corporation under this subsection shall also be used by each recipient of funds under section 121(a) that uses any portion of the assistance to conduct a grant program to support other national service programs.

“(g) REQUIREMENTS FOR TUTORS.—

“(1) IN GENERAL.—Except as provided in paragraph (2), the Corporation shall require that each recipient of assistance under the national service laws that operates a tutoring program involving elementary or secondary school students certifies that individuals serving in approved national service positions as tutors in such program have—

“(A) either—

“(i) obtained their high school diploma; or

“(ii) passed a proficiency test demonstrating that such individuals have the skills necessary to achieve program goals; and

“(B) have successfully completed pre- and in-service training for tutors.

“(2) EXCEPTION.—The requirements in paragraph (1) do not apply to an individual serving in an approved national service position who is enrolled in an elementary or secondary school and is providing tutoring services through a structured, school-managed cross-grade tutoring program.

“(h) REQUIREMENTS FOR TUTORING PROGRAMS.—Each tutoring program that receives assistance under the national service laws shall—

“(1) offer a curriculum that is high quality, research-based, and consistent with the State academic content standards required by section 1111 of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 6311) and the instructional program of the local educational agency; and

“(2) offer high quality, research-based pre- and in-service training for tutors.

“(i) CITIZENSHIP TRAINING.—The Corporation shall establish requirements for recipients of assistance under the national service laws relating to the promotion of citizenship and civic engagement, that are consistent with the principles on which citizenship programs administered by U.S. Citizenship and Immigration Services are based and are appropriate to the age, education, and experience of the participants enrolled in approved national service positions and approved summer of service positions.

“(j) REPORT.—Not later than 60 days after the end of each fiscal year for which the Corporation makes grants under section 121(a), the Corporation shall prepare and submit to the appropriate committees of Congress a report containing—

“(1) information describing how the Corporation allocated financial assistance and approved national service positions among eligible entities proposed to carry out national service corps described in that subsection (a) for that fiscal year; and

“(2) information describing the amount of financial assistance and the number of approved national service positions the Corporation provided to each national service corps described in subsection (a) for that fiscal year;

“(3) a measure of the extent to which the national service corps improved performance on the corresponding indicators; and

“(4) information describing how the Corporation is coordinating—

“(A) the national service corps funded under subsection (a); with

“(B) applicable programs, as determined by the Corporation, carried out under subtitles B of this title, and part A of title I and parts A and B of title II of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4951 et seq., 5001, 5011) that improve performance on those indicators or otherwise address identified community needs.”.

SEC. 1303. TYPES OF POSITIONS.

Section 123 (42 U.S.C. 12573) is amended—

(1) in paragraph (2)(A) by inserting after “subdivision of a State,” the following: “a Territory,”; and

(2) in paragraph (5) by inserting “National” before “Civilian Community Corps”.

SEC. 1304. CONFORMING REPEAL RELATING TO TRAINING AND TECHNICAL ASSISTANCE.

Section 125 (42 U.S.C. 12575) is repealed.

SEC. 1305. ASSISTANCE TO STATE COMMISSIONS; CHALLENGE GRANTS.

Section 126 (42 U.S.C. 12576) is amended—

(1) in subsection (a)—

(A) in paragraph (1), by striking “\$125,000 and \$750,000” and inserting “\$250,000 and \$1,000,000”; and

(B) by striking paragraph (2) and inserting the following:

“(2) MATCHING REQUIREMENT.—In making grants to a State under this subsection, the Corporation shall require the State to provide matching funds of \$1 from non-Federal sources for every \$1 provided by the Corporation.

“(3) ALTERNATIVE.—Notwithstanding paragraph (2), the Chief Executive Officer may permit a State that demonstrates hardship or a new State Commission to use an alternative match as follows:

“(A) FIRST \$100,000.—For the first \$100,000 of grant amounts provided by the Corporation, a State shall not be required to provide matching funds.

“(B) AMOUNTS GREATER THAN \$100,000.—For grant amounts of more than \$100,000 and not exceeding \$200,000 provided by the Corporation, a State shall provide \$1 from non-Federal sources for every \$2 provided by the Corporation.

“(C) AMOUNTS GREATER THAN \$200,000.—For grant amounts of more than \$200,000 provided by the Corporation, a State shall provide \$1 from non-Federal sources for every \$1 provided by the Corporation.

“(D) RESERVATION OF FUNDS.—The corporation shall ensure that it reserves funds for assistance provided under section 126(a) at an aggregate amount equal to that of at least 150 percent allocated in fiscal year 2004 for the first full fiscal year after the date of enactment of the GIVE Act. Each subsequent year the corporation shall increase the amount reserved proportionately including minimum and maximum amounts described in paragraph (1) to the amount of program funding allocated in subtitle C.”.

(2) in subsection (b), by striking the period and inserting “and to support, including through mission-assignments under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5147), nonprofit organizations and public agencies responding to the needs of communities in disasters.”; and

(3) in subsection (c)—

(A) in paragraph (1), by striking “to national service programs that receive assistance under section 121” and inserting “to programs supported under the national service laws”; and

(B) by striking paragraph (3) and inserting the following:

“(3) AMOUNT OF ASSISTANCE.—A challenge grant under this subsection may provide, for an initial 3-year grant period, not more than \$1 of assistance under this subsection for each \$1 in cash raised from private sources by the program supported under the national service laws in excess of amounts required to be provided by the program to satisfy matching funds requirements. After an initial 3-year grant period, grants under this subsection may provide not more than \$1 of assistance for each \$2 in cash raised from private sources by the program in excess of amounts required to be provided by the program to satisfy matching funds requirements. The Corporation may permit the use of local or State funds as matching funds if the Corporation determines that such use would be equitable due to a lack of available private funds at the local level. The Corporation shall establish a ceiling on the amount of assistance that may be provided to a national service program under this subsection.”.

SEC. 1306. ALLOCATION OF ASSISTANCE TO STATES AND OTHER ELIGIBLE ENTITIES.

Section 129 (42 U.S.C. 12581) is amended to read as follows:

“SEC. 129. PROVISION OF ASSISTANCE AND APPROVED NATIONAL SERVICE POSITIONS.

“(a) 1-PERCENT ALLOTMENT FOR CERTAIN TERRITORIES.—Of the funds allocated by the

Corporation for provision of assistance under section 121(a) for a fiscal year, the Corporation shall reserve 1 percent for grants to the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands upon approval by the Corporation of an application submitted under section 130. The amount allotted as a grant to each such Territory under this subsection for a fiscal year shall be equal to the amount that bears the same ratio to 1 percent of the allocated funds for that fiscal year as the population of the Territory bears to the total population of such Territories.

“(b) ALLOTMENT FOR INDIAN TRIBES.—Of the funds allocated by the Corporation for provision of assistance under section 121(a) for a fiscal year, the Corporation shall reserve at least 1 percent for grants to Indian tribes, including nonprofit organizations applying on behalf of a tribe or tribes, to be allotted by the Corporation on a competitive basis. In the case of a nonprofit organization applying on behalf of a tribe or tribes such nonprofit organization shall include in its application—

“(1) written documentation from such tribe or tribes that such tribe or tribes has approved the application and authorized such nonprofit organization to submit an application on the behalf of the tribe or tribes; and

“(2) certification that the nonprofit organization will use the grant exclusively to serve members of such tribe or tribes and will, to the maximum extent practicable, do so on tribal lands.

“(c) RESERVATION OF APPROVED POSITIONS.—The Corporation shall ensure that each individual selected during a fiscal year for assignment as a VISTA volunteer under title I of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4951 et seq.) or as a participant in the Civilian Community Corps Demonstration Program under subtitle E shall receive the national service educational award described in subtitle D if the individual satisfies the eligibility requirements for the award. Funds for approved national service positions required by this paragraph for a fiscal year shall be deducted from the total funding for approved national service positions to be available for distribution under subsections (d) and (e) for that fiscal year.

“(d) ALLOTMENT FOR COMPETITIVE GRANTS.—Of the funds allocated by the Corporation for provision of assistance under section 121(a) for a fiscal year and subject to section 133(d)(3), the Corporation shall reserve up to 62.7 percent for grants awarded on a competitive basis to States for national service programs and to nonprofit organizations seeking to operate a national service program in 2 or more States.

“(e) ALLOTMENT TO CERTAIN STATES ON FORMULA BASIS.—

“(1) GRANTS.—Of the funds allocated by the Corporation for provision of assistance under subsection (a) of section 121 for a fiscal year, the Corporation shall make a grant to each of the several States, the District of Columbia, and the Commonwealth of Puerto Rico that submits an application under section 130 that is approved by the Corporation.

“(2) ALLOTMENTS.—The amount allotted as a grant to each such State under this subsection for a fiscal year shall be equal to the amount that bears the same ratio to 35.3 percent of the allocated funds for that fiscal year as the population of the State bears to the total population of the several States, the District of Columbia, and the Commonwealth of Puerto Rico, in compliance with paragraph (3).

“(3) MINIMUM AMOUNT.—Notwithstanding paragraph (2), the minimum grant made available to each State approved by the Corporation under paragraph (1) for each fiscal year must be at least \$600,000, or 0.5 percent of the amount allocated for the State formula under this section, whichever is greater.

“(f) EFFECT OF FAILURE TO APPLY.—If a State or Territory fails to apply for, or fails to give notice to the Corporation of its intent to apply for an allotment under this section, or the Corporation does not approve the application consistent with section 133, the Corporation may use the amount that would have been allotted under this section to the State or Territory to—

“(1) make grants (and provide approved national service positions in connection with such grants) to other community-based organizations under section 121 that propose to carry out national service programs in such State or Territory; and

“(2) make a reallocation to other States or Territories with approved applications submitted under section 130, to the extent community-based organizations do not apply as described in paragraph (1).

“(g) APPLICATION REQUIRED.—The allotment of assistance and approved national service positions to a recipient under this section shall be made by the Corporation only pursuant to an application submitted by a State or other applicant under section 130.

“(h) APPROVAL OF POSITIONS SUBJECT TO AVAILABLE FUNDS.—The Corporation may not approve positions as approved national service positions under this subtitle for a fiscal year in excess of the number of such positions for which the Corporation has sufficient available funds in the National Service Trust for that fiscal year, taking into consideration funding needs for national service educational awards under subtitle D based on completed service. If appropriations are insufficient to provide the maximum allowable national service educational awards under subtitle D for all eligible participants, the Corporation is authorized to make necessary and reasonable adjustments to program rules.

“(i) SPONSORSHIP OF APPROVED NATIONAL SERVICE POSITIONS.—

“(1) SPONSORSHIP AUTHORIZED.—The Corporation may enter into agreements with persons or entities who offer to sponsor national service positions for which the person or entity will be responsible for supplying the funds necessary to provide a national service educational award. The distribution of these approved national service positions shall be made pursuant to the agreement, and the creation of these positions shall not be taken into consideration in determining the number of approved national service positions to be available for distribution under this section.

“(2) DEPOSIT OF CONTRIBUTION.—Funds provided pursuant to an agreement under paragraph (1) shall be deposited in the National Service Trust established in section 145 until such time as the funds are needed.

“(j) RESERVATION OF FUNDS FOR SPECIAL ASSISTANCE.—From amounts appropriated for a fiscal year pursuant to the authorization of appropriations in section 501(a)(2) and subject to the limitation in such section, the Corporation may reserve such amount as the Corporation considers to be appropriate for the purpose of making assistance available under section 126.

“(k) RESERVATION OF FUNDS TO INCREASE THE PARTICIPATION OF INDIVIDUALS WITH DISABILITIES.—

“(1) RESERVATION.—To make grants to public or private nonprofit organizations to increase the participation of individuals with disabilities in national service and for demonstration activities in furtherance of this purpose, and subject to the limitation in paragraph (2), the Chief Executive Officer shall reserve not less than 1 percent from the amount allocated to carry out program grants under the national service laws.

“(2) LIMITATION.—The amount reserved in paragraph (1) may not exceed \$10,000,000.

“(3) REMAINDER.—After making grants under subsection (k), excess funds may be used by the

Chief Executive Officer for other activities under section 501(a)(2).

“(l) AUTHORITY FOR FIXED-AMOUNT GRANTS.—

“(1) IN GENERAL.—

“(A) AUTHORITY.—From amounts appropriated for a fiscal year to provide financial assistance under the national service laws, the Corporation, subject to the limitation in subparagraph (B) may provide assistance in the form of fixed-amount grants in an amount determined by the Corporation under paragraph (2) rather than on the basis of actual costs incurred by a program.

“(B) LIMITATION.—Other than fixed-amount grants to support programs described in section 129A, for the 1-year period beginning on the date of enactment of the GIVE Act, the Corporation may provide assistance in the form of fixed-amount grants only to support full-time positions.

“(2) DETERMINATION OF AMOUNT OF FIXED-AMOUNT GRANTS.—A fixed-amount grant authorized by this subsection shall be in an amount determined by the Corporation that is—

“(A) significantly less than the reasonable and necessary costs of administering the program receiving the grant; and

“(B) based on the amount per individual enrolled in the program receiving the grant, taking into account—

“(i) the program's capacity to manage funds and achieve programmatic results;

“(ii) the number of national service positions approved for the program;

“(iii) the proposed design of the program;

“(iv) whether the program provides service to or involves the participation of disadvantaged youth or otherwise would reasonably incur a relatively higher level of costs; and

“(v) such other factors as the Corporation may consider under section 133 in considering applications for assistance.

“(3) REQUIREMENTS FOR GRANT RECIPIENTS.—In awarding a fixed-amount grant under this subsection, the Corporation—

“(A) shall require the grant recipient—

“(i) to return a pro rata amount of the grant funds based upon the difference between the number of hours served by a participant and the minimum number of hours for completion of a term of service (as established by the Corporation);

“(ii) to report on standardized and other performance measures established by the Corporation;

“(iii) to cooperate with any evaluation activities undertaken by the Corporation; and

“(iv) to provide assurances that additional funds shall be raised in support of the proposed program, in addition to those received under the national service laws; and

“(B) may adopt other terms and conditions as it considers necessary or appropriate based on the relative risks (as determined by the Corporation) associated with any application for a fixed-amount grant.

“(4) OTHER REQUIREMENTS NOT APPLICABLE.—Limitations on administrative costs and matching fund documentation requirements shall not apply to fixed-amount grants provided in accordance with this subsection.

“(5) RULE OF CONSTRUCTION.—Nothing in this subsection shall relieve a grant recipient of the responsibility to comply with the requirements of the Single Audit Act (31 U.S.C. 7501 et seq.) or other requirements of Office of Management and Budget Circular A-133.”.

SEC. 1307. ADDITIONAL AUTHORITY.

Part II of subtitle C of title I is amended by inserting after section 129 (42 U.S.C. 12581) the following:

“SEC. 129A. EDUCATION AWARDS ONLY PROGRAM.

“(a) IN GENERAL.—From amounts appropriated for a fiscal year to provide financial assistance under this subtitle and consistent with

the restriction in subsection (b), the Corporation may, through fixed-amount grants (in accordance with section 129(l)), provide operational assistance to programs that receive approved national service positions but do not receive funds under section 121(a).

“(b) **LIMIT ON CORPORATION GRANT FUNDS.**—Operational support under this section may not exceed \$600 per individual enrolled in an approved national service position and may reach \$800 per individual if the program supports at least 50 percent disadvantaged youth.

“(c) **ADJUSTMENTS FOR INFLATION.**—For each year after 2008, the amounts specified in subsection (b) shall be adjusted for inflation as measured by the Consumer Price Index for all Urban Consumers published by the Secretary of Labor.

“(d) **INAPPLICABLE PROVISIONS.**—The provisions under section 129(l)(4) and the living allowances and other benefits under sections 131(e) and section 140 (other than individualized support services for disabled members under section 140(f)) shall not apply to programs that receive assistance under this section.”.

SEC. 1308. STATE SELECTION OF PROGRAMS.

Section 130 (42 U.S.C. 12582) is amended—

(1) in subsection (a)—

(A) by inserting after “State,” the following: “Territory,”; and

(B) by striking “institution of higher education, or Federal agency” and inserting “or institution of higher education”;

(2) in subsection (b)—

(A) in paragraph (9), by striking “section 122(c)” and inserting “section 122(f)”;

(B) in paragraph (12), by inserting “municipalities and county governments in the areas being served,” after “services,”.

(3) in subsection (c)—

(A) in paragraph (1)—

(i) by striking “jobs or positions” and inserting “proposed positions”;

(ii) by striking “, including” and all that follows through the period at the end and inserting a period;

(B) in paragraph (2) by inserting “proposed” before “minimum”; and

(C) by adding at the end the following:

“(3) In the case of a nonprofit organization operating programs in 2 or more States, a description of the manner and extent to which the State Commissions of each State in which the nonprofit organization intends to operate were consulted and the nature of the consultation.”;

(4) by redesignating subsections (d) through (g) as subsections (e) through (h), respectively and inserting after subsection (c) the following:

“(d) **ADDITIONAL REQUIRED APPLICATION INFORMATION.**—An application submitted under subsection (a) for programs described in 122(a) shall also contain—

“(1) measurable goals, to be used for annual measurements of the program on 1 or more of the corresponding performance indicators;

“(2) information describing how the applicant proposes to utilize funds to improve performance on the corresponding performance indicators utilizing participants, including the activities in which such participants will engage to improve performance on those indicators;

“(3) information identifying the geographical area in which the eligible entity proposed to carry out the program proposes to use funds to improve performance on the corresponding performance indicators including demographic information on the students or individuals, as appropriate, in such area, and statistics demonstrating the need to improve such indicators in such area; and

“(4) if applicable, information on how the eligible entity will work with other community-based agencies to carry out activities to improve performance on the corresponding performance indicators using such funds.”;

(5) in subsection (f)(2) (as so redesignated) by striking “were selected” and inserting “were or will be selected”;

(6) in subsection (g) (as so redesignated)—

(A) in paragraph (1), by striking “a program applicant” and inserting “an applicant”; and

(B) in paragraph (2)—

(i) in the heading, by striking “PROGRAM APPLICANT” and inserting “APPLICANT”;

(ii) in the matter preceding subparagraph (A), by striking “program applicant” and inserting “applicant”;

(iii) in subparagraph (A)—

(I) by inserting after “subdivision of a State,” the following: “Territory,”; and

(II) by striking “institution of higher education, or Federal agency” and inserting “or institution of higher education”;

(iv) in subparagraph (B)—

(I) by inserting after “subdivision of a State,” the following: “Territory,”; and

(II) by striking “institution of higher education, or Federal agency” and inserting “or institution of higher education”;

(7) in subsection (h) (as so redesignated), by striking the period and inserting “or is already receiving financial assistance from the Corporation.”.

SEC. 1309. NATIONAL SERVICE PROGRAM ASSISTANCE REQUIREMENTS.

Section 131(c) (42 U.S.C. 12583(c)) is amended—

(1) in paragraph (1)—

(A) by amending subparagraph (A) to read as follows:

“(A) the community served, including, if appropriate, municipal and county governments in the area served, and potential participants in the program”;

(B) in subparagraph (B), by inserting “and” after “program”;

(C) by adding at the end the following:

“(C) municipalities and county governments in the areas being served”;

(2) by amending paragraph (3) to read as follows:

“(3) in the case of a program that is not funded through a State, including programs operated by nonprofit organizations seeking to operate a national service program in 2 or more States—

“(A) consult with and coordinate with the State Commission for the State in which the program operates; and

“(B) obtain confirmation from the State Commission that the applicant seeking assistance under this Act has consulted with and coordinated with the State Commission when seeking to operate a program in that State.”.

SEC. 1310. CONSIDERATION OF APPLICATIONS.

Section 133 (42 U.S.C. 12585) is amended—

(1) in subsection (c)(6), insert after subparagraph (E) the following:

“(F) Areas that have a mortgage foreclosure rate greater than the national average mortgage foreclosure rate for the most recent 12 months for which satisfactory data are available.”;

(2) in subsection (b)(2)(B), by striking “jobs or”;

(3) in subsection (d)(2)—

(A) by striking “and” at the end of subparagraph (F);

(B) by striking the period at the end of subparagraph (G) and inserting a semicolon; and

(C) by adding at the end the following:

“(H) programs that recruit veterans, particularly returning veterans, into service opportunities; and

“(I) programs that promote community-based efforts to meet the unique needs of military families while a member of the family is deployed, or when a member of the family returns from deployment.”.

SEC. 1311. DESCRIPTION OF PARTICIPANTS.

Section 137 (42 U.S.C. 12591) is amended—

(1) in subsection (a)—

(A) by striking paragraph (3); and

(B) by redesignating paragraphs (4), (5), and (6) as paragraphs (3), (4), and (5), respectively;

(2) in subsection (b)—

(A) in paragraph (1), by striking “paragraph (4)” and inserting “paragraph (3)”;

(B) in paragraph (2), by striking “between the ages of 16 and 25” and inserting “a 16-year-old out of school youth or an individual between the ages of 17 and 25”; and

(3) in subsection (c), by striking “(a)(5)” and inserting “(a)(4)”.

SEC. 1312. SELECTION OF NATIONAL SERVICE PARTICIPANTS.

Section 138 (42 U.S.C. 12592) is amended—

(1) in subsection (a) by striking “conducted by the State” and all that follows through “or other entity” and inserting “conducted by the entity”;

(2) in subsection (e)(2)(C) by inserting before the semicolon at the end the following: “, particularly those who were considered at the time of their service disadvantaged youth”.

SEC. 1313. TERMS OF SERVICE.

Section 139 (42 U.S.C. 12593) is amended—

(1) in subsection (b)(1), by striking “not less than 9 months and”;

(2) in subsection (b)(2), by striking “during a period of—” and all that follows through the period at the end and inserting “during a period of not more than 2 years.”;

(3) in subsection (b) by inserting at the end the following:

“(4) **EXTENSION OF TERM FOR DISASTER PURPOSES.**—

“(A) An individual in an approved national service position performing service directly related to disaster relief efforts may continue in a term of service for a period of 90 days beyond the period otherwise specified in sections 139(b) and 153 (e) or in section 104 of the Domestic Volunteer Service Act of 1973.

“(B) Service performed by an individual in an originally-agreed to term of service and service performed under this paragraph shall constitute a single term of service for purposes of sections 146(b) and (c) but may not receive an additional education award under section 141.”;

(4) in subsection (c)—

(A) in paragraph (1)(A), by striking “as demonstrated by the participant” and inserting “as determined by the organization responsible for granting a release, if the participant has otherwise performed satisfactorily and has completed at least 15 percent of the original term of service”;

(B) in paragraph (2)(A), by striking “provide to the participant that portion of the national service educational award” and inserting “certify the participant’s eligibility for that portion of the national service educational award”;

(C) in paragraph (2)(B), by striking “to allow return to the program with which the individual was serving in order”.

SEC. 1314. ADJUSTMENTS TO LIVING ALLOWANCE.

Section 140 (42 U.S.C. 12594) is amended—

(1) in subsection (a)—

(A) in paragraph (1), by striking “paragraph (3)” and inserting “paragraphs (2) and (3)”;

(B) by striking paragraph (2);

(C) by redesignating paragraph (3) as (2);

(D) by inserting after paragraph (2) (as so redesignated) the following:

“(3) **FEDERAL WORK-STUDY STUDENTS.**—The living allowance that may be provided to an individual whose term of service includes hours for which the individual receives Federal work study wages shall be reduced by the amount of the individual’s Federal work study award.”;

and

(E) in paragraph (4), by striking “a reduced term of service under section 139(b)(3)” and inserting “a term of service that is less than 12 months”;

(2) in subsection (b), by striking “shall include an amount sufficient to cover 85 percent of such taxes” and all that follows through the period at the end and inserting “may be used to pay such taxes.”;

(3) in subsection (c)—

(A) in paragraph (1) by adding “and” at the end;

(B) by striking paragraph (2); and

(C) by redesignating paragraph (3) as (2);

(4) in subsection (d)(1), by striking the second sentence; and

(5) by striking subsections (g) and (h).

Subtitle D—Amendments to Subtitle D (National Service Trust and Provision of National Service Educational Awards)

SEC. 1401. AVAILABILITY OF FUNDS IN THE NATIONAL SERVICE TRUST.

Section 145 (42 U.S.C. 12601) is amended—

(1) in subsection (a)—

(A) in paragraph (1)(B), by striking “section 148(e)” and inserting “section 148(f)”;

(B) in paragraph (2), by striking “pursuant to section 196(a)(2)” and inserting “pursuant to section 196(a)(2), if the terms of such donations direct that they be deposited in the National Service Trust”;

(2) in subsection (c), by striking “for payments of national service educational awards in accordance with section 148.” and inserting “for—

“(1) payments of summer of service educational awards and national service educational awards in accordance with section 148; and

“(2) payments of interest in accordance with section 148(f).”

SEC. 1402. INDIVIDUALS ELIGIBLE TO RECEIVE A NATIONAL SERVICE EDUCATIONAL AWARD FROM THE TRUST.

Section 146 (42 U.S.C. 12602) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1), by striking “if the individual” and inserting “if the organization responsible for an individual’s supervision certifies that the individual”;

(B) by striking paragraphs (1), (2), and (3) and inserting the following:

“(1) met the applicable eligibility requirements for the position; and

“(2)(A) for a full-time or part-time educational award, successfully completed the required term of service described in subsection (b) in an approved national service position; or

“(B) for a partial educational award—

“(i) satisfactorily performed prior to being granted a release for compelling personal circumstances under section 139(c); and

“(ii) served at least 15 percent of the required term of service described in subsection (b); and”;

(C) by redesignating paragraph (4) as paragraph (3);

(2) by striking subsection (c) and inserting the following:

“(c) **LIMITATION ON RECEIPT OF NATIONAL SERVICE EDUCATIONAL AWARDS.**—An individual may not receive, in national service educational awards, more than an amount equal to the aggregate value of 2 such awards for full-time service. The aggregate value of summer of service educational awards that an individual receives shall have no effect on the aggregate value of national service educational awards the individual may receive.”;

(3) in subsection (d)—

(A) in paragraph (1)—

(i) by striking “SEVEN-YEAR REQUIREMENT” and inserting “IN GENERAL”;

(ii) by striking “An” and inserting “Subject to paragraph (2), an”;

(B) in paragraph (2)—

(i) in subparagraph (A) by striking “or” at the end;

(ii) in subparagraph (B) by striking the period at the end and inserting “; or”;

(iii) by adding at the end the following:

“(C) is an individual eligible to receive a summer of service educational award, in which case the individual shall have a 10-year period to use such educational award beginning on the date that the individual completes the term of service that is the basis of such educational award.”;

(4) in subsection (e)(1)—

(A) by inserting after “qualifying under this section” the following: “or under section 120(c)(8)”;

(B) by inserting after “to receive a national service educational award” the following: “or a summer of service educational award”.

SEC. 1403. DETERMINATION OF THE AMOUNT OF NATIONAL SERVICE EDUCATIONAL AWARDS.

Section 147 (42 U.S.C. 12603) is amended—

(1) by amending subsection (a) to read as follows:

“(a) **AMOUNT FOR FULL-TIME NATIONAL SERVICE.**—Except as provided in subsection (c), an individual described in section 146(a) who successfully completes a required term of full-time national service in an approved national service position shall receive a national service educational award having a value equal to the maximum amount of a Federal Pell Grant that a student eligible under section 401(b)(2)(A) of the Higher Education Act of 1965 may receive for the award year for which the national service position is approved by the Corporation.”;

(2) in subsection (b), by inserting after “for each of not more than 2 of such terms of service” the following: “in the period of one year”.

SEC. 1404. DISBURSEMENT OF EDUCATIONAL AWARDS.

Section 148 (42 U.S.C. 12604) is amended—

(1) in subsection (a)—

(A) in paragraph (2), by striking “cost of attendance” and inserting “cost of attendance or other educational expenses”;

(B) in paragraph (3), by striking “and”;

(C) by redesignating paragraph (4) as paragraph (5); and

(D) by inserting after paragraph (3) the following:

“(4) to pay expenses incurred in enrolling in an educational institution or training establishment that meets the requirements of chapter 36 of title 38, United States Code (38 U.S.C. 3451 et seq.); and”;

(2) in subsection (b)(1) by inserting after “the national service educational award of the individual” the following: “, or an eligible individual under section 120(c)(8) who received a summer of service educational award”;

(3) in subsection (b)(2) by inserting after “the national service educational award” the following: “or the summer of service educational award, as applicable.”;

(4) in subsection (b)(5) by inserting after “the national service educational award” the following: “or the summer of service educational award, as applicable.”;

(5) in subsection (b)(7)—

(A) in subparagraph (A), by striking “, other than a loan to a parent of a student pursuant to section 428B of such Act (20 U.S.C. 1078-2); and” and inserting a semicolon;

(B) in subparagraph (B), by striking the period and inserting “; and”;

(C) by adding at the end the following:

“(C) any loan (other than a loan described in subparagraph (A) or (B)) determined by an institution of higher education to be necessary to cover a student’s educational expenses and made, insured, or guaranteed by—

“(i) an eligible lender, as defined in section 435 of the Higher Education Act of 1965 (20 U.S.C. 1085);

“(ii) the direct student loan program under part D of title IV of such Act;

“(iii) a State agency; or

“(iv) a lender otherwise determined by the Corporation to be eligible to receive disbursements from the National Service Trust.”;

(6) in subsection (c)(1), by inserting after “national service educational award” the following: “, or an eligible individual under section 120(c)(8) who desires to apply the individual’s summer of service educational award.”;

(7) in subsection (c)(2)(A), by inserting after “national service educational award” the following: “or summer of service educational award, as applicable.”;

(8) in subsection (c)(2)(C)(iii), by inserting after “national service educational awards received under this subtitle” the following: “or summer of service educational awards received under section 120(c)(8)”;

(9) in subsection (c)(3), by inserting after “national service educational awards” the following: “and summer of service educational awards”;

(10) in subsection (c)(5)—

(A) by inserting after “national service educational award” the following: “, or summer of service educational award, as applicable.”;

(B) by inserting after “additional” the following: “summer of service educational awards and additional”;

(11) in subsection (c)(6), by inserting after “national service educational award” the following: “and summer of service educational award”;

(12) in subsection (d), by inserting after “national service educational awards” the following: “and summer of service educational awards”;

(13) in subsection (e), by striking “subsection (b)(6)” and inserting “subsection (b)(7)”;

(14) in subsection (f), by striking “Director” and inserting “Chief Executive Officer”.

SEC. 1405. PROCESS OF APPROVAL OF NATIONAL SERVICE POSITIONS.

(a) **IN GENERAL.**—Subtitle D of title I (42 U.S.C. 12601 et seq.) is further amended by adding at the end the following new section:

“SEC. 149. PROCESS OF APPROVAL OF NATIONAL SERVICE POSITIONS.

“(a) **TIMING AND RECORDING REQUIREMENTS.**—

“(1) **IN GENERAL.**—Notwithstanding subtitles C and D, and any other provision of law, in approving a position as an approved national service position, the Corporation—

“(A) shall approve the position at the time the Corporation—

“(i) enters into an enforceable agreement with an individual participant to serve in a program carried out under subtitle E of title I of this Act or under title I of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4951 et seq.), or a summer of service educational award; or

“(ii) except as provided in clause (i), awards a grant to (or enters into a contract or cooperative agreement with) an entity to carry out a program for which such a position is approved under section 123; and

“(B) shall record as an obligation an estimate of the net present value of the national service educational award associated with the position, based on a formula that takes into consideration historical rates of enrollment in such a program, and of earning and using national service educational awards for such a program and remain available.

“(2) **FORMULA.**—In determining the formula described in paragraph (1)(B), the Corporation shall consult with the Director of the Congressional Budget Office.

“(3) **CERTIFICATION REPORT.**—The Chief Executive Officer of the Corporation shall annually prepare and submit to the appropriate committees of Congress a report that contains a certification that the Corporation is in compliance with the requirements of paragraph (1).

“(4) **APPROVAL.**—The requirements of this subsection shall apply to each approved national service position that the Corporation approves—

“(A) during fiscal year 2009; and

“(B) during any subsequent fiscal year.

“(b) **RESERVE ACCOUNT.**—

“(1) **ESTABLISHMENT AND CONTENTS.**—

“(A) **ESTABLISHMENT.**—Notwithstanding subtitles C and D, and any other provision of law, within the National Service Trust established under section 145, the Corporation shall establish a reserve account.

“(B) **CONTENTS.**—To ensure the availability of adequate funds to support the awards of approved national service positions for each fiscal year, the Corporation shall place in the account—

“(i) during fiscal year 2009, a portion of the funds that were appropriated for fiscal year 2009 or a previous fiscal year under section 501(a)(2), were made available to carry out subtitle C, D, or E of this title, subtitle A of title I of the Domestic Volunteer Service Act of 1973, or summer of service under section 120(c)(8), and remain available; and

“(ii) during fiscal year 2009 or a subsequent fiscal year, a portion of the funds that were appropriated for that fiscal year under section 501(a)(2) and were made available to carry out subtitle C, D, or E of this title, subtitle A of title I of the Domestic Volunteer Service Act of 1973, or summer of service under section 111(a)(5), and remain available.

“(2) **OBLIGATION.**—The Corporation shall not obligate the funds in the reserve account until the Corporation—

“(A) determines that the funds will not be needed for the payment of national service educational awards associated with previously approved national service positions and summer of service educational awards; or

“(B) obligates the funds for the payment of national service educational awards for such previously approved national service positions or summer of service educational awards, as applicable.

“(c) **AUDITS.**—The accounts of the Corporation relating to the appropriated funds for approved national service positions, and the records demonstrating the manner in which the Corporation has recorded estimates described in subsection (a)(1)(B) as obligations, shall be audited annually by independent certified public accountants or independent licensed public accountants certified or licensed by a regulatory authority of a State or other political subdivision of the United States in accordance with generally accepted auditing standards. A report containing the results of each such independent audit shall be included in the annual report required by subsection (a)(3).

“(d) **AVAILABILITY OF AMOUNTS.**—Except as provided in subsection (b), all amounts included in the National Service Trust under paragraphs (1), (2), and (3) of section 145(a) shall be available for payments of national service educational awards or summer of service educational awards under section 148.”.

(b) **CONFORMING REPEAL.**—Section 2 of the Strengthen AmeriCorps Program Act (Public Law 108-145; 117 Stat. 844; 42 U.S.C. 12605) is repealed.

Subtitle E—Amendments to Subtitle E (National Civilian Community Corps)

SEC. 1501. PURPOSE.

Section 151 (42 U.S.C. 12611) is amended to read as follows:

“SEC. 151. PURPOSE.

“It is the purpose of this subtitle to authorize the operation of, and support for, residential and other service programs that combine the best practices of civilian service with the best aspects of military service, including leadership

and team building, to meet national and community needs. Such needs to be met under such programs include those related to—

“(1) natural and other disasters;

“(2) infrastructure improvement;

“(3) environmental stewardship and conservation;

“(4) energy conservation;

“(5) urban and rural development; and

“(6) other unmet needs consistent with the purpose as described in this section.”.

SEC. 1502. PROGRAM COMPONENTS.

Section 152 (42 U.S.C. 12612) is amended—

(1) by amending the section heading to read as follows:

“SEC. 152. ESTABLISHMENT OF NATIONAL CIVILIAN COMMUNITY CORPS PROGRAM.”.

(2) in subsection (a), by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”;

(3) in subsection (b)—

(A) by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”;

(B) by striking “a Civilian Community Corps” and inserting “a National Civilian Community Corps”;

(4) in the heading of subsection (c), by striking “PROGRAMS” and inserting “COMPONENTS”;

(5) in subsection (c), by striking “program components are residential programs” and all that follows and inserting “programs referred to in subsection (b) may include a residential component.”.

SEC. 1503. ELIGIBLE PARTICIPANTS.

Section 153 (42 U.S.C. 12613) is amended—

(1) in subsection (a)—

(A) by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”;

(B) by striking “on Civilian Community Corps” and inserting “on National Civilian Community Corps”;

(2) in subsection (b), by striking “if the person” and all that follows through the period at the end and inserting “if the person will be at least 18 years of age on or before December 31 in the calendar year in which the individual enrolls in the program.”;

(3) in subsection (c)—

(A) by striking “BACKGROUNDS” and inserting “BACKGROUND”;

(B) by adding at the end the following: “The Director shall take appropriate steps, including through outreach and recruitment activities carried out by the chief executive officer, to increase the percentage of participants in the program who are disadvantaged youth toward 50 percent of all participants by year 2011. The Director shall report to the appropriate committees of Congress biennially on such efforts, any challenges faced, and the annual participation rates of disadvantaged youth in the program.”;

(4) by striking subsection (e).

SEC. 1504. SUMMER NATIONAL SERVICE PROGRAM.

Section 154 (42 U.S.C. 12614) is amended—

(1) in subsection (a)—

(A) by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”;

(B) by striking “on Civilian Community Corps” and inserting “on National Civilian Community Corps”;

(2) in subsection (b), by striking “shall be” and all that follows through the period at the end and inserting “shall be from economically and ethnically diverse backgrounds, including youth who are in foster care.”.

SEC. 1505. TEAM LEADERS.

Section 155 (42 U.S.C. 12615) is amended—

(1) by amending the section heading to read as follows:

“SEC. 155. NATIONAL CIVILIAN COMMUNITY CORPS.”;

(2) in subsection (a)—

(A) by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”;

(B) by striking “the Civilian Community Corps shall” and inserting “the National Civilian Community Corps shall”;

(3) in subsection (b)—

(A) by amending the subsection heading to read as follows:

“(b) MEMBERSHIP IN NATIONAL CIVILIAN COMMUNITY CORPS.—”;

(B) in paragraph (1), by inserting “National” before “Civilian Community Corps”;

(C) in paragraph (3)—

(i) by striking “superintendent” and inserting “campus director”;

(ii) by striking “camp” and inserting “campus”;

(D) by adding at the end the following:

“(4) TEAM LEADERS.—The Director may select from Corps members individuals with prior supervisory or service experience to be team leaders within units in the National Civilian Community Corps to perform service that includes leading and supervising teams of Corps members. Team leaders shall—

“(A) be selected without regard to the age limitation under section 153(b);

“(B) be members of the National Civilian Community Corps; and

“(C) be provided the rights and benefits applicable to Corps members, except that the limitation on the amount of living allowance shall not exceed 10 percent more than the amount established under section 158(b).”;

(4) in subsection (d)—

(A) by amending the subsection heading to read as follows:

“(d) CAMPUSES.—”;

(B) in paragraph (1)—

(i) by amending the paragraph heading to read as follows:

“(1) UNITS TO BE ASSIGNED TO CAMPUSES.—”;

(ii) by striking “in camps” and inserting “in campuses”;

(iii) by striking “camp” and inserting “campus”;

(iv) by striking “in the camps” and inserting “in the campuses”;

(C) by amending paragraph (2) to read as follows:

“(2) CAMPUS DIRECTOR.—There shall be a campus director for each campus. The campus director is the head of the campus.”;

(D) in paragraph (3)—

(i) by amending the paragraph heading to read as follows:

“(3) ELIGIBLE SITE FOR CAMPUS.—”;

(ii) by striking “A camp may be located” and inserting “A campus must be cost-effective and may, upon the completion of a feasibility study, be located”;

(5) in subsection (e)—

(A) by amending the paragraph heading to read as follows:

“(e) DISTRIBUTION OF UNITS AND CAMPUSES.—”;

(B) by striking “camps are distributed” and inserting “campuses are cost-effective and are distributed”;

(C) by striking “rural areas” and all that follows through the period at the end and inserting “rural areas such that each Corps unit in a region can be easily deployed for disaster and emergency response to such region.”;

(6) in subsection (f)—

(A) in paragraph (1)—

(i) by striking “superintendent” and inserting “campus director”;

(ii) by striking “camp” both places such term appears and inserting “campus”;

(B) in paragraph (2)—

(i) in the matter preceding subparagraph (A), by striking “superintendent of a camp” and inserting “campus director of a campus”;

(ii) in subparagraph (A)—

(I) by striking “superintendent” and inserting “campus director”;

(II) by striking “superintendent’s” and inserting “campus director’s”; and

(III) by striking “camp” each place such term appears and inserting “campus”;

(iii) in subparagraph (B), by striking “superintendent” and inserting “campus director”; and

(C) in paragraph (3), by striking “camp superintendent” and inserting “campus director”.

SEC. 1506. TRAINING.

Section 156 (42 U.S.C. 12616) is amended—

(1) in subsection (a)—

(A) by inserting “National” before “Civilian Community Corps”; and

(B) by adding at the end the following: “The Director shall ensure that to the extent practicable, each member of the Corps is trained in CPR, first aid, and other skills related to disaster preparedness and response.”;

(2) in subsection (b)(1), by inserting before the period at the end the following: “, including a focus on energy conservation, environmental stewardship or conservation, infrastructure improvement, urban and rural development, or disaster preparedness needs”; and

(3) by amending subsection (c)(2) to read as follows:

“(2) COORDINATION WITH OTHER ENTITIES.—Members of the cadre may provide, either directly or through grants, contracts, or cooperative agreements, the advanced service training referred to in subsection (b)(1) in coordination with vocational or technical schools, other employment and training providers, existing youth service programs, other qualified individuals, or organizations with expertise in training youth, including disadvantaged youth, in the skill areas described in such subsection.”.

SEC. 1507. CONSULTATION WITH STATE COMMISSIONS.

Section 157 (42 U.S.C. 12617) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1), by inserting “National” before “Civilian Community Corps”;

(B) in paragraph (1), by inserting before the semicolon the following: “with specific emphasis on projects in support of infrastructure improvement, disaster relief and recovery, the environment, energy conservation, and urban and rural development”; and

(C) in paragraph (2) by striking “service learning” and inserting “service-learning”;

(2) in subsection (b)—

(A) in paragraph (1)(A), by striking “and the Secretary of Housing and Urban Development” and inserting “the Secretary of Housing and Urban Development, the Administrator of the Environmental Protection Agency, the Administrator of the Federal Emergency Management Agency, the Secretary of Energy, the Secretary of Transportation, and the Chief of the United States Forest Service”;

(B) in paragraph (1)(B)—

(i) by inserting “community-based organizations and” before “representatives of local communities”; and

(ii) by striking “camp” both places such term appears and inserting “campus”;

(C) in paragraph (2), by inserting “State Commissions,” before “and persons involved in other youth service programs.”; and

(3) in subsection (c)—

(A) in paragraph (1)—

(i) by striking “superintendent” both places such term appears and inserting “campus director”; and

(ii) by striking “camp” both places such term appears and inserting “campus”; and

(B) in paragraph (2), by striking “camp superintendents” and inserting “campus directors”.

SEC. 1508. AUTHORIZED BENEFITS FOR CORPS MEMBERS.

Section 158 (42 U.S.C. 12618) is amended—

(1) in subsection (a) by inserting “National” before “Civilian Community Corps”; and

(2) in subsection (c)—

(A) in the matter preceding paragraph (1)—

(i) by inserting “National” before “Civilian Community Corps”; and

(ii) by inserting before the colon the following: “, as the Director determines appropriate”;

(B) in paragraph (6), by striking “Clothing” and inserting “Uniforms”; and

(C) in paragraph (7), by striking “Recreational services and supplies” and inserting “Supplies”.

SEC. 1509. PERMANENT CADRE.

Section 159 (42 U.S.C. 12619) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1), by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”; and

(B) in paragraph (1)—

(i) by inserting “including those” before “recommended”; and

(ii) by inserting “National” before “Civilian Community Corps”;

(2) in subsection (b)(1), by inserting “National” before “Civilian Community Corps”;

(3) in subsection (c)—

(A) in paragraph (1)(B)(i), by inserting “National” before “Civilian Community Corps”; and

(B) in paragraph (2)—

(i) in subparagraph (A)—

(I) by striking “The Director shall establish a permanent cadre of” and inserting “The Chief Executive Officer shall establish a permanent cadre that includes the Director and other appointed”; and

(II) by inserting “National” before “Civilian Community Corps”;

(ii) in subparagraph (B), by striking “The Director shall appoint the members” and inserting “The Chief Executive Officer shall consider the recommendations of the Director in appointing the other members”;

(iii) in subparagraph (C)—

(I) in the matter preceding clause (i), by striking “the Director” and inserting “the Chief Executive Officer”;

(II) in clause (iii) by striking “and” at the end;

(III) by redesignating clause (iv) as (v); and

(IV) by inserting after clause (iii) the following:

“(iv) give consideration to retired and other former law enforcement, fire, rescue, and emergency personnel, and other individuals with backgrounds in disaster preparedness, relief, and recovery; and”;

(iv) in subparagraph (E)—

(I) by inserting after “techniques” the following: “, including techniques for working with and enhancing the development of disadvantaged youth,”; and

(II) by striking “service learning” and inserting “service-learning”; and

(C) in the first sentence of paragraph (3), by striking “the members” and inserting “other members”.

SEC. 1510. CONTRACT AND GRANT AUTHORITY.

Section 161 (42 U.S.C. 12621) is amended—

(1) in subsection (a), by striking “perform any program function under this subtitle” and inserting “carry out the National Civilian Community Corps program”; and

(2) in subsection (b)(2), by inserting “National” before “Civilian Community Corps”.

SEC. 1511. OTHER DEPARTMENTS.

Section 162 (42 U.S.C. 12622) is amended—

(1) in subsection (a)—

(A) in paragraph (1)—

(i) in subparagraph (A), by inserting “National” before “Civilian Community Corps”; and

(ii) in subparagraph (B)(i), by striking “the registry established by” and all that follows through the semicolon and inserting “the registry established by section 1143a of title 10, United States Code”;

(B) in paragraph (2)(A), by striking “to be recommended for appointment” and inserting “from which individuals may be selected for appointment by the Director”; and

(C) in paragraph (3), by inserting “National” before “Civilian Community Corps”; and

(2) by striking subsection (b).

SEC. 1512. ADVISORY BOARD.

Section 163 (42 U.S.C. 12623) is amended—

(1) in subsection (a)—

(A) by striking “Upon the establishment of the Program, there shall also be” and inserting “There shall be”;

(B) by inserting “National” before “Civilian Community Corps Advisory Board”; and

(C) by striking “to assist” and all that follows through the period at the end and inserting “to assist the Corps in responding rapidly and efficiently in times of natural and other disasters. Consistent with the needs outlined in section 151, the Advisory Board members shall help coordinate activities with the Corps as appropriate, including the mobilization of volunteers and coordination of volunteer centers to help local communities recover from the effects of natural and other disasters.”;

(2) in subsection (b)—

(A) by redesignating paragraphs (8) and (9) as paragraphs (13) and (14), respectively;

(B) by inserting after paragraph (7) the following:

“(8) The Administrator of the Federal Emergency Management Agency.

“(9) The Secretary of Transportation.

“(10) The Chief of the United States Forest Service.

“(11) The Administrator of the Environmental Protection Agency.

“(12) The Secretary of Energy.”; and

(C) in paragraph (13), as so redesignated, by striking “industry,” and inserting “public and private organizations.”.

SEC. 1513. EVALUATION.

Section 164 (42 U.S.C. 12624) is amended—

(1) in the section heading, by striking “annual”;

(2) by striking “annual evaluation” and inserting “evaluation before September 30, 2014”;

(3) by inserting “National” before “Civilian Community Corps”; and

(4) by adding at the end the following: “Upon completing each such evaluation, the Corporation shall transmit to the appropriate committees of Congress a report on the evaluation.”.

SEC. 1514. REPEAL OF FUNDING LIMITATION.

Section 165 (42 U.S.C. 12625) is repealed.

SEC. 1515. DEFINITIONS.

Section 166 (42 U.S.C. 12626) is amended—

(1) by striking paragraphs (2), (3), and (9);

(2) by redesignating paragraphs (4) through (8) as paragraphs (5) through (9), respectively;

(3) by inserting after paragraph (1) the following:

“(2) CAMPUS DIRECTOR.—The term ‘campus director’, with respect to a Corps campus, means the head of the campus under section 155(d).

“(3) CORPS.—The term ‘Corps’ means the National Civilian Community Corps required under section 155 as part of the Civilian Community Corps Program.

“(4) CORPS CAMPUS.—The term ‘Corps campus’ means the facility or central location established

as the operational headquarters and boarding place for particular Corps units.”;

(4) in paragraph (5) (as so redesignated), by striking “Civilian Community Corps Demonstration Program” and inserting “National Civilian Community Corps Program”;

(5) in paragraph (6) (as so redesignated), by inserting “National” before “Civilian Community Corps”;

(6) in paragraph (8) (as so redesignated), by striking “The terms” and all that follows through “Demonstration Program” the first place such term appears and inserting “The term ‘Program’ means the National Civilian Community Corps Program”; and

(7) in paragraph (9) (as so redesignated)—

(A) in the heading by striking “SERVICE LEARNING” and inserting “SERVICE-LEARNING”; and

(B) in the matter preceding subparagraph (A) by striking “service learning” and inserting “service-learning”.

SEC. 1516. TERMINOLOGY.

Subtitle E of title I (42 U.S.C. 12611 et seq.) is amended—

(1) by striking the subtitle heading and inserting the following:

“Subtitle E—National Civilian Community Corps”;

and

(2) in section 160(a) (42 U.S.C. 12620(a)) by inserting “National” before “Civilian Community Corps”.

Subtitle F—Amendments to Subtitle E (Administrative Provisions)

SEC. 1601. FAMILY AND MEDICAL LEAVE.

Section 171(a)(1) (42 U.S.C. 12631(a)(1)) is amended by striking “with respect to a project” and inserting “with respect to a project authorized under the national service laws”.

SEC. 1602. ADDITIONAL PROHIBITIONS ON USE OF FUNDS.

Section 174 (42 U.S.C. 12634) is amended by adding at the end the following:

“(d) REFERRALS FOR FEDERAL ASSISTANCE.—A program may not receive assistance under the national service laws for the sole purpose of referring individuals to Federal assistance programs or State assistance programs funded in part by the Federal Government.”.

SEC. 1603. NOTICE, HEARING, AND GRIEVANCE PROCEDURES.

Section 176 (42 U.S.C. 12636) is amended—

(1) in subsection (a)(2)(A), by striking “30 days” and inserting “1 or more periods of 30 days not to exceed 90 days in total”; and

(2) in subsection (f)—

(A) in paragraph (1), by striking “A State or local applicant” and inserting “An entity”; and

(B) in paragraph (6)—

(i) in subparagraph (C), by striking “and”;

(ii) by redesignating subparagraph (D) as subparagraph (E); and

(iii) by inserting after subparagraph (C) the following:

“(D) in a grievance filed by an individual applicant or participant—

“(i) the applicant’s selection or the participant’s reinstatement, as the case may be; and

“(ii) other changes in the terms and conditions of service; and”.

SEC. 1604. RESOLUTION OF DISPLACEMENT COMPLAINTS.

Section 177 (42 U.S.C. 12637) is amended—

(1) in subsections (a) and (b), by striking “under this title” each place it appears and inserting “under the national service laws”;

(2) in subsection (b)(1), by striking “employee or position” and inserting “employee, position, or volunteer (other than a participant under the national service laws)”; and

(3) by adding at the end the following:

“(f) PARENTAL INVOLVEMENT.—

“(1) IN GENERAL.—Programs that receive assistance under the national service laws shall consult with the parents or legal guardians of children in developing and operating programs that include and serve children.

“(2) PARENTAL PERMISSION.—Programs that receive assistance under the national service laws shall, consistent with State law, before transporting minor children, provide the reason for and obtain written permission of the children’s parents.”.

SEC. 1605. STATE COMMISSIONS ON NATIONAL AND COMMUNITY SERVICE.

Section 178 (42 U.S.C. 12638) is amended—

(1) in subsection (c)(1), by adding at the end the following:

“(J) A representative of the volunteer sector.”;

(2) in subsection (c)(3), by striking “, unless the State permits the representative to serve as a voting member of the State Commission or alternative administrative entity”;

(3) by striking subsection (e)(1) and inserting the following:

“(1) Preparation of a national service plan for the State that—

“(A) is developed through an open and public process (such as through regional forums, hearings, and other means) that provides for maximum participation and input from companies, organizations, and public agencies using service and volunteerism as a strategy to meet critical community needs, including programs funded under the national service laws;

“(B) covers a 3-year period, the beginning of which may be set by the State;

“(C) is subject to approval by the chief executive officer of the State;

“(D) includes measurable goals and outcomes for the State consistent with those for national service programs as described in section 179(a)(1)(A);

“(E) ensures outreach to diverse community-based agencies that serve under-represented populations, by using established networks and registries at the State level, or establishing such networks and registries;

“(F) provides for effective coordination of funding applications submitted by the State and others within the State under the national service laws;

“(G) is updated annually, reflecting changes in practices and policies that will improve the coordination and effectiveness of Federal, State, and local resources for service and volunteerism within the State; and

“(H) contains such information as the State Commission considers to be appropriate or as the Corporation may require.”;

(4) by redesignating subsections (f) through (j) as subsections (h) through (l), respectively;

(5) by inserting after subsection (e) the following:

“(f) RELIEF FROM ADMINISTRATIVE REQUIREMENTS.—Upon approval of a State plan submitted under subsection (e)(1), the Chief Executive Officer may waive, or specify alternatives to, administrative requirements (other than statutory provisions) otherwise applicable to grants made to States under the national service laws, including those requirements identified by a State as impeding the coordination and effectiveness of Federal, State, and local resources for service and volunteerism within a State.

“(g) STATE PLAN FOR BABY BOOMER AND OLDER ADULT VOLUNTEER AND PAID SERVICE.—

“(1) IN GENERAL.—Notwithstanding any other provision of this section, to be eligible to receive a grant or allotment under subtitle B or C or to receive a distribution of approved national service positions under subtitle C, a State must work with appropriate State agencies and private entities to develop a comprehensive State plan for volunteer and paid service by members of the Baby Boom generation and older adults.

“(2) MATTERS INCLUDED.—The State plan shall include—

“(A) recommendations for public policy initiatives, including how to best tap the population of members of the Baby Boom generation and older adults as sources of social capital and as ways to address community needs;

“(B) recommendations to the State unit on aging on—

“(i) a marketing outreach plan to businesses;

“(ii) outreach to—

“(I) non-profit organizations;

“(II) the State’s Department of Education;

“(III) institutions of higher education; and

“(IV) other State agencies; and

“(C) recommendations for civic engagement and multigenerational activities, such as—

“(i) early childhood education, family literacy, and after school programs;

“(ii) respite services for older adults and caregivers; and

“(iii) transitions for members of the Baby Boom generation and older adults to purposeful work in their post career lives.

“(3) KNOWLEDGE INCORPORATED.—The State plan shall incorporate the current knowledge base regarding—

“(A) the economic impact of older workers’ roles in the economy;

“(B) the social impact of older workers’ roles in the community; and

“(C) the health and social benefits of active engagement for members of the Baby Boom generation and older adults.

“(4) PUBLICATION.—The State plan must be made public and be transmitted to the Chief Executive Officer.”; and

(6) in subsection (k)(1) (as redesignated by this section), by striking the period at the end and inserting “, consistent with section 174(d).”.

SEC. 1606. EVALUATION AND ACCOUNTABILITY.

Section 179 (42 U.S.C. 12639) is amended—

(1) by amending subsection (a) to read as follows:

“(a) IN GENERAL.—The Corporation shall provide, directly or through grants or contracts, for the continuing evaluation of programs that receive assistance under the national service laws, including evaluations that measure the impact of such programs, to determine—

“(1) the effectiveness of programs receiving assistance under the national service laws in achieving stated goals and the costs associated with such, including—

“(A) an evaluation of performance measures, as established by the Corporation in consultation with each grantee receiving assistance under the national service laws, which may include—

“(i) number of participants enrolled and completing terms of service compared to the stated goals of the program;

“(ii) number of volunteers recruited from the community in which the program was implemented;

“(iii) if applicable based on the program design, the number of individuals receiving or benefiting from the service conducted;

“(iv) number of disadvantaged and under-represented youth participants;

“(v) sustainability of project or program, including measures to ascertain the level of community support for the project or program;

“(vi) measures to ascertain the change in attitude toward civic engagement among the participants and the beneficiaries of the service; and

“(vii) other quantitative and qualitative measures as determined to be appropriate by the recipient of assistance; and

“(B) review of the implementation plan for reaching such measures described in subparagraph (A); and

“(2) the effectiveness of the structure and mechanisms for delivery of services, such as the effective utilization of the participants’ time, the management of the participants, and the ease with which recipients were able to receive services, to maximize the cost-effectiveness and the impact of such programs.”;

(2) in subsection (g)—

(A) in paragraph (3), by striking “National Senior Volunteer Corps” and inserting “National Senior Service Corps”; and

(B) in paragraph (9), by striking “to public service” and all that follows through the period at the end and inserting “to engage in service that benefits the community.”; and

(3) by adding at the end the following:

“(j) **RESERVED PROGRAM FUNDS FOR ACCOUNTABILITY.**—In addition to amounts appropriated to carry out this section, the Corporation may reserve up to 1 percent of total program funds appropriated for a fiscal year under the national service laws to support program accountability activities under this section.

“(k) **CORRECTIVE PLANS.**—

“(1) **IN GENERAL.**—A grantee that fails to reach the performance measures in subsection (a)(1)(A) as determined by the Corporation, shall reach an agreement with the Corporation on a corrective action plan to achieve the agreed upon performance measures.

“(2) **ASSISTANCE.**—

“(A) **NEW PROGRAM.**—For a program that has received assistance for less than 3 years and is failing to achieve the performance measures agreed upon under subsection (a)(1)(A), the Corporation shall—

“(i) provide technical assistance to the grantee to address targeted performance problems relating to the performance measures in subsection (a)(1)(A); and

“(ii) require quarterly reports from the grantee on the program’s progress toward achieving the performance measures in subsection (a)(1)(A) to the appropriate State, Territory, or Indian tribe and the Corporation.

“(B) **ESTABLISHED PROGRAMS.**—For a program that has received assistance for 3 years or more and is failing to achieve the performance measures agreed upon under subsection (a)(1)(A), the Corporation shall require quarterly reports from the grantee on the program’s progress towards achieving performance measures in subsection (a)(1)(A) to the appropriate State, Territory, or Indian tribe and the Corporation.

“(1) **FAILURE TO MEET PERFORMANCE LEVELS.**—If, after a period for correction as approved by the Corporation, a grantee or subgrantee fails to achieve the established levels of performance, the Corporation shall—

“(1) reduce the annual amount of the grant award attributable to the underperforming grantee or subgrantee by at least 25 percent; or

“(2) terminate assistance to the underperforming grantee or subgrantee, consistent with section 176(a).

“(m) **REPORTS.**—The Corporation shall submit to the appropriate committees of Congress not later than two years after the date of the enactment of this subsection, and annually thereafter, a report containing information on the number of—

“(1) grantees implementing corrective action plans;

“(2) grantees for which the Corporation offers technical assistance under subsection (k);

“(3) grantees for which the Corporation terminates assistance for a program under subsection (l);

“(4) entities that expressed interest in applying for assistance under a national service law but did not apply;

“(5) entities whose application was rejected; and

“(6) grantees meeting or exceeding their performance measures in subsection (a).”.

SEC. 1607. TECHNICAL AMENDMENT.

Section 181 (42 U.S.C. 12641) is amended by striking “Section 414” and inserting “Section 422”.

SEC. 1608. PARTNERSHIPS WITH SCHOOLS.

Section 182(b) (42 U.S.C. 12642(b)) is amended to read as follows:

“(b) **REPORT.**—

“(1) **FEDERAL AGENCY SUBMISSION.**—The head of each Federal agency shall prepare and submit to Corporation for Community and National Service a report concerning the implementation of this section, including an evaluation of the performance goals and benchmarks of the partnership programs.

“(2) **REPORT TO CONGRESS.**—The Corporation for National and Community Service shall prepare and submit to the appropriate committees of Congress a compilation of the information received under paragraph (1).”.

SEC. 1609. RIGHTS OF ACCESS, EXAMINATION, AND COPYING.

Section 183 (42 U.S.C. 12643) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1), by striking “The” and inserting “Consistent with otherwise applicable law, the”; and

(B) in paragraph (1), by inserting after “local government,” the following: “Territory,”;

(2) in subsection (b)—

(A) in the matter preceding paragraph (1), by striking “The” and inserting “Consistent with otherwise applicable law, the”; and

(B) in paragraph (1), by inserting after “local government,” the following: “Territory,”; and

(3) by adding at the end the following:

“(c) **INSPECTOR GENERAL.**—Consistent with otherwise applicable law, the Inspector General of the Corporation shall have access to, and the right to examine and copy, any books, documents, papers, records, and other recorded information in any form—

“(1) within the possession or control of the Corporation or any State or local government, Territory, Indian tribe, or public or private nonprofit organization receiving assistance directly or indirectly under this Act that relates to the assistance received, directly or indirectly, under this Act; and

“(2) that relates to the duties of the Inspector General under the Inspector General Act of 1978.”.

SEC. 1610. ADDITIONAL ADMINISTRATIVE PROVISIONS.

Subtitle F of title I (42 U.S.C. 12631 et seq.) is amended by adding at the end the following:

“SEC. 185. SUSTAINABILITY.

“(a) **GOALS.**—To ensure that recipients of assistance under the national service laws are carrying out sustainable projects or programs, the Corporation, after collaboration with State Commissions and consultation with recipients of assistance under the national service laws, may set sustainability goals supported by policies and procedures to—

“(1) build the capacity of the projects that receive assistance under the national service laws to meet community needs and lessen the dependence on Federal dollars to do so, taking into consideration challenges that programs in underserved rural or urban areas may face;

“(2) provide technical assistance to aid the recipients of assistance under the national service laws in acquiring and leveraging non-Federal funds for the projects; and

“(3) implement measures to ascertain whether the projects are generating sufficient community support.

“(b) **ENFORCEMENT.**—If a recipient does not meet the sustainability goals in subsection (a) for a project, the Corporation may take action as described in sections 176 and 179.

“SEC. 186. GRANT PERIODS.

“Unless otherwise specifically provided, the Corporation has authority to make a grant

under the national service laws for a period of 3 years.

“SEC. 187. GENERATION OF VOLUNTEERS.

“In making decisions on applications for assistance or approved national service positions under the national service laws, the Corporation shall take into consideration the extent to which the applicant’s proposal will increase the involvement of volunteers in meeting community needs. In reviewing the application for this purpose, the Corporation may take into account the mission of the applicant.

“SEC. 188. LIMITATION ON PROGRAM GRANT COSTS.

“(a) **LIMITATION ON GRANT AMOUNTS.**—Except as otherwise provided by this section, the amount of funds approved by the Corporation in a grant to operate a program authorized under the national service laws supporting individuals serving in approved national service positions may not exceed \$17,000 per full-time equivalent position.

“(b) **COSTS SUBJECT TO LIMITATION.**—The limitation in subsection (a) applies to the Corporation’s share of member support costs, staff costs, and other costs borne by the grantee or subgrantee to operate a program.

“(c) **COSTS NOT SUBJECT TO LIMITATION.**—The limitation in subsection (a) and (e)(1) shall not apply to expenses that are not included in the program operating grant award.

“(d) **ADJUSTMENTS FOR INFLATION.**—The amount specified in subsections (a) and (e)(1) shall be adjusted each year after 2008 for inflation as measured by the Consumer Price Index for All Urban Consumers published by the Secretary of Labor.

“(e) WAIVER AUTHORITY AND REPORTING REQUIREMENT.—

“(1) **WAIVER.**—The Chief Executive Officer may waive the requirements of this section, up to a maximum of \$19,500, if necessary to meet the compelling needs of a particular program, such as exceptional training needs for a program serving disadvantaged youth, increased costs relating to the participation of individuals with disabilities, tribal programs or programs located in the Territories and start-up costs associated with a first-time grantee, and up to a maximum of \$22,000 for Tribal residential programs.

“(2) **REPORTS.**—The Chief Executive Officer shall report to the appropriate committees of Congress annually on all waivers granted under this section, with an explanation of the compelling needs justifying such waivers.

“SEC. 189. AUDITS AND REPORTS.

“The Corporation shall comply with applicable audit and reporting requirements as provided in the Chief Financial Officers Act of 1990 (31 U.S.C. 501 et seq.) and the Government Corporation Control Act of 1945 (31 U.S.C. 9101 et seq.). The Corporation shall report to the appropriate committees of Congress any failure to comply with the requirements of such audits.

“SEC. 190. CRIMINAL HISTORY CHECKS.

“(a) **IN GENERAL.**—Entities selecting individuals to serve in a position in which the individual receives a Corporation grant-funded living allowance, stipend, education award, salary, or other remuneration in a program receiving assistance under the national service laws, shall, subject to regulations and requirements established by the Corporation, conduct criminal history checks for such individuals.

“(b) **REQUIREMENTS.**—A criminal history check shall, except in cases approved for good cause by the Corporation, include a name-based search of the National Sex Offender Registry established under the Adam Walsh Child Protection and Safety Act of 2006 (42 U.S.C. 16901 et seq.) and—

“(1) a search of the State criminal registry or repository in the State in which the program is

operating and the State in which the individual resides at the time of application; or

“(2) a Federal Bureau of Investigation fingerprint check.

“(c) **ELIGIBILITY PROHIBITION.**—An individual shall be ineligible to serve in a position described under subsection (a) if such individual—

“(1) refuses to consent to the criminal history check described in subsection (b);

“(2) makes a false statement in connection with such criminal history check;

“(3) is registered, or is required to be registered, on a State sex offender registry or the National Sex Offender Registry established under the Adam Walsh Child Protection and Safety Act of 2006 (42 U.S.C. 16901 et seq.); or

“(4) has been convicted of murder, as described in section 1111 of title 18, United States Code.

“SEC. 190A. REPORT ON PARTICIPANT INFORMATION.

“(a) **IN GENERAL.**—The Corporation shall annually collect and report to the appropriate committees of Congress any demographic and socioeconomic information on the participants of all programs or projects receiving assistance under the national service laws.

“(b) **INFORMATION COLLECTED AND REPORTED.**—

“(1) **PARTICIPANTS AGES 18 AND OLDER.**—The information collected and reported under this section for participants ages 18 and older shall include age, gender, race, ethnicity, annual income, employment status, disability status, veteran status, marital status, educational attainment, and household size, type, and income.

“(2) **PARTICIPANTS UNDER AGE 18.**—The information collected and reported under this section for participants under age 18 shall only include age, gender, race, ethnicity, and eligibility for free or reduced price lunch under the Richard B. Russell National School Lunch Act (42 U.S.C. 1751 et seq.).

“(c) **PUBLIC AVAILABILITY.**—The information collected and reported under this section shall be available to the public.

“(d) **CONFIDENTIALITY.**—The information collected and reported under this section shall not contain any personally identifiable information of any participant.”.

Subtitle G—Amendments to Subtitle G (Corporation for National and Community Service)

SEC. 1701. TERMS OF OFFICE.

Section 192 (42 U.S.C. 12651a) is amended—

(1) by striking subsection (c) and inserting the following:

“(c) **TERMS.**—Subject to subsection (e), each appointed member shall serve for a term of 5 years.”;

(2) by adding at the end the following:

“(e) **SERVICE UNTIL APPOINTMENT OF SUCCESSOR.**—A voting member of the Board whose term has expired may continue to serve for one year beyond expiration of the term if no successor is appointed or until the date on which a successor has taken office.”.

SEC. 1702. BOARD OF DIRECTORS AUTHORITIES AND DUTIES.

Section 192A(g) (42 U.S.C. 12651b(g)) is amended—

(1) in the matter preceding paragraph (1) by striking “shall—” and inserting “shall have responsibility for setting overall policy for the Corporation and shall—”;

(2) in paragraph (1), by inserting before the semicolon at the end the following: “, and review the budget proposal in advance of submission to the Office of Management and Budget and to Congress”;

(3) in paragraph (5)—

(A) in subparagraph (A) by striking “and” at the end;

(B) in subparagraph (B) by inserting “and” at the end; and

(C) by adding at the end the following:

“(C) review the performance of the Chief Executive Officer annually and forward a report on that review to the President.”;

(4) by amending paragraph (10) to read as follows:

“(10) notwithstanding any other provision of law—

“(A) make grants to or contracts with Federal and other public departments or agencies, and private nonprofit organizations for the assignment or referral of volunteers under the provisions of Title I of the Domestic Volunteer Service Act of 1973 (except as provided in section 108 of the Domestic Volunteer Service Act of 1973) which may provide that the agency or organization shall pay all or a part of the costs of the program; and

“(B) enter into agreements with other Federal agencies for the support of programs under the national service laws which—

“(i) may provide that the agency or organization shall pay all or a part of the costs of the program; and

“(ii) shall provide that the program (including any program operated by another Federal agency) will comply with all requirements related to evaluation, performance, and other goals applicable to similar programs under the national service laws, as determined by the Corporation; and”;

(5) in paragraph (11), by striking “September 30, 1995” and inserting “January 1, 2012”.

SEC. 1703. CHIEF EXECUTIVE OFFICER COMPENSATION.

Section 193(b) (42 U.S.C. 12651c(b)) is amended by striking the period and inserting “, plus 3 percent.”.

SEC. 1704. AUTHORITIES AND DUTIES OF THE CHIEF EXECUTIVE OFFICER.

Section 193A (42 U.S.C. 12651d) is amended—

(1) in subsection (b)—

(A) in the matter preceding paragraph (1), by striking “shall—” and inserting “, in collaboration with State Commissions, shall—”;

(B) in paragraph (1), by inserting after “a strategic plan” the following: “, including a plan for achieving 50 percent full-time approved national service positions by 2012.”;

(C) in paragraph (10)—

(i) in the matter preceding subparagraph (A), by striking “June 30, 1995,” and inserting “June 30 of each even-numbered year.”; and

(ii) in subparagraph (A)(i), by striking “section 122(c)(1)” and inserting “section 122(c)”;

(D) by adding at the end the following:

“(12) bolster the public awareness of and recruitment efforts for the wide range of service opportunities for citizens of all ages, regardless of socioeconomic status or geographic location, through a variety of methods, including—

“(A) print media;

“(B) the Internet and related emerging technologies;

“(C) television;

“(D) radio;

“(E) presentations at public or private forums;

“(F) other innovative methods of communication; and

“(G) outreach to offices of economic development, State employment security agencies, labor unions and trade associations, local education agencies, institutions of higher education, agencies and organizations serving veterans and people with disabilities, and other institutions or organizations from which participants for programs receiving assistance from the national service laws can be recruited;

“(13) identify and implement methods of recruitment to—

“(A) increase the diversity of participants in the programs receiving assistance under the national service laws; and

“(B) increase the diversity of service sponsors of programs desiring to receive assistance under the national service laws;

“(14) coordinate with organizations of former participants of national service programs for service opportunities that may include capacity building, outreach, and recruitment for programs receiving assistance under the national service laws;

“(15) collaborate with organizations with demonstrated expertise in supporting and accommodating individuals with disabilities, including institutions of higher education, to identify and implement methods of recruitment to increase the number of participants with disabilities in the programs receiving assistance under the national service laws;

“(16) identify and implement recruitment strategies and training programs for bilingual volunteers in the National Senior Service Corps under title II of the Domestic Volunteer Service Act of 1973;

“(17) collaborate with organizations which have established volunteer recruitment programs, including those on the Internet, to increase the recruitment capacity of the Corporation;

“(18) where practicable, provide application materials in languages other than English for those with limited English proficiency who wish to participate in a national service program;

“(19) collaborate with the training and technical assistance programs described in subtitle J and in appropriate paragraphs of section 199N(b);

“(20) coordinate the clearinghouses described in section 198F;

“(21) coordinate with entities receiving funds under Subtitle Establishing the Reserve Corps for alumni of the national service programs to serve in emergencies, disasters, and other times of national need;

“(22) identify and implement strategies to increase awareness among Indian tribes of the types and availability of assistance under the national service laws, increase Native American participation in national service, and collect information on challenges facing Native American communities;

“(23) conduct outreach to ensure the inclusion of low-income persons in national service programs and activities authorized under the National Senior Service Corps; and

“(24) ensure that outreach, awareness, and recruitment efforts are consistent with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794).”;

(2) in subsection (c)—

(A) in paragraph (9), by striking “and” at the end;

(B) by redesignating paragraph (10) as paragraph (11); and

(C) by inserting after paragraph (9) the following:

“(10) obtain the opinions of peer reviewers in evaluating applications to the Corporation for assistance under this title; and”;

(3) in subsection (f)—

(A) by inserting “AND STUDIES” after “EVALUATIONS” in the subsection heading; and

(B) by adding at the end the following new paragraphs:

“(3) **EVALUATION ON REACHING 50 PERCENT GOAL.**—The Corporation shall submit a report to the appropriate committees of Congress, not later than 18 months after the enactment of this section on actions taken to achieve the goal of 50 percent full-time approved national service positions as described in 193A(b)(1), including an assessment of the progress made toward achieving that goal and the actions to be taken in the coming year toward achieving that goal.

“(4) **EVALUATION ON APPLICATIONS.**—The Corporation shall submit a report to the appropriate

committees of Congress, not later than 18 months after the enactment of this section a report on the actions taken to modify the application procedures and reporting requirements for programs and activities funded under then national service laws, including a description of the consultation procedures with grantees.

“(5) **STUDY OF INVOLVEMENT OF VETERANS.**—The Corporation shall submit to the appropriate committees of Congress, not later than 3 years after the enactment of this section, on—

“(A) the number of veterans serving in national service programs historically by year;

“(B) strategies being undertaken to identify the specific areas of need of veterans, including any goals set by the Corporation for veterans participating in the service programs;

“(C) the impact of the strategies described in paragraph (2) and the Veterans Corps on enabling greater participation by veterans in the national service programs carried out under the national service laws;

“(D) how existing programs and activities carried out under the national service laws could be improved to serve veterans, veterans service organizations, families of active-duty military, including gaps in services to veterans;

“(E) the extent to which existing programs and activities carried out under the national service laws are coordinated and recommendations to improve such coordination including the methods for ensuring the efficient financial organization of services directed towards veterans; and

“(F) how to improve utilization of veterans as resources and volunteers.

“(6) **CONSULTATION.**—In conducting the studies and preparing the reports required under this subsection, the Corporation shall consult with veterans’ service organizations, the Department of Veterans Affairs, State veterans agencies, the Department of Defense, as appropriate, and other individuals and entities the Corporation considers appropriate.”;

(4) by adding at the end the following:

“(h) **AUTHORITY TO CONTRACT WITH A BUSINESS.**—The Chief Executive Officer may, through contracts or cooperative agreements, carry out the marketing duties described in subsection (b)(13), with priority given to those entities who have established expertise in the recruitment of disadvantaged youth, members of Indian tribes, and members of the Baby Boom generation.

“(i) **CAMPAIGN TO SOLICIT FUNDS.**—The Chief Executive Officer may conduct a campaign to solicit non-Federal funds to support outreach and recruitment of a diverse population of service sponsors of and participants in programs and projects receiving assistance under the national service laws.”.

SEC. 1705. DELEGATION TO STATES.

Consistent with section 193A(c)(1) (42 U.S.C. 12651d(c)(1)), the Chief Executive Officer may delegate to States specific programmatic authority upon a determination that such a delegation will increase efficiency in the operation or oversight of a program under the national service laws.

SEC. 1706. CHIEF FINANCIAL OFFICER.

Section 194(c) (42 U.S.C. 12651e(c)) is amended—

(1) by striking paragraphs (1) and (2) and inserting:

“(1) **IN GENERAL.**—The Corporation shall have a chief financial officer appointed subject to the provisions of title 5, United States Code, governing appointment in the competitive service and paid in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of that title relating to classification and General Schedule pay rates.”; and

(2) by redesignating paragraph (3) as paragraph (2).

SEC. 1707. NONVOTING MEMBERS; PERSONAL SERVICES CONTRACTS.

Section 195 (42 U.S.C. 12651f) is amended—

(1) in subsection (c)—

(A) in paragraph (2)(B), by inserting after “subdivision of a State,” the following: “Territory.”; and

(B) in paragraph (3)—

(i) in the heading, by striking “MEMBER” and inserting “NON-VOTING MEMBER”; and

(ii) by inserting “non-voting” before “member”; and

(2) by adding at the end the following new subsection:

“(g) **PERSONAL SERVICES CONTRACTS.**—The Corporation may enter into personal services contracts to carry out research, evaluation, and public awareness related to the national service laws.”.

SEC. 1708. DONATED SERVICES.

Section 196(a) (42 U.S.C. 12651g(a)) is amended—

(1) in paragraph (1)—

(A) by striking subparagraph (A) and inserting the following:

“(A) **ORGANIZATIONS AND INDIVIDUALS.**—Notwithstanding section 1342 of title 31, United States Code, the Corporation may solicit and accept the services of organizations and individuals (other than participants) to assist the Corporation in carrying out the duties of the Corporation under the national service laws, and may provide to such individuals the travel expenses described in section 192A(d).”;

(B) in subparagraph (B)—

(i) in the matter preceding clause (i), by striking “Such a volunteer” and inserting “A person who is a member of an organization or is an individual covered by subparagraph (A)”;

(ii) in clause (i), by striking “a volunteer” and inserting “such a person”;

(iii) in clause (ii), by striking “volunteers” and inserting “such a person”;

(iv) in clause (iii), by striking “such a volunteer” and inserting “such a person”; and

(C) in subparagraph (C)(i), by striking “Such a volunteer” and inserting “Such a person”; and

(2) by striking paragraph (3).

SEC. 1709. STUDY TO EXAMINE AND INCREASE SERVICE PROGRAMS FOR DISPLACED WORKERS.

(a) **PLANNING STUDY.**—The Corporation for National and Community Service shall conduct a study to identify—

(1) specific areas of need for displaced workers;

(2) how existing programs and activities carried out under the national service laws could better serve displaced workers and communities that have been adversely affected by plant closings and job losses;

(3) prospects for better utilization of skilled workers as resources and volunteers; and

(4) methods for ensuring the efficient financial organization of services directed towards displaced workers.

(b) **CONSULTATION.**—The study shall be carried out in consultation with the Department of Labor, State labor agencies, and other individuals and entities the Corporation considers appropriate.

(c) **REPORT.**—Not later than 1 year after the date of the enactment of this Act, the Corporation shall submit to the appropriate committees of Congress a report on the results of the planning study required by subsection (a), together with a plan for implementation of a pilot program using promising strategies and approaches for better targeting and serving displaced workers.

(d) **PILOT PROGRAM.**—From amounts made available to carry out this section, the Corporation shall develop and carry out a pilot program

based on the findings in the report submitted under subsection (c).

(e) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this section such sums as may be necessary for each of fiscal years 2010 through 2014.

SEC. 1710. STUDY TO EVALUATE THE EFFECTIVENESS OF A CENTRALIZED ELECTRONIC CITIZENSHIP VERIFICATION SYSTEM.

(a) **STUDY.**—The Corporation for National and Community Service shall conduct a study to determine the effectiveness of a centralized electronic citizenship verification system which would allow the Corporation to share employment eligibility information with the Department of Education in order to reduce administrative burden and lower costs for member programs. This study shall identify—

(1) the costs associated with establishing this program both for the Corporation and for the Department of Education;

(2) the benefits or detriments of such a system both for the Corporation and for the Department of Education;

(3) strategies for ensuring the privacy and security of member information that is shared between agencies and member organizations;

(4) the information that needs to be shared in order to fulfill employment eligibility requirements; and

(5) recommendations for implementation of such a program.

(b) **CONSULTATION.**—The study shall be carried out in consultation with the Department of Education and other individuals and entities the Corporation considers appropriate.

(c) **REPORT.**—Not later than 18 months after the date of the enactment of this Act, the Corporation shall submit to the appropriate committees of Congress a report on the results of the study required by subsection (a), together with a plan for implementation of a pilot program using promising strategies and approaches identified in such study, if the Corporation determines such program to be feasible.

(d) **PILOT PROGRAM.**—From amounts made available to carry out this section, the Corporation may develop and carry out a pilot program based on the findings in the report submitted under subsection (c).

(e) **AUTHORIZATION OF APPROPRIATIONS.**—There are authorized to be appropriated to carry out this section such sums as may be necessary for each of fiscal years 2010 through 2014.

Subtitle H—Amendments to Subtitle H

SEC. 1801. TECHNICAL AMENDMENTS TO SUBTITLE H.

(a) **ADDITIONAL CORPORATION ACTIVITIES TO SUPPORT NATIONAL SERVICE.**—Subtitle H is amended by inserting after the subtitle heading and before section 198 the following:

“PART I—ADDITIONAL CORPORATION ACTIVITIES TO SUPPORT NATIONAL SERVICE”.

(b) **TECHNICAL AMENDMENTS.**—Section 198 (42 U.S.C. 12653) is amended—

(1) in subsection (a), by striking “subsection (r)” and inserting “subsection (g)”;

(2) in subsection (b), by striking “to improve the quality” and all that follows through “including” the first place such term appears and inserting “to address emergent needs through summer programs and other activities, and to support service-learning programs and national service programs, including”; and

(3) by striking subsections (c), (d), (e), (f), (h), (i), (j), (l), (m), and (p) and redesignating subsections (g), (k), (n), (o), (q), (r), and (s) as subsections (c), (d), (e), (f), (g), (h), and (i), respectively.

(c) **CALL TO SERVICE CAMPAIGN AND SEPTEMBER 11TH DAY OF SERVICE.**—Section 198 (as amended by subsection (b) (42 U.S.C. 12653) is

further amended by adding at the end the following:

“(j) **CALL TO SERVICE CAMPAIGN.**—Not less than 180 days after enactment of this Act, the Corporation shall conduct a nationwide ‘Call to Service’ campaign, to encourage all people of the United States, regardless of age, race, ethnicity, religion, or economic status, to engage in full- or part-time national service, long- or short-term public service in the nonprofit sector or government, or volunteering. In conducting the campaign, the Corporation may collaborate with other Federal agencies and entities, State Commissions, Governors, nonprofit and faith-based organizations, businesses, institutions of higher education, elementary schools, and secondary schools.

“(k) **SEPTEMBER 11TH DAY OF SERVICE.**—

“(1) **FEDERAL ACTIVITIES.**—The Corporation may organize and carry out appropriate ceremonies and activities, which may include activities that are part of the broader Call to Service Campaign, in order to observe September 11th National Day of Service and Remembrance at the Federal level.

“(2) **ACTIVITIES.**—The Corporation may make grants and provide other support to community-based organizations to assist in planning and carrying out appropriate service, charity, and remembrance opportunities in conjunction with the September 11th National Day of Service and Remembrance.

“(3) **CONSULTATION.**—The Corporation may consult with and make grants or provide other forms of support to nonprofit organizations with expertise in representing September 11th families and other impacted constituencies, in promoting the establishment of September 11th as an annually recognized National Day of Service and Remembrance.”.

SEC. 1802. REPEALS.

(a) **REPEALS.**—The following provisions are repealed:

(1) **CLEARINGHOUSES.**—Section 198A (42 U.S.C. 12653a).

(2) **MILITARY INSTALLATION CONVERSION DEMONSTRATION PROGRAMS.**—Section 198C (42 U.S.C. 12653c).

(3) **SPECIAL DEMONSTRATION PROJECT.**—Section 198D (42 U.S.C. 12653d).

(b) **REDESIGNATION.**—Section 198B is redesignated as section 198A.

SEC. 1803. NEW FELLOWSHIPS.

Subtitle H is further amended by adding at the end the following new sections:

“SEC. 198B. SERVE AMERICA FELLOWSHIPS.

“(a) **DEFINITIONS.**—In this section:

“(1) **AREA OF NATIONAL NEED.**—The term ‘area of national need’ means an area involved in efforts to—

“(A) improve education in schools for economically disadvantaged students;

“(B) expand and improve access to health care;

“(C) improve energy efficiency and conserve natural resources;

“(D) improve economic opportunities for economically disadvantaged individuals; or

“(E) improve disaster preparedness and response.

“(2) **ELIGIBLE FELLOWSHIP RECIPIENT.**—The term ‘eligible fellowship recipient’ means an individual who is selected by a State Commission under subsection (c), as a result of such selection, is eligible for a ServeAmerica Fellowship.

“(3) **FELLOW.**—The term ‘fellow’ means an eligible fellowship recipient who is awarded a ServeAmerica Fellowship and is designated a fellow under subsection (e).

“(b) **GRANTS.**—

“(1) **IN GENERAL.**—From the amounts appropriated under section 501(a)(2) and allotted under paragraph (2)(A), the Corporation shall make grants (including financial assistance and

a corresponding allotment of approved national service positions), to the State Commission of each of the several States, the District of Columbia, or the Commonwealth of Puerto Rico with an application approved under this section, to enable such State Commission to award ServeAmerica Fellowships under subsection (e).

“(2) **ALLOTMENT; RULES.**—

“(A) **ALLOTMENT.**—The amount allotted to a State Commission for a fiscal year shall be equal to an amount that bears the same ratio to the amount appropriated under section 501(a)(2), as the population of the State bears to the total population of the several States, the District of Columbia, and the Commonwealth of Puerto Rico.

“(B) **RULES.**—Of the amount allotted to a State Commission under subparagraph (A)—

“(i) $\frac{1}{3}$ of such amount shall be awarded to Fellows serving in organizations that maintain not more than 10 full-time staff and not more than 10 part-time staff; and

“(ii) not more than 1.5 percent of such amount may be used for administrative costs.

“(C) **REALLOTMENT.**—If a State Commission does not apply for an allotment under this subsection, or if a State Commission’s application is not approved, the Corporation shall reallocate the amount of the State Commission’s allotment to the remaining State Commissions in accordance with subparagraph (A).

“(3) **NUMBER OF POSITIONS.**—The Corporation shall—

“(A) establish or increase the number of approved national service positions under this subsection during each of fiscal years 2010 through 2014;

“(B) establish the number of approved positions at 500 for fiscal year 2010; and

“(C) increase the number of the approved positions to—

“(i) 750 for fiscal year 2011;

“(ii) 1,000 for fiscal year 2012;

“(iii) 1,250 for fiscal year 2013; and

“(iv) 1,500 for fiscal year 2014.

“(4) **USES OF GRANT FUNDS.**—

“(A) **REQUIRED USES.**—A grant awarded under this subsection shall be used to enable fellows to carry out service projects in areas of national need.

“(B) **PERMITTED USES.**—A grant awarded under this subsection may be used for—

“(i) oversight activities and mechanisms for the service sites as determined by the State Commission or the Corporation, which may include site visits;

“(ii) activities to augment the experience of participants in approved national service positions under this section, including activities to engage such participants in networking opportunities with other national service participants; and

“(iii) recruitment or training activities for participants in approved national service positions under this section.

“(5) **APPLICATIONS.**—To be eligible to receive a grant under this subsection, a State Commission shall submit an application to the Corporation at such time, in such manner, and containing such information as the Corporation may require, including information on the criteria and procedures that the State Commission will use for overseeing ServeAmerica Fellowship placements for service projects, under subsection (e).

“(c) **ELIGIBLE FELLOWSHIP RECIPIENTS.**—

“(1) **APPLICATION.**—

“(A) **IN GENERAL.**—An applicant desiring to become an eligible fellowship recipient shall submit an application to a State Commission, at such time and in such manner as the Commission may require, and containing the information described in subparagraph (B) and such additional information as the Commission may require. An applicant may submit such applica-

tion to only one State Commission for a fiscal year.

“(B) **CONTENTS.**—The Corporation shall specify information to be provided in an application submitted under this subsection, which shall include—

“(i) a description of the area of national need that the applicant intends to address in the service project;

“(ii) a description of the skills and experience the applicant has to address the area of national need;

“(iii) a description of the type of service the applicant plans to provide as a fellow; and

“(iv) information identifying the local area in which the applicant plans to serve, for the service project.

“(2) **SELECTION.**—Each State Commission shall select the applicants received by the State Commission for a fiscal year, the number of eligible fellowship recipients that may be supported for that fiscal year based on the grant received by the State Commission under subsection (b).

“(d) **SERVICE SPONSOR ORGANIZATIONS.**—

“(1) **IN GENERAL.**—Each service sponsor organization shall—

“(A) be a nonprofit organization or an institution of higher education that is not a Campus of Service (as described in section 119);

“(B) satisfy qualification criteria established by the Corporation or the State Commission, including standards relating to organizational capacity, financial management, and programmatic oversight;

“(C) not be a recipient of other national service awards; and

“(D) at the time of registration with a State Commission, enter into an agreement providing that the service sponsor organization shall—

“(i) abide by all program requirements;

“(ii) provide an amount described in subsection (e)(3)(b) for each fellow serving with the organization through the ServeAmerica Fellowship;

“(iii) be responsible for certifying whether each fellow serving with the organization successfully completed the ServeAmerica Fellowship, and record and certify in a manner specified by the Corporation the number of hours served by a fellow for purposes of determining the fellow’s eligibility for benefits; and

“(iv) provide timely access to records relating to the ServeAmerica Fellowship to the State Commission, the Corporation, and the Corporation’s Inspector General.

“(2) **REGISTRATION.**—

“(A) **REQUIREMENT.**—No service sponsor organization may receive a fellow under this subsection until the organization registers with the State Commission;

“(B) **CLEARINGHOUSE.**—The State Commission shall maintain a list of registered service sponsor organizations on a public website;

“(C) **REVOCATION.**—If a State Commission determines that a service sponsor organization is in violation of any of the applicable provisions of this section—

“(i) the State Commission shall revoke the registration of the organization;

“(ii) the organization shall not be eligible to receive a national service award under this title, for not less than 5 years; and

“(iii) the State Commission shall have the right to remove a fellow from the organization and relocate the fellow to another site.

“(e) **FELLOWS.**—

“(1) **IN GENERAL.**—To be eligible to participate in a service project as a fellow and receive a ServeAmerica Fellowship, an eligible fellowship recipient shall—

“(A) within 3 months after being selected as an eligible fellowship recipient, select a registered service sponsor organization described in subsection (d) with which the recipient is interested in serving under this section; and

“(B) enter into an agreement with the organization—

“(i) that specifies the service the recipient will provide if the placement is approved; and

“(ii) in which the recipient agrees to serve for 1 year on a full-time or part-time basis (as determined by the Corporation); and

“(iii) submit such agreement to the State Commission.

“(2) AWARD.—Upon receiving the eligible fellowship recipient's agreement under paragraph (1), the State Commission shall award a ServeAmerica Fellowship to the recipient and designate the recipient as a fellow.

“(3) FELLOWSHIP AMOUNT.—

“(A) IN GENERAL.—From amounts received under subsection (b), each State Commission shall award each of the State's fellows a ServeAmerica Fellowship amount that is equal to 50 percent of the amount of the total average annual subsistence allowance provided to VISTA volunteers under section 105 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4955).

“(B) AMOUNT FROM SERVICE SPONSOR ORGANIZATION.—Except as provided in subsection (C), the service sponsor organization shall award to the fellow serving such organization an amount that will ensure that the total award received by the fellow for service in the service project (consisting of such amount and the ServeAmerica Fellowship amount the fellow receives under subparagraph (A)) is equal to or greater than 70 percent of the average annual subsistence allowance provided to VISTA volunteers under section 105 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4955).

“(C) MAXIMUM LIVING ALLOWANCE.—

“(i) IN GENERAL.—The total amount that may be provided to a fellow under this subparagraph shall not exceed 100 percent of the average annual subsistence allowance provided to VISTA volunteers under section 105 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4955).

“(ii) SMALL ORGANIZATIONS.—A service sponsor organization meeting the requirements of subsection (b)(2)(B)(i) shall award to the fellow serving such organization an amount that will ensure that the total award received by the fellow for service in the service project (consisting of that amount and the ServeAmerica Fellowship amount that fellows receive under clause (i) is equal to or greater than 60 percent of the average annual subsistence allowance provided to VISTA volunteers under section 105 of the Domestic Volunteer Service Act of 1973.

“(D) PRORATION OF AMOUNT.—In the case of a fellow who is authorized to serve a part-time term of service under the agreement described in subparagraph (1)(B)(ii), the amount provided to a fellow under this subparagraph shall be prorated accordingly.

“(E) WAIVER.—The Corporation may allow a State Commission to waive the amount required under subparagraph (B) from the service sponsor organization for a fellow serving the organization if—

“(i) such requirement is inconsistent with the objectives of the ServeAmerica Fellowship program; and

“(ii) the amount provided to the fellow under subparagraph (A) is sufficient to meet the necessary costs of living (including food, housing, and transportation) in the area in which the ServeAmerica Fellowship program is located.

“(f) COMPLIANCE WITH INELIGIBLE SERVICE CATEGORIES.—Service under a ServeAmerica Fellowship shall comply with section 132(a). For purposes of applying that section to this subsection, a reference to assistance shall be considered to be a reference to assistance provided under this section.

“(g) REPORTS.—Each service sponsor organization that receives a fellow under this sub-

section shall, on a biweekly basis, report to the State Commission on the number of hours served and the services provided by that fellow. The Corporation shall establish a web portal for the organizations to use in reporting the information.

“(h) EDUCATIONAL AWARDS.—A fellow who serves in a service project under this section shall be considered to have served in an approved national service position and, upon meeting the requirements of section 147 for full-time or part-time national service, shall be eligible for a national service educational award described in such section. The Corporation shall transfer an appropriate amount of funds to the National Service Trust to provide for the national service educational awards for such fellow.

“SEC. 198C. SILVER SCHOLARSHIPS AND ENCORE FELLOWSHIPS.

“(a) SILVER SCHOLARSHIP.—

“(1) ESTABLISHMENT.—The Corporation may award grants, including fixed-amount grants (in accordance with section 129(l)) to community-based organizations to carry out a Silver Scholarship Grant Program for individuals age 55 and older to complete not less than 500 hours of service in a year carrying out projects of national need and to receive a Silver Scholarship in the form of a \$1,000 education award. Under such a program—

“(A) the Corporation shall establish criteria for the types of the service required to be performed to receive such award; and

“(B) the individual receiving the award shall use such award in accordance with sections 146(c), 146(d), and 148(c).

“(2) TERM.—Each program funded under this subsection shall be carried out over a period of 3 years, which may include 1 planning year and 2 additional grant years, with a 1-year extension possible, if the program meets performance measures developed in accordance with section 179(a) and any other criteria determined by the Corporation.

“(3) APPLICATIONS.—To be eligible to carry out a program under this subsection, a community-based organization shall submit to the Corporation an application at such time and in such manner as the Chief Executive Officer may reasonably require. A community-based organization approved by the Corporation shall be a listed organization as described in subsection (b)(2)(D).

“(4) COLLABORATION ENCOURAGED.—A community-based organization awarded a grant under this subsection is encouraged to collaborate with programs funded under title II of the Domestic Volunteer Service Act in carrying out this program.

“(5) ELIGIBILITY FOR SCHOLARSHIP.—An individual is eligible to receive a Silver Scholarship if the community-based organization certifies to the Corporation that the individual has completed not less than 500 hours of service under this section.

“(6) SUPPORT SERVICES.—A community-based organization receiving a grant under this subsection may use a portion of the fixed-amount grant to provide transportation services to an eligible individual to allow such individual to participate in a service project.

“(b) ENCORE FELLOWSHIPS.—

“(1) ESTABLISHMENT.—The Corporation may award 1-year Encore Fellowships to enable individuals age 55 or older to—

“(A) carry out service projects in areas of national need; and

“(B) to receive training and development in order to transition to full- or part-time public service in the nonprofit sector or government.

“(2) PROGRAM.—In carrying out the program, the Corporation shall—

“(A) maintain a list of eligible organizations for which Encore Fellows may be placed to

carry out service projects through the program and shall provide the list to all Fellowship recipients; and

“(B) at the request of a Fellowship recipient—

“(i) determine whether the requesting recipient is able to meet the service needs of a listed organization, or another organization that the recipient requests in accordance with subparagraph (E), for a service project; and

“(ii) upon making a favorable determination under clause (i), award the recipient with an Encore Fellowship, and place the recipient with the organization as an Encore Fellow under subparagraph (E).

“(C) ELIGIBLE RECIPIENTS.—

“(i) IN GENERAL.—An individual desiring to be selected as a Fellowship recipient shall—

“(I) be an individual who—

“(aa) is at least 55 years of age as of the time the individual applies for the program; and

“(bb) is not engaged in, but who wishes to engage in, full- or part-time public service in the nonprofit sector or government; and

“(II) submit an application to the Corporation, at such time, in such manner, and containing such information as the Corporation may require, including—

“(aa) a description of the area of national need that the applicant hopes to address through the service project;

“(bb) a description of the skills and experience the applicant has to address an area of national need; and

“(cc) information identifying the region of the United States in which the applicant wishes to serve.

“(ii) SELECTION BASIS.—In determining which individuals to select as Fellowship recipients, the Corporation shall—

“(I) select not more than 10 individuals from each State; and

“(II) give priority to individuals with skills and experience for which there is an ongoing high demand in the nonprofit sector and government.

“(D) LISTED ORGANIZATIONS.—To be listed under subparagraph (A), an organization shall—

“(i) be a nonprofit organization; and

“(ii) submit an application to the Corporation at such time, in such manner, and containing such information as the Corporation may require, including—

“(I) a description of—

“(aa) the services and activities the organization carries out generally;

“(bb) the area of national need that the organization seeks to address through a service project; and

“(cc) the services and activities the organization seeks to carry out through the proposed service project;

“(II) a description of the skills and experience that an eligible Encore Fellowship recipient needs to be placed with the organization as an Encore Fellow for the service project;

“(III) a description of the training and leadership development the organization shall provide an Encore Fellow placed with the organization to assist the Encore Fellow in obtaining a public service job in the nonprofit sector or government after the period of the Encore Fellowship; and

“(IV) evidence of the organization's financial stability.

“(E) PLACEMENT.—

“(i) REQUEST FOR PLACEMENT WITH LISTED ORGANIZATIONS.—To be placed with a listed organization in accordance with subparagraph (B)(ii) for a service project, an eligible Encore Fellowship recipient shall submit an application for such placement to the Corporation at such time, in such manner, and containing such information as the Corporation may require.

“(ii) REQUEST FOR PLACEMENT WITH OTHER ORGANIZATION.—An eligible Encore Fellowship

recipient may apply to the Corporation to serve the recipient's Encore Fellowship year with a nonprofit organization that is not a listed organization. Such application shall be submitted to the Corporation at such time, in such manner, and containing such information as the Corporation shall require, and shall include—

- “(I) an identification and description of—
 - “(aa) the organization;
 - “(bb) the area of national need the organization seeks to address; and
 - “(cc) the services or activities the organization carries out to address such area of national need;
- “(II) a description of the services the eligible Encore Fellowship recipient shall provide for the organization as an Encore Fellow; and
- “(III) a letter of support from the leader of the organization, including—
 - “(aa) a description of the organization's need for the eligible Encore Fellowship recipient's services;
 - “(bb) evidence that the organization is financially sound;
 - “(cc) an assurance that the organization will provide training and leadership development to the eligible Encore Fellowship recipient if placed with the organization as an Encore Fellow, to assist the Encore Fellow in obtaining a public service job in the nonprofit sector or government after the period of the Encore Fellowship; and
 - “(dd) a description of the training and leadership development to be provided to the Encore Fellowship recipient if so placed.
- “(iii) PLACEMENT AND AWARD OF FELLOWSHIP.—If the Corporation determines that the eligible Encore Fellowship recipient is able to meet the service needs (including skills and experience to address an area of national need) of the organization that the eligible fellowship recipient requests under clause (ii) or (iii), the Corporation shall—
 - “(I) approve the placement of the eligible Encore Fellowship recipient with the organization;
 - “(II) award the eligible Encore Fellowship recipient an Encore Fellowship for a period of 1 year and designate the eligible Encore Fellowship recipient as an Encore Fellow; and
 - “(III) in awarding the Encore Fellowship, make a payment, in the amount of \$11,000, to the organization to enable the organization to provide living expenses to the Encore Fellow for the year in which the Encore Fellow agrees to serve.
- “(F) MATCHING FUNDS.—An organization that receives an Encore Fellow under this subsection shall agree to provide, for the living expenses of the Encore Fellow during the year of service, non-Federal contributions in an amount equal to not less than \$1 for every \$1 of Federal funds provided to the organization for the Encore Fellow through the fellowship.
- “(G) TRAINING AND ASSISTANCE.—Each organization that receives an Encore Fellow under this subsection shall provide training, leadership development, and assistance to the Encore Fellow, and conduct oversight of the service provided by the Encore Fellow.
- “(H) LEADERSHIP DEVELOPMENT.—Each year, the Corporation shall convene current and former Encore Fellows to discuss the Encore Fellows' experiences related to service under this subsection and discuss strategies for increasing leadership and careers in public service in the nonprofit sector or government.
- “(c) EVALUATIONS.—The Corporation shall conduct an independent evaluation of the programs authorized under subsections (a) and (b) and widely disseminate the results, including recommendations for improvement, to the service community through multiple channels, including the Corporation's Resource Center or a clearinghouse of effective strategies.”.

SEC. 1804. INNOVATIVE AND MODEL PROGRAM SUPPORT.

Subtitle H is further amended by adding at the end the following:

“PART II—INNOVATIVE AND MODEL PROGRAM SUPPORT

“SEC. 198D. INNOVATIVE AND MODEL PROGRAM SUPPORT.

“(a) METHODS OF CONDUCTING ACTIVITIES.—The Corporation may, through grants and fixed-amount grants (in accordance with section 129(l)), carry out the following programs:

“(1) PROGRAMS FOR DISADVANTAGED YOUTH.—A program selected from among those listed in 122(a) where no less than 75 percent of the participants are disadvantaged youth.

“(A) COMPONENTS OF PROGRAMS.—Such programs may include life skills training, employment training, educational counseling, program to complete a high-school diploma or GED, counseling, or a mentoring relationship with an adult volunteer.

“(B) PRIORITY.—Priority shall be given to programs that engage retirees to serve as mentors.

“(2) PROGRAMS THAT ENGAGE YOUTH UNDER THE AGE OF 17.—Programs that engage youth under the age of 17 in service to the community to meet unmet human, educational, environmental, emergency and disaster preparedness, or public safety needs and may be a summer program or a year-round program. Priority shall be given to programs that collaborate with the RSVP Program and the AmeriCorps programs.

“(3) PROGRAMS THAT REDUCE RECIDIVISM.—Programs that re-engage court-involved youth and adults with the goal of reducing recidivism. Priority shall be given to such programs that create support systems beginning in corrections facilities, and programs that have life skills training, employment training, an education program, including a program to complete a high-school diploma or GED, educational and career counseling, post program placement, and support services, which could begin in corrections facilities. The program may include health and wellness programs, including but not limited to drug and alcohol treatment, mental health counseling, and smoking cessation.

“(4) PROGRAMS THAT RECRUIT CERTAIN INDIVIDUALS.—Demonstration projects for programs that have as one of their primary purposes the recruitment and acceptance of court-involved youth and adults as participants, volunteers, or members. Such a program may serve any purpose otherwise permitted under this Act.

“(5) PROGRAMS THAT SUPPORT MENTORING.—Programs that support and strengthen direct-service youth mentoring programs by increasing State resources dedicated to mentoring and to allow mentoring partnerships to assist direct-service mentoring programs through subgrants, to promote quality standards for mentoring programs, to expand mentoring opportunities tailored to the needs and circumstances of youth, to increase the number of at-risk youth in the State receiving mentoring from screened and trained adult mentors; and

“(6) PROGRAMS THAT BUILD STATE AND NATIONAL MENTORING INFRASTRUCTURE.—Programs to create statewide Mentoring Partnerships or implement youth mentoring projects of national scope.

“(7) OTHER INNOVATIVE AND MODEL PROGRAMS.—Any other innovative and model programs that the Corporation considers appropriate.

“(b) REQUIREMENTS.—

“(1) THREE-YEAR TERM.—Each program funded under this part shall be carried out over a period of three years, which may include one planning year and two additional grant years, with a 1-year extension possible, if the program meets performance measures developed in ac-

cordance with section 179(a) and any other criteria determined by the Corporation.

“(2) MATCHING FUNDS.—

“(A) IN GENERAL.—The Federal share of the cost of carrying out a program for which a grant is made under this part may not exceed 76 percent of the total cost of the program in the first year and may not exceed 50 percent of the total cost of the program for the remaining years of the grant, including if the grant is extended for 1 year.

“(B) NON-FEDERAL CONTRIBUTION.—In providing for the remaining share of the cost of carrying out such a program, each recipient of a grant under this part—

“(i) shall provide for such share through a payment in cash or in kind, fairly evaluated, including facilities, equipment, or services; and

“(ii) may provide for such share through State sources or local sources, including private funds or donated services.

“(3) COLLABORATION ENCOURAGED.—Each program funded under this part is encouraged to collaborate with Learn and Serve, AmeriCorps, VISTA, and the National Senior Service Corps.

“(4) EVALUATION.—Upon completion of the program, the Corporation shall conduct an independent evaluation of the program and widely disseminate the results, including recommendations for improvement, to the service community through multiple channels, including the Corporation's Resource Center or a clearinghouse of effective strategies.

“(c) APPLICATIONS.—To be eligible to carry out a program under this part, an entity shall prepare, submit to the Corporation, and obtain approval of, an application at such time and in such manner as the Chief Executive Officer may reasonably require.”.

SEC. 1805. SOCIAL INNOVATION FUND.

Subtitle H is further amended by adding after Part II (as added by section 1804) the following new part:

“PART III—SOCIAL INNOVATION FUND

“SEC. 198E. SOCIAL INNOVATION FUND.

“(a) FINDINGS.—Congress finds the following:

“(1) Social entrepreneurs and other nonprofit community organizations are developing innovative and effective solutions to national and local challenges.

“(2) Increased public and private investment in replicating and expanding proven effective solutions developed by social entrepreneurs and other nonprofit community organizations, could allow those entrepreneurs and organizations to replicate and expand proven initiatives in communities.

“(3) Increased public and private investment to seed new solutions to our nation's most serious challenges will create a pipeline of new social innovations.

“(4) A Social Innovation Fund could leverage Federal investments to increase State, local, business, and philanthropic resources to replicate and expand proven solutions, and invest in seeding new innovations, to tackle specific identified community challenges.

“(b) PURPOSES.—The purposes of this section are—

“(1) to recognize and increase the impact of social entrepreneurs and other nonprofit community organizations in tackling national and local challenges;

“(2) to stimulate the development of a Social Innovation Fund that will increase private and public investment in nonprofit community organizations that are effectively addressing national and local challenges to allow such organizations to replicate and expand successful initiatives;

“(3) to assess the effectiveness of—

“(A) leveraging Federal investments to increase State, local, business, and philanthropic

resources to address national and local challenges;

“(B) providing resources to replicate and expand effective initiatives; and

“(C) seeding experimental initiatives; and

“(4) to strengthen the infrastructure to identify, invest in, and replicate and expand, initiatives with effective solutions to national and local challenges.

“(c) DEFINITIONS.—In this section—

“(1) the term ‘community organization’ means a nonprofit organization that carries out innovative, effective initiatives to address community challenges;

“(2) the term ‘covered entity’ means—

“(A) an existing grantmaking institution (existing as of the date on which the institution applies for a grant under this section); or

“(B) a partnership between—

“(i) such an existing grantmaking institution; and

“(ii) an additional grantmaking institution, a State Commission, or a chief executive officer of a unit of general local government; or

“(C) an individual nonprofit organization; and

“(3) the term ‘issue area’ means an area described in subsection (f)(3).

“(d) PROGRAM.—The Corporation shall establish a Social Innovation Fund grant program to make grants on a competitive basis to eligible entities.

“(e) PERIODS; AMOUNTS.—

“(1) For covered entities described in subsection (c)(2)(A) and (B), the Corporation shall make such grants for periods of 5 years, and may renew the grants for additional periods of 5 years, in amounts of not less than \$1,000,000 and not more than \$10,000,000 per year.

“(2) For covered entities described in subsection (c)(2)(C), the Corporation shall make grants for up to 3 years, and may renew the grants for additional periods of 3 years, in amounts up to \$500,000 per year.

“(f) ELIGIBILITY.—To be eligible to receive a grant under this section, an entity shall—

“(1) be a covered entity;

“(2) be focused on—

“(A) serving a specific local geographical area; or

“(B) addressing a specific issue area, in geographical areas that have the highest need in that issue area, as demonstrated by statistics concerning that need.

“(3) be focused on improving measurable outcomes relating to—

“(A) education for economically disadvantaged students;

“(B) child and youth development;

“(C) reductions in poverty or increases in economic opportunity for economically disadvantaged individuals;

“(D) health, including access to health care and health education;

“(E) resource conservation and local environmental quality;

“(F) individual or community energy efficiency;

“(G) civic engagement; or

“(H) reductions in crime;

“(4) For covered entities described in subsection (c)(2)(A) and (B), have an evidence-based decision-making strategy including, but not limited to—

“(A) use of evidence produced by prior rigorous evaluations of program effectiveness including, where available, well-implemented randomized controlled trials; and

“(B) a well-articulated plan to—

“(i) replicate and expand research-proven initiatives that have been shown to produce sizeable, sustained benefits to participants or society; or

“(ii) partner with a research organization to carry out rigorous evaluations to assess the effectiveness of approaches.

“(5) For covered entities described in subsection (c)(2)(C), have an evidence-based decision-making strategy including, but not limited to—

“(A) use of evidence produced by prior rigorous evaluations of program effectiveness including, where available, well-implemented randomized controlled trials; or

“(B) a well-articulated plan to—

“(i) conduct rigorous evaluations to assess the effectiveness of approaches; or

“(ii) partner with a research organization to carry out rigorous evaluations to assess the effectiveness of approaches to addressing national or local challenges.

“(6) For covered entities described in subsection (c)(2)(A) and (B), have a well-articulated process for assessing community organizations for subgrants; and

“(7) have appropriate policies, as determined by the Corporation, that protect against conflict of interest, self-dealing, and other improper practices.

“(g) APPLICATION.—To be eligible to receive a grant under subsection (d) for national leveraging capital, an eligible entity shall submit an application to the Corporation at such time, in such manner, and containing such information as the Corporation may specify, including, at a minimum—

“(1) an assurance that the eligible entity will—

“(A) use the funds received through that capital in order to make subgrants to community organizations that will use the funds to test new initiatives, or replicate or expand proven initiatives in low-income communities;

“(B) use the funds for growth capital or to test new initiatives;

“(C) in making decisions about subgrants for communities, consult with a diverse cross section of community representatives in the decisions, including individuals from the public, nonprofit, and for-profit private sectors; and

“(D) make subgrants of a sufficient size and scope to enable the community organizations to build their capacity to test or manage initiatives, and sustain replication or expansion of the initiatives;

“(2) an assurance that the eligible entity will not make any subgrants to the parent organizations of the eligible entity, a subsidiary organization of the parent organization, or, if the eligible entity applied for funds under this section as a partnership, any member of the partnership;

“(3) an identification of, as appropriate—

“(A) the specific local geographical area referred to in subsection (f)(2)(A) that the eligible entity is proposing to serve; or

“(B) geographical areas referred to in subsection (f)(2)(B) that the eligible entity is likely to serve;

“(4)(A) information identifying the issue areas in which the eligible entity will work to improve measurable outcomes;

“(B) statistics on the needs related to those issue areas in, as appropriate—

“(i) the specific local geographical area described in paragraph (3)(A); or

“(ii) the geographical areas described in paragraph (3)(B), including statistics demonstrating that those geographical areas have the highest need in the specific issue area that the eligible entity is proposing to address; and

“(C) information on the specific measurable outcomes related to the issue areas involved that the eligible entity will seek to improve;

“(5) information describing the process by which the eligible entity selected, or will select, community organizations to receive the subgrants, to ensure that the community organizations—

“(A) are institutions with proven initiatives, with track records of achieving specific out-

comes related to the measurable outcomes for the eligible entity, or are institutions that articulate a new solution with potential for substantial impact;

“(B) articulate measurable outcomes for the use of the subgrant funds that are connected to the measurable outcomes for the eligible entity;

“(C) will use the funds to test, replicate or expand their initiatives;

“(D) provide a well-defined plan for testing, replicating or expanding the initiatives funded;

“(E) can sustain the initiatives after the subgrant period concludes through reliable public revenues, earned income, or private sector funding;

“(F) have strong leadership and financial and management systems;

“(G) are committed to the use of data collection and evaluation for improvement of the initiatives;

“(H) will implement and evaluate innovative initiatives, to be important contributors to knowledge in their fields; and

“(I) will meet the requirements for providing matching funds specified in subsection (k);

“(6) information about the eligible entity, including its experience managing collaborative initiatives, or assessing applicants for grants and evaluating the performance of grant recipients for outcome-focused initiatives, and any other relevant information;

“(7) a commitment to meet the requirements of subsection (i) and a plan for meeting the requirements, including information on any funding that the eligible entity has secured to provide the matching funds required under that subsection;

“(8) a description of the eligible entity's plan for providing technical assistance and support, other than financial support, to the community organizations that will increase the ability of the community organizations to achieve their measurable outcomes;

“(9) information on the commitment, institutional capacity, and expertise of the eligible entity concerning—

“(A) collecting and analyzing data required for evaluations, compliance efforts, and other purposes;

“(B) supporting relevant research; and

“(C) submitting regular reports to the Corporation, including information on the initiatives of the community organizations, and the replication or expansion of such initiatives; and

“(10) a commitment to use data and evaluations to improve their model and be more transparent about its challenges; and

“(11) a commitment to cooperate with any evaluation activities undertaken by the Corporation.

“(h) SELECTION CRITERIA.—In selecting eligible entities to receive grants under this section, the Corporation shall—

“(1) select eligible entities on a competitive basis;

“(2) select eligible entities on the basis of the quality of their selection process, as described in subsection (g)(5), the capacity of the eligible entities to manage Social Innovation Funds, and the potential of the eligible entities to sustain the Funds after the conclusion of the grant period;

“(3) solicit broad community perspectives that inform grant-making decisions;

“(4) include among the grant recipients eligible entities that propose to provide subgrants to serve communities (such as rural low-income communities) that the eligible entities can demonstrate are significantly philanthropically underserved; and

“(5) select a geographically diverse set of eligible entities.

“(i) MATCHING FUNDS FOR GRANTS.—

“(1) IN GENERAL.—The Corporation may not make a grant to an eligible entity under this

section for a Community Solutions Fund unless the entity agrees that, with respect to the cost described in subsection (d) for that Fund, the entity will make available matching funds in an amount not less than \$1 for every \$1 of funds provided under the grant.

“(2) NON-FEDERAL SHARE.—The eligible entity shall provide the matching funds in cash.

“(j) RESERVED PROGRAM FUNDS FOR RESEARCH AND EVALUATION.—The Corporation may reserve up to 5 percent of total program funds appropriated to carry out this section for a fiscal year to support research and evaluation related to this section.

“(k) ADVISORY PANEL.—

“(1) IN GENERAL.—Under authority of section 195 (f) of the National and Community Service Act of 1990, the Chief Executive Officer, in consultation with the Board, shall establish an Advisory Panel to provide advice and input about carrying out this section. The Advisory Panel may collectively have experience in—

“(A) social entrepreneurship and social enterprise;

“(B) the management and operation of small nonprofit organizations and large nonprofit organizations;

“(C) business, including a business with experience working with a startup enterprises, experience growing businesses, experience with corporate social responsibility or a business with experience working with the nonprofit sector;

“(D) philanthropy, including an understanding of philanthropic challenges in urban and rural areas and in areas that are philanthropically underserved;

“(E) qualitative and quantitative social science research, including scientifically-rigorous evaluations of program effectiveness; data driven decision making and evidence-based policymaking;

“(F) volunteering, including effective volunteer management; and

“(G) government, including the management of government agencies and the role of government programs in providing services.

“(2) OTHER QUALIFICATIONS.—The Advisory Panel shall include a diverse range of individuals, including young people, and individuals from diverse economic, racial, ethnic, and religious backgrounds, and individuals from diverse geographic areas.

“(I) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated such sums as may be necessary to carry out this section.”.

SEC. 1806. CLEARINGHOUSES.

Subtitle H is further amended by adding at the end the following:

“PART IV—NATIONAL SERVICE PROGRAMS CLEARINGHOUSE

“SEC. 198F. NATIONAL SERVICE PROGRAMS CLEARINGHOUSE.

“(a) IN GENERAL.—The Corporation shall provide assistance, either by grant, contract, or cooperative agreement, to entities with expertise in the dissemination of information through clearinghouses to establish one or more clearinghouses for the national service laws.

“(b) FUNCTION OF CLEARINGHOUSE.—Such a clearinghouse may—

“(1) assist entities carrying out State or local service-learning and national service programs with needs assessments and planning;

“(2) conduct research and evaluations concerning service-learning or programs receiving assistance under the national service laws unless the recipient is receiving funds for such purpose under part III of subtitle B and under subtitle H;

“(3)(A) provide leadership development and training to State and local service-learning program administrators, supervisors, service sponsors, and participants; and

“(B) provide training to persons who can provide the leadership development and training described in subparagraph (A);

“(4) facilitate communication among entities carrying out service-learning programs and programs offered under the national service laws and participants in such programs;

“(5) provide and disseminate information and curriculum materials relating to planning and operating service-learning programs and programs offered under the national service laws, to States, Territories, Indian tribes, and local entities eligible to receive financial assistance under the national service laws;

“(6) provide and disseminate information regarding methods to make service-learning programs and programs offered under the national service laws accessible to individuals with disabilities;

“(7) disseminate applications in languages other than English;

“(8)(A) gather and disseminate information on successful service-learning programs and programs offered under the national service laws, components of such successful programs, innovative curricula related to service-learning, and service-learning projects; and

“(B) coordinate the activities of the Clearinghouse with appropriate entities to avoid duplication of effort;

“(9) make recommendations to State and local entities on quality controls to improve the quality of service-learning programs and programs offered under the national service laws;

“(10) assist organizations in recruiting, screening, and placing a diverse population of service-learning coordinators and program sponsors;

“(11) disseminate effective strategies for working with disadvantaged youth in national service programs as determined by organizations with an established expertise working with such youth;

“(12) collaborate with State and local Mentoring Partnerships and directly with youth mentoring organizations to disseminate effective strategies for the recruiting, training, and screening of responsible adult mentors and best practices for building quality relationships between adult mentors and youth mentees; and

“(13) carry out such other activities as the Chief Executive Officer determines to be appropriate.”.

Subtitle I—Training and Technical Assistance

SEC. 1821. TRAINING AND TECHNICAL ASSISTANCE.

Title I is further amended by adding at the end the following new subtitle:

“Subtitle J—Training and Technical Assistance

“SEC. 199N. TRAINING AND TECHNICAL ASSISTANCE.

“(a) IN GENERAL.—The Corporation shall conduct, either directly or through grants, contracts, or cooperative agreements, including through State Commissions on National and Community Service, appropriate training and technical assistance to—

“(1) programs receiving assistance under the national service laws; and

“(2) entities (particularly those in rural areas and underserved communities)—

“(A) that desire to carry out or establish national service programs;

“(B) that desire to apply for assistance under the national service laws; or

“(C) that desire to apply for a subgrant under the national service laws.

“(b) ACTIVITIES INCLUDED.—Such training and technical assistance activities may include—

“(1) providing technical assistance to those applying to carry out national service programs or those carrying out national service programs;

“(2) promoting leadership development in national service programs;

“(3) improving the instructional and programmatic quality of national service programs;

“(4) developing the management and budgetary skills of those operating or overseeing national service programs, including to increase the cost effectiveness of the programs under the national service laws;

“(5) providing for or improving the training provided to the participants in programs under the national service laws;

“(6) facilitating the education of national service programs in risk management procedures, including the training of participants in appropriate risk management practices;

“(7) training of those operating or overseeing national service programs in volunteer recruitment, management, and retention to improve the abilities of such individuals to use participants and other volunteers in an effective manner which results in high quality service and the desire of participants or volunteers to continue to serve in other capacities after the program is completed;

“(8) training of those operating or overseeing national service programs in program evaluation and performance measures to inform practices to augment the capacity and sustainability of the program;

“(9) training of those operating or overseeing national service programs to effectively accommodate people with disabilities to increase the participation of people with disabilities in national service programs. Such activities may utilize funding from the reservation of funds to increase the participation of individuals with disabilities as described in section 129(j);

“(10) establishing networks and collaboration among employers, educators, and other key stakeholders in the community to further leverage resources to increase local participation and to coordinate community-wide planning and service;

“(11) providing training and technical assistance for the National Senior Service Corps, including providing such training and technical assistance to programs receiving assistance under section 201 of the Domestic Volunteer Service Act of 1973; and

“(12) carrying out such other activities as the Chief Executive Officer determines to be appropriate.

“(c) PRIORITY.—The Corporation shall give priority to programs under the national service laws and those entities eligible to establish programs under the national service laws seeking training or technical assistance that—

“(1) seek to carry out high quality programs where the services are needed most;

“(2) seek to carry out high quality programs where national service programs do not currently exist or where the programs are too limited to meet community needs;

“(3) seek to carry out high quality programs that focus on and provide service opportunities for underserved rural and urban areas and populations; and

“(4) assist programs in developing a service component that combines students, out-of-school youths, and older adults as participants to provide needed community services.”.

Subtitle J—Repeal of Title III (Points of Light Foundation)

SEC. 1831. REPEAL.

Title III (42 U.S.C. 12661 et seq.) is repealed.

Subtitle K—Amendments to Title V (Authorization of Appropriations)

SEC. 1841. AUTHORIZATION OF APPROPRIATIONS.

Section 501 (42 U.S.C. 12681) is amended to read as follows:

“SEC. 501. AUTHORIZATION OF APPROPRIATIONS.

“(a) TITLE I.—

“(1) **SUBTITLE B.**—

“(A) **IN GENERAL.**—There are authorized to be appropriated to provide financial assistance under subtitle B of title I—

“(i) \$97,000,000 for fiscal year 2010; and

“(ii) such sums as may be necessary for each of fiscal years 2011 through 2014.

“(B) **PROGRAMS.**—Of the amount appropriated under subparagraph (A) for a fiscal year—

“(i) not more than 60 percent shall be available to provide financial assistance under part I of subtitle B of title I;

“(ii) not more than 25 percent shall be available to provide financial assistance under part II of such subtitle; and

“(iii) not less than 15 percent shall be available to provide financial assistance under part III of such subtitle.

“(C) **SPECIAL ALLOCATIONS.**—Of the amount appropriated under subparagraph (A) for a fiscal year, up to \$10,000,000 shall be for summer of service grants, \$20,000,000 for youth engagement zones, \$7,000,000 for Campuses of Service, and up to \$10,000,000 shall be deposited in the National Service Trust to support summer of service educational awards, consistent with section 120(c)(8).

“(2) **SUBTITLES C, D, AND H.**—

“(A) **IN GENERAL.**—There are authorized to be appropriated to provide financial assistance under subtitles C and H of title I, to administer the National Service Trust and disburse national service educational awards and scholarships under subtitle D of title I, and to carry out such audits and evaluations as the Chief Executive Officer of the Corporation may determine to be necessary, such sums as may be necessary for each of fiscal years 2010 through 2014.

“(B) **PRIORITY.**—Notwithstanding any other provision of this Act, in obligating the amounts made available pursuant to the authorization of appropriations in subparagraph (C), priority shall be given to programs carried out in areas for which the President has declared the existence of a major disaster, in accordance with section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170), as a consequence of Hurricanes Katrina and Rita.

“(3) **SUBTITLE E.**—There are authorized to be appropriated to operate the National Civilian Community Corps and provide financial assistance under subtitle E of title I, \$35,000,000 for fiscal year 2010 and such sums as may be necessary for each of fiscal years 2011 through 2014.

“(4) **ADMINISTRATION.**—

“(A) **CORPORATION.**—There are authorized to be appropriated for the Corporation's administration of the national service laws such sums as may be necessary for each of fiscal years 2010 through 2014.

“(B) **STATE COMMISSIONS.**—There are authorized to be appropriated for assistance to State Commissions under section 126(a), such sums as may be necessary for each of fiscal years 2010 through 2014.

“(5) **TRAINING AND TECHNICAL ASSISTANCE.**—Of the amounts appropriated for a fiscal year under subtitles B, C, and H of title I of this Act and under titles I and II of the Domestic Volunteer Service Act of 1973, the Corporation shall reserve up to 2.5 percent to carry out subtitle J of this Act. Notwithstanding subsection (b), amounts so reserved shall be available only for the fiscal year for which they are reserved.

“(b) **AVAILABILITY OF APPROPRIATIONS.**—Funds appropriated under this section shall remain available until expended.”

TITLE II—AMENDMENTS TO THE DOMESTIC VOLUNTEER SERVICE ACT OF 1973

SEC. 2001. REFERENCES.

Except as otherwise specifically provided, whenever in this title an amendment or repeal is expressed in terms of an amendment to, or re-

peal of a provision, the reference shall be considered to be made to a provision of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4950 et seq.).

Subtitle A—Amendments to Title I (National Volunteer Antipoverty Programs)

SEC. 2101. PURPOSE.

Section 2 (42 U.S.C. 4950) is amended—

(1) in subsection (a), by striking “both young and older citizens” and inserting “citizens of all ages and backgrounds”; and

(2) in subsection (b), by striking “local agencies” and all that follows through the period at the end and inserting “local agencies, expand relationships with, and support for, the efforts of civic, community, and educational organizations, and utilize the energy, innovative spirit, experience, and skills of all Americans.”

SEC. 2102. PURPOSE OF THE VISTA PROGRAM.

Section 101 (42 U.S.C. 4951) is amended—

(1) in the second sentence, by striking “affected with” and inserting “affected by”; and

(2) in the third sentence, by striking “local level” and all that follows through the period at the end and inserting “local level, to support efforts by local agencies and organizations to achieve long-term sustainability of projects, consistent with section 185 of the National and Community Service Act of 1990, initiated or expanded under the VISTA program activities, and to strengthen local agencies and community organizations to carry out the purpose of this part.”

SEC. 2103. APPLICATIONS.

Section 103 (42 U.S.C. 4953) is amended—

(1) in subsection (a)—

(A) in paragraph (1), by inserting “the Commonwealth of the Northern Mariana Islands,” after “American Samoa,”; and

(B) in paragraph (2)—

(i) by striking “handicapped” and inserting “disabled”; and

(ii) by striking “handicaps” and inserting “disabilities”;

(C) in paragraph (3), by striking “jobless, the hungry, and low-income” and inserting “unemployed, the hungry, and low-income”;

(D) in paragraph (4), by striking “prevention, education,” and inserting “through prevention, education, rehabilitation, and treatment,”;

(E) in paragraph (5), by inserting “, mental illness,” after “including”;

(F) in paragraph (6), by striking “; and” and inserting a semicolon;

(G) in paragraph (7), by striking the period and inserting a semicolon; and

(H) by adding at the end the following new paragraphs:

“(8) in the re-entry and re-integration of formerly incarcerated youth and adults into society, including life skills training, employment training, counseling, educational training, and educational counseling;

“(9) in developing and carrying out financial literacy, financial planning, budgeting, savings, and reputable credit accessibility programs in low-income communities, including those programs which educate on financing home ownership and higher education;

“(10) in initiating and supporting before-school and after-school programs servicing children in low-income communities that may engage participants in mentoring relationships, tutoring, life skills, or study skills programs, service-learning, physical, nutrition, and health education programs, including programs aimed at fighting childhood obesity, and other activities addressing the needs of the community's children;

“(11) in establishing and supporting community economic development initiatives, including micro-enterprises, with a priority on such programs in rural areas and other areas where such programs are needed most;

“(12) in assisting veterans and their families through establishing or augmenting programs which assist such persons with access to legal assistance, health care (including mental health), employment counseling or training, education counseling or training, affordable housing, and other support services; and

“(13) in addressing the health and wellness of low-income and underserved communities, including programs to increase access to preventive services, insurance, and health care.”;

(2) in subsection (b)—

(A) in paragraph (1), by striking “recruitment and placement procedures” and inserting “placement procedures that involve sponsoring organizations and”;

(B) in paragraph (2)—

(i) in subparagraph (A)—

(I) by striking “related to the recruitment and” and inserting “related to the”;

(II) by striking “in conjunction with recruitment and” and inserting “in conjunction with the”;

(III) by striking “1993. Upon” and all that follows through the period at the end and inserting “1993.”;

(ii) in subparagraph (B), by striking “central information system that shall, on request, promptly provide” and inserting “database that provides”;

(iii) in subparagraph (C)—

(I) by striking “timely and effective” and inserting “timely and cost-effective”; and

(II) by striking “the recruitment of volunteers” and inserting “recruitment and management of volunteers”;

(C) in paragraph (3), by adding at the end the following: “The Director shall give priority to—

“(A) disadvantaged youth (as defined in section 101 of the National and Community Service Act of 1990) and low-income adults; and

“(B) retired adults of any profession, but with an emphasis on those professions whose services and training are most needed in a community, such as the health care professions, teaching, counseling, and engineering and other professions requiring a high level of technical and project management skills, to utilize their experience, including professional skills, in the VISTA program.”;

(D) in paragraph (5)(B), by striking “information system” and inserting “database”;

(3) in subsection (c)—

(A) in paragraph (1)—

(i) in the matter preceding subparagraph (A), by striking “personnel described in subsection (b)(2)(C)” and inserting “personnel described in subsection (b)(2)(C) and sponsoring organizations”;

(ii) in subparagraph (A), by inserting “the Internet and related technologies,” after “television,”;

(iii) in subparagraph (B), by inserting “Internet and related technologies,” after “through the”;

(iv) in subparagraph (C), by inserting after “senior citizens organizations,” the following: “offices of economic development, State employment security agencies, employment offices,”;

(v) in subparagraph (F), by striking “National and Community Service Trust Act of 1993” and inserting “National and Community Service Act of 1990”; and

(vi) in subparagraph (G), by striking “, on request,”;

(B) in paragraph (3), by striking “this subsection” and inserting “this subsection and related public awareness and recruitment activities under the national service laws”; and

(C) in paragraph (4)—

(i) by striking “Beginning” and all that follows through “for the purpose” and inserting “For the purpose”; and

(ii) by striking “1.5 percent” and inserting “2 percent”;

(4) by amending the second sentence of subsection (d) to read as follows: "Whenever feasible, such efforts shall be coordinated with an appropriate local workforce investment board established under section 117 of the Workforce Investment Act of 1998.";

(5) in subsection (g) by striking "and has been submitted to the Governor" and all that follows and inserting a period; and

(6) by adding at the end the following:

"(i) The Director may enter into agreements under which public and private nonprofit organizations, with sufficient financial capacity and size, pay for all or a portion of the costs of supporting the service of volunteers under this title, consistent with the provisions of section 186 of the National and Community Service Act of 1990."

SEC. 2104. VISTA PROGRAMS OF NATIONAL SIGNIFICANCE.

Part A of title I is amended by inserting after section 103 (42 U.S.C. 4953) the following:

"SEC. 103A. VISTA PROGRAMS OF NATIONAL SIGNIFICANCE.

"(a) IN GENERAL.—With not less than one-third of the funds made available under subsection (d) in each fiscal year, the Director shall make grants for VISTA positions to support programs of national significance. Each program for which a grant is received under this subsection shall be carried out in accordance with the requirements applicable to that program.

"(b) ACTIVITIES SUPPORTED.—The Director shall make grants under subsection (a) to support one or more of the following programs to address problems that concern low-income and rural communities in the Nation:

"(1) In the re-entry and re-integration of formerly incarcerated youth and adults into society, including life skills training, employment training, counseling, educational training, and educational counseling.

"(2) In developing and carrying-out financial literacy, financial planning, budgeting, savings, and reputable credit accessibility programs in low-income communities, including those programs which educate on financing home ownership and higher education.

"(3) In initiating and supporting before-school and after-school programs in low-income communities that may include such activities as establishing mentoring relationships, physical education, tutoring, instruction in 21st century thinking skills, life skills, and study skills, community service, service-learning, nutrition and health education, and other activities aimed at keeping children, safe, educated, and healthy, which serve the children in such community.

"(4) In establishing and supporting community economic development initiatives, including micro-enterprises, with a priority on such programs in rural areas and areas where such programs are needed most.

"(5) In assisting veterans and their families through establishing or augmenting programs which assist such persons with access to legal assistance, health care (including mental health), employment counseling or training, education counseling or training, affordable housing, and other support services.

"(6) In addressing the health and wellness of low-income and underserved communities across our Nation, including programs to fight childhood obesity through nutrition, physical fitness, and other associated life skills education programs and programs to increase access to preventive services, insurance, and health care.

"(c) REQUIREMENTS.—

"(1) ELIGIBILITY.—In order to receive a grant under subsection (a), an applicant shall submit an application to the Director at such time and in such manner as the Director requires and receive approval of the application. Such application shall, at a minimum, demonstrate to the Di-

rector a level of expertise in carrying out such a program.

"(2) SUPPLEMENT NOT SUPPLANT.—Funds made available under subsection (d) shall be used to supplement and not supplant the number of VISTA volunteers engaged in programs addressing the problem for which such funds are awarded unless such sums are an extension of funds previously provided under this title.

"(d) FUNDING.—

"(1) IN GENERAL.—From the amounts appropriate under section 501 for each fiscal year there shall be available to the Director such sums as may be necessary to make grants under subsection (a).

"(2) LIMITATION.—No funds shall be made available to the Director to make grants under subsection (a) unless the amounts appropriated under section 501 available for such fiscal year to carry out part A are sufficient to maintain the number of projects and volunteers funded under part A in the preceding fiscal year.

"(e) INFORMATION.—The Director shall widely disseminate information on grants that may be made under this section, including through volunteer recruitment programs being carried out by public or private non-profit organizations."

SEC. 2105. TERMS AND PERIODS OF SERVICE.

Section 104(d) (42 U.S.C. 4954(d)) is amended—

(1) in the first sentence, by striking "with the terms and conditions of their service." and inserting "with the terms and conditions of their service or any adverse action, such as termination, proposed by the sponsoring organization. The procedure shall provide for an appeal to the Director of any proposed termination."; and

(2) in the third sentence (as amended by this section), by striking "and the terms and conditions of their service".

SEC. 2106. SUPPORT SERVICE.

Section 105(a)(1)(B) (42 U.S.C. 4955(a)(1)(B)) is amended by striking "Such stipend" and all that follows through "in the case of persons" and inserting "Such stipend shall be set at a minimum of \$125 per month and a maximum of \$150 per month, subject to the availability of funds to accomplish such a maximum. The Director may provide a stipend of \$250 per month in the case of persons".

SEC. 2107. SECTIONS REPEALED.

The following provisions are repealed:

(1) VISTA LITERACY CORPS.—Section 109 (42 U.S.C. 4959).

(2) UNIVERSITY YEAR FOR VISTA.—Part B of title I (42 U.S.C. 4971 et seq.).

(3) LITERACY CHALLENGE GRANTS.—Section 124 (42 U.S.C. 4995).

SEC. 2108. CONFORMING AMENDMENT.

Section 121 (42 U.S.C. 4991) is amended in the second sentence by striking "situations" and inserting "organizations".

SEC. 2109. FINANCIAL ASSISTANCE.

Section 123 (42 U.S.C. 4993) is amended—

(1) in the section heading by striking "TECHNICAL AND"; and

(2) by striking "technical and".

Subtitle B—Amendments to Title II (National Senior Volunteer Corps)

SEC. 2201. CHANGE IN NAME.

Title II (42 U.S.C. 5000 et seq.) is amended in the title heading by striking "NATIONAL SENIOR VOLUNTEER CORPS" and inserting "NATIONAL SENIOR SERVICE CORPS".

SEC. 2202. PURPOSE.

Section 200 (42 U.S.C. 5000) is amended to read as follows:

"SEC. 200. STATEMENT OF PURPOSE.

"It is the purpose of this title to provide—

"(1) opportunities for senior service to meet unmet local, State, and national needs in the areas of education, public safety, emergency

and disaster preparedness, relief, and recovery, health and human needs, and the environment;

"(2) for the National Senior Service Corps, comprised of the Retired and Senior Volunteer Program, the Foster Grandparent Program, and the Senior Companion Program, and demonstration and other programs to empower people 55 years of age or older to contribute to their communities through service, enhance the lives of those who serve and those whom they serve, and provide communities with valuable services;

"(3) opportunities for people 55 years of age or older, through the Retired and Senior Volunteer Program, to share their knowledge, experiences, abilities, and skills for the betterment of their communities and themselves;

"(4) opportunities for low-income people 55 years of age or older, through the Foster Grandparents Program, to have a positive impact on the lives of children in need;

"(5) opportunities for low-income people 55 years of age or older, through the Senior Companion Program, to provide critical support services and companionship to adults at risk of institutionalization and who are struggling to maintain a dignified independent life; and

"(6) for research, training, demonstration, and other program activities to increase and improve opportunities for people 55 years of age or older to meet unmet needs, including those related to public safety, public health, and emergency and disaster preparedness, relief, and recovery, in their communities."

SEC. 2203. GRANTS AND CONTRACTS FOR VOLUNTEER SERVICE PROJECTS.

Section 201 (42 U.S.C. 5001) is amended—

(1) in subsection (a)—

(A) in the matter preceding paragraph (1), by striking "avail themselves of opportunities for volunteer service in their community" and inserting "share their experiences, abilities, and skills for the betterment of their communities and themselves through service";

(B) in paragraph (2), by striking "and individuals 60 years of age or older will be given priority for enrollment";

(C) in paragraph (3), by inserting "either prior to or during the volunteer service" after "may be necessary"; and

(D) by striking paragraph (4) and inserting the following:

"(4) the project is being designed and implemented with the advice of experts in the field of service to be delivered as well as with those who have expertise in the recruitment and management of volunteers, particularly those of the Baby Boom generation.";

(2) by amending subsection (c) to read as follows:

"(c) The Director shall give priority to projects—

"(1) utilizing retired scientists, technicians, engineers, and mathematicians (the STEM professionals) to improve Science, Technology, Engineering, and Mathematics (STEM) education through activities such as assisting teachers in classroom demonstrations or laboratory experiences, running after-school, weekend, or summer programs designed to engage disadvantaged youth (as defined in section 101 of the National and Community Service Act of 1990) or low-income, minority youth in the STEM fields and to improve mastery of the STEM content, providing field trips to businesses, institutions of higher education, museums, and other locations where the STEM professions are practiced or illuminated;

"(2) utilizing retired health care professionals to improve the health and wellness of low income or rural communities;

"(3) utilizing retired criminal justice professionals for programs designed to prevent disadvantaged youth (as defined in section 101 of the National and Community Service Act of 1990) from joining gangs or committing crimes;

“(4) utilizing retired military and emergency professionals for programs to improve public safety, emergency and disaster preparedness, relief, and recovery, search and rescue, and homeland security efforts; and

“(5) utilizing retired computer science professionals, technicians of related technologies, business professionals, and others with relevant knowledge to increase, for low income individuals and families, access to and obtaining the benefits from computers and other existing and emerging technologies.”; and

(3) by adding at the end the following:

“(e) COMPETITIVE GRANT AWARDS REQUIRED.—

“(1) IN GENERAL.—Effective for fiscal year 2013 and each fiscal year thereafter, each grant or contract awarded under this section in such a year shall be—

“(A) awarded for a period of 3 years; and

“(B) awarded through a competitive process.

“(2) ELEMENTS OF COMPETITIVE PROCESS.—The competitive process required by paragraph (1)(B)—

“(A) shall include the use of a peer review panel, including members with expertise in senior service and aging;

“(B) shall ensure that—

“(i) the resulting grants (or contracts) support no less than the volunteer service years of the previous grant (or contract) cycle in a given geographic service area;

“(ii) the resulting grants (or contracts) maintain a similar program distribution; and

“(iii) every effort is made to minimize the disruption to volunteers; and

“(C) shall include the performance measures, outcomes, and other criteria established under subsection (f).

“(3) ESTABLISHMENT OF COMPETITIVE PROCESSES.—The Corporation shall establish and make available the competitive process required by paragraph (1)(B) no later than 18 months after the date of the enactment of this subsection. The Corporation shall consult with the program directors of the Retired Senior Volunteer Program during development and implementation of the competitive process.

“(f) EVALUATION PROCESS REQUIRED.—

“(1) IN GENERAL.—Notwithstanding section 412, and effective beginning 180 days after the date of the enactment of this subsection, each grant or contract under this section that expires in fiscal year 2011, 2012, and 2013 shall be subject to an evaluation process. The evaluation process shall be carried out, to the maximum extent practicable, in fiscal year 2010, 2011, and 2012, respectively.

“(2) ELEMENTS OF EVALUATION PROCESS.—The evaluation process required by paragraph (1)—

“(A) shall include performance measures, outcomes, and other criteria; and

“(B) shall evaluate the extent to which the recipient of the grant or contract meets or exceeds such performance measures, outcomes, and other criteria.

“(3) ESTABLISHMENT OF EVALUATION PROCESSES.—The Corporation shall, in collaboration and consultation with program directors of the Retired Senior Volunteer Program, establish and make available the evaluation process required by paragraph (1), including the performance measures, outcomes, and other criteria required by paragraph (2)(A), with particular attention to the different needs of rural and urban programs. The processes shall be established and made available, including notification of the available training and technical assistance, no later than 180 days after the date of the enactment of this subsection.

“(4) EFFECT OF FAILING TO MEET PERFORMANCE MEASURES.—If the evaluation process determines that the recipient has failed to meet or exceed the performance measures, outcomes, and

other criteria established under this subsection, the grant or contract shall not be renewed. Any successor grant or contract shall be awarded through the competitive process described in subsection (e)(1).

“(5) SPECIAL RULE.—The Corporation may continue to fund a program which has failed to meet or exceed the performance measures, outcomes, and other criteria established under this subsection for up to 12 months if competition does not result in a successor grant or contract for such program, in order to minimize the disruption to volunteers and disruption of services. In such a case, outreach shall be conducted and a new competition shall be established. The previous recipient shall remain eligible for the new competition.

“(6) PERFORMANCE MEASURES.—

“(A) IN GENERAL.—The performance measures, outcomes, and other criteria established under this subsection may be updated or modified as necessary, in consultation with program directors for the Retired Senior Volunteer Program, but no earlier than fiscal year 2014.

“(B) OPERATIONAL PROBLEMS.—Effective for fiscal years before fiscal year 2014, the Corporation may, after consulting with program directors of the Retired Senior Volunteer Program, determine that a performance measure, outcome, or criterion established under this subsection is operationally problematic, and may, in consultation with program directors of the Retired Senior Volunteer Program and after notifying the appropriate committees of Congress—

“(i) eliminate the use of that performance measure, outcome, or criterion; or

“(ii) modify that performance measure, outcome, or criterion as necessary to render it no longer operationally problematic.

“(g) ONLINE RESOURCE GUIDE.—The Corporation shall develop and disseminate an online resource guide for the Retired Senior Volunteer Program within 180 days after the date of the enactment of this subsection, which shall include, but not be limited to—

“(1) examples of high performing programs;

“(2) corrective actions for underperforming programs; and

“(3) examples of meaningful outcome-based performance measures that capture a program's mission and priorities.

“(h) REPORT TO CONGRESS.—Not later than September 30, 2013, the Corporation shall submit to the appropriate committees of Congress a report on—

“(1) the number of programs that did not meet or exceed the established performance measures, outcomes, and other criteria established under subsection (f);

“(2) the number of new grants awarded;

“(3) the challenges to the implementation of evaluation and competition, including but not limited to geographic distribution and the minimization of disruption to volunteers; and

“(4) how the current program geographic distribution affects recruitment for the Retired Senior Volunteer Program.”.

SEC. 2204. FOSTER GRANDPARENT PROGRAM GRANTS.

Section 211 (42 U.S.C. 5011) is amended—

(1) in subsection (a)—

(A) by striking “low-income persons aged sixty or over” and inserting “low-income and other persons aged 55 or over”; and

(B) by striking “children having exceptional needs” and inserting “children having special or exceptional needs or with conditions or circumstances identified as limiting their academic, social, or emotional development”;

(2) in subsection (b)—

(A) in paragraph (1)—

(i) in the matter preceding subparagraph (A), by striking “shall have the exclusive authority to determine, pursuant to the provisions of

paragraph (2) of this subsection—” and inserting “may determine—”;

(ii) in subparagraph (A), by striking “and”;

(iii) in subparagraph (B), by striking the period and inserting “; and”; and

(iv) by adding after subparagraph (B) the following:

“(C) whether it is in the best interests of a child receiving, and of a particular foster grandparent providing, services in such a project, to continue such relationship after the child reaches the age of 21, if such child was receiving such services prior to attaining the age of 21.”;

(B) by striking paragraph (2);

(C) by redesignating paragraph (3) as paragraph (2);

(D) in paragraph (2) (as redesignated by this section), by striking “paragraphs (1) and (2)” and inserting “paragraph (1)”; and

(E) by adding after paragraph (2) (as redesignated by this section) the following:

“(3) If an assignment of a foster grandparent is suspended or discontinued, the replacement of that foster grandparent shall be determined through the mutual agreement of all parties involved in the provision of services to the child.”;

(3) in subsection (d), in the second sentence, by striking “Any stipend” and all that follows through “inflation,” and inserting “Any stipend or allowance provided under this part shall not exceed 75 percent of the minimum wage under section 6 the Fair Labor Standards Act of 1938 (29 U.S.C. 206), and the Federal share shall not be less than \$2.65 per hour, provided that the Director shall adjust the Federal share once prior to December 31, 2012, to account for inflation.”;

(4) in subsection (e)—

(A) in paragraph (1), by striking “125” and inserting “200”; and

(B) in paragraph (2), by striking “, as so adjusted” and all that follows through “local situations”;

(5) by striking subsection (f) and inserting:

“(f)(1) Subject to the restrictions in paragraph (3), individuals who are not low-income persons may serve as volunteers under this part. The regulations issued by the Director to carry out this part (other than regulations relating to stipends or allowances to individuals authorized by subsection (d)) shall apply to all volunteers under this part, without regard to whether such volunteers are eligible to receive a stipend or allowance under subsection (d).

“(2) Except as provided under paragraph (1), each recipient of a grant or contract to carry out a project under this part shall give equal treatment to all volunteers who participate in such project, without regard to whether such volunteers are eligible to receive a stipend or allowance under subsection (d).

“(3) An individual who is not a low-income person may not become a volunteer under this part if allowing that individual to become a volunteer under this part would prevent a low-income person from becoming a volunteer under this part or would displace a low-income person from being a volunteer under this part.”; and

(6) by adding at the end the following new subsections:

“(g) The Director may also provide a stipend or allowance in an amount not to exceed 10 percent more than the amount established under subsection (d) to leaders who, on the basis of past experience as volunteers, special skills, and demonstrated leadership abilities, may coordinate activities, including training, and otherwise support the service of volunteers under this part.

“(h) The program may accept up to 15 percent of volunteers serving in a project under this part for a fiscal year who do not meet the definition of ‘low-income’ under subsection (e), upon certification by the recipient of a grant or contract

that it is unable to effectively recruit and place low-income volunteers in the number of placements approved for the project.”.

SEC. 2205. SENIOR COMPANION PROGRAM GRANTS.

Section 213 (42 U.S.C. 5013) is amended—

(1) in subsection (a), by striking “low-income persons aged 60 or over” and inserting “low-income and other persons aged 55 or over”;

(2) in subsection (b), by striking “Subsections (d), (e), and (f)” and inserting “Subsections (d) through (h)”;

(3) by striking subsection (c)(2)(B) and inserting the following:

“(B) Senior companion volunteer trainers and leaders may receive a stipend or allowance consistent with subsection (g) authorized under subsection (d) of section 211, as approved by the Director.”.

SEC. 2206. PROMOTION OF NATIONAL SENIOR SERVICE CORPS.

Section 221 (42 U.S.C. 5021) is amended—

(1) in the section heading, by striking “VOLUNTEER” and inserting “SERVICE”; and

(2) in subsection (b)(2), by inserting “of all ages and backgrounds living in rural, suburban, and urban localities” after “greater participation of volunteers”.

SEC. 2207. TECHNICAL AMENDMENTS.

(a) CHANGE IN AGE ELIGIBILITY.—Section 223 (42 U.S.C. 5023) is amended by striking “sixty years and older from minority groups” and inserting “55 years and older from minority and underserved populations”.

(b) NAME CHANGE.—Section 224 (42 U.S.C. 5024) is amended in the heading by striking “VOLUNTEER” and inserting “SERVICE”.

SEC. 2208. PROGRAMS OF NATIONAL SIGNIFICANCE.

Section 225 (42 U.S.C. 5025) is amended—

(1) in subsection (a)—

(A) by amending paragraph (2) to read as follows:

“(2) Applicants for grants under paragraph (1) shall determine which program under part A, B, or C the program shall be carried out and submit an application as required for programs under part A, B, or C.”; and

(B) by adding at the end the following:

“(4) To the maximum extent practicable, the Director shall ensure that at least 25 percent of the grants under this subsection are made to applicants not receiving assistance from the Corporation at the time of such grant and, when possible, from locations where no programs under part A, B, or C are in effect at the time of such grant. In a fiscal year where less than 25 percent of the applicants are applicants not receiving such assistance, the Director may make more than 75 percent of such grants to applicants receiving such assistance.”;

(2) in subsection (b)—

(A) in paragraph (1), by inserting before the period at the end the following: “or Alzheimer’s disease, with an intent of allowing those served to age in place”;

(B) in paragraph (2), by inserting before the period at the end the following: “through education, prevention, treatment, and rehabilitation”;

(C) in paragraph (3), by inserting before the period at the end the following: “, including programs that teach parenting skills, life skills, and family management skills”;

(D) by amending paragraph (4) to read as follows:

“(4) Programs that establish and support mentoring programs for disadvantaged youth (as defined in section 101 of the National and Community Service Act of 1990), including those mentoring programs that match youth with volunteer mentors leading to apprenticeship programs and employment training.”;

(E) in paragraph (5), by inserting before the period at the end the following: “, including

those programs that serve youth and adults with limited English proficiency”;

(F) in paragraph (6), by striking “and” and all that follows through the period and insert “and for individuals and children with disabilities or chronic illnesses living at home.”;

(G) in paragraph (7), by striking “after-school activities” and all that follows through the period at the end and inserting “after-school programs serving children in low-income communities that may engage participants in mentoring relationships, tutoring, life skills or study skills programs, service-learning, physical, nutrition, and health education programs, including programs aimed at fighting childhood obesity, and other activities addressing the needs of the community’s children, including those of working parents.”;

(H) by striking paragraphs (8), (9), (12), (13), (14), (15), (16), and (18);

(I) by redesignating paragraphs (10) and (11) as paragraphs (8) and (9), respectively;

(J) by inserting after paragraph (9) (as so redesignated) the following:

“(10) Programs that engage older adults with children and youth to complete service in energy conservation, environmental stewardship, or other environmental needs of a community, including conducting energy audits, insulating homes, or conducting other activities to promote energy efficiency.

“(11) Programs that collaborate with criminal justice professionals and organizations in prevention programs aimed at disadvantaged youth (as defined in section 101 of the National and Community Service Act of 1990) or youth re-entering society after incarceration and their families, which may include mentoring and counseling, which many include employment counseling.”;

(K) by redesignating paragraph (17) as paragraph (12); and

(L) by adding at the end the following:

“(13) Programs that strengthen community efforts in support of homeland security.”;

(3) in subsection (c)(1), by striking “shall demonstrate to the Director” and all that follows through the period at the end and inserting “shall demonstrate to the Director a level of expertise in carrying out such a program.”; and

(4) in subsection (e)—

(A) by inserting “widely” before “disseminate”;

(B) by striking “to field personnel” and all that follows through the period at the end and inserting “, including through volunteer recruitment programs being carried out by public or private non-profit organizations.”.

SEC. 2209. ADDITIONAL PROVISIONS.

Part D of title II (42 U.S.C. 5000 et seq.) is amended by adding after section 227 the following:

“SEC. 228. CONTINUITY OF SERVICE.

“To ensure the continued service of individuals in communities served by the Retired and Senior Volunteer Program prior to enactment of this section, in making grants under this title the Corporation shall take actions it considers necessary to maintain service assignments for such seniors and to ensure continuity of service for communities.

“SEC. 229. ACCEPTANCE OF DONATIONS.

“(a) IN GENERAL.—Except as provided in subsection (b), a program receiving assistance under this title may accept donations, including donations in cash or in kind.

“(b) EXCEPTION.—Notwithstanding subsection (a), a program receiving assistance under this title shall not accept donations from the beneficiaries of the program.”.

SEC. 2210. AUTHORITY OF DIRECTOR.

Section 231 (42 U.S.C. 5028) is amended—

(1) by amending subsection (a) to read as follows:

“(a) IN GENERAL.—

“(1) ACTIVITIES AUTHORIZED.—The Director is authorized to—

“(A) make grants to or enter into contracts with public or nonprofit organizations, including organizations funded under part A, B, or C, for the purposes of demonstrating innovative activities involving older Americans as volunteers; and

“(B) make incentive grants under subsection (d).

“(2) SUPPORT OF VOLUNTEERS.—The Director may support under this part both volunteers receiving stipends and volunteers not receiving stipends.”;

(2) in subsection (b)—

(A) in the matter preceding paragraph (1), by striking “subsection (a)” and inserting “subsection (a)(1)(A)”;

(B) in paragraph (1), by striking “activities,” and inserting “activities described in section 225(b) and carried out through programs described in parts A, B, and C.”; and

(C) by striking paragraphs (2) and (3) and inserting the following:

“(2) programs that support older Americans in aging in place while augmenting the capacity of members of a community to serve each other through reciprocal service centers, service credit banking, community economic scripts, barter services, timebanking, and other similar programs where services are exchanged and not paid for; or

“(3) grants to non-profit organizations to establish sites or programs to—

“(A) assist retiring or retired individuals in locating opportunities for—

“(i) public service roles, including through paid or volunteer service;

“(ii) participating in life-planning programs, including financial planning and issues revolving around health and wellness; and

“(iii) continuing education, including leadership development, health and wellness, and technological literacy; and

“(B) connect retiring or retired individuals with members of the community to serve as leaders and mentors in life planning, relationships, employment counseling, education counseling, and other areas of expertise as developed by the retiring or retired adults.”; and

(3) by adding at the end the following:

“(c) PRIORITY.—For purposes of subsection (b)(2), priority shall be given to—

“(1) programs with established experience in carrying out such a program and engaging the entire community in service exchange;

“(2) programs with the capacity to connect to similar programs throughout a city or region to augment the available services to older Americans and for members of the community to serve each other;

“(3) programs seeking to establish in an area where needs of older Americans are left unmet and older Americans are unable to consider aging in place without such service exchange in place; and

“(4) programs that integrate participants in or collaborate with service-learning programs, AmeriCorps State and National programs, the VISTA program, the Retired and Senior Volunteer Program, Foster Grandparents program, and the Senior Companion programs, and programs described in section 411 of the Older Americans Act of 1965 (42 U.S.C. 3032).

“(d) INCENTIVE GRANTS.—The incentive grants referred to in subsection (a)(1)(B) are incentive grants to programs receiving assistance under this title, subject to the following:

“(1) Such grants (which may be fixed-amount grants) shall be grants in an amount equal to \$300 per volunteer enrolled in the program, except that such amount shall be reduced as necessary to meet the goals of this section.

“(2) Such a grant shall be awarded to a program only if the program—

“(A) exceeds performance measures established under section 179 of the National and Community Service Act of 1990;

“(B) provides non-Federal matching funds in an amount that is not less than 50 percent of the amount received by the program under this title;

“(C) enrolls more than 50 percent of the volunteers in outcome-based service programs with measurable objectives meeting community needs, as determined by the Corporation; and

“(D) enrolls more volunteers from among members of the Baby Boom generation, as defined in section 101 of the National and Community Service Act of 1990, than were enrolled in the program during the previous fiscal year.

“(3) For each such grant, the Corporation shall require the recipient to provide matching funds of 70 cents from non-Federal sources for every \$1 provided under the grant.

“(4) Such a grant shall be awarded to a program only if the program submits, at such time and in such manner as the Corporation may reasonably require, an application that contains—

“(A) a demonstration that the program has met the requirements of paragraph (2);

“(B) if applicable, a plan for innovative programs as described in paragraph (6)(B)(ii);

“(C) a sustainability plan that describes how the program will maintain the activities described in paragraph (6) when the grant terminates; and

“(D) other information that the Corporation may require.

“(5) Such grants shall be awarded for a period of 3 years, except that the grant shall be reviewed by the Corporation at the end of the first and second fiscal years and revoked if the Corporation finds that the program has failed to continue to meet the requirements of paragraph (2) for those fiscal years.

“(6) Such grants—

“(A) shall be used to increase the number of volunteers in outcome-based service with measurable objectives meeting community needs as determined by the Corporation; and

“(B) may be used—

“(i) for activities for which the program is authorized to receive assistance under this title; and

“(ii) for innovative programs focused on the Baby Boom generation, as defined in section 101 of the National and Community Service Act of 1990, that have been accepted by the Corporation through the application process in paragraph (4) and are outcome-based programs with measurable objectives meeting community needs as determined by the Corporation.

“(7) The Director shall, in making such grants, give high priority to programs receiving assistance under section 201.”

Subtitle C—Amendments to Title IV (Administration and Coordination)

SEC. 2301. NONDISPLACEMENT.

Section 404(a) (42 U.S.C. 5044(a)) is amended by striking “displacement of employed workers” and inserting “displacement of employed workers or volunteers (other than participants under the national service laws)”.

SEC. 2302. NOTICE AND HEARING PROCEDURES.

Section 412(a) (42 U.S.C. 5052(a)) is amended—

(1) in paragraph (2)—

(A) by striking “75” and inserting “60”; and

(B) by adding “and” at the end;

(2) by striking paragraph (3); and

(3) by redesignating paragraph (4) as paragraph (3).

SEC. 2303. DEFINITIONS.

Section 421 (42 U.S.C. 5061) is amended—

(1) in paragraph (2), by inserting “, the Commonwealth of the Northern Mariana Islands” after “American Samoa”;

(2) in paragraph (13), by striking “National Senior Volunteer Corps” and inserting “National Senior Service Corps”; and

(3) in paragraph (14)—

(A) by striking “National Senior Volunteer Corps” and inserting “National Senior Service Corps”; and

(B) by striking “parts A, B, C, and E of”;

SEC. 2304. PROTECTION AGAINST IMPROPER USE.

Section 425 (42 U.S.C. 5065) is amended by striking “National Senior Volunteer Corps” and inserting “National Senior Service Corps”.

Subtitle D—Amendments to Title V (Authorization of Appropriations)

SEC. 2401. AUTHORIZATION OF APPROPRIATIONS FOR VISTA AND OTHER PURPOSES.

Section 501 (42 U.S.C. 5081) is amended—

(1) in subsection (a)—

(A) in paragraph (1), by striking “, excluding section 109” and all that follows and inserting “\$100,000,000 for fiscal year 2010 and such sums as may be necessary for each of fiscal years 2011 through 2014.”;

(B) by striking paragraphs (2) and (4) and redesignating paragraphs (3) and (5) as paragraphs (2) and (3); and

(C) in paragraph (2) (as redesignated by this section), by striking “, excluding section 125” and all that follows and inserting “such sums as may be necessary for each of fiscal years 2010 through 2014.”; and

(2) by striking subsection (e).

SEC. 2402. AUTHORIZATION OF APPROPRIATIONS FOR NATIONAL SENIOR SERVICE CORPS.

Section 502 (42 U.S.C. 5082) is amended to read as follows:

“SEC. 502. NATIONAL SENIOR SERVICE CORPS.

“(a) RETIRED AND SENIOR VOLUNTEER PROGRAM.—There are authorized to be appropriated to carry out part A of title II, \$70,000,000 for fiscal year 2010 and such sums as may be necessary for each of fiscal years 2011 through 2014.

“(b) FOSTER GRANDPARENT PROGRAM.—There are authorized to be appropriated to carry out part B of title II, \$115,000,000 for fiscal year 2010 and such sums as may be necessary for each of fiscal years 2011 through 2014.

“(c) SENIOR COMPANION PROGRAM.—There are authorized to be appropriated to carry out part C of title II, \$55,000,000 for fiscal year 2010 and such sums as may be necessary for each of fiscal years 2011 through 2014.

“(d) DEMONSTRATION PROGRAMS.—There are authorized to be appropriated to carry out part E of title II such sums as may be necessary for each of fiscal years 2011 through 2014.”

TITLE III—AMENDMENTS TO OTHER LAWS

SEC. 3101. INSPECTOR GENERAL ACT OF 1978.

Section 8F(a)(1) of the Inspector General Act of 1978 (5 U.S.C. App.) is amended by striking “National and Community Service Trust Act of 1993” and inserting “National and Community Service Act of 1990”.

TITLE IV—TECHNICAL AMENDMENTS TO TABLES OF CONTENTS

SEC. 4101. TABLE OF CONTENTS FOR THE NATIONAL AND COMMUNITY SERVICE ACT OF 1990.

Section 1(b) of the National and Community Service Act of 1990 (42 U.S.C. 12501 note) is amended to read as follows:

“(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

“Sec. 1. Short title and table of contents.

“Sec. 2. Findings and purpose.

“Sec. 3. Sense of Congress.

“TITLE I—NATIONAL AND COMMUNITY SERVICE STATE GRANT PROGRAM

SEC. 4102. TABLE OF CONTENTS AMENDMENTS FOR THE DOMESTIC VOLUNTEER SERVICE ACT.
 The table of contents in section 1(b) of the Domestic Volunteer Service Act of 1973 is amended as follows:
 (1) By inserting after the item relating to section 103 the following new item:
 "Sec. 103A. VISTA programs of national significance."
 (2) By striking the item relating to section 123 and inserting the following new item:
 "Sec. 123. Financial assistance."
 (3) By amending the item relating to title II to read as follows:
 "TITLE II—NATIONAL SENIOR SERVICE CORPS".
 (4) By striking the item relating to section 224 and inserting the following new item:
 "Sec. 224. Use of locally generated contributions in National Senior Service Corps."
 (5) By inserting after the item relating to section 227 the following new items:
 "Sec. 228. Continuity of service.
 "Sec. 229. Acceptance of donations."
 (6) By striking the item relating to section 502 and inserting the following new item:
 "Sec. 502. National Senior Service Corps."
TITLE V—EFFECTIVE DATE
SEC. 5101. EFFECTIVE DATE.
 Unless specifically provided otherwise, the amendments made by this Act shall take effect on the date of the enactment of this Act.
SEC. 5102. SERVICE ASSIGNMENTS AND AGREEMENTS.
 (a) SERVICE ASSIGNMENTS.—Changes pursuant to this Act in the terms and conditions of terms of service and other service assignments under the national service laws (including the amount of the education award) shall apply only to individuals who enroll or otherwise begin service assignments after 90 days after the date of en-

actment of this Act, except when agreed upon by all interested parties.

(b) AGREEMENTS.—Changes pursuant to this Act in the terms and conditions of grants, contracts, or other agreements under the national service laws shall apply only to such agreements entered into after 90 days after the date of enactment of this Act, except when agreed upon by the parties to such agreements.

(c) EXCEPTION.—Subsections (a) and (b) do not apply to the amendments made by this Act to section 201 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5001). Any changes pursuant to those amendments apply as specified in those amendments.

TITLE VI—CONGRESSIONAL COMMISSION ON CIVIC SERVICE

SEC. 6101. SHORT TITLE.

This title may be cited as the "Congressional Commission on Civic Service Act".

SEC. 6102. FINDINGS.

Congress finds the following:

(1) The social fabric of the United States is stronger if individuals in the United States are committed to protecting and serving our Nation by utilizing national service and volunteerism to overcome our civic challenges.

(2) A more engaged civic society will strengthen the Nation by bringing together people from diverse backgrounds and experiences to work on solutions to some of our Nation's major challenges.

(3) Despite declines in civic health in the past 30 years, national service and volunteerism among the Nation's youth are increasing, and existing national service and volunteer programs greatly enhance opportunities for youth to engage in civic activity.

(4) In addition to the benefits received by nonprofit organizations and society as a whole, volunteering and national service provide a variety of personal benefits and satisfaction and can lead to new paths of civic engagement, responsibility, and upward mobility.

SEC. 6103. ESTABLISHMENT.

There is established in the legislative branch a commission to be known as the "Congressional Commission on Civic Service" (in this title referred to as the "Commission").

SEC. 6104. DUTIES.

(a) GENERAL PURPOSE.—The purpose of the Commission is to gather and analyze information in order to make recommendations to Congress to—

(1) improve the ability of individuals in the United States to serve others and, by doing so, to enhance our Nation and the global community;

(2) train leaders in public service organizations to better utilize individuals committed to national service and volunteerism as they manage human and fiscal resources;

(3) identify and offer solutions to the barriers that make it difficult for some individuals in the United States to volunteer or perform national service; and

(4) build on the foundation of service and volunteer opportunities that are currently available.

(b) SPECIFIC TOPICS.—In carrying out its general purpose under subsection (a), the Commission shall address and analyze the following specific topics:

(1) The level of understanding about the current Federal, State, and local volunteer programs and opportunities for service among individuals in the United States.

(2) The issues that deter volunteerism and national service, particularly among young people, and how the identified issues can be overcome.

(3) Whether there is an appropriate role for Federal, State, and local governments in overcoming the issues that deter volunteerism and

national service and, if appropriate, how to expand the relationships and partnerships between different levels of government in promoting volunteerism and national service.

(4) Whether existing databases are effective in matching community needs to would-be volunteers and service providers.

(5) The effect on the Nation, on those who serve, and on the families of those who serve, if all individuals in the United States were expected to perform national service or were required to perform a certain amount of national service.

(6) Whether a workable, fair, and reasonable mandatory service requirement for all able young people could be developed, and how such a requirement could be implemented in a manner that would strengthen the social fabric of the Nation and overcome civic challenges by bringing together people from diverse economic, ethnic, and educational backgrounds.

(7) The need for a public service academy, a 4-year institution that offers a federally funded undergraduate education with a focus on training future public sector leaders.

(8) The means to develop awareness of national service and volunteer opportunities at a young age by creating, expanding, and promoting service options for elementary and secondary school students, through service learning or other means, and by raising awareness of existing incentives.

(9) The effectiveness of establishing a training program on college campuses to recruit and educate college students for national service.

(10) The effect on United States diplomacy and foreign policy interests of expanding service opportunities abroad, such as the Peace Corps, and the degree of need and capacity abroad for an expansion.

(11) The constraints that service providers, nonprofit organizations, and State and local agencies face in utilizing federally funded volunteer programs, and how these constraints can be overcome.

(12) Whether current Federal volunteer programs are suited to address the special skills and needs of senior volunteers, and if not, how these programs can be improved such that the Federal Government can effectively promote service among the "baby boomer" generation.

(c) METHODOLOGY.—

(1) PUBLIC HEARINGS.—The Commission shall conduct public hearings in various locations around the United States.

(2) REGULAR AND FREQUENT CONSULTATION.—The Commission shall regularly and frequently consult with an advisory panel of Members of Congress appointed for such purpose by the Speaker of the House of Representatives and the majority leader of the Senate.

SEC. 6105. MEMBERSHIP.

(a) NUMBER AND APPOINTMENT.—

(1) IN GENERAL.—The Commission shall be composed of 8 members appointed as follows:

(A) 2 members appointed by the Speaker of the House of Representatives.

(B) 2 members appointed by the minority leader of the House of Representatives.

(C) 2 members appointed by the majority leader of the Senate.

(D) 2 members appointed by the minority leader of the Senate.

(2) QUALIFICATIONS.—The members of the Commission shall consist of individuals who are of recognized standing and distinction in the areas of international public service, national public service, service-learning, local service, business, or academia.

(3) DEADLINE FOR APPOINTMENT.—The members of the Commission shall be appointed not later than 90 days after the date of the enactment of this title.

(4) CHAIRPERSON.—The Chairperson of the Commission shall be designated by the Speaker

of the House of Representatives at the time of the appointment.

(b) TERMS.—

(1) IN GENERAL.—The members of the Commission shall serve for the life of the Commission.

(2) VACANCIES.—A vacancy in the Commission shall not affect the power of the remaining members to execute the duties of the Commission but any such vacancy shall be filled in the same manner in which the original appointment was made.

(c) COMPENSATION.—

(1) RATES OF PAY; TRAVEL EXPENSES.—Each member shall serve without pay, except that each member shall receive travel expenses, including per diem in lieu of subsistence, in accordance with applicable provisions under subchapter 1 of chapter 57 of title 5, United States Code.

(2) PROHIBITION OF COMPENSATION OF FEDERAL EMPLOYEES.—Notwithstanding paragraph (1), any member of the Commission who is a full-time officer or employee of the United States may not receive additional pay, allowances, or benefits because of service on the Commission.

(d) MEETING REQUIREMENTS.—

(1) FREQUENCY.—

(A) QUARTERLY MEETINGS.—The Commission shall meet at least quarterly.

(B) ADDITIONAL MEETINGS.—In addition to quarterly meetings, the Commission shall meet at the call of the Chairperson or a majority of its members.

(2) QUORUM.—5 members of the Commission shall constitute a quorum but a lesser number may hold hearings.

(3) MEETING BY TELEPHONE OR OTHER APPROPRIATE TECHNOLOGY.—Members of the Commission are permitted to meet using telephones or other suitable telecommunications technologies provided that all members of the Commission can fully communicate with all other members simultaneously.

SEC. 6106. DIRECTOR AND STAFF OF COMMISSION; EXPERTS AND CONSULTANTS.

(a) DIRECTOR.—

(1) APPOINTMENT.—The Commission shall have a Director who shall be appointed by the Chairperson with the approval of the Commission.

(2) CREDENTIALS.—The Director shall have credentials related to international public service, national public service, service-learning, or local service.

(3) SALARY.—The Director shall be paid at a rate determined by the Chairperson with the approval of the Commission, except that the rate may not exceed the rate of basic pay for GS-15 of the General Schedule.

(b) STAFF.—With the approval of the Chairperson, the Director may appoint and fix the pay of additional qualified personnel as the Director considers appropriate.

(c) EXPERTS AND CONSULTANTS.—With the approval of the Commission, the Director may procure temporary and intermittent services under section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed the daily equivalent of the maximum annual rate of basic pay for GS-15 of the General Schedule.

(d) STAFF OF FEDERAL AGENCIES.—Upon request of the Commission, Chairperson, or Director, the head of any Federal department or agency may detail, on a reimbursable basis, any of the personnel of that department or agency to the Commission to assist it in carrying out its duties under this title.

SEC. 6107. POWERS OF COMMISSION.

(a) HEARINGS AND SESSIONS.—The Commission may, for the purpose of carrying out this title, hold public hearings, sit and act at times and places, take testimony, and receive evidence as the Commission considers appropriate.

(b) POWERS OF MEMBERS AND AGENTS.—Any member or agent of the Commission may, if au-

thorized by the Commission, take any action which the Commission is authorized to take by this section.

(c) OBTAINING OFFICIAL DATA.—Upon request of the Chairperson, the head of any department or agency shall furnish information to the Commission that the Commission deems necessary to enable it to carry out this title.

(d) PHYSICAL FACILITIES AND EQUIPMENT.—The Architect of the Capitol, in consultation with the appropriate entities in the legislative branch, shall locate and provide suitable facilities and equipment for the operation of the Commission on a nonreimbursable basis.

(e) ADMINISTRATIVE SUPPORT SERVICES.—Upon the request of the Commission, the Architect of the Capitol and the Administrator of General Services shall provide to the Commission on a nonreimbursable basis such administrative support services as the Commission may request in order for the Commission to carry out its responsibilities under this title.

SEC. 6108. REPORTS.

(a) INTERIM REPORT.—The Commission shall submit an interim report on its activities to the appropriate committees of Congress not later than 20 months after the date of the enactment of this title.

(b) FINAL REPORT.—

(1) DEADLINE.—The Commission shall submit a final report on its activities to the appropriate committees of Congress not later than 120 days after the submission of the interim report under subsection (a).

(2) CONTENTS.—The final report shall contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for proposed legislation.

SEC. 6109. TERMINATION.

The Commission shall terminate not later than 30 days after submitting its final report under section 6108(b)(1).

The CHAIR. No amendment to the committee amendment is in order except those printed in House Report 111-39. Each amendment may be offered only in the order printed in the report, by a Member designated in the report, shall be considered read, shall be debatable for the time specified in the report, equally divided and controlled by the proponent and an opponent of the amendment, shall not be subject to amendment, and shall not be subject to a demand for division of the question.

AMENDMENT NO. 1 OFFERED BY MR. ANDREWS,
AS MODIFIED

The CHAIR. It is now in order to consider amendment No. 1 printed in House Report 111-39.

Mr. ANDREWS. Mr. Chairman, I have an amendment at the desk.

The CHAIR. The Clerk will designate the amendment.

The text of the amendment is as follows:

Amendment No. 1 offered by Mr. ANDREWS:

In the table of contents in section 1(b) of the bill, strike the item relating to title VI and the items relating to sections 6101 through 6109.

In section 3 of the National and Community Service Act of 1990 (as proposed to be inserted by section 1101 of the bill), strike "the programs authorized under subtitle C" and insert "approved national service positions".

In section 101(12) of the National and Community Service Act of 1990 (as proposed to be inserted by section 1102(6) of the bill), strike "ORGANIZATION" and insert "ENTITY" in the heading.

In section 101(12) of the National and Community Service Act of 1990 (as proposed to be inserted by section 1102(6) of the bill), in the matter preceding subparagraph (A), strike “organization” and insert “entity”.

In section 1102 of the bill, redesignate paragraph (11) as paragraph (12) and insert after paragraph (10) the following:

(11) in paragraph (33) (as so redesignated), strike the last sentence.

In the matter proposed to be added by section 1102(12) of the bill (as redesignated by the preceding amendment), redesignate paragraphs (38) through (40) as paragraphs (41) through (43), respectively, and insert after paragraph (37) the following:

“(38) **SCIENTIFICALLY VALID RESEARCH.**—The term ‘scientifically valid research’ includes applied research, basic research, and field-initiated research in which the rationale, design, and interpretation are soundly developed in accordance with principles of scientific research.

“(39) **PRINCIPLES OF SCIENTIFIC RESEARCH.**—The term ‘principles of scientific research’ means principles of research that—

“(A) applies rigorous, systematic, and objective methodology to obtain reliable and valid knowledge relevant to education activities and programs;

“(B) presents findings and makes claims that are appropriate to and supported by methods that have been employed; and

“(C) includes, as appropriate to the research being conducted—

“(I) use of systematic, empirical methods that draw on observation or experiment;

“(ii) use of data analyses that are adequate to support the general findings;

“(iii) reliance on measurements or observational methods that provide reliable and generalizable findings;

“(iv) strong claims of causal relationships, only with research designs that eliminate plausible competing explanations for observed results, such as, but not limited to, random assignment experiments;

“(v) presentation of studies and methods in sufficient detail and clarity to allow for replication or, at a minimum, to offer the opportunity to build systematically on the findings of the research;

“(vi) acceptance by a peer-reviewed journal or critique by a panel of independent experts through a comparably rigorous, objective, and scientific review; and

“(vii) consistency of findings across multiple studies or sites to support the generality of results and conclusions.

“(40) **SEVERELY ECONOMICALLY DISTRESSED COMMUNITY.**—The term ‘severely economically distressed community’ means an area that has a mortgage foreclosure rate, home price decline, and unemployment rate greater than the national mortgage foreclosure rate, home price decline, and unemployment rate for the last 12 months for which satisfactory data are available, or a residential area that lacks basic living necessities, such as water and sewer systems, electricity, paved roads, and safe sanitary housing.”

In section 101(42) (as so redesignated) of the National and Community Service Act of 1990 (as proposed to be amended by section 1102(12) (as so redesignated) of the bill), strike “means any individual” and all that follows through “condition other than dishonorable” and insert “has the meaning given the term in section 101 of title 38, United States Code.”

In section 111(a)(2) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(b)(1)(A) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(b)(3)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(b)(5)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “promote a better understanding of”.

In section 111(b)(5)(C) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “promote a better understanding of”.

In section 111(c) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), in the matter preceding paragraph (1), strike “The” and insert “From the amounts appropriated under section 501(a)(4), the”.

In section 111(d)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(d)(2) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “and” at the end.

In section 111(d)(3) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike the period at the end and insert “; and”.

In section 111(d) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), insert at the end the following:

“(4) assisting schools and school districts in developing school policies and practices that support the integration of service-learning into the curriculum.”

In section 112(c) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “community-based organization” and insert “community-based entity”, and strike “community-based organizations” and insert “community-based entities”.

In section 112(d) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “this part” and insert “this subtitle”.

In section 112(d) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “\$65,000” and insert “\$75,000”.

In section 113(b)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “service” and insert “service-learning”.

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), in the matter following subparagraph (E), strike “community-based organization” and insert “community-based entity”.

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), insert “and” at the end of subparagraph (C).

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “and” at the end of subparagraph (D).

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike paragraph (E).

In section 115(a)(2) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 116(b)(2)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “purposes consistent with title I of such Act (20 U.S.C. 6301 et seq.)” and insert “activities authorized under section 1114 or 1115 of title I of such Act (as applicable) subject to the approval of the local educational agency”.

Strike clause (iii) of section 1301(2)(B) of the bill, and insert the following:

(iii) by striking “by the agency.” and inserting “by the agency, and may approve national service positions for a program carried out or otherwise supported by the agency.”

In section 122(a)(1)(A) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), strike clause (ii) and redesignate clauses (iii) through (xiv) as clauses (ii) through (xiii), respectively.

In section 122(a)(2)(A)(vi) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert before the semicolon “including the recruitment of youth to work in health professions in such communities”.

In section 122(a)(3)(A)(xi) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), in the matter preceding subclause (I), strike “(including youth corps programs)” and all that follows through “Hawaiian home lands,”.

In section 122(a)(3)(A)(xi)(II) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), strike “youths who are individuals with disabilities and youths who are economically disadvantaged” and insert “and youths who are individuals with disabilities”.

In section 122(a)(3)(A)(xii) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert “in partnership with the National Park Service” after “projects”.

In section 122(a) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert at the end the following:

“(5) **PROGRAM MODELS FOR SERVICE CORPS.**—In addition to any activities described in paragraphs (1) through (4), a recipient of a grant under section 121(a) and a Federal agency operating or supporting a national service program under section 121(b) may directly or through grants or subgrants to other entities carry out a national service corps through the following program models:

“(A) a community corps program that meets unmet human, educational, health, veteran, environmental, or public safety needs and promotes greater community unity through the use of organized teams of participants of varied social and economic backgrounds, skill levels, physical and developmental capabilities, ages, ethnic backgrounds, or genders;

“(B) a service program that—

“(i) recruits individuals with special skills or provides specialized preservice training to enable participants to be placed individually or in teams in positions in which the participants can meet such unmet needs; and

“(ii) if consistent with the purposes of the program, brings participants together for additional training and other activities designed to foster civic responsibility, increase

the skills of participants, and improve the quality of the service provided;

“(C) a campus based program that is designed to provide substantial service in a community during the school term and during summer or other vacation periods through the use of—

“(i) students who are attending an institution of higher education, including students participating in a work study program assisted under part C of title IV of the Higher Education Act of 1965 (42 U.S.C. 2751 et seq.);

“(ii) teams composed of such students; or

“(iii) teams composed of a combination of such students and community residents;

“(D) a professional corps program that recruits and places qualified participants in positions—

“(i) as teachers, nurses and other health care providers, police officers, early childhood development staff, engineers, or other professionals providing service to meet educational, human, environmental, or public safety needs in communities with an inadequate number of such professionals;

“(ii) that may include a salary in excess of the maximum living allowance authorized in subsection (a)(3) of section 140, as provided in subsection (c) of such section; and

“(iii) that are sponsored by public or private employers who agree to pay 100 percent of the salaries and benefits (other than any national service educational award under subtitle D) of the participants; and

“(E) such other program models as approved by the Corporation or a State commission, as appropriate.”.

In section 122(a)(3)(A)(xi) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), in subclause II, strike “and at least 50 percent of whom are” and insert “including”.

In section 122(b)(1)(D) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), in the matter preceding clause (i), insert “and improve nutrition” after “hunger”.

In section 122(b)(1)(D) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert “faith-based entities” after “food pantries” both places it appears in clauses (i) and (ii), respectively.

In section 122(b)(1)(D) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), redesignate clauses (iii) and (iv) as clauses (v) and (vi), respectively, and after clause (ii) insert the following:

“(iii) increasing access to and participation in federally supported nutrition programs;

“(iv) involving the preparation and delivery of nutritious food and the dissemination of nutrition education to critically and chronically ill individuals;”.

In section 122(b)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), redesignate subparagraph (J) as subparagraph (R) and insert after subparagraph (I) the following:

“(J) Providing financial literacy education to economically disadvantaged individuals, including financial literacy education with regard to credit management, financial institutions including banks and credit unions, and utilization of savings plans.

“(K) Assisting in building, improving, and preserving affordable housing and in the construction and rehabilitation of housing units, including energy efficient homes, for economically disadvantaged individuals.

“(L) Assisting individuals in obtaining access to health care for themselves or their children.

“(M) Assisting individuals in obtaining information about Federal, State, local, or private programs or benefits focused on assisting economically disadvantaged individuals, economically disadvantaged children, or low-income families.

“(N) Facilitating enrollment in and completion of job training for economically disadvantaged individuals.

“(O) Assisting economically disadvantaged individuals in obtaining access to job placement assistance.

“(P) Promoting community-based efforts to reduce crime and recruiting public safety officers into service opportunities to work with disadvantaged youth.

“(Q) A musician and artist corps program that trains and deploys skilled musicians and artists to promote greater community unity through the use of music and arts education and engagement through work in low income communities, education, healthcare and therapeutic settings, and other work in the public domain with citizens of all ages.”.

In section 126(a)(3)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1305 of the bill), strike “\$200,000” and insert “\$250,000”, and insert before the period “in excess of \$100,000”.

In section 126(a)(3)(C) of the National and Community Service Act of 1990 (as proposed to be amended by section 1305 of the bill), strike “\$200,000” in the heading and insert “\$250,000”, and insert before the period “in excess of \$250,000”.

In section 126(a)(3)(C) of the National and Community Service Act of 1990 (as proposed to be amended by section 1305 of the bill), strike “\$200,000” and insert “\$250,000”, and insert before the period “in excess of \$250,000”.

Strike subparagraph (D) of section 126(a)(3) of the National and Community Service Act of 1990 (as proposed to be inserted by section 1305(1)(B) of the bill), and insert the following:

“(4) RESERVATION OF FUNDS.—From the amounts appropriated to carry out this subsection each fiscal year, the corporation shall ensure that it reserves funds for assistance provided under this subsection at an aggregate amount equal to that of at least 150 percent allocated in fiscal year 2004 for the first full fiscal year after the date of enactment of the GIVE Act. Each subsequent year the corporation shall increase the amount reserved proportionately including minimum and maximum amounts described in paragraph (1) to the amount of program funding allocated in subtitle C.”.

In section 129(b) of the National and Community Service Act of 1990 (as proposed to be amended by section 1306 of the bill), in the matter preceding paragraph (1), strike “, including nonprofit organizations applying on behalf of a tribe or tribes” and strike “In the case of a” and all that follows through “its application.”.

In section 129(b) of the National and Community Service Act of 1990 (as proposed to be amended by section 1306 of the bill), strike paragraphs (1) and (2).

In section 129(f)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1306 of the bill), strike “organizations” and insert “entities”.

In section 1308 of the bill, strike paragraph (7) and insert the following:

(7) by amending subsection (h) (as so redesignated) to read as follows:

“(h) LIMITATION ON SAME PROJECT RECEIVING MULTIPLE GRANTS.—Unless specifically authorized by law, the Corporation may not provide more than 1 grant under the national service laws to support the same project.”.

In section 133(c)(6)(F) of the National and Community Service Act of 1990 (as proposed to be amended by section 1310(1) of the bill), insert “or home price decline” after each place “mortgage foreclosure rate” appears.

In section 1303 of the bill, amend paragraph (2) to read as follows:

(2) in paragraph (5).

(A) by inserting “National” before “Civilian Community Corps”; and

(B) by inserting before the period “the Summer of Service program under section 120(c)(8), the ServeAmerica Fellowship under 198B or the Silver Scholarship under section 198C(a)”.

In section 129(j) of the National and Community Service Act of 1990 (as proposed to be amended by section 1306 of the bill), strike “section 126” and insert “section 126(b) and (c)”.

In section 129A(c) of the National and Community Service Act of 1990 (as proposed to be inserted by section 1307 of the bill), strike “2008” and insert “2009”.

In section 1310 of the bill, amend paragraph (3) to read as follows:

(3) in subsection (d), by adding at the end the following:

“(5) DIVERSITY IN PROGRAM SIZE.—The Corporation shall ensure that recipients of assistance provided under section 121 are diverse in terms of program size, as reflected in the number of participants.”.

In paragraph (1) of the matter proposed to be inserted by section 1402(3) of the bill insert “, including in the Summer of Service program under section 120(c)(8), the ServeAmerica program under section 198B, or the Silver Scholarship program under section 198E” after “position”.

In section 149(a)(1) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), in the matter preceding subparagraph (A), strike “subtitle C and D” and insert “subtitles C, D, and H”.

In section 149(a)(4)(A) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “2009” and insert “2010”.

In section 149(b)(1)(A) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “C and D” and insert “C, D, and H”.

In section 149(b)(1)(B)(i) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “2009” and insert “2010” each place such term appears.

In section 149(b)(1)(B)(i) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “D, or E” and insert “D, E, or H”.

In section 149(b)(1)(B)(i) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “or” before “summer” and insert “, Silver Scholarship under section 198C, or ServeAmerica Fellowship under section 198B” after “section 120(c)(8),”.

In section 149(b)(1)(B)(ii) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “2009” and insert “2010”.

In section 149(b)(1)(B)(ii) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill), strike “or E” and insert “E, or H”.

In section 149(b)(1)(B)(ii) of the National and Community Service Act of 1990 (as proposed to be added by section 1405 of the bill),

strike “or” before “summer” and insert “, Silver Scholarship under section 198C, or ServeAmerica Fellowship under section 198B” after “section 120(c)(8),”.

In section 1503(4) of the bill, strike “subsection (e)” and insert “subsection (d)”.

In section 155(b)(4) of the National and Community Service Act of 1990 (as proposed to be amended by section 1505 of the bill), in the matter preceding subparagraph (A), strike “from Corps members”.

In section 155(b)(4)(C) of the National and Community Service Act of 1990 (as proposed to be amended by section 1505 of the bill), strike “limitation on the amount” and all that follows through “established under” and insert “Director may establish a separate living allowance amount consistent with the limitation in”.

In section 1503(3)(B) of the bill, in the matter proposed to be amended by such section, strike “2011” and insert “2012”.

In section 178(e)(1)(G) of the National and Community Service Act of 1990 (as proposed to be amended by section 1605(3) of the bill), strike “and” at the end.

In section 178(e)(1)(H) of the National and Community Service Act of 1990 (as proposed to be amended by section 1605(3) of the bill), strike the period at the end and insert “; and”.

In section 1605(3) of the bill, strike the close quotation mark and following semicolon after the matter proposed to be inserted by such section and at the end of such section insert the following:

“(I) ensures outreach to and coordination with municipalities and county governments, including large cities.”;

In section 178(g)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1605(5) of the bill), strike “B or”.

In subsection (m) of section 179 of the National and Community Service Act of 1990 (as proposed to be added by section 1606 of the bill), strike paragraph (4) and redesignate paragraphs (5) and (6) as paragraphs (4) and (5), respectively.

Insert after section 189 of the National and Community Service Act of 1990 (as proposed to be added by section 1610 of the bill) the following:

“SEC. 189A. RESTRICTIONS ON FEDERAL GOVERNMENT AND USE OF FEDERAL FUNDS.

“(a) GENERAL PROHIBITION.—Nothing in this Act shall be construed to authorize an officer or employee of the Federal Government to mandate, direct, or control a State, local educational agency, or school’s curriculum, program of instruction, specific instructional content, academic achievement standards, assessments, or allocation of State or local resources, or mandate a State or any subdivision thereof to spend any funds or incur any costs not paid for under this Act.

“(b) PROHIBITION ON ENDORSEMENT OF CURRICULUM.—No funds provided to the Chief Executive Officer under this Act may be used by the Corporation to endorse, approve, or sanction any curriculum designed to be used in an elementary school or secondary school.

“(c) PROHIBITION ON REQUIRING FEDERAL APPROVAL OR CERTIFICATION STANDARDS.—No State shall be required to have academic content or student academic achievement standards approved or certified by the Federal Government, in order to receive assistance under this Act.”.

In paragraph (12)(G) of section 193A of the National and Community Service Act of 1990 as proposed to be added by section 1704 of the

bill, insert “cultural institutions,” after “disabilities.”.

In section 1704(1)(D) of the bill, strike paragraph (21) of the matter proposed to be added by such section and redesignate subparagraphs (22) through (24) as subparagraphs (21) through (23), respectively.

In the matter proposed to be inserted by section 1704(3)(B) of the bill, redesignate paragraphs (4) through (6) as paragraphs (5) through (7) and insert after paragraph (3) the following:

“(4) CONSOLIDATED APPLICATION.—To promote efficiency and eliminate duplicative requirements, the Corporation shall consolidate or modify application procedures and reporting requirements for programs and activities funded under the national service laws.”.

In section 1705 of the bill, add at the end the following: “In carrying out this section and before executing any delegation of authority, the Chief Executive Officer shall seek input from and consult with Corporation employees, State commissions on national and community service, State educational agencies, and other interested stakeholders.”

In section 198C(a) of the National and Community Service Act of 1990 (as proposed to be added by section 1805 of the bill), strike “community-based organization” and insert “community-based entity” each place such term appears.

In section 194(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1706 of the bill), strike “subject to the provisions of title 5, United States Code” and all that follows through “pay rates” and insert “pursuant to sections 195(a) and 195(b) of this Act”.

In section 198B(d)(1)(A) of the National and Community Service Act of 1990 (as proposed to be added by section 1803 of the bill), strike “or an institution of higher education that is not a Campus of Service (as described in section 119)”.

In section 198C(a)(6) of the National and Community Service Act of 1990 (as proposed to be added by section 1803 of the bill), strike “fixed-amount”.

In section 198D(a) of the National and Community Service Act of 1990 (as proposed to be added by section 1804 of the bill), amend paragraph (5) to read as follows:

“(5) PROGRAMS THAT SUPPORT MENTORING.—Programs to support mentoring partnerships, including statewide and local partnerships that strengthen direct-service youth mentoring programs by increasing State resources dedicated to mentoring, assisting direct-service mentoring programs through subgrants, promoting quality standards for mentoring programs, expanding mentoring opportunities tailored to the needs and circumstances of youth, and increasing the number of at-risk youth in the State receiving mentoring from screened and trained adult mentors, as well as programs to support the creation of statewide mentoring partnerships and programs of national scope through collaborative efforts between entities such as local mentoring partnerships, units of State or local government, or direct service mentoring programs.”.

In section 198D(a) of the National and Community Service Act of 1990 (as proposed to be added by section 1804 of the bill), strike paragraph (6) and redesignate paragraph (7) as paragraph (6).

In section 198E of the National and Community Service Act of 1990 (as proposed to be added by section 1805 of the bill), strike subsection (c) and redesignate subsections (d)

through (l) as subsections (c) through (k), respectively.

In section 501(a)(2)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1841 of the bill), strike “subparagraph (C)” and insert “subparagraph (A)”, and insert before the period at the end the following: “, and disasters of similar magnitude”.

In section 501(a)(3) of the National and Community Service Act of 1990 (as proposed to be amended by section 1841 of the bill), strike “\$35,000,000” and insert “\$30,000,000”.

In section 2103(3) of the bill, insert “and” at the end of subparagraph (A), strike “and” at the end of subparagraph (B), and strike subparagraph (C).

In section 201(e)(1) of the Domestic Volunteer Service Act of 1973 (as proposed to be amended by section 2203 of the bill), strike “2013” and insert “2014”.

In section 225(a)(4) of the Domestic Volunteers Service Act of 1973 (as proposed to be amended by section 2208 of the bill), strike “grants” the first place it appears and insert “funds”, and strike “grants” the last place it appears and insert “funds available”.

In the table of contents of the National and Community Service Act of 1990 (as proposed to be amended by section 4101 of the bill), after the item relating to section 189, insert the following:

“Sec. 189A. Restrictions on Federal Government and use of Federal funds.”.

Strike title VI of the bill.

The CHAIR. Pursuant to House Resolution 250, the gentleman from New Jersey (Mr. ANDREWS) and a Member opposed each will control 15 minutes.

Mr. ANDREWS. Mr. Chair, I ask unanimous consent to modify the manager’s amendment by replacing it with the modification at the desk.

The CHAIR. The Clerk will report the modification.

The Clerk read as follows:

Modification to amendment No. 1 offered by Mr. ANDREWS:

In the table of contents in section 1(b) of the bill, strike the item relating to title VI and the items relating to sections 6101 through 6109.

In section 3 of the National and Community Service Act of 1990 (as proposed to be inserted by section 1101 of the bill), strike “the programs authorized under subtitle C” and insert “approved national service positions”.

In section 101(12) of the National and Community Service Act of 1990 (as proposed to be inserted by section 1102(6) of the bill), strike “ORGANIZATION” and insert “ENTITY” in the heading.

In section 101(12) of the National and Community Service Act of 1990 (as proposed to be inserted by section 1102(6) of the bill), in the matter preceding subparagraph (A), strike “organization” and insert “entity”.

In section 1102 of the bill, redesignate paragraph (11) as paragraph (12) and insert after paragraph (10) the following:

(11) in paragraph (33) (as so redesignated), strike the last sentence.

In the matter proposed to be added by section 1102(12) of the bill (as redesignated by the preceding amendment), redesignate paragraphs (38) through (40) as paragraphs (41) through (43), respectively, and insert after paragraph (37) the following:

“(38) SCIENTIFICALLY VALID RESEARCH.—The term ‘scientifically valid research’ includes applied research, basic research, and field-

initiated research in which the rationale, design, and interpretation are soundly developed in accordance with principles of scientific research.

“(39) PRINCIPLES OF SCIENTIFIC RESEARCH.—The term ‘principles of scientific research’ means principles of research that—

“(A) applies rigorous, systematic, and objective methodology to obtain reliable and valid knowledge relevant to education activities and programs;

“(B) presents findings and makes claims that are appropriate to and supported by methods that have been employed; and

“(C) includes, as appropriate to the research being conducted—

“(i) use of systematic, empirical methods that draw on observation or experiment;

“(ii) use of data analyses that are adequate to support the general findings;

“(iii) reliance on measurements or observational methods that provide reliable and generalizable findings;

“(iv) strong claims of causal relationships, only with research designs that eliminate plausible competing explanations for observed results, such as, but not limited to, random assignment experiments;

“(v) presentation of studies and methods in sufficient detail and clarity to allow for replication or, at a minimum, to offer the opportunity to build systematically on the findings of the research;

“(vi) acceptance by a peer-reviewed journal or critique by a panel of independent experts through a comparably rigorous, objective, and scientific review; and

“(vii) consistency of findings across multiple studies or sites to support the generality of results and conclusions.

“(40) SEVERELY ECONOMICALLY DISTRESSED COMMUNITY.—The term ‘severely economically distressed community’ means an area that has a mortgage foreclosure rate, home price decline, and unemployment rate greater than the national mortgage foreclosure rate, home price decline, and unemployment rate for the last 12 months for which satisfactory data are available, or a residential area that lacks basic living necessities, such as water and sewer systems, electricity, paved roads, and safe sanitary housing.”

In section 101(43) (as so redesignated) of the National and Community Service Act of 1990 (as proposed to be amended by section 1102(12) (as so redesignated) of the bill), strike “means any individual” and all that follows through “condition other than dishonorable” and insert “has the meaning given the term in section 101 of title 38, United States Code.”

In section 111(a)(2) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(b)(1)(A) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(b)(3)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(b)(5)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “promote a better understanding of”.

In section 111(b)(5)(C) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “promote a better understanding of”.

In section 111(c) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), in the matter preceding paragraph (1), strike “The” and insert “From the amounts appropriated under section 501(a)(4), the”.

In section 111(d)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 111(d)(2) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “and” at the end.

In section 111(d)(3) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike the period at the end and insert “; and”.

In section 111(d) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), insert at the end the following:

“(4) assisting schools and school districts in developing school policies and practices that support the integration of service-learning into the curriculum.”

In section 112(c) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “community-based organization” and insert “community-based entity”, and strike “community-based organizations” and insert “community-based entities”.

In section 112(d) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “this part” and insert “this subtitle”.

In section 112(d) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “\$65,000” and insert “\$75,000”.

In section 113(b)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “service” and insert “service-learning”.

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), in the matter following subparagraph (E), strike “community-based organization” and insert “community-based entity”.

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), insert “and” at the end of subparagraph (C).

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “and” at the end of subparagraph (D).

In section 113(c)(1) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike paragraph (E).

In section 115(a)(2) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “training” and insert “professional development”.

In section 116(b)(2)(B) of the National and Community Service Act of 1990 (as proposed to be amended by section 1201 of the bill), strike “purposes consistent with title I of such Act (20 U.S.C. 6301 et seq.)” and insert “activities authorized under section 1114 or 1115 of title I of such Act (as applicable) subject to the approval of the local educational agency”.

Strike clause (iii) of section 1301(2)(B) of the bill, and insert the following:

(iii) by striking “by the agency.” and inserting “by the agency, and may approve na-

tional service positions for a program carried out or otherwise supported by the agency.”

In section 122(a)(1)(A) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), strike clause (ii) and redesignate clauses (iii) through (xiv) as clauses (ii) through (xiii), respectively.

In section 122(a)(2)(A)(vi) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert before the semicolon “including the recruitment of youth to work in health professions in such communities”.

In section 122(a)(3)(A)(xi) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), in the matter preceding subclause (I), strike “(including youth corps programs” and all that follows through “Hawaiian home lands).”.

In section 122(a)(3)(A)(xi)(II) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), strike “youths who are individuals with disabilities and youths who are economically disadvantaged” and insert “and youths who are individuals with disabilities”.

In section 122(a)(3)(A)(xii) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert “in partnership with the National Park Service” after “projects”.

In section 122(a) of the National and Community Service Act of 1990 (as proposed to be amended by section 1302 of the bill), insert at the end the following:
